> The Spaniards residing in the territories over which Spain by this treaty cedes or relinquishes her sovereignty shall be subject in matters civil as well as criminal to the jurisdiction of the courts of the country wherein they reside, pursuant to the ordinary laws governing the same; and they shall have the right to appear before such court and to pursue the same course as citizens of the country to which the courts belong.

By this article they are guaranteed a fair trial in the courts. Article XII has to do with judicial proceedings pending at the time of the exchange of ratifications of the treaty. Article XIII provides that the copyrights and patents acquired by Spaniards shall continue to be respected.

Article XIV provides that—

> Spain shall have the power to establish consular officers in the ports or territories, the sovereignty over which has been either relinquished or ceded by the present treaty.

Article XV provides for a mutual agreement as to port charges for 10 years.

Notice particularly the reading of Article XVI as to what time limit in respect to guaranties there is covering Porto Rico, which we are legislating for now, and also the Philippines. It reads:

> It is understood that any obligations assumed in this treaty by the United States with respect to Cuba are limited to the time of its occupancy thereof.

There is absolutely no such limitation, no such language, used in this treaty as regards Porto Rico or the Philippines.

Mr. MILLER of Minnesota. Will the gentleman yield?

Mr. YOUNG of North Dakota. Certainly.

Mr. MILLER of Minnesota. By every principle of statutory construction the restriction made there expresses the intention that the obligation assumed by the United States in regard to Porto Rico and the Philippines are forever.

Mr. YOUNG of North Dakota. Certainly. There is no time limit on the guaranties made between this Government and Spain expressed in the treaty. When no limit was expressed it would, according to the accepted rules of construction, apply for all time; but the intention of those who drew this treaty was clearly indicated and emphasized by the fact that they went out of their way in two different places in the treaty to call attention to the fact that guaranties would not apply to Cuba excepting during the period of our occupation.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

[By unanimous consent Mr. YOUNG of North Dakota was granted five minutes additional.]

Mr. YOUNG of North Dakota. Those who drafted this treaty took pains in at least two different portions of the treaty to call attention to the fact that in respect to the island of Cuba our guarantee should be limited to the period of our occupancy. Article I reads as follows——

Mr. BORLAND. Mr. Chairman, will the gentleman yield there?

Mr. YOUNG of North Dakota. Certainly.

Mr. BORLAND. The gentleman is not contending that the sovereignty of the United States over the Philippine Islands is in any degree limited or conditional in such a way as would prevent us from making any disposition of the islands that we saw fit?

Mr. YOUNG of North Dakota. No; perhaps not, so far as our power is concerned, but what I am contending is that when we acquired title, or when these islands or possessions were ceded to us, we assumed certain obligations; we obligated ourselves in this treaty of Paris to do certain things. We extended here certain guarantees to the citizens of Spain, and we can not honorably do anything now which will violate these guarantees, these covenants, that were placed in this treaty in favor of Spain as well as other countries. We can not in honor treat this treaty as "a scrap of paper."

Mr. BORLAND. I am asking the gentleman about the legal right. Is our legal right limited to dispose of the islands as our Government desires?

Mr. YOUNG of North Dakota. Perhaps not, but I should suppose that both sides of the House would want to go further than what our merely legal rights call for. Some day the Supreme Court may pass upon the right of Congress to cede to others the Philippines or Porto Rico. The citizens of these islands may ask the courts to determine what their rights are, and protect them.

Mr. KENT. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from North Dakota yield to the gentleman from California?

Mr. YOUNG of North Dakota. Yes.

Mr. KENT. Is it the gentleman's position that we can not afford to let go the bear's tail?

Mr. YOUNG of North Dakota. That is not my position. This discussion was provoked by the statement of the gentleman from Tennessee [Mr. GARRETT], that there were no specific guaranties in the treaty of Paris made to the citizens of Spain excepting certain minor ones mentioned by him. That is the only excuse I have for discussing this question at this time. It seems to me I have demonstrated that the contrary is true, and unless some one questions this I am ready to yield the floor.

Mr. BORLAND rose.

Mr. YOUNG of North Dakota. I yield to the gentleman from Missouri.

Mr. BORLAND. Mr. Chairman, if the gentleman yields the floor I want to move to strike out the last word.

Mr. PARKER of New Jersey. I want to take the floor.

Mr. SLAYDEN. Mr. Chairman, I have been interested in every effort that has been made to advance the political status of the people of Porto Rico since the series of events that occurred in 1898, by which we acquired authority over the island. I have likewise, Mr. Chairman, been equally interested in efforts to exercise control over and possibly advance the political interests of the Philippine Islands. This effort at legislation is an illustration of the embarrassments that come to us and will abide with us until we, as I see it, decide to do the right thing, inasmuch as we did the wrong and un-American thing in 1898.

Now, I have only the kindliest feelings for the people of Porto Rico, as I have for those of the Philippine Islands. I have not qualified myself, as some Members think they have, to speak as an expert by brief visits to either of those possessions; but, Mr. Speaker, a comprehension of the fundamental American principles can be achieved by an individual of ordinary common sense without having studied the people and the territories on the spot. I believe as firmly, sir, as I do that I am speaking to you now, that if we persist in the retention of the Philippine Islands the time will come, and should come, when there will be a proportionate representation in this House and in the other body from those islands. I believe that the time will come, if we continue to exercise control over them, unless we frankly abandon American fundamental principles, when Porto Rico will have her Representatives and her Senators in the Congress of the United States.

And I want to say to some gentlemen, many of whom I have heard advance the idea since I have been acquainted with public life and public men—that we ought to have and exercise control over Mexico—that, if it is ever done, in all human probability we will have in a few years, and should have, 52 Senators from that country—Yaquis, perhaps, or from some other tribe of Indians down there—contributing to the legislation of this great Republic, helping to direct the destinies of an Anglo-Saxon people. For these profound reasons, Mr. Chairman, I have always been in favor of conceding to the people of the Philippine Islands the same privileges that I claim for myself—the right to absolute independence.

I read in the New York Sun yesterday an exceedingly interesting article, said to have been the last one written by Mr. Pearse, who was president of the "Irish Republic," which had such a troubled existence for a week or so and then went out in tragedy. Mr. Pearse, speaking of a pronunciamento of Wolfe Tone, who figured as an Irish patriot in the last part of the eighteenth century, stated that the declaration of principles of Wolfe Tone expressed those in which the Irish people believed. It was the manifesto of the Irish people, he said, and the best possible statement of their demand for recognition as a self-governing people; and he based it on the human right to be independent. Mr. Chairman, I believe in that doctrine, and I have the courage of my convictions, and I am willing to apply it to this case. I believe in the human right of all people to be free and independent. I claim it for myself; I cheerfully concede it to others.

Mr. GARNER. Mr. Chairman, will my colleague yield?

Mr. SLAYDEN. Yes.

Mr. GARNER. Does the gentleman apply the same rule to Porto Rico as to the Philippines?

Mr. SLAYDEN. No. As I said, that is one of the embarrassments connected with this question. But, I may say to my colleague, when the Porto Ricans with substantial unanimity ask for it, I will be glad to do my part to secure freedom for them. It will be more satisfactory to them and immeasurably better for us.

Mr. BORLAND. Mr. Chairman, I belong to a political party which believes in the largest measure of local self-government that is consistent with national safety. I am very glad to be able to favor this bill, somewhat belated, to do justice to the people of Porto Rico. I believe that they are entitled now to a larger measure of self-government and participation in their own affairs.

Three years ago last March I had the pleasure of visiting that island, soon after the inauguration of the present administration, and I doubt not that the conditions have improved even since that time. But at that time I was thoroughly convinced that the great mass of citizens of that island was entitled to American citizenship and entitled to a large measure of home rule.

I have always believed that it was a mistake for our country to hold any dependencies upon a lower level of political rights than those of our own country. I believe it is a mistake for any republic to undertake to do so. I believe that a country which can be incorporated into a republic and which can look forward to an equality of political rights and a unity of interests is a distinct strengthening of the prosperity and unity of the Republic, but a dependency which looks forward to no unity of political rights and no equality with the dominant country is a source of weakness and danger.

I look forward to the time when the island of Porto Rico will not only be an organized Territory of the Union but will be well on the way toward being one of the sovereign States of the American Nation. It is sufficietly contiguous to our shores, sufficiently like us in most respects, and sufficiently able to bring itself up to the political standard of the average State of the American Union to be entitled to look forward to such recognition.

I do not believe there ought ever to have been, except in the temporary law, which was to have been only temporary for the government of Porto Rico, a distinction between citizenship of Porto Rico and citizenship of the United States. I can not quite conceive of such a thing as a citizenship of Porto Rico or any other country which is denied complete sovereignty. It simply means a denial of citizenship; and it puts those people in the position, if they have any local patriotism and political ambition or aspirations at all, of looking toward a division of political powers and a separation from the United States. I believe that if we will invite them in and make them citizens of this country, and let them see that our industrial problems are their industrial problems and that our political problems are their political problems, we shall have the politics of Porto Rico not founded upon local issues distinct and separate there, but a participation, and a loyal participation, by the Porto Ricans in the great problems of the American Republic itself. I am satisfied that they have both the capacity and the desire to enter as a loyal and integral part of the great American Republic. I think the time has come when they should have the right to choose not only the lower house of their legislature, which they have done so wisely, and the right to choose a Commissioner in Congress, which they have done so wisely, but the right to choose the upper branch of their legislature and to have full charge of the legislative branch of their government, subject, of course, to the veto that we exercise over a Territory, for their own good. So I am glad to support this measure of justice to the people of Porto Rico. [Applause.]

Mr. GREEN of Iowa. Mr. Chairman, the distinguished gentleman from Texas [Mr. SLAYDEN] who spoke a few moments ago called to mind that in the debate concerning the Philippine bill we upon this side of the House were charged with being inconsistent with the principles upon which the Government of this country was established, and we were accused of being unwilling to grant freedom to a people who desired it. And yet in some way we have now a unanimous report of the committee, supported, I suppose, by a majority of the other side of the House, a bill which denies the right of separation to another portion of our territory, in which there are a considerable number of people at least who wish to be separated entirely from this country—a people whose educational qualifications are, I believe, far in excess of those possessed by the people of the Philippines, certainly a people whose culture and attainments in every way are at least equal. This bill does not give the people of Porto Rico as great a degree of self-government as the Philippine bill provides. It ought to give more. Gentlemen upon the other side accused us of inconsistency when we were unwilling to vote for the Philippine bill, but I suppose they consider themselves entirely consistent in voting for the bill which is now before the House.

Mr. SLAYDEN. Will the gentleman permit me?

Mr. GREEN of Iowa. With pleasure.

Mr. SLAYDEN. Mr. Chairman, I want to say to the gentleman that I think our position is perfectly consistent. If the people of Porto Rico as unanimously desired separation and independence as the people of the Philippines appear to desire it, I would be perfectly willing that they should have an opportunity

to exercise it. I believe in the right of small governments and small peoples to live and in their right to be independent.

Mr. GREEN of Iowa. Let me say to the gentleman from Texas——

Mr. MILLER of Minnesota. Will the gentleman permit me to ask him a question?

Mr. GREEN of Iowa. Yes.

Mr. MILLER of Minnesota. Upon what does the gentleman base his assumption that the people of the Philippine Islands desire independence?

Mr. SLAYDEN. I base it upon evidence which is entirely satisfactory to my mind.

Mr. MILLER of Minnesota. Will the gentleman inform the House what that evidence is?

Mr. GREEN of Iowa. I would prefer that the gentleman did not undertake to make that disclosure in my time. I fear it would take him too long to find the evidence. [Laughter.]

Mr. MILLER of Minnesota. I think he can state in half a minute all the evidence that he has on that subject.

Mr. SLAYDEN. I am not controlled either by political ambitions or commercial interests.

Mr. GREEN of Iowa. Ncr am I. In one respect I agree with the gentleman from Texas, and that is in his purpose with reference to Porto Rico. And let me say to the distinguished gentleman from Porto Rico [Mr. RIVERA], as I would have liked to have said to the distinguished gentleman from the Philippines [Mr. QUEZON] if I could have had the opportunity, that I do not believe a solitary Member of this House wants to deny to the people either of Porto Rico or of the Philippine Islands the right of self-government when they shall have fully shown their qualifications for it.

Mr. SLAYDEN. But you want to reserve the privilege of determining that yourself.

Mr. GREEN of Iowa. We necessarily have that duty cast upon us. We undertook it when we acquired those islands from Spain; and I want to see the time come when the people of Porto Rico shall exercise the full right to self-government, either as a State or in some form like that in which Canada now has the right of self-government. I believe that the day will come when Porto Rico and the Philippines alike will be so attached to the Government that they will not desire to be entirely separated and cut off from this Nation.

Mr. Chairman, in the debate on the Philippine bill some comparisons were made between the situation prevailing with reference to the Philippines—and I suppose also with reference to Porto Rico—with the days when this country was demanding separation from England. Those gentlemen who will examine the grounds upon which independence from England was asked by the American Colonies will find that there is no parallel in the situation. Gentlemen who make that assertion should read the Declaration of Independence and see upon what grounds that important document based the reasons for separation from England. What right or privilege has been denied either to the people of the Philippines or to the people of Porto Rico? What do they wish to do, what might they do in the pursuit of comfort, of happiness, of prosperity which they may not do now?

Mr. RIVERA. Will the gentleman yield?

Mr. GREEN of Iowa. I know what the gentleman would say. He would say they have not now the right to select their own governor. We expect to give that to you some day.

Mr. RIVERA. We have been denied the high privilege of governing ourselves.

Mr. GREEN of Iowa. The gentleman does not answer my question. I ask the gentleman in what way he has been denied anything in the way of comfort, happiness, and prosperity, what wrong has been committed on any person who resides in the Philippines or Porto Rico?

Mr. RIVERA. Does the gentleman think it is possible for people to be happy without freedom?

Mr. GREEN of Iowa. In what does freedom consist? Is it the mere exercise of universal franchise? It is not possessed everywhere in the United States. It is limited here. In what does freedom consist? In electing a governor? Quite a large portion of our communities do not select governors. In this city we have them appointed for its citizens. Freedom consists in the possession of certain inalienable rights created before government was established. Let me say also to the gentleman from Porto Rico, in all kindness and sincerity, that the capacity for self-government does not consist alone in education nor even in refinement nor culture. It is something that must be acquired by years of experience.

Mr. Chairman, neither education nor culture, wealth or refinement are such evidence. If they had been, the ancient governments of Greece and Rome would not have perished from the earth. Five centuries have elapsed since the undying words of the Magna Charta were spoken at Runnymede and a reluctant tyrant was compelled to affix his signature to its principles; but principles will not be enforced until ingrained in the hearts of men. The bitter experience of century after century was necessary before our forefathers learned the true doctrine of self-government. What does it require for self-government? I answer, a capacity for self-control and self-restraint, a spirit of right thinking that recognizes and concedes the rights of others and so influences the majority in numbers or in power as to prevent tyranny over the minority, together with a patriotism that puts country above self, and, most of all, a ready and willing obedience to law and rightfully established authority. If either the Porto Ricans or the Philippine people have learned all this in the brief years of our occupation they are marvels indeed.

Mr. Chairman, I dislike to say it, but it has often seemed to me that the people of the islands which we took over from Spain were raised by us so quickly from a depth of oppression and from the ignorance and poverty which prevailed among the masses to a height of freedom enjoyed by few nations upon the globe that they are unable to appreciate the splendid bounty which had been conferred upon them. In all kindness I would say that the speech which the distinguished gentleman from Porto Rico [Mr. RIVERA] has made to-day bears out this thought, and I am surprised at the ingratitude which seems to prevail among the leaders in the Philippines.

Mr. Chairman, I have often listened on this floor to the gentleman from the Philippines [Mr. QUEZON]. From his speeches one would believe that he and those whom he represents had forgotten the tyranny under which they groaned before Dewey's guns shook Manila Bay with their thunder and shattered the Spanish fleet. They seem to have forgotten the days when those who lifted a hand or voice for freedom in their island were executed wholesale, with as little compunction as when animals are sent to a slaughter pen. They have forgotten that we paid the vast sum of $20,000,000 to keep them from again passing under the Spanish yoke or being sold to Germany. They have forgotten that the islands have been transformed by the restless energy of the American people from a region scourged by pestilence to one almost as healthful as our own; how free schools have been opened where the darkness of ignorance prevailed; how the door of opportunity has been opened for the poor and needy; how thousands of evils which prostrated a helpless people have been removed; how the whole country has been regenerated under the sheltering folds of that flag which never came to any land without bringing a new life, a new hope, and new freedom for the oppressed.

They tell us that the inhabitants of the Philippine Islands are a nation, and that this nation wants its independence. This collection of what is variously estimated from 20 to more than 200 tribes, that speak 20 different languages, that have different customs, that never lived together in peace until our coming, is this a nation? It is not and may never be. We are told that we are not acting in accordance with the Declaration of Independence in governing others without their consent; but when or how have the majority of the people of these islands expressed their dissent? Only a small portion have the right to vote. Does the gentleman from the Philippines claim that he represents the Macabebes, whom his own race could never subdue or conquer? How many of the Igorots even know he is here; and how many of them would have a voice in the new Philippine government which he fondly hopes to create, with himself at the head, and which would be misnamed if it is to be called a republic? Is the bitter hatred that exists between the Tagalogs and the Igorots to be extinguished by making the Tagalogs rulers over the Igorots? And what is to be done with those fierce fighters, the Moros, who have so often declared that they would submit to no control but ours?

To put the Philippines in the control and power of a small group selected from two or three tribes or races, as would be done by this bill, would violate every principle for which this Government has stood.

If the gentlemen upon the other side are really interested in applying the principles of that immortal document of which they have so much to say, a splendid opportunity can be found close at home without straining their eyes to look 3,000 miles across the sea.

Mr. Chairman, some of these races have fought with and for us, relying on the pledge so well understood that it was unnecessary to make it, that as long as they were true to the great Republic across the sea it would be true to them, and shall we now put it beyond our power to protect them from their hereditary enemies? To do so would be to invite the just condemnation of mankind.

Mr. Chairman, while the American people may have assumed the position of tutors and educators, they desire to be no man's master. I have never known an American who did not want the time to come when both Porto Rico and the Philippines would be self-governing and self-sustaining. With this purpose in mind, each year has seen a larger measure of self-government granted as fast, and, as it has seemed to me in the case of the Philippines, faster than they could best exercise it. If the day comes, as it will come in time to the Philippines, when the capacity for self-government had become manifest, when the various tribes were amalgamated into one nation, who would then deny they would have the right to expect to direct for themselves the affairs of these islands, so far as they concern the islands alone? But it is to be hoped that the people would not only be willing but desirous of remaining under the sheltering arm of our Government, with such a degree of control as would be necessary in order that we might protect them from disorder within and invasion from without, as we now protect Cuba. But the people of the Philippines should fully understand that the United States will never be guilty of the gigantic folly of becoming responsible for the acts of a country over which it has no control; that it will commit such an unparalleled blunder in statecraft as to assume the burden of protecting a people whose course and action it can in no way influence. If either the Philippine people or any Members of this House indulge in such idle dreams they will receive a rude awakening when the sensible, practical farmers and workingmen of this country express themselves at the polls.

I am surprised that any thinking man in Porto Rico would suppose that in this day and age that island could remain independent. It must come under the protection of some strong power, and such being the case, can the people of that island think of any Government under which they would have more freedom and more opportunity? When that question is presented to them there is no doubt about the answer. It must be said also that we can not for a moment think of permitting any of the great powers to obtain possession or control over this island. While we hold it it is an outpost for defense of the Panama Canal; held by any other nation it becomes a point of attack in war and danger in peace. For their own good and our good we must retain some kind of control over Porto Rico.

The situation with reference to the Philippines is very similar. Is it possible that the Philippine people can not see what will be the result of a separation in the manner provided by the Senate bill? When a nation such as our own, whose available strength in men and means surpasses that of any other on the globe, feels that it is not safe from aggression unless it maintains a powerful navy, strong fortifications, and half a million of disciplined men ready to call, what chance for self-preservation would any government created by this bill possess? If Australia before the present war had so much reason to provide a powerful military organization and to construct battle cruisers in order to protect itself against Japan, how hopeless would be the situation of the Philippines when cast off to shift for themselves? Protected and sheltered from the howling storm of war that rages over the greater part of the civilized world, the Filipinos seem to have no conception of the real situation. Apparently only a few realize independence now means the ruin of their country in the future, but they have only to look around them to learn what will be their fate.

Taking advantage of the conditions brought about by the present war, Japan issued its ultimatum to China, a country which had given no offense and which sought only to be left alone. Now, Japan is slowly but surely assuming dominion over its helpless neighbor, and soon China will be but its vassal. The Philippines, if not under our protection, will quickly follow.

The problem before us is not easy. We do not know how large a portion of the Philippine people desire a separation on the terms of this bill. We do know that they have been led to believe that some general agreement between nations would be made for their protection when complete independence had been established. That any considerable portion of the inhabitants of the island desire to be cast loose upon the terms of this bill is a supposition that does little credit to their knowledge or understanding.

Mr. Chairman, if the Philippine bill should ever pass in the form agreed to by the Senate, the time is not far distant, as I believe, when the peril to us of the innumerable hordes of the Orient will be changed from an expectancy into a reality, and the Philippine Islands will have passed as a result of the enactment of such a bill into the control and under the dominion of a foreign power where a spirit hostile to this Nation has long prevailed. Then when at length that power has so grown in strength that it is ready to carry out its long-premeditated desires; and when in the midst of war our citizens realize that the strength of their adversary, its wealth, and its power had been increased by the action of this Congress, the historian of that day will read with astonishment of its proceedings and search the record in vain for a justification of its proceedings. [Applause.]

Mr. PARKER of New Jersey. Mr. Chairman, I speak on this bill as an intensely practical question. It seems to me that freedom, happiness, allegiance, loyalty, and Americanism will depend in this country of Porto Rico, as well as in all other countries, in its people being able to make their own living and having money to run their own government. It is, I say, an intensely practical question that confronts us to-day in Porto Rican affairs. The principal revenue of Porto Rico has been and is in duties collected from goods coming there from all parts of the world other than ourselves. There is free trade between Porto Rico and the United States. These imports have fallen to less than a third of what they were, so that there is almost no revenue, and the government does not know how to get along. The same thing is taking place in the Philippines. The question is intensely practical so far as the support of the government is concerned.

It is rather difficult for them to collect taxes in islands like these. In olden times they put an export duty on coffee at the wharves, and so they did not send their tax collectors all over the land but collected the tax at once against the farmer without oppression where the price was paid.

Now export taxes are forbidden, and instead of having export duties that could be paid where the goods were sold after the money was received from the exporter, these taxes have to be placed, as proposed in section 3 of this bill, upon land. As a practical result in Porto Rico, I am informed, that as the poor people there did not understand the payment of taxes on the value of land, which sometimes amounts to more than what it brings in every year, they have been sold out by a large number of tax sales. Is that not right?

Mr. RIVERA. The gentleman is not right; his information is completely erroneous.

Mr. PARKER of New Jersey. Very well; I am glad to hear it. I was afraid that they were being oppressed by tax sales. I do know, however, from reading over the bills of the Porto Rico Legislature that they have been forced to put upon each trade and profession and business a license tax to be paid every year, so that if a man wants to plane or saw and get something from his neighbor for it, that little energy is taxed and he can not do it until he takes out a license as a carpenter. Such taxes are not only imposed by general law for the general government, but by the law municipalities also can tax wholesale stores, dry goods stores, grocery stores, furniture stores, pharmacies, and a long list that I will not read. Thus a man is taxed because he is active and doing business. He is taxed also if he follows a trade. This "cedula," as it is called, is abhorrent; it is repressive of energy.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. PARKER of New Jersey. Not at present. These taxes are unnecessary. Soon after we took over Porto Rico in the year 1900, under the leadership of the former leader of this House, Mr. Payne, we passed a law that all goods going into Porto Rico should pay United States duties except those that came from or to the United States, which should pay one-quarter of those duties, and that the one-quarter of the duties collected, both in the United States on goods from Porto Rico and in Porto Rico on our goods, should be paid into the Porto Rican treasury. That law had two good results. It gave them money to run their government, and plenty of it. It encouraged commerce between the United States and Porto Rico, but still it gave the small producer in Porto Rico some protection—not very much, compared to our own, because it gave a preference to United States imports, but some protection to their small trades. It is a difficult and terrible thing for an island of this sort, filled with people of a different race and a different language, to be put into immediate competition with our mills. Our shoe factories have driven our own shoemaker out of business and he has become the owner of a shoe factory or works in the factory; but if our factories drive the Porto Rican shoemaker out of business he can not come into a factory here.

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

Mr. PARKER of New Jersey. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. PARKER of New Jersey. Mr. Chairman, the result is that where you make laws for a different community from your own you must not treat them as part of your own State, as Ireland was treated by England, so that Irish manufactures

were destroyed by the greatness of English power, energy, and organization, but you must give them a chance to develop for themselves, by allowing them some small amount of protection against the great mother country. That protection is what has made the strength of Canada, Australia, and New Zealand. They have been given real independence, an independence which allows them to have their own business managed in their own way [applause], subject, it is true, to revision by the home Government. This is the constitutional way. It is provided in the Constitution of the United States that any State, with the consent of Congress, may put import duties on goods that are brought into that State from other States, provided that the scheme is always under the control of Congress and the money collected goes into the General Treasury. So far as the State is concerned, such duties would be merely for protection.

This law that was passed in 1900—the 25 per cent law—worked well. There is no doubt of that. It was repealed by the influence of American manufacturers who wanted a monopoly of the Porto Rican market. Porto Rico would be far better off now with the revenue and protection that they received from this law. We might go further. We might give the Porto Rico Legislature the right to establish what duties they pleased against all of the world, with the understanding that only one-quarter of those duties should be charged against United States goods and only one-quarter of our duties against Porto Rican goods coming into the United States, and that those funds should go into the Treasury. They need the money and they need the protection.

This is a matter on which I spoke on the 22d of February, 1900, 16 years ago. I then urged the establishment of that 25 per cent tariff rule. I urged it earnestly, because I thought it essential that Porto Rico should have revenue and protection such as we have, as an independent entity, not ready to become part of this Union, because the power of our business and industry would be oppressive, but ready to accept the protection of this Union, and yet to exercise a real independence, just as Canada possesses a business independence from England. I ask unanimous consent to extend my remarks in the RECORD by printing that speech.

The CHAIRMAN. The gentleman from New Jersey asks unanimous consent to extend his remarks in the RECORD in the manner stated. Is there objection?

There was no objection.

Mr. PARKER of New Jersey. Mr. Chairman, I have been consistent in this view. When the present Philippine law was proposed in 1906, which abolished the 25 per cent rule between the Philippines and the United States, I opposed its enactment and urged that it would destroy their revenue, as it has done. The Committee on Insular Affairs will bear me out in the statement that when it was attempted to put a land tax in the Philippines they were unable to enforce it. They had to go without it and to adopt the cedula system of licensing business, a system which is a tax upon energy and a destruction to trade, an injury to the freedom of the individual, which ought not to prevail if it can be avoided in any part of the possessions of the United States. [Applause.]

I urge that before we get through with this bill we should insert a provision such as we had before, that the United States tariff should apply to Porto Rico, but that goods between the United States and Porto Rico should pay only one-fourth of that tariff and pay that into the Porto Rican treasury, or else that we should give the Porto Rican Legislature the right to fix what duties they please on goods from all parts of the world, with the same understanding that only one-quarter of each tariff should be paid on trade between us and them. This provision of a preferential tariff has become the great question of the world between England and her colonies. If she shall adopt a rule that only a certain proportion of all duties shall be paid where the goods go between different parts of the English possessions, and that that proportion when paid shall go into a common fund for a common defense, she will only have adopted the same provision that is contained in Article I, section 10, paragraph 2, of the American Constitution, which provides that no State shall impose any duty upon imports or exports except with the consent of Congress, that the net proceeds of such duty shall be for the use of the Treasury of the United States, and that such laws always be subject to the revision and control of Congress. That provision is not usually brought to our attention, and I point out that it is essentially protective so far as the State is concerned, because the State gets no money whatever and the revenue goes to the United States. It is a section intended for the protection of individual States, with the thought then that they might be as far separated from us as Porto Rico now is. Modern transportation has changed that as to the States, but a preferential tariff for Porto Rico will be for the common benefit of the whole country. [Applause.]

The speech I delivered February 22, 1900, upon the Porto Rico tariff is as follows:

"REMARKS OF HON. RICHARD WAYNE PARKER, OF NEW JERSEY.

"The House being in Committee of the Whole House on the state of the Union, and having under consideration the bill (H. R. 8245) to regulate the trade of Porto Rico, and for other purposes, as follows:

"'*Be it enacted, etc.*, That the provisions of this act shall apply to the island of Porto Rico and to the adjacent islands and waters of the islands lying east of the seventy-fourth meridian of longitude west of Greenwich, which was ceded to the United States by the Government of Spain by treaty concluded April 11, 1899; and the name Porto Rico, as used in this act, shall be held to include not only the island of that name, but all the adjacent islands as aforesaid.

"'SEC. 2. That on and after the passage of this act the same tariffs, customs, and duties shall be levied, collected, and paid upon all articles imported into Porto Rico from ports other than those of the United States which are required by law to be collected upon articles imported into the United States from foreign countries.

"'SEC. 3. That on and after the passage of this act all merchandise coming into the United States from Porto Rico and coming into Porto Rico from the United States shall be entered at the several ports of entry upon payment of 25 per cent of the duties which are required to be levied, collected, and paid upon like articles of merchandise imported from foreign countries; and, in addition thereto, upon articles of merchandise of Porto Rican manufacture coming into the United States, customs duties equal in rate and amount to the internal-revenue tax which may be imposed in the United States upon the same articles of merchandise of domestic manufacture; and upon articles of United States manufacture coming into Porto Rico customs duties equal in rate and amount to the internal-revenue tax which may be imposed in Porto Rico upon the same articles of Porto Rican manufacture.

"'SEC. 4. That the customs duties collected in Porto Rico in pursuance of this act, less the cost of collecting the same, and the gross amount of all collections of customs in the United States upon articles of merchandise coming from Porto Rico, shall not be covered into the general fund of the Treasury, but shall be held as a separate fund, and shall be placed at the disposal of the President to be used for the government and benefit of Porto Rico until otherwise provided by law'—

"Mr. PARKER of New Jersey said:

"Mr. Chairman, I feel difficulty in addressing this committee after the speech that has been made by the gentleman from Massachusetts [Mr. Moody], a speech that ought to be written in our hearts. It is not to the law of this matter that I should address myself, for wiser lawyers have spoken on that subject. But I want to say to this House that there is no calamity that they could impose upon Porto Rico or upon those people equal to the failure of this bill.

"Porto Rico is our ward; it is for its people we are legislating. It is to give them such financial conditions as will allow them to have peace and prosperity, and to wish to be within the limits of the United States; and to my mind the alternative proposed of giving free trade to Porto Rico would be an unspeakable wrong to them. I say this without the least hesitation because my first impressions were in that very direction of free trade. The extension, through annexation of Porto Rico as a part of the United States, to it of the Dingley tariff means necessarily that we also extend to them our internal revenue. No man can deny that. Otherwise they could distill liquor or make cigars, and make the things which are under our internal revenue, and could send their products free of duty into the United States.

"But to extend the excise law to them means that all small manufactories should be closed and that hundreds of people should be put out of business. It means that these poor people, for they are poor, could no longer smoke cigars, because the price would be so much increased. There is not a witness who does not say that the imposition of these excise taxes would be absolutely impossible in Porto Rico, and for that reason this bill does not impose them. Free trade means more to this island. Its people have lived without machinery, without organized manufactories.

"Small trades, like those of the shoemaker, the tailor, and the furniture maker, such as used to prevail with us, are there still supplying the wants of the people. All at once they would be subjected to the competition of great manufacturing industries which have almost driven these trades from without our midst and would drive them out from their island. We have welcomed the development of manufacturing in spite of that result. Our tradesmen have done better; the shoemaker became the shoe manufacturer, the tailor becomes a merchant tailor or engages in large manufactories. Our eastern farmer, who finds that the railroads have made his farm unprofitable, moves to the West, where farming pays.

"Our eastern manufacturer, if his materials become too expensive, goes where those materials are cheaper. The American can move everywhere, but the Porto Rican is not an American. He speaks Spanish; he is partly of Indian blood. He can not or will not come to this country, and any measure which would put that little island immediately under the unrestricted competition of our great manufactories and drive out its small tradesmen would be an injury that we have no right to inflict.

"There is only one parallel case, and that was cited by the gentleman from Massachusetts [Mr. McCall], who spoke against the bill. It is Ireland. Let me ask what free trade has done for Ireland? Free trade for Ireland meant that England, the country which had the coal, the brains, and the organization, took the profits of an island that was turned into a poor farming country, on which its sister island held the title or the mortgage and from which it drew the rents. We do not mean to create this result in Porto Rico.

"With free trade between Porto Rico and this country, whence is revenue to be got? Revenue is needed for roads and schools, such revenue as we always need for good government, for courts, and the administration of the laws. We can appropriate from the United States Treasury, but no one thinks that is a proper measure; or we can tax property there as we do here. Are we to increase the land taxes there upon a people whose plantations have been ruined by tornadoes? Or are we to increase a tax which they have already—the tax upon production? There every farm pays a certain proportion of its production to the Government. But this produce tax is the worst kind of tax in the world, because it makes an army of assessors all over the country; because it is the most susceptible to fraud; because it is the most susceptible to oppression; because it seeks for money when there is nothing but the crop upon the ground. If that crop be taken away, the expense of its being taken away is to come out, as well as the expense of the tax collector.

"We will adopt no such measure. This bill says that Porto Rico shall have what no State in this Union has ever had. It says first, that these poor people shall have absolute freedom from the excise taxes of the United States, and from the tariff of the United States, so far as paying a single dollar into our Treasury. It says that they shall be treated as our friends. We do not ask them to contribute to our support or even to the repayment of what we have spent in the war which gave them good government. We reduce the Dingley tariff as against them by three-quarters.

"We ask them only to do the same to us, and then we declare that the payments under the tariff shall not go into the Treasury of the United States, but go to the President for the benefit of the people of that island. Was ever so much generosity shown to any people? We give them just enough protection to maintain their own industries during the period of change, and we relieve them as far as we can from land tax or produce tax. [Applause on the Republican side.]

"If the tariff that we lay on their goods is a tariff on their production, it is only when the goods have come here and are able to pay the tariff because at the market and the money is ready to pay for them.

"And then we enact that the duties not only on goods that go to them but on goods that come here shall all go to the benefit of the island. This is what we have been told is tyranny!

"What are we going to give the islands if we do not pass this bill? What are we to do for those people? How is the expense of their government to be paid?

"Gentlemen come to me and others on this side of the House and talk of this measure of kindness as if it were tyranny. And they talk about the Philippines and ask, Will you do the same there? Still more, they ask whether the rights of personal liberty guaranteed by the Constitution shall not go to all the Territories held by the United States? How are these questions incident to a measure providing simply for the raising of revenue for this country and for that island? There is a constitutional provision that 'all duties, imposts, and excises shall be uniform throughout the United States.'

"The provisions as to personal rights are not limited as to place. One says that the writ of habeas corpus shall not be suspended except in certain cases, and says nothing about territory. It may well be argued that the rights of a citizen of the United States go everywhere where the power of the United States may extend. But how has that to do with the question as to whether these people should be given relief to the extent of three-fourths from the tariff bar that now stands between us and them; that they shall be afforded at the same time a revenue for schools and for roads, and that they shall be absolutely relieved from all contributions toward the support of this Government?

"Let us have no sympathy with mere verbal arguments on the subject of our control in the territories that we have received by the treaty with Spain. They are not beyond the pale of the great rights of liberty guaranteed by the Constitution. As soon as peace is established an inhabitant of those islands is entitled to the protection of his life and his liberty. But so far as the territory is concerned, this Government, through its Congress, has the power to acquire territory, and when it has been acquired it is the right of Congress, under the Constitution, even to dispose of or sell such territory.

"Our control over the territory is absolute. If Congress can sell, it can control. It can tax. It can exercise the power of taxation as may be found right, and has the power to make all rules and regulations with reference to such property. There is no limitation on this power, except that taxes must be uniform throughout the States which are united and which contribute by uniform laws to the support of the United States Government while managing their own affairs. This territory is not contributing to the expenses of maintaining the United States Government. The United States is imposing taxes there for the purpose of maintaining the local government there; and it must have all the powers of a State in so doing.

"Mr. FINLEY. Will the gentleman yield for a question?

"Mr. PARKER of New Jersey. Yes, sir.

"Mr. FINLEY. In ordinary legal parlance, is not the term 'rules and regulations' used as meaning provisions for carrying out some enactment of law? In other words, is there not a distinction between a law and what may be termed 'rules and regulations'?

"Mr. PARKER of New Jersey. In this particular article 'rules and regulations' are spoken of as instruments of government, and therefore they are law.

"Mr. FINLEY. Then I understand the gentleman to say that 'rules and regulations' in the sense implied in this article mean law?

"Mr. PARKER of New Jersey. I can not see how it can mean anything else, and I believe the courts have so held.

"Mr. FINLEY. Has the gentleman any authority in support of that statement?

"Mr. PARKER of New Jersey. I have plenty of authorities, but I have not the books at hand. The Supreme Court of the United States has often held that in the Territories under this authority to make rules and regulations Congress must make law.

"Mr. FINLEY. Then, as I understand, the gentleman has no authorities.

"Mr. PARKER of New Jersey. I have plenty of authorities, but I can not on the instant refer to the exact case. I have no books here.

"Mr. GILBERT. Will the gentleman allow me to ask him a question?

"The CHAIRMAN. Does the gentleman from New Jersey yield?

"Mr. PARKER of New Jersey. Certainly.

"Mr. GILBERT. Do you contend that Congress could incorporate a railroad company or a bank in Porto Rico?

"Mr. PARKER of New Jersey. Certainly.

"Mr. GILBERT. Would that corporation become a citizen in the sense of the fourteenth amendment to the Constitution?

"Mr. GROSVENOR. Not necessarily.

"Mr. PARKER of New Jersey. I should say not.

"Mr. GILBERT. Would it become a person in the sense of the fourteenth amendment?

"Mr. PARKER of New Jersey. I should say not necessarily.

"Mr. GILBERT. Does not the gentleman know that the Supreme Court has repeatedly held that corporations are persons within the sense of the fourteenth amendment?

"Mr. PARKER of New Jersey. I believe so.

"Mr. GILBERT. Would not that corporation be entitled to equal protection of the laws in Porto Rico?

"Mr. GROSVENOR. What decision of the Supreme Court is there on that subject since the adoption of the fourteenth amendment?

"Mr. GILBERT. The case of St. Clair County against somebody. There are three or four cases in which the Supreme Court has held that a corporation is a person in the sense of the fourteenth amendment.

"Mr. PARKER of New Jersey. I want to make one or two more propositions, and I do not think the gentleman's question is very pertinent to my argument. It is very easy to ask questions when a man is standing here without books, and it is not easy to answer them without the authorities at hand.

"Mr. GILBERT. If this Congress——

"Mr. PARKER of New Jersey. The gentleman is making an argument, and he is not on the point that I am referring to.

"The CHAIRMAN. The gentleman from New Jersey [Mr. PARKER] is entitled to the floor.

"Mr. PARKER of New Jersey. Something has been said about export duties. It was always supposed that export duties were duties levied upon goods because they were exported—that is to say, if a law should be enacted that in a certain State all of a certain class of goods leaving that State should pay a duty, that would be an export duty. On the other hand, if a State, by

consent of Congress, were allowed to impose a duty on all goods coming into that State, that would be an import duty. Some of those goods would come from other States, but that would not make this an export duty on the goods coming from those States.

"The provision of the Constitution was intended to prevent the imposition of duties on goods, on the classification and because they were exported. Here by this bill duties are levied on goods going into Porto Rico, not because they are exported from anywhere, but because they are imported into that island. They are import duties, pure and simple.

"The bill provides full Dingley tariff rates for goods coming from the rest of the world and one-quarter of those rates for goods from the United States. That is not the imposition of an export duty on goods coming from the United States. That is a reduction by three-quarters of the import duties in Porto Rico because the goods come from the United States. The bill might just as well have said that full tariff rates under the United States laws shall be charged on all goods from wheresoever they shall come, with a rebate of three-quarters to be allowed to goods coming from the United States. The bill substantially orders an import duty with a rebate on goods coming from the United States.

"Now, on that construction of the law we are not without a case exactly analogous. It is the case of Pace against Burgess. Pace made tobacco and Burgess was collector. The law provides that there shall be a stamp tax on all tobacco of so much per pound, but that if the tobacco was to be exported, it was to pay a much less rate per pound, and that a different stamp, marking the tobacco for export, should be put upon the tobacco. The manufacturer went before the Supreme Court claiming that the tobacco was for export, that it was taxed so many cents a pound, and that therefore an export duty was being levied.

"The court denied this claim, holding that while the statute imposed a tax on tobacco that was exported, it was really a rebate on a much larger tax on all manufactured tobacco, and therefore not an export tax, but a rebate of an excise tax. Now, just so in this case, when this bill says that there shall be a tariff imposed upon all goods coming into Porto Rico, and then provides that import duty shall be much less if the goods come from the United States, it is not an export duty from the United States, but a rebate of an import duty into Porto Rico.

"It is idle longer to delay the House with questions of law.

"Mr. BARTLETT. Will the gentleman permit me to ask him one question?

"Mr. PARKER of New Jersey. Certainly.

"Mr. BARTLETT. Do I understand the gentleman to claim that the Dingley law is now in force in Porto Rico?

"Mr. PARKER of New Jersey. By this bill the Dingley law is put into force in Porto Rico, except that practically a rebate from the Dingley law of three-quarters is given on all goods that come from the United States.

"In conclusion, only one word. It is idle to talk of law only. This is an intensely practical question. We must give some relief to these people. We must give them revenue; we must give them a reduction of the tariff; we must give them the means of getting a chance in the progress among nations. Unless that happens we might have revolution, and we shall certainly have poverty and discontent. This bill gives that relief, and we can not help appealing to every member of this House to support it. [Applause on the Republican side.]"

[By unanimous consent, Mr. GREEN of Iowa was granted leave to extend his remarks in the RECORD.]

Mr. BENNET. Mr. Chairman, I move to strike out the last two words for the purpose of asking the gentleman from Virginia [Mr. JONES] a question. During the course of the remarks of the gentleman from Iowa [Mr. TOWNER] I asked him if there was anything in this bill that covered the case of the several hundred former residents of Porto Rico who live in New York City, who were born in Porto Rico, Spanish subjects at that time, left Porto Rico prior to 1898 or since, and now reside in the State of New York, and, doubtless, in other States.

Those men did not desire to take advantage of the treaty and did not renew their allegiance to the Crown of Spain prior to April 11, 1900. Therefore they ceased to be Spanish subjects. They were in the United States at the time of the war, and they had no opportunity to continue their adherence to the Crown of Spain. Now they can not be naturalized in the United States because they can not renounce allegiance to any king or State. As a matter of fact their allegiance is to the United States, but they are not citizens of the United States. This bill does not help them out, because this bill only applies to persons who are either now in Porto Rico or who shall return, and what I want to ask the gentleman was whether—I will ask a two-branch question—whether the omission to do anything for these people was intentional, or if it was not intentional whether the gentleman would have any objection to an amendment which would appeal to his sense of what is right and fair, conferring American citizenship upon these former Porto Ricans, or former subjects of Spain, who have resided for these many years in the United States?

Mr. JONES. Well, I would say to the gentleman in response to the last part of his question that if these Porto Ricans are in the United States and propose to continue to reside in the United States there is no reason why they can not become citizens of the United States——

Mr. BENNET. Oh, yes.

Mr. JONES. Why?

Mr. BENNET. How can they? They can not be naturalized because the law of June 28, 1906, says that no one can be naturalized except a subject or citizen of some foreign power. Now those people lost or rather ceased to become the subjects of Spain——

Mr. JONES. Yes.

Mr. BENNET. By that war, and we may gloss it over as much as we please, but the fact remains that those people are subjects of the United States.

Mr. JONES. The gentleman may be right about that. I had in my mind when I said what I did of a number of Porto Ricans who heretofore have come to New York and have become naturalized citizens of the United States; but I will say to the gentleman that it was not brought to the attention of the committee that there were any Porto Ricans residing in New York who had no intention of going back to the island, and therefore we did not consider that subject at all. We felt that we were going far enough when we extended American citizenship to those Porto Ricans who live in the island and those who are temporarily away and intended to go back. I would not be willing, I think, to extend American citizenship to Porto Ricans who have resided and almost expatriated themselves, and who have no idea of ever going back there.

Mr. MILLER of Minnesota. Will the gentleman yield?

Mr. BENNET. I will yield first to the gentleman from Iowa [Mr. GREEN].

Mr. GREEN of Iowa. Upon what does the gentleman base his statement that those people lost their citizenship in regard to Spain?

Mr. BENNET. Upon the fact that in section 7 of the act of 1902—I will take that back; those people have lost their rights as subjects of Spain through the fact of the conquest of the land of which they were citizens.

Mr. MILLER of Minnesota. And did not avail themselves of the privilege contained in the treaty with Spain of asserting their intention.

Mr. GREEN of Iowa. If the gentleman will allow me a moment, I will say I can not agree with the gentleman at all. I know of no principle of international law, and I doubt whether the gentleman knows, although he may have looked it up more carefully than I have, that the conquest of the island would cause these people residing in New York to lose their citizenship in Spain.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BENNET. I would ask that I may have five minutes more.

Mr. MANN. Will the gentleman yield?

Mr. BENNET. If I can get the time.

The CHAIRMAN. The gentleman from New York asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. MANN. Of course it would not affect the citizenship of Porto Ricans residing in New York at the time of the conquest. That is the point referred to, but those who came from Porto Rico to New York since can not become naturalized, and under this bill they still remain citizens of Porto Rico, which is nothing to them, and they can not become citizens of the United States, which is everything to them.

Mr. BENNET. And if they came shortly after the conquest, I will call the attention of the gentleman from Minnesota to the fact that section 7 of the act of 1900 only applies to Spanish subjects residing on the island of Porto Rico.

Mr. MILLER of Minnesota. I can see no reason why this present bill should not be amended so as to confer citizenship upon the inhabitants of Porto Rico or upon Porto Rican citizens who are now residing in the United States. That would cover the ground.

Mr. TOWNER. Will the gentleman yield?

Mr. BENNET. In a moment. I drafted this, I will say to the gentleman from Minnesota: "That all former Spanish subjects born in Porto Rico, who at the time of the passage of this act reside in any State or Territory of the United States

or in the District of Columbia, except such as shall have elected to preserve their allegiance to the Crown of Spain on or before the 11th day of April, 1900, are hereby declared and deemed to be citizens of the United States."

I think possibly that would cover it.

Mr. STAFFORD. Will the gentleman permit——

Mr. BENNET. I now yield to the gentleman from Iowa [Mr. TOWNER].

Mr. TOWNER. The language of the section in the bill by which we give the right to become citizens of the United States says, referring to these citizens of Porto Rico——

Mr. BENNET. What page?

Mr. TOWNER. Page 6—

And have since returned and are permanently residing in that island, and are not citizens of any foreign country.

So that the people to whom the gentleman refers in the United States could not come under the provision of this section.

Mr. BENNET. Certainly not.

Mr. TOWNER. Therefore, not being allowed to become citizens of the United States, because they are not citizens, and who have been citizens of a foreign power, having had their allegiance transferred by the treaty, they can not become citizens of the United States here and can not become citizens of the United States under the provisions of this act unless it is amended.

Mr. BENNET. Certainly; I agree thoroughly with the gentleman.

Mr. FESS. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. FESS. This question is purely for information. The first step in naturalization is to renounce allegiance to the country——

Mr. BENNET. To the country of which the person is a subject or a citizen.

Mr. FESS. And second, to declare an intention to become a citizen of our country.

Mr. BENNET. That is in the declaration of intention.

Mr. FESS. Now, what I want to know is, if the fact of the loss of citizenship in Spain would not satisfy the law of the renunciation of the citizenship for the sake of being naturalized?

Mr. BENNET. It would not. The gentleman from Indiana [Mr. MOORES] is very well informed on legal matters, and tells me that there is a district court decision on this. That was my own impression. He has gone to look up the decision. The reason I brought the matter up so early is just exactly what has occurred, that we might by discussion rather clear our minds as to the best way of covering what I think all of us want to cover, because I am frank to say the fewer subjects the United States has the better I will be pleased.

Mr. MILLER of Minnesota. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. MILLER of Minnesota. I am informed that the Federal court in the Hawaiian Islands has just decided that a Filipino man who was then in Hawaii had a right to become naturalized as a citizen of the United States. That case, of course, will be appealed, and, I understand, the Government attorney has taken steps for the appeal, and it ultimately will be decided by our Supreme Court. If our court should hold that that Filipino had a right to citizenship in the United States for naturalization, of course the same reasons would apply to citizens of Porto Rico, and the gentleman in whom the gentleman from New York is interested.

Mr. BENNET. The Supreme Court of the United States in the case of In re Williams had a chance to declare something like that, and did not do it.

Mr. MILLER of Minnesota. I know they did not.

Mr. BENNET. They simply contented themselves by deciding that a resident of the island of Porto Rico was not an alien, and stopped right there.

Mr. STAFFORD. Will the gentleman yield?

Mr. BENNET. I will.

Mr. STAFFORD. Is not citizenship, so far as naturalization goes, predicated upon the act of the individual, and would not your amendment force citizenship upon them regardless of their own desires?

Mr. BENNET. The gentleman is correct up to a certain point. We have done that in a great many instances. We did it in the case of the whole Territory of Louisiana when it was taken over from France. The gentleman from Ohio [Mr. FESS] this afternoon called attention to the fact that we forced, if you want to use that word, citizenship on everybody in Texas that we took with Texas.

Mr. MANN. And we do it when anybody is born.

Mr. BENNET. Yes.

Mr. STAFFORD. The very fact that they lost their nationality as to Spain does not signify that we should necessarily confer citizenship upon them unless they wish it?

Mr. BENNET. I will say to the gentleman from Wisconsin that after we have conferred that citizenship upon them, and we have the right to do it, of course, by right of conquest, if they want to turn around and deliberately expatriate themselves and become Russians or Hindus or anything else, they have that right?

Mr. STAFFORD. Will the gentleman permit further?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. BENNET. Mr. Chairman, I ask unanimous consent to proceed for four minutes.

The CHAIRMAN. The gentleman from New York asks unanimous consent to proceed for four minutes. Is there objection?

There was no objection.

Mr. STAFFORD. There may be, as a result of this European war, certain countries effaced from the governmental maps which have a large number of subjects living in this country, but that would be no reason why we should by legislative act confer jurisdiction upon those people without their full assent and will?

Mr. BENNET. Oh, that is entirely different.

Mr. STAFFORD. I think that is a parallel case.

Mr. BENNET. These are people that we have taken over, and to whom we owe a duty to start them off with some sort of citizenship.

Mr. TILSON. Will the gentleman yield?

Mr. BENNET. I will.

Mr. TILSON. Is it not provided in this very bill that if they wish to continue as citizens of Spain or become citizens or subjects of Spain, they can do so under the terms of this bill by signing a certificate within six months after this law goes into effect?

Mr. BENNET. They could go back to Porto Rico, and when they got there they could sign a declaration, and, after they had signed that declaration, I am a little bit doubtful as to what their status would then be. Would they be citizens of Porto Rico or would they be subjects of Spain? I do not know precisely what that language means.

Mr. TILSON. It seems that they may become subjects of Spain if they wish to do so.

Mr. BENNET. The language says:

I, ———, being duly sworn, hereby declare my intention not to become a citizen of the United States as provided in the act of Congress conferring United States citizenship upon citizens of Porto Rico and certain natives permanently residing in said island.

Well, I do not know that that would get them any further than making them men without a country. I suppose we have the right to do that. But it seems to me we owe it to them to start them off right as American citizens.

Mr. JONES. Mr. Chairman, will the gentleman yield?

Mr. BENNET. Yes; I yield to the chairman of the committee.

Mr. JONES. I agree with the gentleman from New York as to what he says about the language quoted on page 6 of the bill. That would not help at all. It was intended for just an opposite purpose.

But the gentleman assumes that these Porto Ricans who have, I may say, expatriated themselves, desire to become citizens of the United States. I have no reason for knowing that. The committee has no evidence on the subject. Nobody ever made such statements to us, and this law was framed for the purpose of making the Porto Ricans residing in Porto Rico collectively citizens of the United States, but permitting those who did not want to become citizens to go into the court and make this declaration.

Now, this proposition which the gentleman makes is to make these people who are not residing there, and who have expatriated themselves, collectively citizens of the United States whether they want to become so or not; and they may not all want to become citizens of the United States.

The CHAIRMAN. The time of the gentleman has expired.

Mr. DAVENPORT. Mr. Chairman, I ask unanimous consent that the gentleman from New York [Mr. BENNET] may proceed for two minutes more.

Mr. JONES. I ask unanimous consent that the gentleman may have five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. JONES. That is the difficulty in my mind, I will say to the gentleman from New York. I think we ought to make those who reside in Porto Rico collectively citizens, and to let

the persons who are contemplated in this section who do not desire citizenship to make the declaration that they do not want to be citizens. But does the gentleman think we ought to undertake to say that Porto Ricans who have lived there and who do not want to go back should be made citizens without knowing whether they want to be citizens or not?

Mr. BENNET. Answering the very pertinent question of the chairman of the committee, I happen to know something about these people. They do desire to become citizens of the United States, and in many instances they have gone to the naturalization courts and tried to become citizens of the United States. The gentleman says some of these people have expatriated themselves. The gentleman is as good an American as there is in the United States, and I do not think he would put a term of opprobrium upon any person who left any part of the United States and came to the mainland of the United States to cast in his fortunes with us. So far as they could they have become Americans.

Mr. JONES. But the gentleman realizes that when they came here they were not coming to the mainland of the United States, with reference to Porto Rico. Then Porto Rico was a colony of Spain.

Mr. BENNET. I mean those who have come since then. Take the case of a man who was in the island at the time of the conquest. Take the case of the employees of the Bull Line of steamers, to be specific. I do not happen to know anybody connected with that line, but I know that there is such a line. They have brought people from Porto Rico to New York City to work in their offices, and those people have become permanent residents of New York, and regard themselves as Americans, but they are not and can not become citizens of the United States, and must remain subjects.

Mr. JONES. Subjects of what country?

Mr. BENNET. Subjects of the United States.

Mr. JONES. Is the gentleman certain that they are not citizens of Spain?

Mr. BENNET. Certainly; because prior to the 11th day of April, 1900, they did not exercise their right of retaining their allegiance to the Crown of Spain, as provided by section 7 of the act of August, 1900.

Mr. JONES. They were not in Porto Rico at that time?

Mr. BENNET. Yes; they were. They were in Porto Rico at the time. But when Port Rico became a part of America, and American business commenced to go back and forth, they came to America and engaged in these various lines of occupation as Americans. They had no desire to remain Spaniards. If they had, they could have filed their declaration.

Now, here is the situation: Two men from the same family, both equally desirous of being Americans, one remaining in Porto Rico and one coming to the United States. The man who remains in Porto Rico can become an American citizen, though he is not on the mainland of the United States, but his brother who comes to the United States can not become an American citizen.

Mr. MEEKER. Mr. Chairman, will the gentleman yield for a question?

Mr. BENNET. I yield to the gentleman from Missouri.

Mr. MEEKER. Would it not meet the practical difficulty to offer an amendment similar to the provision in the bill, that those who desire not to become citizens can up to a certain time go into court and make that statement; or, on the other side, make a proviso whereby all those who are already in the United States will be given the opportunity to become citizens of the United States?

Mr. BENNET. I think the suggestion of the gentleman from Missouri is a very practical one, and that it would be possible to couple with the provision that I suggest a provision that if they do not desire to become citizens, then they may file in the United States district court a declaration to that effect.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I should like to oppose the motion to mutilate the first section of the bill.

Just a moment on this point: The language of section 5 of the bill provides among other things for the making of American citizens of natives of Porto Rico who were temporarily absent from that island on April 11, 1899, and have since returned, and who are permanently residing in that island, and are not citizens of any foreign country.

Under the language of the bill the man who was absent from the island on April 11, 1899, and who has since returned to Porto Rico, becomes a citizen. If he came to the United States in 1898 and has gone back to the island, he becomes an American citizen; but if he came to the United States in 1898, and has elected to remain here, he pays the penalty because he stays here of forfeiting his American citizenship. If he has shown his love of America by staying here, then he is not to be an American citizen. It seems to me that that was not the intent of the committee, and that it might very easily be corrected——

Mr. JONES. I will say to the gentleman that that point was never presented to us.

Mr. MANN. I would like to finish my sentence without having it interlarded. Then I will be very glad to yield to the gentleman. If you strike out the provision—

> And have since returned and are permanently residing in that island—

So that it will read—

> All natives of Porto Rico who were temporarily absent from that island on April 11, 1899, and are not citizens of any foreign country are hereby declared, and shall be deemed and held to be, citizens of the United States—

That will cover the case. I gladly yield now to the gentleman from Virginia.

Mr. JONES. What I was saying to the gentleman was that it was never stated to the committee that there were any Porto Ricans who would come within this category, and we did not undertake to make any provision of this kind. I will say to the gentleman that we have not reached this section in the reading of the bill, and that if we do reach it this evening I will ask that this section be passed over, to be returned to; and in the meantime I will take up the matter with the ranking minority member of the committee [Mr. TOWNER], and will see if we can not frame some amendment that will meet the situation.

Mr. MANN. I have no doubt at all that it was a pure inadvertence on the part of the committee.

Mr. BENNET. I will say that that course is entirely satisfactory to me, and the reason I brought it up under the first section was in the hope that what has resulted would result; that is, that the chairman of the committee would commence to think about the best amendment to meet the situation. I have no doubt he will have a better amendment when we get to it than the one that I have suggested.

Mr. MILLER of Minnesota. Mr. Chairman, I would like to be recognized in opposition to the formal amendment. Now that we are on this question of citizenship, I suppose we might as well thrash out some of the details that might more properly come up later. In that connection I want to invite the attention of the committee to the fact that the injustice which it is apparent would have been inflicted upon certain individuals who were born in or who are citizens of Porto Rico may exist in respect to certain natives of the Philippine Islands, all of which was called to the attention of the committee recently, but which the committee did not seem inclined to act upon. I am very glad to find that they are willing to listen to suggestions of this kind, although they turned a deaf ear to my beseeching appeal in committee. When I say "beseeching appeal" I speak advisedly, because I had tears in my voice, if not in my eyes, when I was talking to them. The treaty in regard to citizenship provides that a man must have been in the Philippine Islands at the time the treaty was passed in order to become a citizen. In other words, if a man was born in the Philippine Islands and was temporarily away at the time the treaty passed and was signed and has gone back to the islands he is strictly a man without a country. Now, that seems an anomaly, and it may be that to some people it seems a rarity, as far as any practical application is concerned, and not worthy of consideration. That is not so. As a matter of fact, some of the most learned Philippine people were in Europe and some of the most cultured and wealthy people were in Spain at the time this treaty was signed and some were in the Spanish army in Cuba.

I think I will be pardoned if I mention one gentleman, a somewhat notorious gentleman. He was educated at the University of Spain at Madrid. He was one of the leading physicians of the islands. At the time of the Spanish-American war he was a physician in the Spanish Army in Cuba. He afterwards returned to the Philippine Islands, and while I am not qualified to speak, I am informed he is a most eloquent speaker among the Filipino people. I rather think he is eloquent because he has been elected to the Philippine Legislature, I think, three times by an overwhelming majority in the city of Manila. Each time he has been ruled out on the ground that he is not a citizen of the Philippine Islands. As a matter of fact, he was born of a Philippine father and a Philippine mother within the walled city. It is not for me to say whether or not that position was well taken; but anyhow, the Philippine Legislature, which has the right to judge of the qualifications and election of its own members, the same as we have, finally said that Dominibar Gomez should not have a seat in the Philippine Assembly because he was not a citizen of the islands. I am not defending Dominibar Gomez for his record; I will leave

that to my genial friend from Virginia, the chairman of the committee. I mention this to strengthen the fact that we have overlooked some facts, both in Porto Rico and the Philippines.

Let me emphasize again the case of Dominibar Gomez is not one entirely by itself, there are a large number of others, and in legislating like we are doing in this bill, let us correct, as far as possible, the injustice that has been done. [Applause.]

The Clerk read as follows:

SEC. 2. That no law shall be enacted in Porto Rico which shall deprive any person of life, liberty, or property without due process of law, or deny to any person therein the equal protection of the laws.

That in all criminal prosecutions the accused shall enjoy the right to be heard by himself and counsel; to demand the nature and cause of the accusation against him; to have a copy thereof; to have a speedy and public trial; to meet the witnesses face to face; and to have compulsory process to compel the attendance of witnesses in his behalf.

That no person shall be held to answer for a criminal offense without due process of law; and no person for the same offense shall be twice put in jeopardy of punishment, nor shall be compelled in any criminal case to be a witness against himself.

That all persons shall before conviction be bailable by sufficient sureties, except for capital offenses when the proof is evident or the presumption great.

That no law impairing the obligation of contracts shall be enacted.

That no person shall be imprisoned for debt.

That the privilege of the writ of habeas corpus shall not be suspended, unless when in case of rebellion, insurrection, or invasion the public safety may require it, in either of which events the same may be suspended by the President, or by the governor, whenever during such period the necessity for such suspension shall exist.

That no ex post facto law or bill of attainder shall be enacted.

That no law granting a title of nobility shall be enacted, and no person holding any office of profit or trust in Porto Rico shall, without the consent of the Congress of the United States, accept any present, emolument, office, or title of any kind whatever from any king, queen, prince, or foreign State.

That excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

That the right to be secure against unreasonable searches and seizures shall not be violated.

That neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist in Porto Rico.

That no law shall be passed abridging the freedom of speech or of the press, or the right of the people peaceably to assemble and petition the Government for redress of grievances.

That no law shall be made respecting an establishment of religion or prohibiting the free exercise thereof, and that the free exercise and enjoyment of religious profession and worship without discrimination or preference shall forever be allowed, and that no political or religious test other than an oath to support the Constitution of the United States and the laws of Porto Rico shall be required as a qualification to any office or public trust under Porto Rico.

That no money shall be paid out of the treasury except in pursuance of an appropriation by law.

That no warrant shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched and the persons or things to be seized.

That eight hours shall constitute a day's work in all cases of employment of laborers and mechanics by and on behalf of the government of the island on public works, except in cases of emergency.

That the employment of children under the age of 14 years in any occupation injurious to health or morals or hazardous to life or limb is hereby prohibited.

That the right of action to recover damages for injuries resulting in death shall never be abrogated.

Mr. MURRAY. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 3, line 24, after the word "allowed," insert "and that no political or religious test shall ever be required for the exercise of civil or political rights."

Mr. MURRAY. Mr. Chairman, the usual clause in State constitutions carries this provision, but does not include the remaining part of the paragraph. The committee has provided that "no political or religious test other than an oath to support the Constitution of the United States and the laws of Porto Rico shall be required as a qualification to any office or public trust." Certainly it is more important that no political or religious test shall become necessary for the exercise of civil or political rights.

Mr. MANN. Mr. Chairman, let us have the amendment again reported.

The CHAIRMAN. Without objection, the Clerk will report the amendment.

There was no objection, and the Clerk again read the amendment.

Mr. JONES. After the word "allowed," it provides that "no political or religious test," and so forth. Does the gentleman want to repeat that?

Mr. MURRAY. No; I would strike that out.

Mr. JONES. How will it read with the gentleman's amendment in it?

Mr. MURRAY. I will ask the Clerk to read it as it would read if amended.

The Clerk read as follows:

That no law shall be made respecting an establishment of religion or prohibiting the free exercise thereof, and that the free exercise and enjoyment of religious profession and worship without discrimination or preference shall forever be allowed, and that no political or religious test shall ever be required for the exercise of civil or political rights, and that no political or religious test other than an oath to support the Constitution of the United States and the laws of Porto Rico shall be required as a qualification to any office or public trust under Porto Rico.

Mr. MURRAY. I thought of putting it after the word "required," but here is the trouble. You are referring here now to civil rights. You do not want to say that nothing except an oath to the Constitution of the United States shall be required. If you follow the general trend of the Constitution of the United States you strike out everything after the word "allowed," because when you allow civil and political office, that involves the right of holding office without repetition of these words. If you would strike out everything after the word "allowed" and insert my amendment, you would get everything put in here, unless the gentleman wants to retain the expression about taking an oath to obey the Constitution of the United States, and I thought perhaps he had some purpose in that.

Mr. MANN. Mr. Chairman, the provision of the bill is:

And that no political or religious test other than an oath to support the Constitution of the United States and the laws of Porto Rico shall be required as a qualification to any office or public trust under Porto Rico.

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

Mr. MANN. Not until I have made a statement of some kind. That is an admission, to start with, that an oath to support the Constitution of the United States is a political test, and I think the bill is right in reference to that—it is a political test. The gentleman from Oklahoma [Mr. MURRAY] offers an amendment to the effect that no political test shall be required for the exercise of any civil rights. In other words, a man goes to vote; under our law, in every place that I know of, he might be challenged. He could not make an oath under this provision, because that is a political test, if the amendment of the gentleman should prevail. You have to make a great many affidavits at times in connection with exercising your right to vote, but under the provision offered by the gentleman you could not enact any political test, you could not require a man to make any statement under oath as to his residence when he came to be registered, because taking an oath is a political test.

Mr. MURRAY. The gentleman is using that word differently from its general acceptation.

Mr. MANN. I am using it in the legal acceptation that I understand and which the bill conveys. That was the acceptation of the committee and whoever drafted the bill, because the provision in the bill is:

No political or religious test—

And a religious test has nothing to do with supporting the Constitution—

other than an oath to support the Constitution of the United States and the laws of Porto Rico shall be required as a qualification to any office or public trust under Porto Rico.

That is a statement of the bill itself, that an oath to support the Constitution is a political test, and the bill is correct—it is a political test. What the gentleman has in mind is that one shall not be required to state his partisan politics.

Mr. MURRAY. Certainly.

Mr. MANN. But that has nothing to do with the question of a political test.

Mr. MURRAY. But that is the use in every State in the American Union.

Mr. MANN. I do not believe it is used that way anywhere, and if it is, it is used by people who do not understand the English language.

Mr. MURRAY. It is the use in the gentleman's own State constitution, and if that is so then the people in the gentleman's State do not know anything about the English language.

Mr. MANN. Oh, no.

Mr. MURRAY. It is in the early days.

Mr. MANN. Never in the early days. Even in the earliest immigrant days, those who came to our State understood the English language better than that.

Mr. MURRAY. I will ask the gentleman this question——

Mr. MANN. I am not under cross-examination.

Mr. MURRAY. Does the gentleman from Illinois insist that this clause ought not to go in?

Mr. MANN. I insist that the gentleman's amendment ought not to prevail.

Mr. MURRAY. At all in this provision, either here or over further?

Mr. MANN. The amendment offered by the gentleman from Oklahoma is not drawn with his usual ability. It would eliminate the right to exact any kind of a political test, the

gentleman having in his mind partisan politics, but that is not the use of the term "political" in law.

Mr. MURRAY. Does this agree to the gentleman's view, if it is put over on the other page, at the top of page 4, after the word "required"?

Mr. MANN. Why, no; it would still forbid a man taking an oath that he was going to tell the truth when he went to register to vote.

Mr. MURRAY. To make it clear to the gentleman from Illinois, I will ask unanimous consent to change the word "political" to "partisan."

Mr. MILLER of Minnesota. Does that help it any?

Mr. MURRAY. "Any religious or partisan."

Mr. MILLER of Minnesota. Does that help it any?

Mr. MEEKER. Is that in the Constitution?

The CHAIRMAN. The time of the gentleman has expired.

Mr. MURRAY. Mr. Chairman, I ask unanimous consent for five minutes just to answer this.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to speak for five minutes. Is there objection?

Mr. MANN. Mr. Chairman, reserving the right to object, there are two other matters of some importance to come up in the House to-night, and I think, possibly, if the gentleman will let this go over it will be wise.

Mr. JONES. Mr. Chairman, I am going to suggest that the amendment go over until to-morrow, and move that the committee do now rise.

Mr. COOPER of Wisconsin. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. COOPER of Wisconsin. Will that leave opportunity when the bill next comes up for further amendment to this section?

The CHAIRMAN. Certainly; the first thing will be the amendment offered by the gentleman from Oklahoma.

Mr. BENNET. The entire section is still open to amendment.

The CHAIRMAN. Certainly.

The motion was agreed to.

Accordingly the committee rose, and the Speaker having resumed the chair, Mr. FOSTER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 9533) to provide a civil government for Porto Rico, and for other purposes, and had come to no resolution thereon.

### INDIAN APPROPRIATION BILL.

Mr. CARTER of Oklahoma. Mr. Speaker, I call up the conference report on the Indian appropriation bill, H. R. 10385, and ask that the House further insist upon its disagreement to the Senate amendments and agree to the further conference requested by the Senate.

Mr. MANN. What is the request?

Mr. CARTER of Oklahoma. To take up the conference report on the Indian appropriation bill, to insist upon disagreement to the Senate amendments, and agree to the conference requested.

Mr. MANN. The gentleman, I think, does not want to take up the conference report. As I understand, the Senate has already rejected the conference report——

Mr. CARTER of Oklahoma. Yes.

Mr. MANN. Is the gentleman going to move to concur?

Mr. CARTER of Oklahoma. No; my request is that the House further insist on its disagreement and agree to the conference asked.

Mr. MANN. I thought the gentleman was going to move to concur.

Mr. CARTER of Oklahoma. After consulting the gentleman from Kansas [Mr. CAMPBELL], we have decided upon this.

The SPEAKER. Does the gentleman wish to agree to the conference or ask for one?

Mr. CARTER of Oklahoma. The motion is to further insist upon the disagreement of the House to the Senate amendments and agree to a conference.

The SPEAKER. The gentleman from Oklahoma moves to further insist on a further disagreement to the Senate amendments and agree to a conference. Is there objection?

There was no objection; and the Speaker announced as the conferees on the part of the House Mr. CARTER of Oklahoma, Mr. HAYDEN, and Mr. CAMPBELL.

### EXTENSION OF REMARKS.

Mr. RIVERA. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the economic capacity of Porto Rico to maintain her own expenses.

The SPEAKER. The Resident Commissioner from Porto Rico asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

### THE MILITARY ESTABLISHMENT.

Mr. HAY. Mr. Speaker, I present a conference report for printing under the rule on the bill (H. R. 12766) to increase the efficiency of the Military Establishment of the United States.

The SPEAKER. The gentleman from Virginia presents a conference report on the Army reorganization bill, to be printed under the rule.

The conference report and statement are as follows:

### CONFERENCE REPORT (NO. 644).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H. R. 12766, entitled "An act to increase the efficiency of the Military Establishment of the United States," having met, after full and free conference have been unable to agree.

JAMES HAY,
S. H. DENT, Jr.,
JULIUS KAHN,
*Managers on the part of the House.*

GEO. A. CHAMBERLAIN,
J. C. W. BECKHAM,
F. E. WARREN,
*Managers on the part of the Senate.*

### STATEMENT.

The managers on the part of the House on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H. R. 12766, entitled "An act to increase the efficiency of the Military Establishment of the United States," make the following statement:

The conferees have been unable to agree and have not been able to adjust the differences between the two Houses.

JAMES HAY.
S. H. DENT, Jr.
JULIUS KAHN.

Mr. HAY. Mr. Speaker, in this connection I ask unanimous consent that the following agreement may be agreed to.

The SPEAKER. The Clerk will report the order.

The Clerk read as follows:

It is ordered that on Monday next the bill H. R. 12766, with the Senate amendments, shall be considered in the House, with a motion considered as pending that the House further insists upon its disagreement to the Senate amendments; that during the pendency of said motion it shall be in order to move that it is the sense of the House that sections 2 and 56 of the Senate amendment to the text of the bill ought to be agreed to, which motion shall be put separately to a vote upon each of said sections; that it shall further be in order to move that it is the sense of the House that section 122 of the Senate amendment to the text of the bill ought to be agreed to, and, pending that motion, it shall be in order to offer amendments to said section to be voted upon for the purpose of expressing the sense of the House; that upon each of said two main motions to express the sense of the House, one as to sections 2 and 56 and one as to section 122 in the Senate amendment, there shall be not more than 80 minutes' debate, one-half to be controlled by Mr. HAY and one-half by Mr. KAHN.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, will the gentleman kindly inform the House what items are covered by these three respective sections referred to in the order now pending?

Mr. HAY. Section 2 is the section in the Senate bill providing for an Army in time of peace of 250,000 men. Section 56 is what is known as the "volunteer section." Section 122 is the section providing for a nitrate plant.

Mr. STAFFORD. Do I understand, under the scope of this order, we will have but one vote on section 2 and section 56?

Mr. HAY. You will have a vote on each.

Mr. STAFFORD. And right of amendment on the nitrate proposition?

Mr. HAY. Yes, sir.

Mr. MILLER of Minnesota. Does that mean there will be 80 minutes on the three propositions.

Mr. HAY. Eighty minutes on sections 2 and 56 and 80 minutes on section 122.

Mr. MILLER of Minnesota. It seems to me that is not a very equitable distribution of the time. I should think they should have a great deal more time on sections 2 and 56, and we could get through with much less time on the other one.

Mr. HAY. There are a great many people interested in this proposition for a nitrate plant, and the other propositions have been debated ad nausema, anyway.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. KAHN. Mr. Speaker, I would like to suggest that this Army matter be taken up immediately after the reading of the Journal on Monday. The order does not so state.

Mr. HAY. I take it the Speaker will control that.

The SPEAKER. The Chair will recognize the gentleman from Virginia [Mr. HAY] the first thing after we clear up the Speaker's table on Monday morning.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title:

H. R. 12207. An act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1917, and for other purposes.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 3986. An act granting certain coal lands to the town of Kaycee, Wyo.; to the Committee on the Public Lands.

S. 2986. An act to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes; to the Committee on Banking and Currency.

HOUR OF MEETING MONDAY.

Mr. GARRETT. Mr. Speaker, I ask unanimous consent that when the House adjourns to-morrow it adjourn to meet at 11 o'clock a. m. on Monday next.

The SPEAKER. The gentleman from Tennessee [Mr. GARRETT] asks unanimous consent that when the House adjourn to-morrow it adjourn to meet at 11 o'clock a. m. on Monday. Is there objection? [After a pause.] The Chair hears none.

LEAVE OF ABSENCE.

Mr. CONRY, by unanimous consent, was granted leave of absence, indefinitely, on account of illness.

MORNING BUSINESS TO-MORROW.

Mr. MANN. Mr. Speaker, I wish to say that owing to some speeches which are to be made in the House to-morrow I hope as many Members will be present as possible when the House convenes, because if there is not a quorum here at that time I intend to have a call of the House in order to have the Members come in.

Mr. STAFFORD. The gentleman refers to the testimonial to the eightieth birthday of Mr. CANNON?

Mr. MANN. Yes.

SUPPLIES TO AMERICAN RED CROSS.

Mr. SHALLENBERGER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate joint resolution 119, which I send to the Clerk's desk.

The SPEAKER. The gentleman from Nebraska asks unanimous consent for the present consideration of the Senate joint resolution, which the Clerk will report.

The Clerk read as follows:

Joint resolution (S. J. Res. 119) to permit the issuance of medical and other supplies to the American National Red Cross for a temporary period.

*Resolved, etc.*, That the provisions of section 1 of the joint resolution approved May 8, 1914, authorizing the issue of military and naval equipment to the American National Red Cross be, and they are hereby, so extended as to permit the issue of the same to the American National Red Cross for the instruction of persons who may volunteer to receive training by that association from May 1 to June 1, 1916.

The SPEAKER. Is there objection to the present consideration of this resolution?

Mr. BENNET. Reserving the right to object, could the gentleman in a sentence or two tell us what it is?

Mr. SHALLENBERGER. The bill provides for the issuance of medical and other supplies of the Army and Navy for the use of the service training school that the Red Cross is now conducting in Washington. It has already passed the Senate and is recommended unanimously by the committee.

Mr. STAFFORD. As I understand it, this resolution is to provide surgical supplies in case the fair ladies in camp at Chevy Chase become ill.

The SPEAKER. Is there objection to the consideration of the resolution?

There was no objection.

The resolution was ordered to be read a third time, was read the third time, and passed.

MARY L. CUSHMAN.

Mr. LLOYD. Mr. Speaker, I offer a privileged resolution.

The SPEAKER. The gentleman from Missouri offers a privileged resolution, which the Clerk will report.

The Clerk read as follows:

House resolution 167 (H. Rept. 647).

*Resolved*, That the Clerk of the House be, and he is hereby, authorized and directed to pay, out of the contingent fund of the House, to Mary L. Cushman, widow of John E. Cushman, late a messenger on the soldiers' roll of the House, an amount equal to six months of his compensation as such employee and an additional amount, not exceeding $250, to defray the funeral expenses of said John E. Cushman.

The SPEAKER. The question is on agreeing to the resolution.

The question was taken, and the resolution was agreed to.

H. B. HARE.

Mr. LLOYD. I also desire to offer the following resolution.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

House resolution 205 (H. Rept. 646).

*Resolved*, That there shall be paid out of the contingent fund of the House the sum of $500 to H. B. Hare for clerical services rendered as clerk of the Committee on Mileage.

Mr. LLOYD. Mr. Speaker, the Committee on Mileage has no clerk. This is the usual amount allowed to the Committee on Mileage once in two years.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

FOSTER ZEIGLER.

Mr. LLOYD. Mr. Speaker, I present another resolution.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

House resolution 189 (H. Rept. 645).

*Resolved*, That the Clerk of the House be, and he is hereby, authorized and directed to pay, out of the contingent fund of the House, to Foster Zeigler, clerk to William G. Brown, jr., late a Representative from the State of West Virginia, at the time of his death, March 9, 1916, the sum of $125, being an amount equal to one month's salary of a clerk of a Member of the House.

Mr. LLOYD. Mr. Speaker, this is the usual resolution in such cases.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

ADJOURNMENT.

Mr. GARRETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 15 minutes p. m.) the House adjourned, pursuant to the order previously made, until to-morrow, Saturday, May 6, 1916, at 11 o'clock a. m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the chairman of the Federal Trade Commission, transmitting brief summary of facts and recommendations embodied in the detailed report of the Federal Trade Commission's investigation into trade conditions in and with foreign countries, where associations, combinations, or other conditions may affect the foreign trade of the United States (S. Doc. No. 426), was taken from the Speaker's table, referred to the Committee on the Judiciary, and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. DILLON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 14534) permitting the Missouri River Transportation Co. to construct, maintain, and operate a bridge across the Missouri River in the State of Montana, reported the same with amendment, accompanied by a report (No. 637), which said bill and report were referred to the House Calendar.

Mr. OGLESBY, from the Committee on Patents, to which was referred the bill (H. R. 13981) to amend the copyright law, reported the same with amendment, accompanied by a report (No. 640), which said bill and report were referred to the House Calendar.

Mr. CULLOP, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 15006) to authorize the Board of Commissioners of Lake County, Ind., to construct a bridge across the Grand Calumet River, in the State of Indiana, reported the same with amendment, accompanied by a report (No. 638), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (H. R. 15007) to authorize the Board of Commissioners of Lake County, Ind., to construct a bridge across the Grand Calumet River, in the State of Indiana, reported the same with amendment, accompanied by a report (No. 639), which said bill and report were referred to the House Calendar.

Mr. GRAHAM, from the Committee on the Judiciary, to which was referred the bill (H. R. 6450) to amend section 260 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, reported the same with amendment, accompanied by a report (No. 648), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SLAYDEN, from the Committee on the Library, to which was referred the bill (H. R. 15313) to provide for the removal of the Botanic Garden to Rock Creek Park, and for its transfer to the control of the Department of Agriculture, reported the same with amendment, accompanied by a report (No. 641), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. MAYS, from the Committee on the Public Lands, to which was referred the bill (S. 43) in relation to the location, entry, and patenting of lands within the former Uncompahgre Indian Reservation, in the State of Utah, containing gilsonite or other like substances, and for other purposes, reported the same with amendment, accompanied by a report (No. 642), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. GLASS, from the Committee on Banking and Currency, to which was referred the bill (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal-savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes, reported the same with amendment, accompanied by a report (No. 643), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 15331) granting an increase of pension to Margaret Westcott, and the same was referred to the Committee on Invalid Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and a memorial were introduced and severally referred as follows:

By Mr. TAVENNER: A bill (H. R. 15385) to authorize the Director of the Bureau of the Census under certain conditions to prepare and distribute blank ballots, and to receive and count marked ballots and report to Congress the result of an advisory vote; to the Committee on the Census.

By Mr. HULBERT: A bill (H. R. 15386) to appropriate $300,000 for the improvement of New York Harbor, N. Y., with a view to securing additional width in Bay Ridge and Red Hook Channels; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 15387) to appropriate $700,000 for the improvement of New York Harbor, N. Y., with a view to securing a suitable depth of channel to the navy yard; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 15388) to appropriate $30,000 for the improvement of New York Harbor, N. Y., with a view to the removal of Craven Shoal; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 15389) to appropriate $250,000 for the improvement of New York Harbor, New York Upper Bay, with a view to improving channel opposite anchorage grounds; to the Committee on Rivers and Harbors.

By Mr. GALLIVAN (by request): A bill (H. R. 15390) to regulate the thickness of walls in buildings in the District of Columbia; to the Committee on the District of Columbia.

By Mr. FERRIS: A bill (H. R. 15391) to punish persons who make false representations to settlers and others pertaining to the public lands of the United States; to the Committee on the Public Lands.

By Mr. COSTELLO: A bill (H. R. 15392) providing for the creation and administration of a Government fund for the insurance of compensation for injuries to civil employees of the Government of the United States; to the Committee on Reform in the Civil Service.

Also, a bill (H. R. 15393) to provide for the administration of the civil employees' compensation act of 1916 by creating the Bureau of Civil Employees' Compensation of the Department of Labor; providing for the establishment of a civil employees' compensation board to have charge of such bureau; authorizing the division of the country into civil employees' compensation districts and the appointment of civil employees' compensation referees; defining the powers and duties of the Secretary of Labor, the Bureau of Civil Employees' Compensation, the civil employees' compensation board, the civil employees' compensation referees, and the inspectors of the Department of Labor in enforcing the said act; and fixing the salaries of the members of the civil employees' compensation board, the civil employees' compensation referees, and certain of their employees and assistants; to the Committee on Reform in the Civil Service.

Also, a bill (H. R. 15394) defining the liability of the Government of the United States to pay damages for injuries received by an employee in the course of employment; establishing a schedule of compensation; and providing procedure for the determination of liability and compensation thereunder; to the Committee on Reform in the Civil Service.

By Mr. SMITH of New York: A bill (H. R. 15395) for the employment of an attorney for the Indians in the State of New York; to the Committee on Indian Affairs.

By Mr. HILL: A bill (H. R. 15396) providing for investment of deposits in savings bank departments of national banks; to the Committee on Banking and Currency.

By Mr. STOUT: A bill (H. R. 15397) to amend section 11 of the act of May 30, 1908 (35 Stat. L., p. 558); to the Committee on Indian Affairs.

By Mr. MATTHEWS: A bill (H. R. 15398) authorizing the Secretary of War to donate condemned cannon and cannon balls to the village of Antwerp, Ohio; to the Committee on Military Affairs.

By Mr. ADAMSON: A bill (H. R. 15399) to amend an act entitled "An act to codify, revise, and amend the penal laws of the United States," approved March 4, 1909; to the Committee on Interstate and Foreign Commerce.

By Mr. HAYES: A bill (H. R. 15400) authorizing the Secretary of Commerce to lease certain property; to the Committee on the Public Lands.

By Mr. KITCHIN: Resolution (H. Res. 225) providing for consideration of the bill (S. 2986); to the Committee on Rules.

By Mr. DYER: Resolution (H. Res. 226) authorizing and instructing the Committee on the Judiciary to make an investigation relative to the rise in the price of horseshoes; to the Committee on Rules.

By Mr. EMERSON: Joint resolution (H. J. Res. 219) against removal of United States forces from Mexico; to the Committee on Foreign Affairs.

By Mr. COOPER of Wisconsin: Memorial of the Legislature of the State of Wisconsin, to provide separate and comprehensive plan for the prevention of floods in the Mississippi Valley; to the Committee on Flood Control.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. CAMPBELL: A bill (H. R. 15401) granting a pension to Lou Shoat; to the Committee on Pensions.

By Mr. COOPER of Wisconsin: A bill (H. R. 15402) granting an increase of pension to Isaac L. Ferris; to the Committee on Invalid Pensions.

By Mr. COX: A bill (H. R. 15403) granting a pension to Azupah J. Batman, helpless and dependent child of Andrew J. Batman; to the Committee on Invalid Pensions.

By Mr. CRAGO: A bill (H. R. 15404) granting a pension to Frank J. Mitchell; to the Committee on Pensions.

By Mr. DOOLITTLE: A bill (H. R. 15405) granting an increase of pension to Elbridge Diltz; to the Committee on Invalid Pensions.

By Mr. EDWARDS: A bill (H. R. 15406) to permanently renew patent No. 630352; to the Committee on Patents.

By Mr. FESS: A bill (H. R. 15407) to pay Charles L. Gallaher the sum of $215; to the Committee on War Claims.

By Mr. HAMLIN: A bill (H. R. 15408) granting an increase of pension to John E. Opdyke; to the Committee on Invalid Pensions.

By Mr. HELGESEN (by request): A bill (H. R. 15409) granting an increase of pension to Charles F. Walter; to the Committee on Invalid Pensions.

Also (by request), a bill (H. R. 15410) granting an increase of pension to Catharine A. Mell; to the Committee on Invalid Pensions.

By Mr. HILLIARD: A bill (H. R. 15411) for the relief of James W. Fickle; to the Committee on Claims.

By Mr. HUDDLESTON: A bill (H. R. 15412) granting a pension to John T. Densmore; to the Committee on Pensions.

Also, a bill (H. R. 15413) granting a pension to Samuel A. Holt; to the Committee on Pensions.

By Mr. HULL of Iowa: A bill (H. R. 15414) granting an increase of pension to Henry D. Sumner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15415) granting an increase of pension to William H. Mix; to the Committee on Invalid Pensions.

By Mr. LAFEAN: A bill (H. R. 15416) granting an increase of pension to Samuel Platts; to the Committee on Invalid Pensions.

By Mr. LITTLEPAGE: A bill (H. R. 15417) granting an increase of pension to Andrew J. Escue; to the Committee on Invalid Pensions.

By Mr. McDERMOTT: A bill (H. R. 15418) granting a pension to Mary Butler; to the Committee on Invalid Pensions.

By Mr. MADDEN: A bill (H. R. 15419) granting an increase of pension to Mathew Hewlett; to the Committee on Invalid Pensions.

By Mr. RAKER: A bill (H. R. 15420) granting a pension to Margaret L. Miller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15421) granting an increase of pension to Edward S. Atkins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15422) granting an increase of pension to Louis F. Ursenbach; to the Committee on Pensions.

By Mr. RAMSEYER: A bill (H. R. 15423) granting an increase of pension to Jefferson R. McKaig; to the Committee on Invalid Pensions.

By Mr. REILLY: A bill (H. R. 15424) granting an increase of pension to James Dunn; to the Committee on Invalid Pensions.

By Mr. ROWE: A bill (H. R. 15425) granting an increase of pension to Sophia J. Bartlett; to the Committee on Invalid Pensions.

By Mr. SHACKLEFORD: A bill (H. R. 15426) granting an increase of pension to Patrick Mahoney; to the Committee on Invalid Pensions.

By Mr. SHERWOOD: A bill (H. R. 15427) granting a pension to Henrietta Schmidt; to the Committee on Invalid Pensions.

By Mr. STINESS: A bill (H. R. 15428) granting an increase of pension to Angie O. Allen; to the Committee on Invalid Pensions.

By Mr. SWEET: A bill (H. R. 15429) granting an increase of pension to Elliott F. Wise; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15430) granting a pension to Ephraim James Hopkins; to the Committee on Invalid Pensions.

By Mr. TAGGART: A bill (H. R. 15431) for the relief of the heirs at law of the late Duncan H. Campbell; to the Committee on Patents.

By Mr. WOOD of Indiana: A bill (H. R. 15432) to correct the military record of William B. Young; to the Committee on Military Affairs.

By Mr. DILL: A bill (H. R. 15433) granting an increase of pension to Mrs. Amanda McHenry, wife of John N. McHenry; to the Committee on Invalid Pensions.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BARCHFELD: Petition of 138 citizens of Pittsburgh, Pa., favoring national prohibition; to the Committee on the Judiciary.

Also, papers to accompany House bill 15345, granting an increase of pension to Eli Hovis; to the Committee on Invalid Pensions.

By Mr. VAN DYKE: Petition of Minnesota State Sunday School convention, against appropriation for sectarian purposes; to the Committee on Indian Affairs.

## SENATE.

### SATURDAY, *May 6, 1916.*

*(Legislative day of Friday, May 5, 1916.)*

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

ADDRESS BY EX-SENATOR JOSEPH W. BAILEY (S. DOC. NO. 428).

Mr. SUTHERLAND. Mr. President, at the last meeting of the American Bar Association, held at Salt Lake City, Hon. Joseph W. Bailey, a former Member of this body, delivered an address on the subject of the American judiciary. It is a scholarly and timely contribution to that subject, and I ask unanimous consent that it may be printed as a Senate document.

The VICE PRESIDENT. Without objection, it is so ordered.

RIVER AND HARBOR APPROPRIATIONS.

Mr. CLARKE of Arkansas. I ask unanimous consent to present a report from the Committee on Commerce on the river and harbor appropriation bill.

The VICE PRESIDENT. Without objection, the report will be received.

Mr. CLARKE of Arkansas. From the Committee on Commerce I report back favorably with amendments the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, and I submit a report (No. 420) to accompany the bill. I hope to have the permission of the Senate to call up the bill for consideration on Tuesday next.

The VICE PRESIDENT. The bill will be placed on the calendar.

ARTICLES BY DR. ARTHUR MACDONALD.

Mr. GRONNA. I have here some articles written by Dr. Arthur MacDonald on War and Humanity, giving general attitude of many American citizens. I ask that it be printed as a Senate document.

Mr. SMOOT. I ask that it may go to the Committee on Printing.

Mr. GRONNA. I will say that I understand it will cost less than the $500 limit to print this matter.

Mr. SMOOT. I think it should go to the Committee on Printing.

Mr. GRONNA. Very well; let it go to that committee.

The VICE PRESIDENT. The matter will be referred to the Committee on Printing.

THE FOREIGN TRADE (S. DOC. NO. 426).

Mr. BANKHEAD. I ask for the regular order.

Mr. SIMMONS. Will the Senator from Alabama permit me a moment to make a request?

Mr. BANKHEAD. I yield to the Senator from North Carolina.

Mr. SIMMONS. On May 3 the Vice President laid before the Senate a communication from the chairman of the Federal Trade Commission, transmitting, pursuant to law, a summary of the facts and recommendations embodied in the detailed report of the commission's investigation into trade conditions in and with foreign countries where associations, combinations, or

other conditions may affect the foreign trade of the United States, which, with the accompanying paper, was referred to the Committee on Finance and ordered to be printed.

That report, Mr. President, deals with matters that probably will suggest some amendments to the antitrust laws of the country, and I would suggest that probably the report ought to be referred to the Committee on the Judiciary, and I ask that the Committee on Finance be discharged from its further consideration and that it be referred to the Committee on the Judiciary.

The VICE PRESIDENT. Without objection, it is so ordered. House bill 7617 is before the Senate as in Committee of the Whole.

CALLING OF THE ROLL.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Hughes | Norris | Smoot |
| Bankhead | James | O'Gorman | Sterling |
| Brady | Johnson, Me. | Overman | Stone |
| Chamberlain | Johnson, S. Dak. | Page | Sutherland |
| Clapp | Kenyon | Pittman | Taggart |
| Clarke, Ark. | Kern | Poindexter | Thomas |
| Culberson | La Follette | Ransdell | Tillman |
| Curtis | Lane | Reed | Vardaman |
| Dillingham | Lodge | Shafroth | Wadsworth |
| Fall | Martin, Va. | Sheppard | Williams |
| Fletcher | Martine, N. J. | Sherman | Works |
| Gallinger | Myers | Simmons | |
| Gronna | Nelson | Smith, Ga. | |
| Hardwick | Newlands | Smith, S. C. | |

Mr. KERN. I desire to announce the unavoidable absence of the junior Senator from Illinois [Mr. LEWIS] on account of illness. This announcement may stand for the day.

Mr. MARTINE of New Jersey. I rise to announce the unavoidable absence of the Senator from Ohio [Mr. POMERENE] on public business, and also the absence on public business of the Senator from West Virginia [Mr. CHILTON].

Mr. JOHNSON of South Dakota. I wish to announce that the Senator from Wisconsin [Mr. HUSTING] is unavoidably absent. I desire this announcement to stand for the day.

Mr. GALLINGER. I desire to announce the unavoidable absence of the Senator from Maine [Mr. BURLEIGH] on account of serious illness in his family.

The VICE PRESIDENT. Fifty-three Senators have answered to the roll call. There is a quorum present.

HOMESTEADS IN ALASKA.

Mr. MYERS. Mr. President, on the 3d day of this month, on behalf of the Senate Committee on Public Lands, I made a favorable report upon the bill (H. R. 228) to amend the United States homestead law in its application to Alaska, and for other purposes. The report is erroneous in that it fails to incorporate an amendment that the committee ordered incorporated. I ask unanimous consent that the bill may be recommitted to the Committee on Public Lands in order that a corrected report may be submitted.

The VICE PRESIDENT. Is there objection? The Chair hears none.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 10668. An act to repeal section 4 of the act of Congress approved June 11, 1906, known as the forest-homestead act, and for other purposes; and

H. R. 15005. An act to appropriate $200,000 for training the Organized Militia of any State, Territory, or of the District of Columbia.

The message also announced that the House further insists upon its disagreement to the amendments of the Senate to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917; agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. CARTER of Oklahoma, Mr. HAYDEN, and Mr. CAMPBELL managers at the conference on the part of the House.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice President:

H. R. 759. An act to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof; and

H. R. 12207. An act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1917, and for other purposes.

GOOD ROADS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7617) to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter.

Mr. WORKS. I offer the following amendment.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to amend by adding after section 3 of the committee amendment the following:

SEC. —. That the Secretary of the Treasury is hereby authorized and directed to acquire title for the Government, by purchase or condemnation, of all property fronting on Pennsylvania Avenue, in the city of Washington, between the Capitol and the Treasury Building, not already owned by the Government, on the north and south sides thereof, for the erection thereon of such public buildings as are now and may hereafter be needed by the Government for governmental purposes and for the parking and beautification of said avenue.

SEC. —. That hereafter all public buildings of the Government shall be constructed on said avenue so long as there is space sufficient for that purpose, and not elsewhere.

SEC. —. That the sum of $100,000,000, or so much thereof as may be necessary for the purpose of acquiring such property, is hereby appropriated and made presently available therefor.

Mr. WORKS. Mr. President, I have proposed three amendments to the pending bill, the principal object of which is that the District of Columbia may share to some extent in the money that we are proposing to take out of the National Treasury. One of them is the amendment which has just been read. Another is an amendment proposing to appropriate $600,000 for the purpose of condemning and acquiring title to the land in what is known as Snow Court, one of the most notorious slums in the city of Washington. Another is an amendment proposing to appropriate $10,000,000 for the purpose of clearing out all the slums in the city of Washington and constructing therein sanitary buildings to be rented to the poor of the city.

My genial friend, the Senator from Alabama [Mr. BANKHEAD], because of my introduction of these amendments, has referred to me as a practical joker. Mr. President, it may be a joke to present to the Senate of the United States a plain, practical business proposition without money in it to the States and without votes to the politicians. It may be a joke to endeavor to rehabilitate the great national thoroughfare in the Capital of the Nation and at the same time provide for the construction of a building that the Government needs as a pure matter of economy. It may be a joke to endeavor to make the city of Washington, the Capital of this Nation, clean and decent and respectable by the appropriation of a small sum of money compared with the amount that is proposed to be given here to the States. It may not be a practical joke to extract from the Treasury of the United States under false pretenses $75,000,000 to be distributed to the States, which are no more entitled to that money under the Constitution than I am.

The District of Columbia has no representation in either House of Congress. There is no one here to speak especially for the interests of the District. We say, of course, that all of us represent the District of Columbia because it belongs to the United States and is under the exclusive jurisdiction of Congress; but if any Member of this body could go out into this city and see the things that I have seen, he would come to the conclusion that the District of Columbia is being very poorly represented in Congress.

I am not now going to discuss the two amendments that have not yet been offered, but I shall address myself solely to the proposition of appropriating money for the purpose of acquiring the lands on Pennsylvania Avenue to be used for the construction of buildings of the Government that are now actually needed. I think any Member of this body who goes down and takes a look at Pennsylvania Avenue will be ashamed of the conditions that exist there. It is the one great avenue that is intended to connect the Capitol and the White House. It has fallen into neglect. What buildings have been constructed by the Government have not been constructed along the line of this thoroughfare where I think they should have been erected, and a great many of them that are needed have not been constructed at all.

We are to-day paying something like $700,000 a year rent for buildings in which to house the different departments and bureaus of the Government. We are adding to the number of such bureaus constantly, requiring more and more room. Leaving out all sentimental questions and looking at it from a purely business point of view, it would be a matter of economy to acquire these properties along the line of Pennsylvania Avenue on which to construct our own buildings. It is not only a question of the saving of rent. The buildings that are now being occupied are so inadequate that the renting system obstructs materially the efficient working of the force of the Government; and we are losing money every day in that way, to say nothing about the rent.

I know it will be said that this is not the place to legislate about Pennsylvania Avenue; but why not? It is just as appropriate to apply some of the money of the Government to the improvement of this street as it is to apply the money to the building of a road in California. Pennsylvania Avenue falls under the definition of a post road, as set out in this bill, except that it is not rural; but if you go down and look at it, you will think it comes very near filling the latter requirement.

Mr. President, I had the honor to be a member of the joint committee of the two Houses to investigate the financial difficulties between the District of Columbia and the National Government. While it was not strictly within the province of that committee, in connection with it I took upon myself to make a personal examination and investigation of some of the conditions existing in the city of Washington and in the District of Columbia. Taking a broad view of it, it was entirely legitimate that that should be taken into account by the committee, because one of the questions involved was the efficiency of the service that is being rendered here in the District of Columbia under the half-and-half system that was then under investigation. Amongst other things, I took into account the condition of Pennsylvania Avenue, what was due to the Government and the District of Columbia in dealing with that great street, and I want to read to the Senate very briefly what I said on that subject in the separate report that I filed at that time. After referring in a general way to the condition of the streets, I said this about Pennsylvania Avenue:

I take up Pennsylvania Avenue separately, because it is unique and deserves especial attention and more heroic treatment. If one who had read about the magnificent thoroughfare of the National Capital could see it for the first time from the steps of the Capitol Building looking down toward the White House his illusions about it would be rudely dispelled. Aside from its extreme width, and, in that respect, imposing appearance, there is nothing in the Avenue to excite the pride of an American citizen. It was laid out and intended as an imposing and superb thoroughfare between the Capitol Building and the White House, something like a mile apart. But, unfortunately, the Government neglected to preserve in itself the title to the lands bordering on the street, and it went into the hands of private owners, and the street is lined wih cheap and unsightly frame buildings, many of which have fallen into decay and become nothing less than disreputable. They are occupied as small stores, many of them second-hand and most unattractive, with here and there, at frequent intervals, a liquor saloon, often none too respectable. And now the finishing touch is added by making the center of the Avenue a parking place for automobiles. This is the national thoroughfare which the country reads about.

Are we to leave it in that condition indefinitely? Perish the thought. But what is to be done about it? Do with it just what was intended, undoubtedly, in the beginning. Make it a national thoroughfare by condemning every foot of the land bordering on the Avenue between the Capitol and the Treasury Building for a depth sufficient for the purpose and construct upon it the public buildings so much needed for the housing of the several departments of the Government. There would be plenty of room for them all, I have no doubt, and leave room for parks between them for the length of the street. In this way payments of large rents in the city for Government purposes would be avoided, the efficiency of the service would be greatly increased, and the employees of the Government now working uncomfortably in small, overcrowded, insanitary rooms would be properly housed and able to render the best possible service, and Pennsylvania Avenue be made the most beautiful as well as the most imposing municipal thoroughfare in the world.

This could not, of course, be done out of the current revenues. It should be done by issuing long-time bonds for the improvement of the Capital. It should include an amount sufficient to banish the slums and erect model sanitary houses on the ground they now occupy and in all other ways put the city in good sanitary condition. This would not only enhance the beauty of the city and remove the plague spots that now breed crime and vice and disease, but in the long run it would be an economy.

At the present time the department buildings are scattered about the city in many places, many of them rented and poorly fitted for the purpose, difficult of access and communication by people doing business with the Government, and inconvenient in the transaction of business by the officers and employees themselves. It has been suggested that the Government acquire the south side of the street for its buildings. If this should be done and the buildings constructed, the street with magnificent and imposing buildings on one side and the one and two story frame shacks ready to collapse with age on the other, it would be an amazing spectacle.

Unfortunately, the Government buildings have not been located together but have been scattered about the city. This was a great mistake and should be corrected as soon as possible by bringing them together on this one avenue, thus making the buildings a continuous grouping from the Capitol to the White House. The Book of Estimates for last year showed that we were then paying nearly $600,000 a year for rented buildings The amount, I understand, will increase this year, and continue to grow in amount for the years to come unless we construct our own buildings. This is exceedingly poor economy and bad business policy.

The amount of rent that we are paying, Mr. President, has already increased very largely, even in this short time, and, as I said a while ago, the rents are bound to continue to increase.

Now, I want to say that I have not offered this amendment with any great hope that it will be adopted and made a part of this measure. It will be said, as I suggested a while ago, that it does not properly belong in this bill. Some Senator may conceive the idea that, if it is attached to the bill, it will endanger the bill itself. I am not offering the amendment with any purpose of that kind, though I should not regret it if the bill should be defeated; but, Mr. President, I have taken this opportunity to call the attention of the Senate of the United States to one of the conditions that exist that we ought to take into serious account.

The Senator from Vermont [Mr. DILLINGHAM] asks to what extent we have acquired property on Pennsylvania Avenue. I am not able to answer that question. There has been a part of that property up near the Treasury Building that has already been acquired for the purpose of constructing some of the public buildings.

Mr. BANKHEAD. Mr. President, if the Senator from California will permit me, I think I can answer the question asked by the Senator from Vermont.

Mr. WORKS. I shall be very glad if the Senator from Alabama will do so.

Mr. BANKHEAD. The Government has purchased certain land, beginning on Fifteenth Street, I believe, on the east of the White House Grounds, including three squares on the south side of Pennsylvania Avenue.

Mr. WORKS. But for some unaccountable reason—I do not know why—the Government is now constructing one of its important buildings elsewhere. I have always felt, and felt very strongly, that the Government buildings should be congregated upon this one Avenue, as a matter of convenience, to say nothing else, of communication between the different departments of the Government. It would be an excellent thing.

Mr. NELSON. Mr. President, if the Senator will permit me, perhaps he is not aware of the course of old Tiber Creek, a stream which ran across the foot of the Capitol Grounds and through the area on the south side of Pennsylvania Avenue. If we constructed buildings along there, we would find difficulty, as was found in the case of the Post Office Department Building, for they would be erected in what was formerly swamp. If you examine the old plats of the city of Washington, you will find that there was a canal which ran down there right through the Center Market. If you utilized that area wisely, you should set out rows of Lombardy poplars there instead of erecting public buildings along that canal.

Mr. WORKS. Mr. President, that is a very small consideration, and those things are very easily overcome. Some large buildings have already been erected on that street.

Mr. OVERMAN. Mr. President, I want to say to the Senator that the Senate has, two or three times at least, expressed itself in favor of buying all the property on the south side of Pennsylvania Avenue and putting up public buildings there.

Mr. WORKS. That was before I came to the Senate.

Mr. OVERMAN. That was a hobby, if I may use the expression, of the late Senator Heyburn, of Idaho; and I think he secured the passage through the Senate of such a bill two or three times.

Mr. WORKS. The Senate talking about doing something and actually doing it are two quite different things. We talk about a good many matters here which are never accomplished.

Mr. SHAFROTH. Mr. President, if the Senator will yield to me, I should like to make an observation at this point.

Mr. WORKS. I yield to the Senator.

Mr. SHAFROTH. In purchasing the ground between the Union Station and the Capitol several blocks which are beyond Delaware Avenue, upon which the Senate Office Building is located, have been acquired, and I have understood that on three of those blocks it was intended that fine public buildings should be erected. I understand that was the ultimate desire of many when it was concluded to purchase that ground, and it seems to me that we ought to occupy some of the ground we already own instead of acquiring more ground.

Mr. WORKS. Well, Mr. President, I do not know how that may be. I am going to speak of that after a while, but I supposed all of the ground that was acquired between here and

the Union Station was intended for park purposes, and I myself should think it would be a great mistake to locate any of the Government buildings away off there by themselves, involving difficulty of communication with other departments of the Government. I am very strongly impressed with the belief that the proper thing to do, as a matter of economy, to say nothing about anything else, leaving out of the question the desirability of building up this great street, that the Government buildings ought to be brought together in that one place on that street.

Mr. BANKHEAD. Mr. President, I simply desire to call the attention of the Senate to the provisions of this proposed amendment. It proposes to pay $100,000,000 for the purpose of acquiring both sides of Pennsylvania Avenue from the Peace Monument to the Treasury Department, including, of course, many of the best and most costly hotels in the city, amongst others the New Willard Hotel, and all that. I am not going to argue this question. I am ready for a vote, and I hope the Senate will vote down the amendment.

Mr. VARDAMAN. Mr. President, I suggest that if we are going to pass this amendment in order to clean up the Capital we should move the Capitol, rather than spend a hundred million dollars in this way; and I join the Senator from Alabama in the suggestion that we vote on this question right now.

Mr. SHEPPARD. Mr. President, the Senator from California [Mr. WORKS] adverted to the fact that the District of Columbia was given no representation in Congress. I want to call his attention to the fact that the indifference on the part of Congress ceased the moment that the liquor traffic in the District of Columbia became involved. When the bill was introduced for prohibition in the District of Columbia gentlemen immediately showed great anxiety to have that particular question referred to the people of the District.

Mr. WORKS. Mr. President, I should prefer not to go into the question of the liquor traffic in connection with this matter. I know how earnestly the Senator from Texas is interested in that subject.

Mr. SHEPPARD. I merely wanted to emphasize the point the Senator was making.

Mr. WORKS. I think the Senator is perfectly right about that.

Mr. President, with respect to the amount that is mentioned in this amendment, it is a purely arbitrary amount. I have no means of knowing what amount of money would be necessary for the purpose; and the provision is that such part of it only shall be appropriated as is necessary for the purpose.

Mr. GALLINGER. Mr. President, I rise to ask the Senator from California a question concerning that feature of the matter. Has there been any estimate made as to what the probable cost will be under your amendment?

Mr. WORKS. No.

Mr. GALLINGER. Will the Senator permit me to call attention to some things that occurred in the Senate in relation to this subject before the Senator came here?

Mr. WORKS. I will be very glad to have the Senator do so.

Mr. GALLINGER. The late Senator from Idaho, Mr. Heyburn, who was my neighbor on the right in the Senate for a good many years, took a very active interest in pushing legislation to acquire the property on the south side of the Avenue. To me it has always seemed that the north side of Pennsylvania Avenue was rather more disreputable than the south side. I refer particularly to that portion from the Peace Monument extending to Sixth Street. I thought, if anything was to be done to clean up the Avenue and make it what it ought to be, that the property on the north side ought to be acquired, and the Senator includes that, I notice, in his amendment.

Mr. President, I will give chronologically what has happened on this subject prior to the present time.

On December 4, 1907, Senator Heyburn introduced a bill (S. 122, 60th Cong., 1st sess.) authorizing the purchase of grounds for the accommodation of public buildings for the use of the Government, which included all the south side of the Avenue from the Peace Monument to Fifteenth Street and certain other small tracts. The same Senator made a report from the Committee on Public Buildings and Grounds (Rept. No. 9) on the bill which he had introduced.

Senator Heyburn also made a supplemental report (Rept. 9, pt. 2). In that report he printed a letter from the Commissioners of the District of Columbia, giving a statement concerning the value of the property square by square, the value being $11,923,000 for the land and $6,460,000 for the improvements, making a total of $18,383,000. This amount not only included the value of the property on the south side of the Avenue, not then owned by the Government, but also detached pieces which were included in the bill. The value of the property, as submitted by the commissioners, was as follows:

| | Land. | Improvements. | Total. |
|---|---|---|---|
| Square 226 | $773,000 | $450,000 | $1,223,000 |
| Square 227 | 508,000 | 160,000 | 668,000 |
| Square 228 | 193,000 | 85,000 | 278,000 |
| Square 229 | 180,000 | 50,000 | 230,000 |
| Square 230 | 461,000 | 125,000 | 586,000 |
| Square 256 | 400,000 | 500,000 | 900,000 |
| Square 257 | 300,000 | 150,000 | 450,000 |
| Square 258 | 400,000 | 120,000 | 520,000 |
| Square 259 | 410,000 | 625,000 | 1,035,000 |
| Square 260 | 280,000 | 45,000 | 325,000 |
| Square 292 | 417,000 | 130,000 | 547,000 |
| Square 293 | 600,000 | 250,000 | 850,000 |
| Square 294 | 250,000 | 90,000 | 340,000 |
| Square 295 | 220,000 | 60,000 | 280,000 |
| Square 349 | 520,000 | 250,000 | 770,000 |
| Square 350 | 440,000 | 70,000 | 510,000 |
| Square 380 | 578,000 | 360,000 | 938,000 |
| Square 381 | 740,000 | 180,000 | 920,000 |
| Square 382 | 1,270,000 | 260,000 | 1,530,000 |
| Square 461 | 750,000 | 440,000 | 1,190,000 |
| Square 575 | 260,000 | 270,000 | 530,000 |
| Square 576 | 175,000 | 200,000 | 375,000 |
| Reservation A | 403,000 | 425,000 | 828,000 |
| Reservation B | 600,000 | 600,000 | 1,200,000 |
| Reservation C | 300,000 | 175,000 | 475,000 |
| Reservation D | 275,000 | 240,000 | 515,000 |
| Reservation 12 | 220,000 | 150,000 | 370,000 |
| Total | 11,923,000 | 6,460,000 | 18,383,000 |

Mr. SUTHERLAND. Mr. President, did that include only one tier of blocks, or did it take the property running back to the Mall?

Mr. GALLINGER. It took the property back to the Mall, as I understand. That was Senator Heyburn's scheme. That bill passed the Senate April 15, 1908, but failed of action in the House.

In the Sixty-first Congress, first session—March 22, 1909—Senator Heyburn introduced another bill of a similar nature, which was favorably reported from the Committee on Public Buildings and Grounds—Report No. 285, with map—and which passed the Senate, again failing in the House.

In the Sixty-second Congress, first session, Senator Heyburn introduced the same bill, which was approved by the Commissioners of the District of Columbia, and was favorably reported and passed the Senate May 23, 1912, but it met the same fate as the previous bills had when it reached the House of Representatives.

In this bill the sum of $15,000,000 was named, the amount in former bills being $10,000,000, which the commissioners represented would necessarily be inadequate.

On April 24, 1913, the Senator from Washington [Mr. JONES] introduced a joint resolution (S. J. Res. 28) authorizing the appointment by the President of a board to ascertain and report to Congress the probable cost of acquiring land on both sides of the Avenue from Eleventh Street east to the Capitol Grounds, as sites for buildings, but no action was taken on the resolution.

Nothing has been heard of the matter until the Senator from Calafornia presented it in the form of the amendment which is now under consideration. I will venture to say that whatever the fate of the pending amendment may be, the amount named in the amendment offered by the Senator from California—$100,000,000—for the acquisition of the property on both sides of the street, is very much in excess of what it would actually cost. The commissioners made a very careful estimate in 1908 (S. Doc. 421, 60th Cong., 1st sess.) and I assume that they made personal inquiry of the owners of the several properties at that time, the amount being, as above stated, $18,383,000.

Mr. President, that is all I care to say. I was impressed with the feeling that probably the Senator had made only an approximate estimate as to the value, which I feel sure is far above the real value of the property.

Mr. SUTHERLAND. Mr. President, the late Senator from Idaho, Mr. Heyburn, as the Senator from New Hampshire has just said, introduced a bill, as I recall, on three different occasions——

Mr. GALLINGER. Three occasions; yes.

Mr. SUTHERLAND. By which he sought to have the Government acquire the south side of Pennsylvania Avenue. It was a subject which that Senator had very much at heart, and a project which he prosecuted with his usual zeal. I became a convert to his position with reference to it, and I believe today that we could not do a wiser thing than to obtain the title

to all of the land on the south side of Pennsylvania Avenue. I am not, as at present advised, quite in favor of going as far as this amendment proposes, and acquiring in addition the lands upon the north side of the Avenue.

The thought about it has been this: The Government of the United States already owns quite a proportion—I am not sure of the exact proportion, but perhaps a third in area—of the lands upon the south side of the Avenue between the Peace Monument and the Treasury Building. The Government owns, I think, nothing on the north side of the Avenue. On the north side of the Avenue there are some very valuable buildings, including the Willard Hotel and the Raleigh Hotel and other buildings that have been very expensive, so that the cost of acquiring the lands on the north side of the Avenue would be many times the cost of the lands on the south side.

Mr. GALLINGER. Mr. President, if the Senator will permit me——

Mr. SUTHERLAND. Yes.

Mr. GALLINGER. Having taken a good deal of interest in this matter in former years, my thought was that if we wanted to make Pennsylvania Avenue a decent thoroughfare, which it is not now, it might be well for the Government to acquire the land on the north side of the Avenue from First to Sixth Streets, and that would not include the expensive buildings. It would take in the shacks and the rum shops and buildings of that kind.

Mr. SUTHERLAND. How deep would the Senator propose to go?

Mr. GALLINGER. I think it ought to run back to the next street.

Mr. SUTHERLAND. That is, a single tier of blocks?

Mr. GALLINGER. A single tier of blocks; yes.

Mr. WORKS. I think the Senator is correct in his view that we probably ought not to go beyond Sixth Street; and I shall be quite willing to modify my amendment to that extent, although if in the future it should become necessary, in order to furnish room for the public buildings, I should then prefer to go farther, in order to bring them together at that point and on that street.

Mr. SUTHERLAND. My judgment about it has been that if we would acquire the south side of Pennsylvania Avenue for it full length, from the Peace Monument to the Treasury Building, and the depth back to the Mall, the south side of the street could be built up in the course of some years—it would require probably 15 or 20 years before it would be finally completed—but that side would be occupied by magnificent buildings, with sufficient ground about them to add to their beauty and dignity and nothing back of them in the way of poor buildings to detract from the beauty; and that if we did that, very naturally, in the course of time the north side of the Avenue would be taken over by people who would put up handsome business houses.

If the Senator has ever been in Edinburgh and seen Princes Street, he will understand, in a way, the picture that is in my own mind with reference to what Pennsylvania Avenue might be made. Princes Street, in Edinburgh, I think is one of the most beautiful streets in the world. I am not clear about the points of the compass there, but, as I recall, the east side of Princes Street is open, except that between the two stations—the Caledonian and the North British—there are occasionally handsome monuments. That side of the street gives upon that great depression along which the railroads run, which are so concealed by shrubbery and banks that one standing in the street does not observe them. But because Princes Street has been made such a handsome avenue the west side of the street is occupied by the handsomest business houses in Edinburgh. I think the same result would follow here, and that if we occupy the south side of the street for public buildings the north side of the street would very naturally build up in that way.

I agree with the Senator from California that it is simply outrageous that a great Government like this should be housing its offices in rented buildings, inconvenient, liable to be burned down at any time—because few of those that are occupied are fireproof or anywhere near approximately fireproof. We are paying, as the Senator says, something over $600,000 a year in rentals for those buildings; and it is not in keeping with the dignity of a great Government like this, which represents a hundred million people, here in the Capital of the Nation, that it should be peddling out its offices all over the city in inconvenient structures that are likely to be burned down at any time.

We made provision, as I remember, for three buildings some years ago, and yet apparently nothing has been done by the Treasury Department to put them up. We made provision more than three years ago for joining these two parks, the park along the Potomac River and Rock Creek Park. We authorized it to be done, and directed it to be done; and yet, so far as I know, no steps have been taken to do it. I do not know how long it would be, if we should provide for this, that, with the present administration in power, before anything would be done to carry it out, but I should like to see an attempt made. I, for one, would like to support the amendment of the Senator, if he would modify it so as to provide that the Government should acquire the south side of Pennsylvania Avenue, and that the sum appropriated should be $15,000,000, or so much thereof as may be necessary.

Mr. NELSON. Mr. President, it may seem a little foolish to take up the time of the Senate on this question, but the remarks made are of such a peculiar character that I can not help but make some comments on them.

It is one thing to acquire the land on the south side of the Avenue and add it to the Mall. That is one thing; but, when you talk about putting all our public buildings in a row there, you are simply asking us to put our buildings in the lowest and swampiest ground in the whole city of Washington. If you will look at the old maps of the city you will find that a stream came in from the north down at the foot of Capitol Hill. It is said that in old times there was a bridge across here, and that sometimes, when Senators had been in session a long time, they found it difficult to cross that bridge. [Laughter.]

Mr. SUTHERLAND. Why?

Mr. NELSON. That stream was known as the Tiber. It was deflected at the foot of Capitol Hill, and a canal ran clear down from there—you will find the end of it somewhere down near the Peace Monument—through where the Center Market is, through the back end of the site of the Post Office Department building; and it was all a swamp and a canal down there. Then, as you went down, there were two streams that came across the hill and joined it, one near Seventh Street and another up this way, and the whole territory was nothing but a swamp.

Look at the Post Office Department building? Why, it puts you in mind of a monastery building in the Middle Ages, away down there; and if you go and look at the flood records in Washington before they improved the Potomac you will find that the Potomac waters were away back, so that they would get into the basement of the Post Office Department building. I have heard it rumored that it was the influence of the Star and the Post that got that big building erected down there. I had always supposed that if you wanted buildings of architectural beauty and buildings that embodied the Grecian style of architecture, like the Corinthian and other columns, you would like to have the buildings on elevated ground and not built in a mudhole or a swamp. If you buy up the ground on the south side of the Avenue, I would suggest to Senators that it would be a good plan to plant a row of Lombardy poplars there, instead of putting all our public buildings down in that swamp.

Why should we go to work and buy up buildings and then tear them down? I want to call the Senator's attention to the south side of the Capitol. Did you ever, as you came up Capitol Hill near what is called the Butler Building, look over that territory? There is a lot of rough ground, hard-looking ground, that needs care. That is what we ought to look after—improving the south side of the Capitol; but, unfortunately, there are not so many buildings on that to be sold to the Government as there are in these other localities.

Here we have been buying blocks and tearing down buildings to make a beautiful place between the Capitol and the Union Station. Why do we not do something on the south side of the Capitol as you come up that hill, where there are only a few scattering buildings, and where, if anywhere, an improvement is needed to make the Capitol look well?

Senators talk about renting public buildings. Well, there is something in the wind. I never could get at it. We used to own a building on the west side of the Riggs Bank, between that and Lafayette Square. The Department of Justice occupied it. It was bought for the purpose of putting a department building on it. They bought it, and the department occupied it for a little while, and then by and by they tore it down, and the Department of Justice found quarters in a residence away below here somewhere, farther in the northwest part of the city, and the piece of ground from which the building was removed lies there unused and vacant.

If you want a place for the Department of Justice, where you will have the Supreme Court and the Law Library accessible to Congress, the place to put it is here on Capitol Hill, right across from the Library of Congress, on the north side of East Capitol Street. If you would build up that square, and locate the Department of Justice there, so that the Supreme Court and the department and the Law Library could all be

there together, you would have one of the finest places in the city of Washington, and, more than that, you would have the Law Library accessible here to Congress.

Mr. CLAPP. Mr. President, if my colleague will pardon me, in addition to that you would then have the Capitol, the House Office Building, the Senate Office Building, the Library, and the building the Senator refers to grouped as the basis of a system—something that is absolutely lacking to-day in the location of the public buildings.

Mr. NELSON. There is a good site on which to put a building, instead of going down into a swamp on Pennsylvania Avenue.

Mr. WORKS. Mr. President, my good friend the Senator from Minnesota is evidently living in the dim past. He is talking about Washington as it was 50 or 100 years ago. I suppose he was here 50 years ago, but not 100. Those conditions do not exist on Pennsylvania Avenue at the present time. The objection he makes as to the location may have some force, but not what he says about the swamps, because, I am glad to say, the swamps no longer exist. It cost the Government a good deal of money to rid itself of that condition; but there is no reason founded on any such statement as that why these buildings should not be located on Pennsylvania Avenue.

The VICE PRESIDENT. The question is on the amendment of the Senator from California to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. WORKS. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to amend by adding, after section 3 of the committee amendment, the following:

SEC. —. That square 28 of the city of Washington, D. C., because of its insanitary condition, the character and quality of its buildings, and their dilapidated and insanitary condition, is hereby declared to be dangerous to the public health, detrimental to public morals and the public safety, and a public nuisance.

SEC. —. That the Commissioners of the District of Columbia are hereby authorized and directed to acquire for the Government of the United States, by purchase or condemnation, the title to said square for the purpose of razing the buildings situate thereon and constructing and maintaining thereon, as hereinafter provided, sanitary dwelling houses for the use of tenants.

SEC. —. That upon acquiring title to said property the said commissioners shall cause the buildings thereon to be removed, the said square replatted with ample streets and passageways and means of ingress and egress, and construct thereon model sanitary houses of moderate size to be rented by the Government to the poor and the laboring classes at reasonable and moderate rentals.

SEC. — That the Government shall hold and retain title to said square for the purposes above mentioned, and the improvement of the sanitary condition of the said city of Washington, and the said commissioners shall provide such supervision, control, and inspection of said property as to make and continuously maintain it in a sanitary and healthful condition, free as far as possible from immorality and crime.

SEC. —. That there is hereby appropriated, of the moneys in the Treasury not otherwise appropriated, the sum of $600,000, or so much thereof as may be necessary, to carry into effect the provisions of this act.

Mr. WORKS. Mr. President, slum conditions such as we have in Washington have presented one of the greatest problems that has to be dealt with in city life. Whether the Government in this instance should take hold of a matter of this kind and furnish the relief that is so much needed is a question about which people will greatly differ. It has been handled that way by other countries, and handled successfully. We have endeavored here in Washington to deal with it in an entirely different and in an ineffective and inefficient way.

I suppose there are very few Members of this body who have any realization of what the actual conditions are right here in the Capital of the Nation, where they spend most of each year. While I was investigating the other matters to which I have referred, I visited a number of these so-called courts, better named slums. I spent most of the day in going about and witnessing the conditions, and I went home heartsick at what I saw that day.

I do not know, Mr. President, how much attention Senators have given to this subject. It seems to me to be an exceedingly important one. It affects not only the poor people who are compelled to live in these places, but it affects the whole city of Washington; yes, it affects the good name and credit of this whole Nation, that such conditions as I have witnessed here should exist for a day in the Capital of the Nation.

The District of Columbia is under the absolute control and jurisdiction of the Congress of the United States. It may deal directly with this question. There is no reason why it should not take hold of it in an effective way and rid the District of Columbia of the conditions that exist.

It is not a question of the want of money. It is not going to be a very expensive process. It is going to be an economical one because it will save us much of the expense in the prosecution and care for criminals and the insane, and will relieve the city of much of the disease that now exists coming out of these cesspools of vice and crime.

That we ought not to hesitate about the expenditure of the small amount of money that is called for by this amendment, let me call your attention in a very brief way to some of the expenditures that we are proposing to make and some that we have already made, not for the benefit of the District of Columbia but for the outside. Take, for example, the bill providing for a vocational school, a very excellent thing to be brought about if it can be done properly by the Government. We propose to expend $14,250,000 at the beginning and $3,000,000 a year thereafter perpetually for that purpose.

For the Mississippi floods, by a bill that has already passed the House of Representatives, to expend $45,000,000.

We are proposing to expend in two or three of the States $4,000,000 for the purpose of relieving the citrus fruit growers of those States from the effect of the disease of the tree.

We have just passed a bill through both Houses of Congress appropriating $1,000,000 for the purpose of constructing a bridge across the Potomac. We are proposing to build what is called a memorial bridge across the Potomac to cost something like $4,000,000, and that bridge will undoubtedly be very shortly built.

The Public Health Service is making surveys, as they call it, of the counties in the States at an expense of $6,000 a county. They have already made the survey of 9 of them, I believe, and expect at least to expend money enough to make the survey of 40 counties in different parts of the States, making up a cost of $24,000 for that purpose.

Mr. President, we have spent for this so-called Capitol Park to buy those lands between the Capitol and the Union Station and for the removal of those buildings more than $4,300,000.

It does seem to me that we might spend the small sum this amendment calls for—only $600,000 of expenditure—for the purpose of relieving the city from the conditions that I have mentioned.

In dealing with this question I took it up in the report I made and to which I have called attention, and which, I presume, has been read by very few Senators. Therefore I am now going to impose upon as many of them as will remain here long enough by reading some portions of that report, because I think it is something that Senators ought to know about, if they do not. I am not going to read it all, but I ask leave to insert, after reading extracts from it, that portion of it relating to this particular subject.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. WORKS. I am reading it, Mr. President, partly for the reason that I can present my views upon it more logically and in less time this way than to undertake it orally.

"THE SLUMS.

"The American people want their Capital to be clean, decent, respectable, and healthful as well as beautiful on the outside. It has fallen far below this standard under a system of government where Congress can shift its responsibility onto the District of Columbia, a spineless and irresponsible municipal body. Under this system the slums, the red-light district, the saloons and unwholesome and insanitary conditions have been allowed to flourish. Crime, vice, corruption, and death have devastated portions of the city that could, and should, have been protected from such conditions. From time to time feeble and ineffectual efforts have been made through inadequate laws to remedy these evils. The better class of people in the District have done the best they could with the insufficient weapons provided them by Congress to ameliorate the conditions and protect the poor people who suffer from them the most, but to a discouraging degree it has been a hopeless task. It is not wholly the fault of the people of the District that these conditions continue down to the present day. Neither is it the fault of the District officers. The chief reason for it is that Congress has failed to enact the laws and appropriate the money necessary to abate these crying evils, though often urged to do so.

"In his message to the Fifty-ninth Congress President Roosevelt said:

"The National Government has control of the District of Columbia and should see to it that the city of Washington is made a model city in all respects, both as regards parks, public playgrounds, proper regulation of the system of housing so as to do away with the evils of alley tenements, a proper system of education, a proper system of dealing with truancy and juvenile offenders, a proper handling of the charitable work of the District. Moreover, there should be proper factory laws to prevent all abuses in the employment of women and children in the District.

"Pursuant to this recommendation the President appointed James Bronson Reynolds, of New York, to investigate conditions in the District and report to him with such recommendations as

suggested themselves to him. In his letter asking Mr. Reynolds to act as adviser in the matter, he said:

"I wish your investigation to terminate in definite, practical recommendations to me with reference to the city's present needs and most notable defects, measured by the highest standards of good administration in this country and elsewhere.

"I shall call attention to Mr. Reynolds's report and recommendations a little later. President Taft, dealing with this subject in his message to Congress of December 6, 1910, has this to say:

"Fair as Washington seems, with her beautiful streets and shade trees, and free, as the expanse of territory which she occupies would seem to make her, from slums and insanitary congestion of population, there are centers in the interior of squares where the very poor, and the criminal classes as well, huddle together in filth and noisome surroundings, and it is of primary importance that these nuclei of disease and suffering and vice should be removed and that there should be substituted for them small parks as breathing spaces and model tenements, having sufficient air space and meeting other hygienic requirements. The estimate for the reform of Willow Tree Alley, the worst of these places in the city, is the beginning of a movement that ought to attract the earnest attention and support of Congress, for Congress can not escape its responsibility for the existence of these human pestholes.

"In pursuance of recommendations made by Mr. Reynolds, President Roosevelt appointed a commission of 15 of the leading citizens of Washington to deal with the subject.

"That commission made a full and exhaustive report of conditions with its recommendations. This report first quoted from Mr. Reynolds's report as follows."

Then follows a report made by the commission that was appointed by President Roosevelt to investigate these conditions, which I hope Senators will read.

Mr. KENYON. May I ask the Senator a question? Where is square 28 which is designated in the Senator's amendment?

Mr. WORKS. It is about 5 minutes' walk or less from the White House in a northwesterly direction.

"The report of Mr. James Bronson Reynolds, referred to in the President's letter as the basis of his action, is as follows:

"REPORT OF THE HOUSING OF THE POOR IN THE DISTRICT OF COLUMBIA, ESPECIALLY IN RELATION TO INSIDE TENEMENTS.

"As you directed me to give particular attention to the housing problem, I visited and examined between 350 and 400 tenements, shacks, and small houses in various sections of Washington and Georgetown and inspected numerous alleys. I talked with their occupants and conferred with many citizens of the District, both white and colored, including representatives of trade-unions, to obtain their views regarding housing conditions.

"In my investigation I found three distinct problems—that of small houses, that of alley shacks and alley houses, and that of inside alleys. * * *

"I found nearly all the alley wooden shacks and small brick houses that I visited in a wretched condition. The wooden shacks, as a rule, might properly be condemned on structural grounds. Their yards were apparently storage places for refuse and filth; their water supply inadequate and badly placed, and the privies frequently only open boxes and in many instances without covers, although the latter are required by the health ordinance. I am glad to state that during the past year many of these box privies have been removed.

"I had conversation with the dwellers in these inside shacks, and the comments of many may be fairly summarized in the pathetic remark of an old colored woman who exclaimed, with reference to her neglected, filthy yard and privy: 'Why, my old marsa wouldn't ha' kep' his horses stabled in such a place.'

"No argument is needed to show that such ill-conditioned hovels are culture beds of disease, the germs of which may be carried far and wide by the flies which feed on the rotting garbage and excreta. Their number should be promptly ascertained and immediate steps taken for their complete elimination, and buildings constructed in their places should have proper sanitary appurtenances and should open either upon a highway or small street. * * *

"A particularly undesirable and menacing feature of the poor quarters of Washington is the inside alleys. These alleys are centers of disorder and crime, and they make possible the continuance of small communities uncontrolled by ordinary police inspection and unaffected by public observation and criticism. In my opinion all inside alleys, with the exception of service alleys, should be abolished, and a definite scheme for the accomplishment of this object should be adopted. * * *

"A law passed by the Congress in 1906 appropriated $50,000 for the expense of condemnation proceedings in the substitution of minor streets for alleys, but a recent decision of the Supreme Court of the District of Columbia has interposed fresh difficulties by declaring unconstitutional the assumption of the law that the entire cost of opening small streets as substitutes for alleys should be assessed upon the adjacent property owners. I am not prepared to make any specific recommendations to meet this new difficulty, but to urge that it be not allowed to prevent the abolition of inside alleys.

"The commission then proceeded to report the result of its own investigations, make recommendations, and point out the obstacles that prevented effective work, including reports of its subcommittees. From this long and exhaustive report I extract the following:

"A SERIOUS OBSTACLE TO THE CONVERSION OF ALLEYS INTO STREETS.

"The law passed July 22, 1892, and amended on August 24, 1894, prohibited the erection of dwellings in alleys less than 30 feet wide, and imposed restrictions which hindered the building of any more alley houses. It also provided for the conversion of alleys into minor streets, but nothing of importance seems to have been done under this law until the committee on improvement of housing conditions took the matter up a year or more ago with a demand that the change be made in certain typical alleys. This led the commissioners to appoint a committee of District officials to advise them as to the opening of minor streets, and cases were taken up as rapidly as they could be properly handled until, up to the present time, the opening of 12 such streets has been recommended. Two of these have been confirmed by the courts and three other cases are pending in court. The commissioners are proceeding as rapidly as possible in the other cases, but the conflict with private interests led to litigation and a decision by the Supreme Court of the United States on March 11 last, which declared it illegal to assess all the damages on certain property, as the law provides, unless it is found to be benefited to that extent. Although the commissioners are continuing to prepare and present cases they can not, under the law, approve the verdict in any case unless the benefits as assessed equal the damages and expenses. * * *

"Mr. Thompson, in his Housing Handbook, says of private enterprise:

"It has been assumed by thousands who ought to have known better that private enterprise, unstimulated, unregulated, unassisted, undirected, has hopelessly failed. It has left us face to face with a very deficient supply; it has given us the old slums; it often has given us only acres and acres of new slums in the suburbs, jerry-built 'brick boxes with slate lids' dumped down on dust heaps and put up mainly with the object of getting a quick profit in the few years which will elapse before they degenerate into slum dwellings almost as bad as the old ones in our midst. Where the new houses are well built and on good sites they are of an unsuitable type, and the rents are so unreasonably high as to be beyond the means of one family, so they have to be sublet to other families, and thus by overcrowding, with the increased wear and tear following in its train, they rapidly deteriorate and leave the housing of the mass of the people as bad in many respects as it was before. The product of private enterprise, then, is insufficient in quantity and inferior in quality. * * *

"In the report of the health officer for 1875 it was noted that during the year 699 houses were reported as unfit for human habitation and 198 condemned by the board. In 1876, 424 houses were reported and 371 condemned, and in the report of the board of health for 1877, page 46, we finds:

"'No meaner cabins for temporary or permanent shelter can be found than some our wretched poor are born and exist and die in, here at the Capital of the United States. And, strange as it may seem, none so mean that they have not an owner mean enough to charge rent for them. Down in the alleys, below grade, with combination roof of tar, felt, shingles, rags, tin, gravel, boards, and holes; floors damp and broken, walls begrimed by smoke and age, so domiciled are families, with all the dignity of tenants having rent to pay. The board has condemned 153 such during the past year and 958 during the past four years, of which probably 300 have been entirely demolished. But many owners still cling to the wrecks.

"'Our experience in dealing with filth, crowd poison, and disease among these people during the past four years has taught us that the great public economy, viz, the preservation of public health, is defeated by allowing these filthy, worthless, dependent classes of humanity to congregate in the alleys and byways out of sight, and therefore out of mind, until direful epidemic, incubated and nourished among them, spreads its black wings over the homes of the whole city. Better far to provide for the aged and sick in public institutions of charity, the vagrant in the chain gangs, let the cost be what it may, than to allow them to remain propagators of public disease, an incalculable expense to the District.'

"This report was made at the close of the year 1908."

Let me read what was said in an editorial in the Washington Post as coming from an English gentleman who was here in Washington at the time:

"WE HAVE SLUMS OF OUR OWN.

"An English gentleman, who is also a philanthropist and a student of sociology, has been looking into the slums of Washington. Ten years ago he visited the Capital, but on that occasion saw only our splendid public parks and beautiful private residences, just like a very large majority of Washingtonians and visitors. He returned to England convinced that Washington was the long-looked-for model city. Now he pays a second visit, and this time he goes behind the scenes. The result of the investigation is an amendment to the gentleman's original estimate. He finds that while our areas of squalor and degradation are not as numerous or so extensive as those of London they are in many instances much more appalling. On this point he says:

"'This time I came to see the worst that was to be seen, and it has been a revelation to me. I have seen rooms with half a dozen or more people living in them. I have seen buildings that would be condemned and torn down in London if they were inhabited only by a coster's donkey. Walls tumbling down, floors rotten, ceiling and walls falling in, little yards and outbuildings filled with rubbish and dirt, and absence of all sanitary arrangements. Within a stone's throw of the British Embassy, in an alley, there are hovels that are not fit for pigs to live in. Within the shadow of the Capitol there are others. On Factory Hill and in the holes around the canal in Georgetown there are frightful places full of filth and the direst poverty, where disease and crime must breed rapidly.'

"In December of that year Jacob Riis, in an address delivered at the First Congregational Church of Washington City, had this to say on the subject:

"I am not easily discouraged. But I confess I was surprised by the sights I have seen in the National Capital. You people of Washington have alley after alley filled with people you know nothing about. There are 298 such alleys. They tell me the death rate among the negro babies born in these alleys is 457 out of 1,000, and before they grow up to be 1 year old. Nearly one-half. Nowhere I have ever been in the civilized world have I heard of a death rate like that. Why, I have never seen places like those you have here. * * *

"To fight your slums you ought first of all to acquire the right to deal with the evil man who insists on murdering your babies. But you are sure to run against the old cry of 'property rights.' One-half your children die in hovels before they reach the age of 1 year, because the owners would rather have 25 per cent profit than save their souls. For such a condition there's no defense. Where does the blame lie? With the owners of the slums, you will probably say. But it lies equally with the community which permits such a shameful and sinful condition of affairs to exist within its borders.

"In commenting on this address, the Washington Times said:

"This indictment of a community which has no slums, this astounding disclosure of a condition not paralleled by the squalor of New York

or London or Paris, was the key last night to one of the most remarkable meetings held in Washington in many years. It was the judgment of a trained mind delivered after a trip through the Capital, and expressed with manly courage and plain speech to an assembly of representative Washingtonians.

"Under a more recent date the Times, in an extended editorial on slum conditions, said:

"* * * The thing needed here is such an education of the commercial instinct that owners of houses in the poorer neighborhoods will cease to expect extraordinary percentages on their investments. * * * It has been proved by investigation that the poor can be comfortably housed in clean, sanitary dwellings which will pay from 7 to 10 per cent on the investment if well managed. It has also been ascertained that the profits on much of the old-fashioned tenement and shanty property ran from 10 to 20 per cent, and even higher. This means that a few property owners are content to make money at the cost of the poor and at the risk of endangering the whole community through the disease and filth bred in their property. The way in which this kind of piracy can be avoided lies, first, in strictly enforced laws which will prevent overcrowding and insanitary buildings absolutely. * * *

"Now, let us see how far the conditions have improved since that time. During the year 1910 strenuous efforts were made to secure needed legislation and thus improve conditions which were fully disclosed at that time. Let me quote some of the things that were said of conditions as they then existed.

"In an article in the Washington Times we find the following, quoted in part from remarks of Mr. E. W. Oyster, one of the good citizens here, who has labored incessantly for better conditions in the District:

"Washington is honeycombed with filthy alleys, spreading disease in even the most beautiful parts of the city. Scattered through every residence section are slums more objectionable than the congested districts of New York or London. The health department is fighting a desperate losing battle against conditions too deep rooted to be repaired without public aid.

"This was the warning that E. W. Oyster, of the Petworth Citizens' Association, hurled from the pulpit of the People's Church, East Capitol Street, yesterday morning: * * *

"'The people who own property in these slums,' said Mr. Oyster, 'are selling their souls for cash. And the tragedy of it is they are selling the lives of their own carefully guarded children for cash.'

"'I shall not criticize the health department, because I believe Dr. Woodward is an efficient officer, alive to the situation, but terribly handicapped.

"'The public is strangely indifferent. As a special examiner of the Pension Bureau I have had occasion to visit these places, and if the public could see them as I have seen them and as Dr. Woodward and his assistants have seen them there would be a clamor for reform.

"'We are spending millions making Washington beautiful, and it is beautiful; but what is beauty when it is rotten to the core? * * *

"'As it is, the Capital of the Nation is a disgrace, with a death rate higher than even such cities as Denver, where we send our sick people too late to get them well.

"'Behind the great mansions lay hovels that are natural disease breeders. In every part of this city, in the northwest as well as the southeast, citizens are being murdered through their own lack of interest and their own ignorance of what is going on behind their backs.'"

I wish to read also the statement made by the senior Senator from Washington [Mr. JONES]. This statement was made on the 21st of September, 1914, in which he says:

"To those familiar with the alley conditions in the city of Washington no action in relation to the city's needs has been more imperatively needed than their elimination. If the good men and women knew of the actual conditions that exist within the shadow of the Nation's Capitol and realized the dangers to health and good morals that go out from them to all parts of the city, the demand for their eradication would be universal, except from those who profit from conditions that are a disgrace to civilization and Christianity. There would be no grumbling about how to do it, nor would the rights of humanity be sacrificed for the rights of property.

"When the situation is understood there is not much basis except greed for opposition to what has been done. No substantial injury will be suffered by anyone. Any dwelling house lawfully on these alleys now has been there more than 20 years. The real annual profits from this property have been from 10 to 14 per cent, and so the owners have been paid for it more than twice over during that time. No property is confiscated. All these owners have to do is to change the use of their property or the conditions of use.

"If they make the alleys conform to the conditions of the law, they can use their property for homes or business as they do to-day. They may be put to some expense; their excessive profits may be reduced; but their property will still be useful and profitable."

The Senator in that connection was referring to a law that was in existence in the District at that time but which has proved ineffectual, except in a slight degree. He says, further:

"Nothing more strikingly illustrates the power and influence of wealth and greed than the situation in regard to this alley problem. The public has been apathetic, business organizations composed of men of high standing have opposed this legislation unless the so-called rights of property owners are given the last farthing of protection, and the public health and safety and the pleadings of humanity have been subordinated to the financial interests of a few rapacious individuals.

"A few noble women interested themselves in the subject. They did splendid work, but it took the pleadings of a tender-hearted woman in an exalted place as she passed into the Valley of Death to bring action. Action has come, swift, sure, direct, complete, and the city of Washington without its slums and unspeakable alley conditions will be a fitting tribute and monument to the sweet nobility of Mrs. Wilson, who, from her exalted place as the first lady of the land, gave her time, strength, influence, and love for the happiness and comfort of the poor, lowly, and unfortunate, and whose last thoughts were not of her position, but of poor, suffering humanity.

"In a circular published by the Monday Evening Club of Washington, in October, 1912, Thomas Jesse Jones, chairman of the housing committee of that club, has this to say:

"After 40 years of agitation and search for ways and means to eliminate the blind alleys of Washington, they still remain to spread crime and disease throughout the beautiful city and its inhabitants. Two startling facts should have swept these alleys out of existence years ago. One out of every three children born in these byways dies within the first year of life. To make matters worse, these houses, with their diseases and crime, fill the center of many blocks rimmed with splendid houses and hotels.

"A glance at the map of Washington shows the dangerous proximity of these disease centers to the best residential blocks of the city.

"Some alleys have been eliminated to meet the demands of commercial enterprises. One disreputable place was converted into a minor street by assessments upon neighboring property equal to the cost involved in the change. Further application of this method was stopped by a Supreme Court decision in 1907 which cast doubt upon the legality of this form of assessment. At the last session of Congress $78,000 were voted for the change of the most notorious alley in the city into an inner park. This year the commissioners are planning to attack four more alleys.

"But in spite of all these accomplishments and plans there is no plan to attack the problem as a whole. A careful study of the whole situation leads to the conclusion that the final solution of the alley problem awaits the aroused public interest of the Nation. Let us add to our plans for a city beautiful, a demand for a city pure. Let the woman's clubs of the land, the civic associations of the Nation, and political organizations of every State and city unite in the call for a National Capital that shall be both beautiful without and clean within.

"In the same circular Mr. Wilbur Vincent Mallalieu says:

"The moral conditions in such a secluded inclosure as this court can scarcely be imagined. The police who have to do with it agree in speaking of its disreputable character. One officer has remarked that it is the worst place in the United States and that there is no crime unknown to it. The police blotter of the precinct shows that from March 1, 1911, to March 1, 1912, there were 114 arrests among the 204 men, women, and children living in Snow's Court. The charges were drunkenness, disorderly conduct, assault, unlawful assembly, larceny, cruelty to animals, and accusations relating to sexual crimes. Nor does this number of cases represent all the evil, because it does not take into account residents of Snow's Court arrested in other precincts, nor does it include the mischief done in Snow's Court by inhabitants of the neighboring alleys and residents of other parts of the city. * * *

"Snow's Court is a peril to our Capital's life. Only an awakened public conscience that shall demand the abolition of this and other pest centers will rid the city of very grave dangers.

"I might go on almost without limit quoting from the sayings of newspapers and others as of that date condemning conditions and suggesting remedies, but I desist.

"This showing should appeal strongly to Congress for relief.

"In a directory of the inhabited alleys, issued as late as 1912, it is said by way of introduction:

"There are 275 of these interior courts in the city. They contain 3,337 houses used for dwellings and approximately 16,000 persons. They are so widely distributed throughout the city that even the best residential sections are not free from their evil influences. The northwest, the largest of the four general sections of the city, has 161, or nearly three-fifths of all the alleys.

"The statement which follows shows the number of alleys and alley houses for each section of the city:

"Total, alleys, 275; houses, 3,337.
"Northwest, alleys, 161; houses, 1,940.
"Southwest, alleys, 58; houses, 705.
"Northeast, alleys, 30; houses, 336.
"Southeast, alleys, 26; houses, 356.

"The average for each alley is 12.1 houses and 58.1 persons. Each alley house has an average of 4.8 persons.

"Now let us see what Congress has done to remedy or ameliorate these fearful conditions. In a pamphlet published by the committee on housing of the woman's welfare department of the National Civic Federation in November, 1912, it was recited:

"This first health board, which had begun its work of alley reclamation so nobly, was abolished and the office of health officer created by an act of Congress, June 11, 1878. Right here the good work stopped, for in the legalization of the health ordinances in 1880, the section under which the health department acted in the condemnation of insanitary buildings was omitted. Whether this omission was an oversight or was secured by the influence of men whose money interests were at stake is not known, but it was 12 long years before any further remedial legislation was enacted and during those years no houses were condemned and new houses were constantly erected. Alley property had proved a paying investment and brick had succeeded wood as building material.

"In 1892 an act was passed by Congress authorizing the commissioners to 'condemn, open, extend, widen, or straighten alleys on the petition of the owners of more than one-half of the real estate in the square in which such alley is sought to be opened, and so forth.'

"Congress very magnaminously provided in this act that the whole of the expenses of such improvements should be assessed against the property owners in the square to be affected. By an act passed in 1894 the provisions of the act were extended to minor streets of a width of not less than 40 or more than 60 feet in width.

"It goes without saying that these statutes amounted to practically nothing as a means of ridding the city of the evils I am considering.

"By an act passed in 1906 a board for the condemnation of insanitary buildings was created and authorized to investigate and destroy or repair such buildings. This has resulted in the destruction of some of the buildings in these alleys, but it has wholly failed to reach the heart of the evil and has accomplished very little of good in respect of the slum evil.

"In 1914 an act was passed making it unlawful 'to erect, place, or construct any dwelling on any lot or parcel of ground fronting on an alley where such alley is less than 30 feet wide throughout its entire length and which does not run straight to and open on two of the streets bordering on the square and is not supplied with sewer, water mains, and gas and electric light.'

"The intention of this act was good and it is good, as far as it goes, but that is a very short distance. It only prevents the construction of additional buildings in some of the alleys, which amounts to but little as a means of putting an end to evils that have existed for many years.

"On March 3, 1915, another well-intentioned act was passed 'to incorporate the Ellen Wilson Memorial Homes.' This was a fitting memorial to a good woman whose generous and sympathetic heart went out in sympathy to the unfortunates who were denied the comforts of sanitary homes. But as a practical means of rendering the help she so much desired them to have, it will amount to nothing of permanent good. The work of correcting this great evil can not be delegated to private individuals. If it is ever done and done effectually it must be done by the Government and with its money, as I shall endeavor to point out further along.

"There was one other act that was effective to destroy one of the worst of these slum alleys. It was the act to condemn Willow Tree Alley. In this instance the Government generously put up half of the money necessary to accomplish this commendable result. But even this beneficent effort has largely failed of its object because instead of opening out the alley to the sunlight and the public gaze it has been turned into an inside or inclosed park that has become the rendezvous of criminals, vagabonds, and the immoral and viciously disposed of the poorer classes that calls for police and sanitary inspection and control which is not always supplied.

"In a report of the committee on improvement of existing houses and elimination of insanitary and alley houses of the President's Homes Commission, above mentioned, made December 8, 1908, some of the existing conditions are described and the difficulties of dealing with them effectually are pointed out.

"For example, in speaking of one of the objectionable alleys it is said:

> "One of these cases is Blagden's Alley, square 368, concerning which the chief of police and his associates on the board states in the recommendation for its conversion into a minor street that—
>
> "'Blagden's Alley, located between Ninth and Tenth and M and N Streets, contains 54 houses inhabited by a negro element who live in poverty and are a source of constant trouble. The dwellings are insanitary and dilapidated and afford shelter to 10 or 12 persons each.'
>
> "Another is square 620, as to which the board reported:
>
> "'Logan Place contains 35 insanitary dwellings, which are very much overcrowded and the inhabitants, being of a vicious character, give the police more or less trouble.'
>
> "Everyone familiar with these and other such labyrinths realizes the security from police supervision which they afford, to say nothing of other disadvantages which fully justified the recommendation of the board.

"Then it was said:

> "The principal difficulty with the present law seemed to be that it required that an amount equal to the damages found should be assessed as benefits, and that this should be assessed within a limited area. It was found that the law of 1906 in relation to the opening, extension, widening, or straightening of streets provided that the jury should assess benefits not only upon adjoining and abutting property but upon any and all other lots, pieces, or parcels of land which the jury might find to be benefited by the improvement. This apparently indicated a plan by which the amounts required could be raised in a more equitable manner, but as it seemed probable that in many cases the damages awarded would even then exceed the benefits which the jury might find, it seemed desirable to include also a provision by which a certain proportion of the awards could, if necessary, be paid out of some general fund.
>
> "One of the commissioners has suggested, when the Engineer Commissioner recommended that the work be stopped on account of the expense, that legislation might be urged providing that the alleys be opened and a certain proportion of the expense be paid by the United States Government, another proportion by the District government, and the remainder be assessed upon the property owners in the neighborhood of the improvement. Inasmuch as the deplorable conditions of the alleys have grown up under the administration of the District government, it seems proper that a considerable portion of the expense of removing them should be borne in this way by those responsible for them; but, as any payment for District purposes by the Federal Government would be contrary to the definite policy adopted by Congress, it did not seem advisable to the committee to advocate such a provision."

Mr. President, after quoting what I have read, and a number of other sayings in print and in speech, I make the following comment upon conditions in this report:

"The picture presented by the quotations I have made is not overdrawn. They do not disclose the whole truth. I have not depended on such information in reaching conclusions. I have examined enough of these slums and inspected enough of the dwellings located in them to speak of my own knowledge. The conditions are unspeakably bad. One who witnesses them for the first time is filled with a profound sense of pity and commiseration for the inmates, not unmixed with a feeling of shame and resentment that a great Nation like this, one of the richest and most powerful in the world, and possessed of almost unlimited resources, should allow such conditions to exist in its Capital City.

"Washington is a city of striking and abrupt contrasts. One may ride along a wide, well-paved, and attractive street lined with beautiful, almost palatial, homes and turn from it upon an old, worn-out, cobblestone or brick paved street lined with old, broken-down houses, many of them dilapidated and apparently unfit for human habitation. From that one can turn into what are politely called 'inhabited alleys,' 'courts,' 'places,' and find an appalling condition of poverty, destitution, and degradation. All this within a distance of two or three squares. Some of these alleys are blind alleys—that is to say, there is but one means of ingress and egress—and within is a labyrinth of alleys covering the entire inside of a square with a fringe of houses around the outside, some of them little better than those within except that they are easier of access.

"Within such a square you find the most degrading conditions. It is almost beyond belief that human beings can live under such conditions. They have very justly been called pestholes of crime and disease. And yet the owners of the shacks and tumbled-down and insanitary houses are making more money out of the rent of them than is being made by the owners of first-class houses and business blocks. The rents are exorbitantly high. As an example, I visited one little old brick shanty with two small rooms up and two down stairs, without running water in the house, out of repair, plaster off the walls, ill-lighted, and poorly ventilated. This house was occupied by two families, each with two rooms, for which they paid $7 a month each, or $14 for this little, dilapidated, insanitary house, that should have been condemned and destroyed under existing laws long since.

"There is but one effective remedy for this dreadful condition. The Government should condemn the whole square as a sanitary measure and police regulation, tear everything out of it, root and branch, replat the ground, construct upon it model sanitary houses, rent them to the poorer classes of people who now inhabit the slums, and then supervise and inspect them, thus compelling the tenants to keep them in a sanitary condition inside as well as out. It will be said that all this will cost a lot of money. Yes, it will; but it will be money much better spent than are millions and millions of dollars that we are now throwing away for useless and illegal purposes. The Agricultural Department is spending and wasting millions and millions of dollars on useless experiments and in work that should be done by the States and can not legitimately be done by the National Government. The Public Health Service is spending millions more in the States in violation of the spirit of the Constitution. We are spending hundreds of thousands of dollars for the cure of hogs and cattle in the States often where the Federal authorities have no lawful right or business to enter. We spend millions for agricultural colleges and vocational schools in the States, a work that belongs to and should be left to the States. We are spending money lavishly, extravagantly, and paternally in the States. The dividing lines between the States and the Federal Government are fast disappearing by the raid of the States on the National Treasury.

"The States are selling their jurisdiction and their sovereignty for money. We are centralizing our Government at an alarming rate and to a degree that I am afraid few appreciate, and for purely mercenary and selfish reasons. The pork barrel is kept well filled. We are spending millions of dollars for public buildings in the States that are not needed and for the improvement of so-called rivers and creeks that are of no public use. No wonder the National Treasury is bankrupt and the people are being taxed to keep up these many illegitimate and useless expenditures. But when an effort is made to clean up the National capital, which is within the jurisdiction of the Government and for which it is directly responsible, the purse strings are tightly drawn and the cheeseparing begins. The half-and-half system is appealed to as a reason and excuse for economy. And if the half-and-half system is adhered to it may just as well be conceded now, once for all, that this necessary improvement can not be accomplished. The one-half of the money necessary for the initial work can not be raised by taxation. It would be ruinous. And so long as the Government hides

itself behind the half-and-half system and contents itself by meeting one-half of the expenses, the conditions in the Capital will continue as they are now, a disgrace and a reproach to the Nation.

"These are conditions that should not be allowed to exist for a day in any city in a civilized country, much less in the Capital of a great Nation like ours. But, it will be asked, what is the remedy? The remedy is simple and easy, but expensive. The Government should take the matter vigorously in hand. As I have said, it should condemn and clean out these alleys at whatever cost. But it should not stop when it has turned these poor people out of their homes, however poor and insanitary they are. It should provide other homes for them at reasonable rents, to be under the inspection and control of the Government. This could be done as a matter of public safety and as a sanitary measure. This duty of providing homes for the poor and incompetent within the Capital should not be left to private enterprises seeking profits. Neither the cost nor the responsibility should be divided with anybody. To assess the damages resulting from such sanitary improvements to private owners of property is entirely unreasonable and wholly unjust. Our civic pride as well as our sense of justice should impel us to act in this matter promptly and effectively. It has been done in other countries. It can and should be done in this country within its Capital, over which it has exclusive control.

"Of the means resorted to in London, England, and its results, the report of the housing committee above referred to has this to say:

"The housing of the working-classes act, which was passed in 1890 and which superseded and improved previous attempts in this connection, provided not only that individual houses might be condemned as insanitary, as is done under the law of 1906 here, but also that an area containing streets and many houses might be declared 'unhealthy' and taken over by the local authority; and that the buildings might be removed, the streets rearranged, and other dwellings erected, either by agencies to which money would be furnished by the local authority, or if necessary by the local authorities themselves. In fact, the law made it obligatory upon the local authority in London to provide housing accommodations for at least 50 per cent of the people displaced, which has since been raised by an amendment making the required provision equal to all, and in other districts to such an amount as might be determined by the local authority to be adequate under all the circumstances.

"Under this housing of the working-classes act numerous wretched districts have been cleared up and comfortable and healthy dwellings provided, and although the cost to the community has been considerable in certain cases where the evils to be remedied were of long standing and very great, the law has done great good and the attention of those interested in the subject is being given to improving its operation rather than to changing it in any radical way. It aims, so far as possible, to protect the interest of the community in acquiring any property which has become detrimental to the well-being of the district, while at the same time dealing justly with the owners. The method of procedure requires the local authority to take the initiative and where a loan is necessary, as it often is where an area is acquired, the plans for this and for the improvement of the area must be approved by the central authority in London.

"And comparing the conditions there with ours it is said further:

"It will be noticed that the situation in the District of Columbia is similar to that in England in that the District government resembles the local authority, which can take the initiative in regard to any alleys which require attention, but which can not act without the consent of an authority not local, which in the case of the District is Congress.

"The ordinary danger in giving to public officials who are in entire control considerable discretion in the disbursement of public funds is therefore removed, and it ought to be possible for Congress to give such a plan a fair trial without incurring any very great risk.

"The following, published in the Trades Unionist, is worthy of careful consideration:

"That the United States Government should make Washington the model for all cities of the country was the opinion of the delegates to the National City Planning Conference, which met in this city on May 22, 1909. It was the consensus of opinion of the delegates to this conference that the working out of the plans for the beautification along practical lines rather than for mere adornment should be the ideal worked for by all American cities in order that all classes of people shall be benefited.

"One of the speakers at the opening session of the conference was Robert A. Pope, landscape architect, of New York City. He said:

"'Of prime importance to the growth of the city-planning movement in America is the realization of its true nature, its proper aim, its vast social and economic import. Because of ignorance of the true scope of city planning, work in this country has not and can not, as at present understood, accomplish its primary function.

"'For example,' he said, 'we have assumed without question that the first object of city planning is to beautify. We have made the esthetic an objective in itself. We have rushed to plan showy civic centers of gigantic cost, the carrying out of which too often has been brought about by civic vanity, when pressing hard by we see the almost unbelievable congestion, with its hideous brood of evil, filth, disease, degeneracy, and crime. What external adornment can make truly beautiful such a city? Is it genuine foresight to neglect the present-day serious and fast-growing evils of congestion and bad housing, which is so directly a menace to future generations?

"'To forestall the disastrous and otherwise inevitable consequences of these conditions will be the richest service that city planning can accomplish for the future. This this is its true and primary function can be abundantly established. The example of European countries, especially that of Germany, demonstrates that wise city planning, with proper regulations, can alleviate and ultimately eradicate undue congestion, the festering scurce of most of our disease, crime, and degeneracy. To remedy congestion, then, is to help solve some of our most threatening social and economic problems.'

"The foregoing statement in regard to city planning and city management are probably true of all cities and are certainly true of Washington.

"'What external adornment can make truly beautiful such a city?' The Washington Times appears to have anticipated Mr. Pope's question when it said editorially:

"'No part of the greater Washington can be safely built upon a rotten foundation. There is no room in the city for such contrasts as foul alleyways and a parking system embracing the beauties of a paradise. The spirit that labors for the realization of the beautification project should at the same time strive for the elemination of the slum quarters.'

"The Washington Post says our alleys are 'pest holes'; Rev. J. M. Waldron, president of the Alley Improvement Association, brands them as 'plague spots'; President Roosevelt declared them 'a reproach to the Capital City'; and Senator McMillan 'a disgrace to our civilization.'

"'What external adornment can make truly beautiful such a city?'—a city honeycombed with disease-breeding, death-dealing, and crime-producing slums! Jacob Riis says they are worse than any he ever saw in New York City or in London, and Washington's death rate, when compared with that of the cities named and nearly all the other cities of its class in the United States and Europe, seems to prove the truth of his statement.

"If Congress will abolish the 'local authority' here known as the District of Columbia, which is a mere incumbrance, and the half-and-half system and deal with this awful condition directly and with a free hand the conditions can be eliminated from the life of the Capital as they should be.

"There can be no possible excuse for them to remain. It is a shame to every American citizen that they have been allowed to exist at all."

Mr. President, I might read further from the evidences of the condition that exists here, and the necessity of some action on the part of the Government. I see with some degree of regret that very few Senators seem to be interested in this important humanitarian effort to better the conditions of this city. In the beginning of the session I introduced a bill covering just what I have included in this amendment. That bill is still resting in one of the subcommittees of a committee of the Senate. It calls for the expenditure of only $600,000. It is intended to remove one of the worst of these slum places or courts, known as Snow Court, that has become notorious, and which ought not to be allowed to exist in any civilized community.

When I talk about the Government taking hold of this matter and remedying these conditions, Senators say to me that the Government ought not to go into the matter of building and renting houses; but why not? When this city was threatened from the swamps that were affecting the health of the community the Government spent millions of dollars in filling up those places with dirt. Why not condemn a place of this kind and cover it with sanitary houses for the benefit of the poor? Why should the Government of the United States not spend some of its surplus money, so much of which is being thrown away, by doing this sanitary and humanitarian work itself, and not leaving it to private enterprise, through which profits are attempted to be made?

Perhaps some people are content to leave these conditions as they are. I suppose comparatively few of the people who live right here in Washington have any conception of what those conditions are.

Mr. LANE. Mr. President——

The PRESIDING OFFICER (Mr. THOMPSON in the chair). Does the Senator from California yield to the Senator from Oregon?

Mr. WORKS. I do.

Mr. LANE. I wish to ask the Senator from California if he does not believe that, as a matter of self-protection, these evil spots in the city, the center and souree of infection, which must necessarily affect the health of the community as a whole, as well as the health and welfare of other communities, should be eradicated? Do they not also even affect the morals of future generations, and, if they are allowed to continue as disease breeders, will they not also fasten disease upon people who are to come after us?

Mr. WORKS. There is not any question about that. They are breeders of disease; and the diseases that are bred are not kept within the bounds of these objectionable squares, but they go out into different parts of the city. The moral diseases are precisely the same.

Mr. LANE. Then, Mr. President, if the Senator from California will allow me to interrupt him further, would it not be an excellent measure of economy, and would it not be profitable to expend the money to clean up such places?

Mr. WORKS. So I have contended, Mr. President. We have down here a few miles below the city a penal institution at a

place called Occoquan. There are hundreds of prisoners down there. Many of them have been imprisoned for petty crimes, and most of them come out of these slums. They are there in prison for a month, perhaps, or two months or six months. Then, when they are released, they go back into the slums. They are people of that kind, men and women.

Senators, this is one of the most important problems in dealing with the conditions in the city of Washington that we have to meet, if we only had the courage to meet it. The people who know nothing about the conditions may be excused on that account; but I can point my finger at any Member of this body and say, "You are responsible for these conditions. If you do not know what the conditions are, it is your duty to know." When you do know, it is the duty of every Member of this body to see that those conditions are corrected; and there is no escape from that responsibility.

Now, sir, I have said all that I am going to say about this amendment. I have very much at heart the effort to take hold in an effective way of these conditions and eradicate them from this city, the Capital of the Nation. We can do it if we will.

I am only asking in this amendment that the small sum of $600,000 shall be devoted to that purpose. You may take it as an experiment if you like; you may say that we will try what we can do. In this instance, if we are successful, we will extend it to other parts of the city, and eventually rid this city of that condition so horrible in its effects.

There is no use in saying, Mr. President, that this amendment has no place in this bill. If it were some measure that the friends of the bill desired to have passed, they would not exclude it from the bill on any such ground as that. It is useless to say that it will endanger the passage of the bill. I hope there is no Member of this body who would vote against the bill on the ground that this humanitarian and beneficent provision was included in it.

As I said a while ago, Mr. President, I do not know how far Senators have inquired into either the conditions or the proper means of ridding ourselves of the conditions. If I can do nothing more by presenting this amendment and by what I have said about it than to attract the attention of Senators to these conditions, and to get them thinking about them, I shall have accomplished my purpose, because I think it is largely a matter of indifference to the conditions that has kept us from doing what we should have done long ago in dealing with this problem.

Mr. KENYON. Mr. President, I hope the amendment of the Senator from California may receive some attention, although I do not suppose it will receive very much. I feel like congratulating the Senator from California that he is attempting at this session to do a little something for humanity. The testimony of Jacob Riis, which the Senator has read, ought to be considered by everyone. Of course, Jacob Riis belonged to that class of men who were willing to give their life work and even life itself for the benefit of humanity. He belonged to the dreamers, to the uplifters and the reformers, just as the Senator from California does—the men who are so frequently sneered at to-day when they try to accomplish anything; but Jacob Riis has done a work in the world that will live on in the hearts of the poor people of this country as much as the work of any other man we have every had in our history.

Mr. President, the Senator from California is a statesman ahead of his time. He is a man with a vision, and that vision is shown in the amendment which he has suggested. It does not involve a large expenditure of money. It proposes to undertake a great experiment for the working people and for the poor people, and it is not going to hurt the good-roads bill at all. The question of homes for the poor people of this city, the question of helping to get rid of poverty, if it is possible to do so by legislation—and probably it is not—but to help make it easier for men and women to live and for the average, everyday person in this world to have a little better opportunity is one of the things which, if we can help it any by legislation, we ought to be willing to undertake.

Mr. CLAPP. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Minnesota?

Mr. KENYON. I do.

Mr. CLAPP. It is the basic principle upon which the pending bill rests, is it not, that we may benefit humanity and make it easier for people to get along?

Mr. KENYON. Exactly; and the amendment of the Senator from California is to meet a troublesome condition, a hard condition of the poor people in this community, and to help to make it a little easier for them to get along.

Mr. President, we have been helping the farmers at this session, and that is a good thing to do. They are the backbone of our country. We have just passed a top-heavy rural-credits bill for their benefit. They do not need help half so much as do the poor people of this country. I wish we could devise some system of personal credit whereby the man with a little home, or the one who is trying to acquire a little home, could secure cheap money from the Government in order to help him get the home. That is vastly more essential than it is to help the farmers, however commendable that may be.

Now, here is a chance to help in a humanitarian work. Why cast it aside? Why will not people pay attention to it? Why will not the Senate give it any consideration? We talk about making Washington a model city, and we are all in favor of that. We have beautiful parks, fine playgrounds, and splendid buildings. Why not get rid of the slums of Washington and help make it a beautiful city morally, a city of opportunity for the poor, as well as a beautiful city physically. Make it a city where the slums shall be banished? That is what the Senator from California is trying to do; that is a good work, and I hope the amendment will be adopted.

Mr. MARTINE of New Jersey. Mr. President, I am heartily in favor of both amendments proposed by the Senator from California [Mr. WORKS]. I was heartily in favor of the amendment that was defeated. I believe the south side of Pennsylvania Avenue should be improved, and I can see very clearly that it would be a very fitting place for the great public buildings of our country. The argument advanced by the Senator from Minnesota [Mr. NELSON], that there was once a swamp there, counts for nothing with me. Millions of dollars have been spent; the Potomac River has been very much changed in character; the swamp exists no more, and in every reasonable probability never will there be a like condition again.

I should like to see the south side of Pennsylvania Avenue purchased by the Government and the great public buildings, as nearly as may be, located along that line. I believe the Senator from Virginia [Mr. SWANSON] introduced a little while ago a bill anticipating the construction of a judiciary building on the south side of Pennsylvania Avenue, beginning at Fifteenth Street. I am in hearty accord and in favor of all that, and I am in favor of this last proposition of the Senator from California. But while I am in favor of both of these, I am also in favor of the good-roads bill. I believe that to be of infinite value to the people, and I am fearful that these propositions may load down or weight the good-roads bill so as to defeat it.

I am not a lawyer, so I ask, Why is it not possible that the Senator, with his sympathetic feelings and his genius and his splendid ability, may prepare a bill that shall encompass these two propositions, if you choose, and let that be presented to the Senate? If that is done, with all heartiness and with all accord I will vote for it.

I have thought many, many times for many years past that the Government of the United States ought to do something toward the making of homes for the people. I am a believer in the theory that in the degree that you make homes for men, just in that degree do you make better citizens. I have been an advocate in my small way, long before I came to the Senate, of having something done by municipalities and by States along that line, and I now here heartily indorse the effort by the Government to build homes for the people, to be rented at a minimum of cost. But I have been confronted with the objection that, "Oh, that is socialistic," and that the Constitution would not permit us to do it.

Now, I should like to know how the Senator from California gets around the Constitution. I revere and respect the Constitution of the land; but, as I said the other day, when the Constitution stands between mankind and bread and butter or shelter, then, I say, let the Constitution yield aside.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from California?

Mr. MARTINE of New Jersey. I do.

Mr. WORKS. I suggest to the Senator from New Jersey that the conditions here constitutionally are quite different from the effort of the United States to go out into the States and do this thing. We are legislating here respecting territory over which the Government has absolute jurisdiction.

Mr. MARTINE of New Jersey. Yes; that is just one of the nice distinctions without a difference that I would expect a lawyer to make; but I think, while he may make it here, he might also make it in Maryland.

Now, what as to the fair name of Washington? Washington, D. C., is one of the most splendid cities in our land, and, I have been told, in the world. At the same time I believe it is an orderly and well-governed city. It has many beauties. Doubtless it has some evils. I have heard it reviled as being filled with slums, and all that sort of thing. I have not found so many of these slums. Other cities of a population equal to this have infinitely more slums, and yet they think they have fairly good government.

As to the alley proposition, there doubtless are some ill-kept and unfortunate alleys; but there are also some splendid alleys. I should like the Senator from California to listen to this. There are some splendidly maintained and kept alleys here. Only this morning my sympathetic and good wife, knowing of an unfortunate family, put up a little package and said to me, "Will you take this to Mrs."—I will not mention the name. I said, "Yes." I found out how I was to go. I left Vermont Avenue—I live on Vermont Avenue—and turned down the first alley I came to, and I was astonished to find, not a condition of slum and filth but a well-paved brick alley, the joints filled full with cement, the sides chinked in. I found one or two factories or little shops. Then I found a cluster of three or four or five brick homes, two stories high, seemingly as clean as wax outside, and several little children playing around the alley. I walked on through that alley across into another street, and then came to a cross-section of an alley. I wandered up that. One was back of the Russian legation. I walked up that, first on one side and then on the other. I found there was a stable there, but it was infinitely well kept for a stable. I looked then on the other side, and I found the condition nearly the same. I walked down through until I came to Sixteenth Street, and, as I say, the alley was a model alley; and that is not the only instance of the kind in Washington, where there are very, very many alleys.

The splendid alley system of Washington geographically reflects credit upon the planners of the city. I have been a large house builder and a platter of land, and I said to myself, "What a splendid thought this alley idea is." It affords opportunities to put in our coal and remove our ashes and carry out the garbage and the frequent necessary accumulations of the ordinary householder. I said, "It is a splendid system, and how well it seems to be maintained."

I will agree with the Senator that some time ago I came across some alleys that seemed to be not so good, generally; but I think it is unfair to the good name of Washington that the Senator should mention only the ill-kept alleys, without even a reference to those which are well kept.

When in Baltimore, within an hour of this city, I had occasion to look over the whole system there; and I say without qualification that the way in which the alleys are allowed to be kept there is an absolute disgrace to that great southern metropolis. Doubtless there are some good alleys there, too; and I say the same thing with reference to the great city of Philadelphia. I say that both those cities are cursed with that; but that is not so much the fault of the municipality as it is the fault of the gregarious habit of mankind. If you put a family out in the middle of a 10-acre lot, they seem to gravitate instinctively to a great cluster of a metropolis, and would rather live there than live outside.

So I feel that in justice to the municipality and government of the city of Washington these few words I must say; but I am with you in any proposition that shall lift the burden of poverty from mankind, that shall make happier homes, easier bread and butter, and I care little how it may come. I do not believe that the Divine Providence, in His wisdom, ever meant that man should struggle, struggle, from the cradle of his birth to the day of his grave, against that hateful, horrid situation of dire conditions—sad, unfortunate homes and almost impossible bread and butter. Something is wrong. I believe it has been largely the legislation of the world that has cursed us; and I hope to live to a better day and to a brighter thought and to a happier result for humanity. But while, as I say, I will join with the Senator from California or any other Senator who shall propose to better these conditions, horrid as they are, I feel that this great physical condition, this great prime necessity of better roads throughout the length and breadth of our land, is needed beyond parallel, and I feel that the Senator's measure would tend to burden it unduly, and mayhap defeat it. So, when I vote "nay" on the Senator's proposition, it is not with the thought that I dislike or am opposed to his proposition, but that I want to aid this great project; and then, in turn, I will be his co-worker and ardent supporter in the passage of his proposition.

Mr. LANE. Mr. President, I should like to call the attention of the Senate to the practical features, from a physician's viewpoint, of the danger arising from these centers of infection. If such a condition as the Senator represents exists in a square in the southern or the southeastern portion of the city, other persons living in the northwest who know not of the condition are in peril of their lives from its existence.

Take the little colored child dying of tuberculosis a mile, say, southeast from here, and, on the other hand, the little baby living, we will say, in the Highlands Apartments. There is no connection, apparently, between them, but the germ of tuberculosis escapes from the dwelling where the colored baby is coughing and spraying the germs into the air and, caught up on a vagrant breeze a thousand times lighter than the thistledown, this germ floats through the open winodw, we will say, for illustration, of an apartment of the Highlands, where the Senator's grandchild may be playing upon the floor with its toys. In stirring up the dust from the carpet that baby inhales the germ of this or some other disease. It inhales it. The germ of tuberculosis makes no class distinctions between the lungs or the throat or the flesh of the highest-born baby in the land and that of the humblest and most poverty-stricken negro child; and we have tuberculosis coming, with death resulting eventually to that other child, or maybe, after a long fight, he partially recovers his health, yet crippled for life; and there lies the invisible connecting link between "the hovel of the poor and the palace of the mighty," nature's tie between them. If it were visible, if that tubercular germ were a spark and could be seen by the naked eye of man and traced from its origin on its travels through the air and into that other home, and then the effect of it watched, why, the Senate to-morrow, to-day, this afternoon, would lay aside the good-roads bill, the emergency would be so great, and pass a measure to relieve the city of Washington from the dangers which lurk in such infected and neglected spots.

Mr. STONE. Mr. President. I should like to ask, if it is pertinent to inquire, what bill is under consideration?

The PRESIDING OFFICER. It is the amendment of the Senator from California [Mr. WORKS] to the amendment of the committee.

Mr. STONE. No; what bill are we considering?

The PRESIDING OFFICER. The good-roads bill.

Mr. STONE. The good-roads bill?

The PRESIDING OFFICER. Yes.

Mr. STONE. Oh! I thought we had left that to consider some measure about beautifying Washington or establishing sanitariums or hospitals. We are still on the good-roads bill, presumably?

The PRESIDING OFFICER. We are. The question is on the amendment of the Senator from California to the amendment of the committee.

Mr. BANKHEAD. Mr. President, I rise simply for the purpose of expressing the hope that we may now have a vote on this amendment.

Mr. WORKS. I suggest the absence of a quorum.

Mr. LEE of Maryland. Mr. President, will the Senator withhold that suggestion for a moment? I wish to say one word on this amendment.

Mr. WORKS. Certainly.

Mr. LEE of Maryland. Mr. President, I thought when the Senator from New Jersey [Mr. MARTINE] was talking about conditions in Baltimore just now that it must have been some time since he had made any examination of our great Maryland city; and upon inquiry from him I find that it has been some years since he was there, at or about the time of the Democratic convention. Since that time great changes have taken place in Baltimore. Under the authority of Mayor Preston, the best executive who has ever acted as the mayor of that city, the surface drainage, which the Senator undoubtedly saw, and which impressed him unfavorably, has been done away with and a sewer system has been introduced, and other great improvements, such as paving streets and alleys, and introducing filtered water in the place of the ordinary water supply, and purifying the harbor, and other striking changes of that type have been accomplished in the last year or two under the present municipal administration.

I deem it only proper at this time to correct the impression that otherwise might have gotten into the RECORD as to the existing conditions in the city of Baltimore.

Mr. MARTINE of New Jersey. Mr. President, just one moment in answer to the Senator from Maryland. It is true that the visit to which I referred was about four years ago, and I am very happy to know that that splendid and wealthy city has made strides, as the Senator says, toward the improvement of the conditions that prevailed at the time I was there; but still I do not qualify that which I say. When I went there it was noxious to the eyes, to the sense of smell, and to humanity.

The PRESIDING OFFICER. The Senator from California suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Bankhead | Clapp | Fletcher | Johnson, Me. |
| Broussard | Clarke, Ark. | Hardwick | Kenyon |
| Chamberlain | Curtis | Hitchcock | Lane |

| | | | |
|---|---|---|---|
| Lee, Md. | Shafroth | Sutherland | Vardaman |
| Martin, Va. | Sheppard | Swanson | Warren |
| Martine, N. J. | Simmons | Taggart | Works |
| Myers | Smith, Ariz. | Thompson | |
| Norris | Smoot | Tillman | |
| Page | Stone | Underwood | |

The PRESIDING OFFICER. Only 33 Senators are present in the Chamber. The Secretary will call the names of the absentees.

The Secretary called the names of the absent Senators, and Mr. ASHURST, Mr. BRANDEGEE, Mr. COLT, Mr. GRONNA, Mr. POINDEXTER, Mr. RANSDELL, Mr. SMITH of South Carolina, Mr. STERLING, Mr. THOMAS, Mr. TOWNSEND, and Mr. WADSWORTH answered to their names when called.

Mr. DILLINGHAM, Mr. LA FOLLETTE, Mr. FALL, Mr. GALLINGER, Mr. PITTMAN, and Mr. JOHNSON of South Dakota entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty Senators have answered to their names. There is a quorum present. The question is on the amendment of the Senator from California [Mr. WORKS] to the amendment of the committee.

Mr. BANKHEAD. Mr. President, inasmuch as there are so many Senators who came into the Chamber a moment ago, who perhaps do not understand the character of this amendment, as they have heard none of the discussion, I wish briefly to state that it is the object of this amendment to appropriate $600,000 on this bill for the purpose of purchasing a square somewhere down here in Washington, I do not know exactly where, tearing down all the houses on it and laying it out systematically, and then the Government is to build houses on that square, sanitary, and so forth, and rent them to people who may desire to live in them, and to operate it under governmental supervision for all time to come.

That is the provision of the amendment, and if the Senate cares to add that to the bill I can not help it.

Mr. WORKS. Mr. President, I am very sorry that Senators were not here to hear the discussion. I should not want them to be misled by the very meager statement made by the Senator from Alabama. This square that is mentioned by the Senator is one of the worst slums in the city of Washington. It has been condemned time and again. It is something that ought to be wiped out of existence by the Government. This is simply an appropriation for the purpose of opening up that cesspool of crime and disease by taking it over by the Government and building upon it sanitary homes to be occupied by the poor. There is no reason I can see why it should not be attached to this bill, that is intended for the public benefit out in the States. Why should not the District of Columbia have some of the benefits of the money we are going to appropriate in this way? It can not by any possibility endanger the passage of the bill.

I call for the yeas and nays on agreeing to my amendment to the amendment.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. COLT (when his name was called). I have a general pair with the Senator from Delaware [Mr. SAULSBURY]. He is absent and I withhold my vote.

Mr. FLETCHER (when his name was called). I have a pair with the junior Senator from Idaho [Mr. BRADY] which I transfer to the Senator from Ohio [Mr. POMERENE] and vote "nay."

Mr. HITCHCOCK (when his name was called). I have a general pair with the Senator from Maine [Mr. BURLEIGH]. I transfer that pair to the Senator from Texas [Mr. CULBERSON] and vote "nay."

Mr. MYERS (when his name was called). I have a pair with the Senator from Connecticut [Mr. MCLEAN]. In his absence I transfer that pair to the Senator from New Jersey [Mr. HUGHES] and vote "nay."

Mr. STONE (when his name was called). I transfer my pair with the Senator from Wyoming [Mr. CLARK] to the senior Senator from Indiana [Mr. KERN] and vote "nay."

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER]. I transfer that pair to the junior Senator from Wisconsin [Mr. HUSTING] and vote "nay."

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Arkansas [Mr. ROBINSON] and vote "nay."

Mr. UNDERWOOD (when his name was called). I have a pair with the junior Senator from Ohio [Mr. HARDING]. I transfer that pair to the junior Senator from California [Mr. PHELAN] and vote "nay."

Mr. WADSWORTH (when his name was called). I have a general pair with the junior Senator from New Hampshire [Mr. HOLLIS]. I transfer that pair to the senior Senator from Iowa [Mr. CUMMINS] and vote "yea."

The roll call was concluded.

Mr. GALLINGER. Has the senior Senator from New York [Mr. O'GORMAN] voted?

The PRESIDING OFFICER. He has not.

Mr. GALLINGER. I have a pair with that Senator, and in his absence I withhold my vote.

Mr. SWANSON. I am paired with the senior Senator from Washington [Mr. JONES]. I transfer that pair to the senior Senator from Maryland [Mr. SMITH], so that the Senator from Vermont [Mr. DILLINGHAM] and myself can vote, if that is agreeable to him.

Mr. DILLINGHAM. Very well.

Mr. SWANSON. I vote "nay."

Mr. DILLINGHAM. Under the arrangement of pairs suggested by the Senator from Virginia [Mr. SWANSON], I am at liberty to vote, and I vote "nay."

Mr. REED. I have a pair with the Senator from Michigan [Mr. SMITH]. Under the word that he left with me before he was obliged to leave the Chamber I feel at liberty to vote, as I understand I am voting as he would vote. I therefore vote "nay."

Mr. BECKHAM. I transfer my pair with the senior Senator from Delaware [Mr. DU PONT] to the Senator from Tennessee [Mr. LEA] and vote "nay."

Mr. CHAMBERLAIN. I have a general pair with the Senator from Pennsylvania [Mr. OLIVER]. In his absence I transfer that pair to the junior Senator from Louisiana [Mr. BROUSSARD] and vote "nay."

Mr. PITTMAN. I wish to announce that the Senator from Ohio [Mr. POMERENE] is unavoidably absent and also that the Senator from West Virginia [Mr. CHILTON] is also unavoidably absent. The Senator from West Virginia [Mr. CHILTON] is paired with the Senator from New Mexico [Mr. FALL].

Mr. CURTIS. I wish to announce that the Senator from New Mexico [Mr. CATRON] is paired with the Senator from Oklahoma [Mr. OWEN]; that the Senator from Rhode Island [Mr. LIPPITT] is paired with the Senator from Montana [Mr. WALSH]; that the Senator from Pennsylvania [Mr. PENROSE] is paired with the Senator from Mississippi [Mr. WILLIAMS]; and that the Senator from Massachusetts [Mr. WEEKS] is paired with the Senator from Kentucky [Mr. JAMES].

The result was announced—yeas 14, nays 38, as follows:

YEAS—14.

| | | | |
|---|---|---|---|
| Brandegee | La Follette | Norris | Wadsworth |
| Clapp | Lane | Sheppard | Works |
| Curtis | Lee, Md. | Sherman | |
| Kenyon | Lodge | Sutherland | |

NAYS—38.

| | | | |
|---|---|---|---|
| Ashurst | Hardwick | Reed | Taggart |
| Bankhead | Hitchcock | Shafroth | Thomas |
| Beckham | Johnson, Me. | Shields | Thompson |
| Borah | Martin, Va. | Simmons | Tillman |
| Chamberlain | Martine, N. J. | Smith, Ariz. | Townsend |
| Clarke, Ark. | Myers | Smith, Ga. | Underwood |
| Dillingham | Page | Smith, S. C. | Vardaman |
| Fletcher | Pittman | Sterling | Warren |
| Gore | Poindexter | Stone | |
| Gronna | Ransdell | Swanson | |

NOT VOTING—44.

| | | | |
|---|---|---|---|
| Brady | Fall | Lea, Tenn. | Penrose |
| Broussard | Gallinger | Lewis | Phelan |
| Bryan | Goff | Lippitt | Pomerene |
| Burleigh | Harding | McCumber | Robinson |
| Catron | Hollis | McLean | Saulsbury |
| Chilton | Hughes | Nelson | Smith, Md. |
| Clark, Wyo. | Husting | Newlands | Smith, Mich. |
| Colt | James | O'Gorman | Smoot |
| Culberson | Johnson, S. Dak. | Oliver | Walsh |
| Cummins | Jones | Overman | Weeks |
| du Pont | Kern | Owen | Williams |

So Mr. WORKS's amendment to the amendment was rejected.

Mr. WORKS. Mr. President, I have proposed another amendment, to provide for the condemnation of all the slums in Washington. Having taken the sense of the Senate upon the amendment that has just been voted on, I shall not take up the time of the Senate by offering the amendment, hoping that I may reach it in another way. I sincerely hope that the vote which was given by the Senate to-day is not an indication of the feelings of Senators upon this important question.

Mr. LEE of Maryland. On the 22d of April I sent an amendment to the desk and asked that it might be printed and lie upon the table. I should like to call it up now. I ask that it be read.

The PRESIDING OFFICER. The amendment will be read.

The SECRETARY. Add an additional section, to come after section 9, page 14, as follows:

SEC. 10. That the Secretary of War is authorized to have prepared, in cooperation with the Secretary of Agriculture and the Postmaster General, maps and general estimates for such military highways as in

the judgment of the Secretary of War should be constructed and maintained, in part or in whole, in the several States for the purpose of the mobilization and concentration of troops and for postal purposes, and further maps and estimates for such military highways as in his judgment should be constructed and maintained, in part or in whole, in the several States adjacent to international boundaries and to the coast lines for the movement and supply of troops and artillery for defensive purposes and for postal purposes; and that the Secretary of War report to Congress on the general subject of military highways for the United States as soon as practicable; and, further, that the sum of $96,000 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending June 30, 1917, or so much thereof as may be necessary, to be expended by the Secretary of War for the foregoing purposes.

Mr. LEE of Maryland. Mr. President, this amendment provides for a general report by the Secretary of War on the subject of a system of military highways. It also provides for some further reports by him, in cooperation with the Secretary of Agriculture and the Postmaster General, with reference to roads that will be available not only for military purposes but for postal and agricultural purposes.

We will never have anything like an adequate military defense in this country until we have an annual mobilization of whatever troops may exist. Whether they are a citizen soldiery or whether they are a regular army or whatever they may be, until this country mobilizes them annually there will be practically no genuine preparedness.

This proposition of mobilization will imply the concentration and movement of troops from several zones, some on foot, some by automobile, some by rail. The greater movement of course will be by rail. Thus, with reference to mobilization, some consideration of the road question is essential, and that would seem to apply as much to the interior as to the exterior States. With reference to defense proper, defense now is mostly a question of many men and of large guns. The movement and location of great guns can only be made after war has been declared, spies have been ejected from the country, and the great guns can be concealed in places where they will defeat an invading enemy. The roads for this latter purpose have to be made in advance.

There is no fortification such as were made under former military conditions that will be as effective as the preparation of great macadam highways for defense in the border and coast States by which heavy guns and bodies of men can be located at the proper time for repelling an invading enemy.

The location of great guns is the great essential feature of modern military defense. That is one phase upon which the Secretary of War would naturally report on under this amendment. Another will be wherever the great rail highways of the country pass through the mountains, especially in the West. The macadam road would be the alternative line of transportation and repair in case of the destruction of bridges or tunnels by the enemy agents and spies, especially at the beginning of hostilities.

Such an argument as was presented here yesterday by Senators from certain Western States, showing great stretches of mountains as impassable for military purposes, illustrate how important it is that the Secretary of War should make a report on this question. Those States are interested in this matter as well as other States.

When you come to the coast States and the States bordering upon the northern and southern boundaries of this country, the necessity of such roads for the military safety of the country is too obvious to need elaboration.

But especially, Mr. President, should we consider in connection with any genuine preparation or system of defense that it should be self-sustaining, if possible. There is no method of defense that will be more of a self-sustaining system than a system based upon the movement of troops and the movement of great guns by roads which would have a commercial value; and such a defense system will be of much greater benefit to the country and to the States where the roads are located than the loss represented by cost of the entire road system. We would have in this way a defense system, cooperating with development in a way that would make the whole proposition economical as well as effective in the highest degree.

I do not think it is necessary to elaborate this matter any further, Mr. President, than simply to say that the appropriation in this amendment is a small one. It is simply a rough estimate of $2,000 for each State. Some States may have already sufficient data; in other States there will perhaps be more investigation necessary.

It has been stated by the chairman of the committee that he did not wish to load down the bill with anything that would tend to be a weight upon it at the other end of the Capitol. I wish to suggest, in this connection, that if he has any doubt as to the popularity of this bill, which has so radically reduced the amount that the House intended to apply to this purpose, there is no way I can think of by which he may popularize the bill more completely than by making this amendment a part of it, providing for a report upon this important feature of preparedness, namely, military roads or a road system that is absolutely essential to any form of military preparedness which this country may provide. In this connection it must be borne in mind that the existing road systems of the States are laid off on commercial lines and not from a military standpoint and are almost as much of a facility for an invading force as for a defensive force. Very essential additions and changes can be wisely made in every State for defensive purposes and upon such questions of military strategy the Secretary of War should report.

Mr. THOMPSON. Mr. President, good roads and rural credits are naturally kindred subjects, and it was therefore only proper that they should be considered practically together by the Senate. We have passed the rural-credit bill; now let us pass the good-roads bill and clear the calendar of this important legislation.

Good roads are conceded by all to be one of the first requirements for a successful business and farming community. The building of an adequate system of public highways can not properly be regarded as merely necessary for the handling of traffic, but it is also essential for the development of our country and the prosperity of the people. Our present-day civilization seems to follow good roads, just the same as our early settlers followed the streams which in those days carried the traffic. The manufacturer seeking a location for his plant gives first consideration to the means of transportation. The farmer, because his product must also be transported, considers the same thing. The highway is his means of transportation, just as a line of boats or a railroad is the means of transportation for the manufacturer. Good roads are the arteries of the life of a community, through which the current of traffic flows, and on their condition often depends the profit or loss to the manufacturer, business man, and farmer.

It is estimated that there are 1,000,000,000 acres of good, productive, uncultivated land in the United States waiting development, while nearly one-half of our population is crowded together in the cities, and the constant growth of the city population is far outstripping the growth of the country population. This is conceded to be one of the causes of our present unsatisfactory economic condition, resulting in the high cost of living. It is therefore highly important that the unsettled country be opened up and made more accessible, attractive, and profitable by the extension of good roads, so that this drift of population may be turned from the city to the country.

Investigations show that good roads result in increased land values averaging $9 per acre. There are instances in my State where the expenditure of from $1 to $4 per acre for improved roads has increased the land values from $10 to $50 per acre. The extension of good highways has the same effect upon the value of lands as the extension of a railroad into an unsettled community.

The reports of the Interstate Commerce Commission show that the annual freight and express bill of the people of the United States is about $2,500,000,000. This is an average of about $125 for each family. Therefore practically 20 per cent of the total cost of living to the average family goes to pay freight and express charges, which shows clearly the greatest waste and loss to every family in the country. Good roads will reduce this unreasonable cost of transportation. It is estimated that the cost of transportation by water is only about one-fourth of a cent, and by rail four-fifths of a cent per ton per mile. On an improved public highway the cost of hauling is from 5 to 12 cents per ton per mile and on an ordinary road from 20 to 50 cents per ton per mile. The average cost of hauling farm products in the United States is 23 cents per ton per mile. This is over twenty-eight times as much as by rail.

There are about 2,300,000 miles of public roads in the United States, of which only about 10 per cent have been surfaced with any material other than natural earth, and not more than one-half of these can be classed as good roads, comparable to those in European countries. This failure is not because of a lack of money and work, for it is estimated that in 1904, $80,000,000 in money and labor was expended on good roads, and that this figure gradually increased each year for 10 years, until in 1914 it amounted to the enormous sum of $260,000,000; yet the public roads of this country during that period were in an extremely poor and unsatisfactory condition. This was caused principally by the lack of skilled supervision, coordinate and correlate efforts, and the making of poorly designed temporary roads instead of reasonably permanent improvements. The great trouble seems to have been that in each of the 48 States there has been a different system of laws under which road building was attempted. Kansas is one of the States

which has suffered from an old constitutional provision providing that—

The State shall never be a party to carrying on any works of internal improvement.

This has been held by our courts to apply to the State in its sovereign corporate capacity and not to the subordinate political subdivisions thereof. So that these improvements have been carried on by the counties and townships without State aid.

There are about 108,500 miles of public highways in Kansas, and the counties and townships of the State expend about $5,000,000 annually for county roads. This amount exceeds the total cost of running the State government. It is estimated that at least $35,000,000 has already meen expended in the last 10 years on roads, bridges, and culverts; yet with all this expenditure less than 1 per cent of the roads have been surfaced with clay, oil, macadam, gravel, or concrete. At least 75 per cent of this money has been practically wasted by being expended in temporary construction, without figuring on permanent and lasting benefits for the future.

While in the Nation we have been backward in the building of public roads, yet the development of traffic has increased enormously. Within the last 10 years the motor vehicle has been brought into service, until there are now over 2,300,000 motor vehicles in use, averaging about one for every mile of public road in the United States. Estimating these vehicles to average 25 horsepower, it would mean a total of over 57,000,000 horsepower now in use on our public roads, which necessarily requires a most substantial surface.

Ordinary horse-drawn traffic has also increased to such an extent that we now speak of tonnage by the hundreds of millions and of the ton-mileage in billions. It has been estimated that to move the wheat crop alone in 1915 it required the hauling of more than 30,000,000 tons over the public roads of the country, at a cost of over $50,000,000. The Department of Agriculture estimates that the production of corn, wheat, oats, potatoes, cotton, and hay in 1915 aggregated 270,807,000 tons, which means that practically all of this great weight had to be transported over the country roads from the farm to the market. It is therefore seen that the good-roads problem is not a local matter by any means. They benefit more people than any other public enterprise. There is not a single person of the community who does not receive some pleasure or advantage from them. Any person living anywhere in the world has the same right with every other person to use the public highway, and the introduction of the automobile has extended its use more than ever before. Nearly half of our population live in the cities, which must be fed by the products from the farm. Therefore the people of the cities are as much interested in the condition of the roads as the people in the country. A good road is therefore a universal public benefaction.

The Federal Government has a direct and increasing interest in the public roads by reason of the extension of the Rural Mail Delivery and the Parcel Post Services, which shows the necessity of its cooperation in this great enterprise. The Government makes an annual appropriation of $53,000,000 for the maintenance of a Rural Mail Service conducted by nearly 44,000 rural mail carriers. The mail carriers travel about 1,100,000 miles of rural-delivery roads nearly every day, of which only 61,495 miles are surfaced with crushed stone or its equivalent, leaving about 94 per cent of this great mileage to be traveled by the mail carriers, with great expense and loss of time. During 1913 more than 52,000,000 parcels were handled on the rural routes; and since that time the weight limit has been raised to 50 pounds, and it is estimated that the volume of parcel-post matter over the rural star routes in 1915 exceeded 113,000,000 packages. The Government is also pecuniarily interested in public roads from a military standpoint, good roads being one of the most essential things to successfully conduct military operations. This has been most forcibly demonstrated by recent operations in the European war. In short, good roads are so important to the financial, social, and educational welfare of the people that in no general enumeration of their advantages is it possible to include all the benefits.

Our school system is intimately related to the road development. It has been shown that the percentage of pupils attending schools located on bad roads is far lower than the percentage of those attending schools located on good roads. In fact it has been demonstrated that the falling off in school attendance in bad-road sections is as high as 18 out of each 100 pupils enrolled, and that in States with improved roads the average daily attendance is 78 per cent, while in the States with unimproved roads it is only 59 per cent. So the whole system of common-school education may be transformed through the medium of good roads. For efficiency and economy of consolidated schools properly managed are now regarded as the best, but the success of the consolidated school depends almost entirely upon the condition of the public roads. The American Magazine recently published the following statement, showing the effect of no roads upon the mountaineers of the South:

Since the days of Daniel Boone they have not changed. We heard of these mountaineers in the Civil War—and then forgot them. Half a million splendid Spartans in the worst of bondage for more than a century.

There are no schools because there are no roads; no roads because there are no taxes; no taxes because there is no money; and no possible interchange of commodities because there are no roads.

The city schools are well equipped, but the rural schools, where about 12,000,000 of our future citizens are studying and where many of the farmers and farmers' wives of to-morrow will receive all the education they ever get, are on the whole less efficient to-day than they were 25 years ago.

The imperfect and incongruous separate systems of the several States have needed Federal aid to give uniformity and permanence to the road-building system throughout the country. This bill gives what is needed in the most practical and simple manner yet devised. It simply contributes to the States according to their population, area, and number of miles of rural delivery and star-route systems, money from the Public Treasury to those States, or road-building agencies of a State, which will contribute an equal amount, commencing the first year by distributing $5,000,000 and increasing at the rate of $5,000,000 annually each year for a period of five years, making a total of $75,000,000 to be distributed. It is simply left with the State, or the road-building authorities in States like Kansas where the State can not contribute by reason of constitutional inhibition, whether they shall take advantage of the system. While the Federal Government offers this contribution for the building of good roads in all the States, yet direct supervision of the work of construction and distribution of the money is left with the States themselves, to be handled according to the best judgment of the local authorities. Every reasonable safeguard is made for the protection of the funds of the Government and to secure its proper use by the local communities. It is expected that through this financial cooperation by the Federal Government with the States that those things which have heretofore been needed, to wit, sufficient funds, uniformity and permanency will be supplied, so that in the near future we will have good public roads crossing the country in every direction from the Atlantic to the Pacific and from the Canadian line to Mexico and the Gulf.

Mr. TAGGART. Mr. President, I desire to say that I am very heartily in favor of the passage of the pending post or good roads bill. Under its provisions, as I understand, plans, specifications, and so forth, in regard to the construction of the roads in the various States are to come under the supervision of the Department of Agriculture. I wish to say as to our State of Indiana, that I doubt if there is another State in the Union which has spent more money or which has constructed more miles of good roads than has that State. It has to-day over 60,000 miles of improved roadways. It spent last year $16,000,000 on the improvement of its public highways. Only recently a commission was created to provide for the construction of what is to be known as the Dixie Highway, which is to run from Miami, Fla., to Chicago, via Indianapolis, with a branch from Indianapolis to South Bend, and around the peninsula of Michigan to Toledo, and from there to Dayton and Cincinnati, Ohio, covering a distance of about 2,500 miles.

I do not know of any project which brings more benefit to the farmers and to the community generally than do good roads. In Indiana the amount of money that has been expended for the maintenance of good roads should have given us much better roads than we possess.

What I desire, however, particularly to call attention to here, is the necessity for the Department of Agriculture to see that the specifications which come before it for acceptance are proper and correct, and by a close and thorough inspection to see that the plans are fully complied with.

If there had been a proper supervision of the money which has been expended in Indiana—probably honestly, but not always judiciously—in providing for grading, for culverts, and for improving the waterways of our roads, the overflow of which washes away the roads immediately after they are built, we should have had far better results from our expenditure.

I wish to call attention to the fact that the Agricultural Department, in conjunction with the States, with the highway commissions, and with the engineers who have charge of the matter, can not be too particular before those roads are accepted to ascertain that the specifications for their construction have been implicitly complied with.

Mr. VARDAMAN. Mr. President, what is the pending question?

The PRESIDING OFFICER (Mr. THOMAS in the chair). The question is on the amendment offered by the Senator from Maryland [Mr. LEE].

Mr. STERLING. Mr. President, can we not have the amendment reported?

The PRESIDING OFFICER. The amendment will be again stated.

The SECRETARY. It is proposed to add as an additional section, to come in after section 9, on page 14, the following:

SEC. 10. That the Secretary of War is authorized to have prepared, in cooperation with the Secretary of Agriculture and the Postmaster General, maps and general estimates for such military highways as in the judgment of the Secretary of War should be constructed and maintained in part or in whole in the several States for the purpose of the mobilization and concentration of troops and for postal purposes and further maps and estimates for such military highways as in his judgment should be constructed and maintained in part or in whole in the several States adjacent to international boundaries and to the coast lines for the movement and supply of troops and artillery for defensive purposes and for postal purposes; and that the Secretary of War report to Congress on the general subject of military highways for the United States as soon as practicable; and, further, that the sum of $96,000 is hereby appropriated out of any money in the Treasury not otherwise appropriated, for the fiscal year ending June 30, 1917, or so much thereof as may be necessary, to be expended by the Secretary of War for the foregoing purposes.

Mr. BANKHEAD. Mr. President, I certainly shall not consent to a vote on an amendment so far-reaching as is this amendment, unless more Senators are in the Chamber to vote upon it. I think it is an amendment that ought not to be seriously considered in connection with this bill. It seems to me as though, Mr. President, the entire effort on the part of some of our distinguished friends is to make this bill impossible of passage somewhere else if they can do so.

Here is a plain proposition which we have had before the Senate for weeks, simply providing for the construction of post roads, roads over which the mails are to be carried, and incidentally, of course, the construction of roads by which the products of the farm may be brought to market more cheaply and expeditiously. It seems to me that the Senate ought to be satisfied with the provisions of this bill without adding to it all kinds of amendments.

Mr. LEE of Maryland. Will the Senator yield for a question?

Mr. BANKHEAD. I yield.

Mr. LEE of Maryland. Is there any objection in connection with postal and commercial considerations to consider also the military questions, and to have the Secretary of War report on that subject?

Mr. BANKHEAD. Of course there is no objection to considering military questions at the proper time and in the proper way; but I do not think that such an amendment ought to be added to this bill, and I hope it will not be done.

Mr. LEE of Maryland. I should like to ask the Senator another question. Is not this a proper time to consider the military questions?

Mr. BANKHEAD. Why did not the Senator offer the amendment to the military reorganization bill when we had that bill under consideration?

Mr. LEE of Maryland. But the bill of which the Senator from Alabama is in charge provides for the building of roads, and before the roads are built I suggest that the military aspect of the question should be considered.

Mr. BANKHEAD. But we do not provide in this bill a great scheme for surveying boulevards, military roads, and matters of that sort all over the country, from one end of it to the other. That is not the purpose of this bill; it does not contemplate anything like that. This bill simply seeks, Mr. President, as I have said, to inaugurate a system of building post roads for the purposes I have indicated. If we are going to load it down with all kinds of amendments, if we are going to incorporate in this bill provisions for surveys for magnificent boulevards and military highways all over the country, and appoint a commission to do that kind of work, I do not know where it will end. I hope the amendment will not be adopted.

Mr. SMITH of South Carolina. Mr. President, I should like to ask the Senator from Alabama this question: In his opinion, would not the carrying out of the purposes of this bill go largely toward subserving the purpose sought to be accomplished by the amendment proposed by the Senator from Maryland?

Mr. BANKHEAD. That is true.

Mr. SMITH of South Carolina. The amendment of the Senator from Maryland relates to roads for use in the mobilization of troops. If the roads are properly constructed under the provisions of this bill, there will be very little to add in case of an emergency for military roads. So I think the subject is already covered in the pending bill.

Mr. FALL. Mr. President, I should like to ask the Senator from Maryland if he does not think that an amendment to his amendment would be acceptable? If so, I should like to offer such an amendment to build, as a defensive measure, on the southern boundary of New Mexico, which forms one of our borders, a stone wall 10 feet high and 2 feet wide, with broken glass on top of it. We would rather have that than a road.

Mr. LEE of Maryland. Mr. President, if the Senator asks that as a question, which I can answer without being ruled off the floor if I should want to speak again, I simply say that it is better to have good men, good roads, good discipline, and have an efficient citizen soldiery than it is to try to build a wall, as the Chinese did, to keep out an invading enemy. Such a wall might be very useful to prevent a surprise of sleepy Regular soldiers, who can not protect a town, though they may be camped right next to it; it might be of some use in a case of that kind; but I do not believe that it is in the true spirit of American civilization. We want the "open door," and we ought to be men enough, both by vigilance and preparation, to meet anybody who comes through it to invade our country.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Maryland [Mr. LEE] to the amendment reported by the committee.

The amendment to the amendment was rejected.

Mr. SMOOT. Now, Mr. President, if the committee amendment has been perfected, I desire to offer the amendment which I send to the desk by way of a substitute for it.

The PRESIDING OFFICER. The amendment will be stated.

Mr. VARDAMAN. Mr. President, I rise to a parliamentary question.

The PRESIDING OFFICER. The Senator from Mississippi will state his parliamentary question.

Mr. VARDAMAN. Have all the amendments on the desk been disposed of?

Mr. SMOOT. I understand all the amendments offered have been disposed of.

The PRESIDING OFFICER. Every amendment offered up to this time has been acted upon.

Mr. VARDAMAN. That is what I desire to know.

The PRESIDING OFFICER. The Secretary will read the amendment offered by the Senator from Utah to the amendment reported by the committee.

The SECRETARY. It is proposed to strike out all after the enacting clause, and to insert:

That in order to establish, construct, improve, and maintain public roads that are now or may hereafter be needed for use as post roads, military roads, or for interstate commerce, there be, and hereby is, created a fund to be known as the United States highway fund. Said fund shall be raised in the manner herein provided, but the Treasurer of the United States is hereby authorized to receive and place to the credit of said fund any money that may be contributed from other sources and to expend the same upon the order of the United States Highway Commission or in accordance with the conditions of the contribution.

SEC. 2. That for the purpose of providing money for the United States highway fund the Secretary of the Treasury is hereby authorized and directed to issue and sell, on and after July 1, 1918, at par with accrued interest, coupon or registered bonds of the United States in such form as he may prescribe and in denominations of $20 or multiples of that sum, said bonds to be payable in coin 50 years from date of issue, and to bear interest, payable in coin semiannually, at the rate of 3 per cent per annum, the total amount of said bonds not to exceed $500,000,000, and the issue and sale of same not to exceed such amounts as may be necessary from time to time to enable the Treasurer of the United States to make payments from the United States highway fund to the several States in accordance with the provisions of this act. Bonds issued under authority of this act, or the income therefrom, shall not be subject to taxation of any kind for any purpose. Bonds authorized by this section shall be first offered at par as a popular loan under such regulations prescribed by the Secretary of the Treasury as will give opportunity to the citizens of the United States to participate in the subscriptions to such loan, and in allotting said bonds the several subscriptions of individuals shall be first accepted, and the subscriptions for the lowest amounts shall be first allotted. Any portion of any issue of said bonds not subscribed for as above provided may be disposed of by the Secretary of the Treasury, at not less than par, under such regulations as he may prescribe, but no commissions shall be allowed or paid thereon; and a sum not exceeding one twenty-fifth of 1 per cent of the amount of the bonds herein authorized is hereby appropriated out of any money in the Treasury not otherwise appropriated to pay the expense of preparing, advertising, and issuing the same.

SEC. 3. That before any State shall be entitled to take advantage of the provisions of this act it shall establish by law a State highway commission, which said commission shall have general supervision of road construction and improvement in that State and of the expenditure of money received from the United States highway fund, subject only to the provisions of this act and of State laws not inconsistent herewith. It shall be the duty of each State highway commission annually, on or before the 1st day of January, to make to the governor of the State in which it is located a full and detailed report of its operations, including a statement of receipts and expenditures, copies of which said report shall be sent to the Treasurer of the United States and to the United States Highway Commission.

SEC. 4. That the United States highway fund shall be apportioned and credited to the several States in the following manner: The United States highway commission, hereinafter created, shall ascertain in the most practicable manner from the best information available the total land area, the population according to the last Federal census, the total assessed valuation of all taxable property, and the total mileage of public roads in each of the several States, and shall compute the percentage of the total of each of these four items possessed by each

State. They shall then compute the average of the four percentages for each State, and this average shall be the per cent of the $500,000,000 United States highway fund that shall be apportioned and credited to each State. Said commission shall notify the Treasurer of the United States of the result of their ascertainment and computation, which shall be made as of a date to be fixed by the commission. Such fund so apportioned shall be paid to the States only in accordance with the provisions of this act.

SEC. 5. That whenever any State, through its duly authorized agents, shall apply for any part of its share of the United States highway fund, but not exceeding 20 per cent thereof in any year, and shall deposit with the Treasurer of the United States its bonds for such amount payable in 50 years and bearing interest, payable semiannually, at the rate of 4 per cent per annum, the Secretary of the Treasury shall issue and sell, at par and accrued interest, in the manner prescribed in section 2, United States highway bonds to the amount that may be necessary to pay to said State the amount of money applied for, and upon the sale of said bonds shall pay over the proceeds to the custodian of the public funds of the State: *Provided*, That the bonds of any State shall not be accepted if the total amount of bonds of such State, including the bonds issued to take advantage of the provisions of this act, shall exceed 10 per cent of the amount of the assessed valuation of all taxable property in such State: *Provided further*, That any State desiring to do so may deposit with the Treasurer of the United States its 4 per cent bonds maturing in not less than 20 years, or may redeem its 50-year bonds at any time after 20 years from date of issue, but upon redemption of such bonds, whatever the period for which issued, such State shall pay to the Treasurer of the United States, in addition to the balance due on the principal after deducting the accumulated sinking fund, a premium of 2 per cent on such balance due on bonds redeemed, together with accrued interest. When the Treasurer of the United States shall receive any payment of interest on State bonds deposited in the manner above provided he shall devote three-fourths thereof to the payment of the interest due on the corresponding United States highway bonds, and one-fourth, herein designated as a sinking fund, he shall deposit in the Treasury of the United States to be used from time to time for the redemption of United States highway bonds as provided herein. The Treasurer of the United States shall keep an account with each State that shall deposit bonds and receive funds under the provisions of this act, and shall credit said State with interest compounded annually at the rate of 3 per cent per annum on the sinking funds paid in. Money received upon the principal of State bonds shall also be credited to the sinking fund, but no interest credit shall be allowed the State thereon. At the time of the maturity of the bonds deposited by any State, if all payments have been made when due, the Treasurer of the United States shall cancel said bonds and return them to the State issuing the same. Whenever and each time the sinking fund accumulation shall amount to $1,000,000, then the Secretary of the Treasury shall, and he is hereby, directed to go into the open market and purchase, at par if possible, $1,000,000 par value of the United States highway bonds. If unable to purchase all or any at par then he is authorized and directed to pay such premium as necessary determined by competition after public notice of not less than 30 days, but not exceeding a premium of 2 per cent and accrued interest. If he be unable thus to secure the full amount of bonds necessary to comply with this provision, then he is authorized and directed to call at par, plus premium of 2 per cent and accrued interest, such bonds, determined by drawing of bond numbers from among the largest denominations outstanding, as will make up the $1,000,000 purchase. These bonds thus purchased out of the sinking fund accumulation shall be retained in the United States Treasury, being stamped by the United States Treasurer "Non-negotiable," but "kept alive," in order that the United States Government may receive for the sinking fund the benefit of the interest payments on the bonds thus purchased.

SEC. 6. That on the 1st day of February of each year, after the year 1918, the Treasurer of the United States shall pay to the custodian of the public funds of each State, from any funds in the Treasury not otherwise appropriated, an amount of money equal to one-half the amount such State has expended out of its own funds for the maintenance of public roads during the preceding calendar year, but in no case to exceed 2½ per cent of the amount of State bonds said State has deposited with the Treasurer of the United States under the provisions of this act. The money so paid shall be expended by said State only in the maintenance of public roads. The Treasurer of the United States shall withhold the payment of moneys to any State under the provisions of this section in the event that such State shall default in payment of any interest or principal due.

Whenever the United States highway commission shall certify to the Treasurer of the United States that any portion of the amount expended by any State for the maintenance of public roads, during the preceding calendar year, has not been expended with reasonable effectiveness, one-half of such amount shall be deducted from the next succeeding annual appropriation to such State: *Provided*, That if any State shall fail to issue bonds as provided in section 5 hereof, it shall nevertheless be entitled, during the period such failure to issue bonds shall continue, subject to all the conditions and limitations set forth in this section, to receive the maintenance fund provided for in this section; but in no case shall such maintenance fund exceed the amount which such State would have been entitled to receive if it had issued the bonds authorized by section 5 hereof.

SEC. 7. That there is hereby created a United States highway commission, to be composed of the chairman and ranking minority member of the Senate Committee on Post Offices and Post Roads, the chairman and ranking minority member of the House Committee on Roads, the Director of the Office of Public Roads, and a United States Army Engineer to be detailed from time to time by the Secretary of War. Such commission shall have only an advisory voice in the expenditure of the United States highway fund in the several States. It shall have its head office in the District of Columbia, but may create highway divisions, never exceeding in number one for each State, and may maintain a division office in charge of a United States highway engineer in each division. Said commission shall have power to employ such clerical and expert assistance as may be provided for by appropriation made by Congress from time to time, and may require the assistance and cooperation of the officers and employees of any department in its work.

Mr. SMOOT. Mr. President, I should have preferred to speak upon this measure at some other time than late Saturday afternoon. I recognize the fact that there are only a very few Senators in the Chamber. I also recognize the fact that it will not be long until it will be impossible to secure a quorum.

Mr. President, we are about to enter upon a policy of road building in the United States in which the Government of the United States is asked to participate. It is my belief that whenever that policy is entered upon by the Government, the very best plan that can be devised by mortal man ought to be put in force at the beginning; and it is for that reason that I have submitted the amendment as a substitute for the committee amendment.

I do not want to take any credit whatever for the preparation or the working out of this great plan of road building. It is not due me; but in passing I want to say that above all and foremost in the drafting of this legislation stands the ex-Senator from Oregon, Jonathan Bourne, jr. It is commonly known as the Bourne good-roads bill. If the Senate does not adopt my amendment to-day, and the amendment offered by the committee should become a law, I expect to live to see the day when that law will be amended and the principle of the Bourne plan put in operation. What I am fearful of is that under the committee plan there will be an undue waste of public money. It is incomplete in its provisions. It is a makeshift, at best. It is more cumbersome and more expensive than the so-called Bourne plan, and the results that will come from it will be infinitesimal compared with the Bourne system, if it is put in operation in this country. The Bourne plan does not ask to take money out of the Treasury of the United States. All it asks for is that the State be extended the credit of the United States. It is so simple, and so easily accomplished in cooperation with the different States, that there could be no complaint offered by one State against another if this plan were put in operation.

I want to say that ex-Senator Bourne did not spend merely days, but he spent months, and, I believe, nearly two years, in working out this plan. He held conference after conference with the leaders of finance, the greatest road builders, not only in this country but in foreign countries. He had conferences with many of the leading manufacturers of this country. In fact, there was not a captain of industry, so called, with whom he did not get in touch and to whom he did not submit his ideas and those of the committee for criticism and suggestions. He not only worked in the daytime but he worked nights as well. He not only worked with the committee that was appointed to labor with him to bring this about, but there was scarcely a night of the week while Congress was in session that he did not have three or four Congressmen or Senators at his home discussing this proposed great system of road building.

I know as well as any Member of this body that road building is the most popular question before the American people to-day. I know that it is in the hearts of the people to see that in this country there is a system of good roads equal to the system of any other nation on earth, and I do not believe we ought to adopt a makeshift and temporary measure. I believe that nearly every Senator will admit that the plan submitted by the committee can be but temporary. It will not accomplish what the American people want. I believe the proper thing to do is to meet the situation squarely and fairly and pass a bill that we all know will be satisfactory to the people of the United States.

The act creating the Joint Committee on Federal Aid in the Construction of Post Roads became effective August 24, 1912, and a joint committee of five Members of the House and five Members of the Senate was appointed, consisting of the following: From the Senate, Jonathan Bourne, jr., chairman, Senators PENROSE, GRONNA, SWANSON, and OVERMAN. Appointed by the Speaker of the House were the following: Congressman SHACKLEFORD as vice chairman of the joint committee, with Congressmen LEE, MCGILLICUDDY, MADDEN, and AUSTIN.

Shortly after organization the work began, and for 21 months they continued their labors before submitting their report to Congress. The data that were collected was presented in 17 chapters. I do not care how long the question of good roads may be before the people for consideration, the information collected, tabulated, and printed by this committee can always be referred to as the very best that it was possible to obtain in the world up to that time.

Mr. President, the first section of my amendment provides for the creation——

Mr. VARDAMAN. Mr. President, may I ask the Senator a question right there?

Mr. SMOOT. Certainly.

Mr. VARDAMAN. Did the committee on the part of the House report that bill to the House or recommend its passage?

Mr. SMOOT. I do not believe it did. I will state, however, that the Senate committee reported it to the Senate.

Mr. VARDAMAN. I am familiar with that fact. The vice chairman of the joint committee, Mr. SHACKLEFORD, prepared and introduced another bill?

Mr. SMOOT. Yes.

Mr. SMITH of South Carolina. Which is very similar to the one now pending.

Mr. SMOOT. No; the one that is now pending is a very much better bill than the bill which Mr. SHACKLEFORD submitted to the House.

Mr. SMITH of South Carolina. Oh, I admit that; but it was somewhat along the same lines.

Mr. SMOOT. Since the question has been asked me, perhaps I had better refer to the position of the members of the joint committee, so that the Senate will really know how they stood.

On November 25, 1914, ex-Senator Bourne, chairman of the joint committee, addressed a letter to the members of the Joint Committee on Federal Aid in the Construction of Post Roads, and asked them to examine the report, and, if it met with their approval, kindly to indicate the fact; or, if it did not, to state the reasons why it did not. The members replying to that letter were Senator GRONNA, Senator PENROSE, Congressman AUSTIN, Congressman MADDEN, Senator SWANSON, and Senator OVERMAN. There was no reply from Representatives SHACKLEFORD, LEE, or MCGILLICUDDY. The favorable replies from the Congressmen and Senators I have just named spoke in the highest terms of the measure, although the reply from Senators SWANSON and OVERMAN made one exception, and that was some parts of chapter 2. Chapter 2 referred to the desirability of congressional control. That was the subdivision to some parts of which Senator SWANSON and Senator OVERMAN did not agree; but, with that single exception, all of the members of the joint committee from the Senate, and two members of the joint committee from the House, approved the plan most heartily.

Referring to what I was about to say when interrupted, I will state that section 1 creates a fund, to be known as the United States highway fund, which is to be expended upon the order of the United States Highway Commission, or in accordance with the conditions of the contribution. The reason for the latter part of the paragraph I have just read, which is, "in accordance with the conditions of the contribution," is that the fund can be added to by contributions from other sources than the sale of bonds; and I understand that there were a number of sources from which contributions to this fund would have been made.

The State highway commission is provided for in section 7, and is to be composed of the chairman and ranking minority member of the Senate Committee on Post Offices and Post Roads, the chairman and ranking minority member of the House Committee on the Post Office and Post Roads, the Director of the Office of Public Roads, and a United States Army Engineer, to be detailed from time to time by the Secretary of War.

Mr. President, this commission would have only an advisory voice in the expenditure of the United States highway fund in the several States. The States, or the road commissions within the States, had the handling of the fund; but the highway commission was to be in a position to counsel, to advise, to instruct, if you please, the State road commissions whenever asked for information.

Section 2 of the bill provides for the raising of the money by the sale of bonds authorizing not to exceed $500,000,000, but in no one year shall there be issued more than 20 per cent of the amount. Even if the State demanded or had passed by its legislature an authorization of the issuing of bonds for the building of roads, in no one year could the Treasury Department be called upon for more than 20 per cent of the total amount. Of course, I do not believe that there ever would be a year when there would be that much called for. I am quite sure there would not be; and, as I told ex-Senator Bourne, chairman of the joint committee, I would just as soon have had the amount reduced to 10 per cent, because 10 per cent of the amount would have accomplished, I believe, at least for years to come, all that would have been asked for by the different States. But in order to be perfectly safe, and in order to satisfy any particular State that had the credit at its command and desired to issue its bonds and desired to get roads just as quickly as money could build them, I was perfectly willing that it should be 20 per cent of the amount.

The plan, Mr. President, is this: Whenever the road commission of a State decides, by authority of the State, that that State shall build a certain number of miles of road, and the plans are made for it, the specifications are drawn, and the whole system approved, then the State can issue bonds drawing interest at the rate of 4 per cent and can deposit those bonds with the Treasury of the United States, and upon the depositing of the bonds of the State as security the Secretary of the Treasury is authorized to sell 3 per cent Government bonds and advance the money to the amount of the State bonds to the State issuing them for the building of roads. The interest period upon the State bonds will be the same as the interest period upon the Government bonds, and the State in paying 4 per cent per annum upon the amount of bonds it issues to the Government, and the Government of the United States being able to sell its bonds bearing a rate of interest of 3 per cent—and under the bill they can not be sold for less than par—the 1 per cent difference between the rate of interest on the State bonds and the rate of interest on the Government bonds compounded annually in 50 years will pay off the whole debt. In this way, with the credit of the United States extended to the States, the States can spend $500,000,000 in road building in the different States by simply paying the interest upon the State bonds deposited with the Treasury of the United States as security for the amount of Government bonds sold and the proceeds given to the State.

Mr. WILLIAMS. Mr. President, if I may ask a question purely for information, perhaps the Senator did not express himself accurately or I did not clearly understand him. The 3 per cent which the State would pay to the Government would, of course, extinguish the 3 per cent which the Government owed upon its bonds.

Mr. SMOOT. The State pays 4 per cent.

Mr. WILLIAMS. I understand that; but 3 per cent of the amount which the State would pay would extinguish the 3 per cent which the Government would owe upon its bonds. Now, how could 1 per cent for only 50 years extinguish the entire principal? It would amount to only 50 per cent in that time.

Mr. SMOOT. No; I will say to the Senator this is the plan and the acknowledged result: The 1 per cent, compounded annually, will pay not only the 50 per cent in 50 years but a little over 100 per cent.

Mr. WILLIAMS. What arrangement was made for the Government so to invest it as that it will get compound interest?

Mr. SMOOT. The bill provides for it.

Mr. WILLIAMS. It does?

Mr. SMOOT. The bill provides that it shall be done; and I will say the difference between the 50 per cent spoken of by the Senator and the 100 per cent is amply provided for in this way.

Mr. WILLIAMS. The interest alone would pay only 50 per cent.

Mr. SMOOT. Yes. The bill also provides that the difference between the 4 per cent and the 3 per cent shall be invested by the Government and draw the interest that the original bond does, and that makes up the difference between the 50 per cent spoken of by the Senator and the full 100 per cent.

Mr. President, if a State does not want to build a foot of road, she does not have to do so, and she does not lose a cent in not doing so. The State not building roads under this plan is not called upon to help pay for roads built in other States. The State not taking advantage of the provisions of my amendment loses, in my opinion, the benefits that come from good roads; and, Mr. President, it is fast becoming in the minds of the people of this country a settled conviction that they must have good roads. It is necessary; and the States have not the credit, nor can they by issuing bonds, drawing interest at 4 per cent, with the full amount of the principal to be repaid, secure money enough to do the necessary road building. But under my amendment the Government of the United States, upon the State depositing its bond as security, extends its credit to the State, thus enabling the State to secure money at 3 per cent in reality, but by paying 4 per cent, at the end of 50 years the principal depositing its bonds as security, extends its credit to the State, issuing them. Could there be a more ideal way for the Government and the State to build the roads of the country?

Mr. VARDAMAN. The Senator from Utah is doubtless aware that there are a great many State in the Union which could not take advantage of this bill on account of their constitutional limitation.

Mr. SMOOT. I am coming to that, or I can discuss it now. I understand that there are a few States in the Union that could not take advantage of the provision of the bill, because they are bonded now to the amount of 10 per cent of their assessed valuation. I have not a list of the States, but I personally believe that if a State is bonded to the amount of 10 per cent on its assessed valuation, that State should not go further into debt. That is enough indebtedness for the people of the State to carry.

Mr. OVERMAN. I do not think that is the only question. I think the question also is that in some of the States they can provide for no bond issue at all without submitting it to the people.

Mr. SMOOT. Of course that does not prevent them from submitting the question to the people.

Mr. OVERMAN. They can always amend their constitutions if they want.

Mr. SMOOT. I had reference to the question asked me by the Senator from Mississippi. I understand there are a few States that are bonded to the amount of 10 per cent of their assessed valuation, and the amendment prohibits the issuing of money upon State bonds where the State is assessed up to 10 per cent of its assessed valuation, and I believe that that is a very wise provision.

Mr. BANKHEAD. In connection with what the Senator from Utah has said, I will state the additional fact that it not only provides that no State having a bond issue to 10 per cent of the taxable value shall be entitled to any of this money, but it further provides that no money proposed to be given under it shall be added to that. When you take the States that are now up to or near the limit of taxation and then add whatever they are going to get under this provision, you will have a few States in the Union that can not get any of it.

Mr. SMOOT. Oh, no; I want to disavow any such statement as that. The amount the State can get under the bill depends upon what the State itself applies. I doubt very much whether there are many States, if any, that would be barred from the bill by adding the amount of money that they would receive under the amendment where, with that added, it would be more than 10 per cent of the assessed valuation. There are very few States that carry that amount of indebtedness. In fact, in some States they are restricted to 5 per cent, and in my opinion the restriction is a wise one.

Mr. VARDAMAN. If the Senator will pardon me for just a moment, the discussion of this question developed that there are several States represented by Senators on the committee, if I remember accurately, that would be barred from participating in this fund. I wish to say to the Senator that I think the amendment is in many respects almost ideal in its provisions; but this road building by Federal aid is a new thing, and I became convinced early in the discussion that it would be absolutely impossible at this time to enact the bill proposed by former Senator Bourne. We discussed it at some length and, while it commends itself to me very strongly, I feel as though the adoption of that bill as an amendment would defeat legislation of this character at this session. I am particularly anxious that we should begin and that as time moves on, in the evolution of things, we may come to some plan as nearly perfect as possible; but I do not think it is a good plan to adopt it now.

Mr. SMOOT. In answer to the Senator, of course he knows, as I suppose we all do, that there are some States in which the constitution of the State would not allow them to take advantage of this bill; and he also knows as well as I do that the States can amend their constitutions, and without a question, if they so desire. It is true there are a few of the States that have no State road commission, but that could be provided for even before the operation of this bill could possibly take effect.

Mr. VARDAMAN. I wish to say to the Senator before he leaves that point that there are States in the Union the constitutions of which are so written that the change could not be made in four or five years. The amendment would have to be submitted to the people and it would have to be voted on at a general election. It would mean, in order to get this matter into operation, a postponement in some of the States of five or six years, with a very expensive campaign.

Mr. SMOOT. I think it is very much better, even if that were true, that a few States should have to take that course rather than embark upon a system of road building in this country that is not ideal in its provisions. The Senator from Mississippi expresses my opinion of this amendment when he says that it is almost ideal. I have studied it most carefully. I might say that I studied it with Mr. Bourne section by section. I do not believe there is a system which can be devised by man that is more perfect than this system for the beginning and completion of road building in this country.

Mr. VARDAMAN. Does not the Senator realize that if the pending bill as it came from the committee and is at this moment before the Senate should be adopted it will be opening the way for such legislation as he is now proposing? There can not be any waste of funds or expenditure of money upon makeshifts under the terms of the bill reported by the Senator from Alabama. It is so safeguarded that there will not possibly be any misappropriation or misuse or improper use of the fund. When we shall have started this matter it will be very easy to move on toward the perfect measure that the Senator is so eloquently speaking for now.

Mr. SMOOT. When I begin to build a house, I have in mind exactly what I want to construct. I think it would be very unwise to lay the foundation of any structure with weak materials of any kind. You want the foundation or beginning as perfect as possible, as the structure must rest upon it. We are beginning to-day to construct a great good-roads system, or house, if you please, for the people of the United States, and I want to begin right. I want every dollar that is expended of the people's money, for they will have ultimately to pay every cent of it, to be spent in a way that not one dollar of it will be wasted, nor one step taken that will have to be retraced, nor one effort made that will not be for the ultimate success of a perfect system.

Mr. VARDAMAN. If the Senator were building a house in connection with 40 or 50 other men, the majority of those men are equally interested in the house, and if they differed with him as to material of which the foundation was to be laid the Senator would not decline to build any house at all because he could not have his way absolutely about it?

Mr. SMOOT. No; of course not.

Mr. VARDAMAN. Now, I confess if I had my way about it I would take the Bourne plan, but I am convinced that we can not start with it, and the next best thing is the bill as it came from the committee, which I am sure will pass the Senate and finally be passed by the House.

Mr. SMOOT. No; the Senator would not stop building the house if there was a majority of the men building the house who wanted to construct it in a different way; but I am just as positive as I live that there is a majority of the Senate of the United States who would prefer my amendment to any that has been offered to the pending bill. Of course, if the Senate rejects it, that settles it; but I am quite sure there are other Senators in the same position as that expressed by the Senator from Mississippi. He is convinced that my amendment is the better plan; he is convinced that it is better than the plan proposed by the committee; but he is fearful that if it is adopted by the Senate the House will not approve of it. I wish that the Senate would do its duty to-day and accept the plan that it believes is for the best interests of the people; and I do know that there is not a question but that this is the system that ought to be put in force in the United States.

Mr. KENYON. Mr. President——

Mr. SMOOT. I yield to the Senator.

Mr. KENYON. I agree with the Senator that a majority of the Senate are in favor of this plan. I have talked with many Senators on the subject. That being so, as the Senator says, why can we not adopt the bill? This is a real road bill and one that would be satisfactory to the people and it would work out well. Why can we not adopt it?

Mr. THOMAS. If the Senator will allow me to answer that question, I think it was pretty well answered by the Senator from Massachusetts [Mr. LODGE] the other day. It is because the bill that is pending was made to be passed.

Mr. KENYON. I suppose the Senator from Utah knows more about it than the rest of us.

Mr. SMOOT. The Senator from Utah has already stated that he is fearful there are other Senators in exactly the same position as the Senator from Mississippi; that they are in favor of this measure, but they believe its passage would defeat any good-roads legislation, because the House would not pass it. I do not believe that that ought to be taken into consideration by the Senate. I think that the Senate ought to express its opinion and pass what it believes is the best measure for the country.

Mr. KENYON. If that is so, then we never can get a bill carrying out the Bourne plan.

Mr. SMOOT. That seems to be self-evident.

Mr. KENYON. And we never can get a real measure that will make for perfect road improvement.

Mr. SMOOT. Until the plan to be adopted proves to the people beyond a question or a doubt that there is a great waste of money. Right in this connection I wish to say that the Senate substitute provides for $75,000,000 appropriation. That is only a beginning.

Mr. THOMAS. The first drop in the bucket.

Mr. SMOOT. Many Senators who are in this Chamber now will live to see the day when the statement I have made will be absolutely verified. It is only a beginning. I hope no Senator will vote for the committee amendment thinking that at the end of five years there will be no more appropriations for good roads in this country. I believe that the expenditure of the money provided for the first year and the second year will convince the people that this is not the proper way of building

roads, because, I tell Senators, now the money appropriated in this bill can be used in refitting or rebuilding present roads, and that is what the most of it will be used for, at least for this and the building of dirt roads.

Section 3 creates a State highway commission. I shall not spend any time in the discussion of that section, because I think it is unnecessary at this time. I referred to it in my opening remarks.

Section 4 provides for the apportionment of the money. It is apportioned, first, upon the total land area; second, on the population according to the last Federal census; third, on the total assessed valuation of all taxable property; and, fourth, on the total mileage of public roads in each of the several States. I think that that apportionment could not be improved upon. I do not think there is any State in the Union that can find fault with it.

Taking all four of these requirements into consideration, it seems to me that it is almost perfect as to the apportionment of the money to the States under the bill.

Section 5 provides for the application of the money. I have already referred to the question of the elimination of a State the indebtedness of which amounts to more than 10 per cent of its assessed valuation, and I shall not take any more of the Senate's time to discuss that question.

Section 6 provides for the maintenance of the roads. It is ideal in its provisions. It is perfect, it seems to me. Every power is left in the State. The good people of the State know as to the amount of money that they wish to spend upon the roads of their State and also the amount of money to be expended upon maintaining them up to the maximum provided for in the amendment. I say without fear of contradiction that if it is complied with by the State roads will be maintained in good order, and it will prevent the deterioration of them and keep the roads as they ought to be kept.

That is the only way good roads in a State can be maintained. I do not care how good a road may be when built; I do not care where located; allow it to go without constant repair, and particularly if the first breaks in it are not attended to, and the neglect will be most costly to the State.

I was over in the Hawaiian Islands not long ago. The people of the islands are beginning to build good roads. They have a few stretches of very good roads, but most of them upon the islands are very poor, particularly outside of the island of Oahu, and I might limit it in and around the city of Honolulu. The first time I went over the roads, and they have not been built long, I noticed breaks in them. I said to the man who was with me, "Why do you not keep this splendid road in repair? Every day that you let it go without it will cost you more and more money, and before long you will have no road and will be compelled to rebuild. Good roads ought to be repaired just as soon as a break is shown in them."

Mr. GALLINGER. Mr. President, at that point——

Mr. SMOOT. I yield to the Senator.

Mr. GALLINGER. It is a pretty well established fact in the States where they have built good roads and where they are intending to build more that the only successful system is to have section hands, as they have on railroads, and have material at hand to repair the roads as they become worn. Until that is done there is a great waste on roads at the present time, and there will continue to be a great waste.

Mr. SMOOT. The States that are building good roads to-day and are successful in maintaining them are following exactly that plan. It is the only plan, Mr. President, whereby roads can be prevented from rapidly deteriorating.

Now, Mr. President, under the apportionment of the bill——

Mr. NORRIS. I was called out of the Chamber and the Senator may have touched upon the question concerning which I am about to ask him, and if so, I will not ask the Senator to repeat it. There are two points in the amendment that I want to inquire about. The first is in regard to maintenance. I understand it does not properly provide that the roads shall be maintained after they are built. The other question is in regard to the 1 per cent extra interest that is used as a sinking fund, and that the Senator says will pay off the State bonds at maturity. As I read the amendment, it provides that the State shall be credited with this 1 per cent and it is given a credit of interest compounded at 3 per cent, but there is not any provision in the amendment under which the sinking fund shall be invested by the United States except it provides that the fund may be used for the redemption of bonds. If they are unable to get bonds, as provided in the amendment, without paying a premium, the State would be relieved from the payment of the State bonds, because the Federal Government is obligated to give the State credit at the rate of 3 per cent per annum on that 1 per cent deposited, compounded semiannually. The Government itself might not be able to get that money, and it would have to be paid out of the ordinary resources raised by taxation by the Federal Government.

Mr. SMOOT. On page 6 it is provided that—

> The Treasurer of the United States shall keep an account with each State that shall deposit bonds and receive funds under the provisions of this act, and shall credit said State with interest compounded annually at the rate of 3 per cent per annum on the sinking funds paid in. Money received upon the principal of State bonds shall also be credited to the sinking fund, but no interest credit shall be allowed the State thereon.

I do not think there is any chance whatever of the Government at any time finding it impossible to invest in these bonds. I do not think a contingency of that kind would arise.

Mr. NORRIS. Still it really prohibits the Government from using this sinking fund for the purpose of investing it in some way that will bring a return, because it provides that when the sinking fund amounts to the sum of $1,000,000, then the Secretary of the Treasury is directed to go into the open market and purchase $1,000,000 par value of the United States highway bonds. If he can not purchase them at par, then he is authorized to pay such premium as is necessary.

Mr. SMOOT. Not exceeding 2 per cent.

Mr. NORRIS. To be determined by competition, not exceeding 2 per cent per annum and accrued interest. There is not any way by which the Government could invest its sinking fund. It would have to use it for the purpose provided for in the amendment, which would be for the purchase of these bonds, and it is paying the State all the time 3 per cent interest on the money, compounded semiannually, as it is bound to do, no matter what it does with the fund or what becomes of it.

Mr. SMOOT. The interest of one year will always amount to more than $1,000,000 as soon as the measure is in operation. Therefore, they will have that amount of money just as soon as the first year's interest is paid. So there is no likelihood that the Government will ever be in a position where it can not invest the interest collected.

Mr. NORRIS. Yes; that would be true; but suppose when the Government has the $1,000,000 it would be unable to buy bonds. The men who invest, especially at the beginning of it when the bonds are just starting to run, getting a Government bond, would not want to sell it again at par. The people or the institutions that buy these bonds would do it for the purpose of making a permanent investment. I do not believe you could go out and buy these bonds, and if you did not, the Government would pay interest on money and be getting no interest.

Mr. SMOOT. I think with 3 per cent bonds and the authority of giving 2 per cent premium in order that they may be redeemed in advance the Government could secure them. That is the opinion of the leading bankers of this country.

Mr. NORRIS. If that be true, then the Government would always be out the premium that it would pay.

Mr. SMOOT. Of course, if it sold the bonds at a premium. I hardly think it would. It has been discussed, I will say to the Senator, with the best bankers in the United States. It was the original plan to provide a 4 per cent Government bond with 5 per cent interest to be paid by the State, but I think ninety-nine out of one hundred of the bankers who were consulted decided that on this plan a 3 per cent bond would sell at par with the credit of the Government of the United States back of it, the best in the world.

Mr. NORRIS. The Senator must remember that all the time the Government of the United States is by law obligated to pay to the State 3 per cent interest on the sinking fund, and that interest must be compounded semiannually. There is not any way to escape that.

Mr. SMOOT. No; but there is a margin.

Mr. NORRIS. A little margin.

Mr. SMOOT. There is a margin.

Mr. NORRIS. Yes; there would be a little margin.

Mr. SMOOT. And that margin will provide for whatever may be lost in the idleness of a part of the money.

Mr. NORRIS. If the Government could get the interest immediately in the sinking fund deposited, and if immediately it could use that money and buy bonds at par, so that it would never have anything on hand in the sinking fund there would be a little margin. I have not figured it out, but it would not be very great. There would be a little margin, because the sinking fund to double in 50 years would have to draw interest, and the interest on that would have to be compounded semiannually, continually compounded. The Government's obligation would keep growing all the time. But there never would be a time when the Government could immediately, on the very day, invest all the money in these bonds that came in from the States. There would necessarily be some time lost, and it would more than make up for this margin. I think, too, if the Gov-

ernment was unable to buy the bonds then, it would lose the interest, and it would be paying for 50 years 3½ per cent interest on the bonds, compounded semiannually, which interest itself, after 25 or 30 years, would amount to an enormous sum. That is the weakness, or one of the two weaknesses of the bill.

Mr. SMOOT. Mr. President, I can only say that I have no apprehension but that the margin will take care of the loss of interest during the time that the interest money is idle. I will also state to the Senator that that is the opinion of the very best bankers in the United States.

The amount which each State would be entitled to issue bonds for and to receive is approximately as follows: Alabama, $8,600,000; Arizona, $5,650,000; Arkansas, $7,200,000; California, $17,950,000; Colorado, $7,950,000; Connecticut, $4,350,000—I am not going to take the time to read the figures for all the States, but ask that this table be printed in the RECORD as part of my remarks. It gives the names of the States, the land area in square miles, the population in 1910, the assessed valuation for the fiscal year 1912, the total mileage of roads within the State, the percentage, and the amount of the apportionment to each State.

The VICE PRESIDENT. Without objection, the matter referred to will be printed in the RECORD.

The table referred to is as follows:

The amount each State would be entitled to issue bonds for and receive is approximately as follows:

| State. | Land area in square miles. | Population, 1910. | Assessed valuation, fiscal year 1912. | Total mileage of roads. | Apportionment to each State. | |
|---|---|---|---|---|---|---|
| | | | | | Per cent. | Amount. |
| Alabama | 51,279 | 2,138,093 | $484,851,212.00 | 49,639 | 1.72 | $8,600,000 |
| Arizona | 113,840 | 204,354 | 140,338,191.00 | 5,987 | 1.13 | 5,650,000 |
| Arkansas | 52,525 | 1,574,449 | [1] 425,478,614.00 | 36,445 | 1.44 | 7,200,000 |
| California | 156,092 | 2,377,549 | 2,919,342,889.00 | 48,069 | 3.59 | 17,950,000 |
| Colorado | 103,658 | 799,024 | 430,000,000.00 | 29,693 | 1.59 | 7,950,000 |
| Connecticut | 4,820 | 1,114,756 | [1] 1,041,334,019.00 | 12,583 | .87 | 4,350,000 |
| Delaware | 1,965 | 202,322 | 92,575,760.00 | 3,000 | .14 | 700,000 |
| Florida | 54,861 | 752,619 | 218,887,518.00 | 17,579 | .95 | 4,750,000 |
| Georgia | 58,725 | 2,609,121 | 842,000,000.00 | 82,230 | 2.45 | 12,250,000 |
| Idaho | 83,779 | 325,594 | 418,780,394.00 | 18,403 | 1.16 | 5,800,000 |
| Illinois | 56,002 | 5,638,591 | 2,343,673,232.00 | 94,141 | 3.94 | 19,700,000 |
| Indiana | 35,885 | 2,700,876 | 1,891,602,077.00 | 67,996 | 2.51 | 12,550,000 |
| Iowa | 55,586 | 2,224,771 | 713,318,825.00 | 102,427 | 2.50 | 12,500,000 |
| Kansas | 81,774 | 1,690,949 | 2,746,900,291.00 | 98,302 | 3.28 | 16,400,000 |
| Kentucky | 40,181 | 2,289,905 | 1,089,265,143.00 | 53,744 | 1.98 | 9,900,000 |
| Louisiana | 45,409 | 1,656,388 | 546,650,157.00 | 24,962 | 1.32 | 6,600,000 |
| Maine | 29,895 | 742,371 | 478,192,054.00 | 25,528 | .92 | 4,600,000 |
| Maryland | 9,941 | 1,295,346 | 979,309,970.00 | 16,773 | .99 | 4,950,000 |
| Massachusetts | 8,039 | 3,366,416 | 4,249,699,855.00 | 17,272 | 2.73 | 13,650,000 |
| Michigan | 57,480 | 2,810,173 | [1] 2,288,000,000.00 | 68,906 | 2.88 | 14,400,000 |
| Minnesota | 80,858 | 2,075,708 | 1,212,567,794.00 | 79,323 | 2.59 | 12,950,000 |
| Mississippi | 46,362 | 1,797,114 | [1] 399,029,000.00 | 39,619 | 1.48 | 7,400,000 |

| Total and average | 2,974,090 | 91,972,266 | 67,763,587,864.45 | 2,199,646 | ..... | 500,000,000 |

[1] 1911. [2] Rough estimate. [3] 1910.

Mr. SMOOT. Mr. President, Senators will notice that the apportionment to every State is such an amount as will enable the State to do perhaps more in road building than it would ordinarily do in the next 10 years.

If we adopt the substitute recommended by the committee, we will be creating another bureau in the department; and, as I have said, the appropriations for that bureau will grow. If we adopt the amendment which I have offered, the States will be more careful in the expenditure of the money, because the States will pay the money, or at least they will pay the interest upon the bonds. If you pass either the House bill or the substitute reported by the committee, I am quite sure there will be in some cases a reckless expenditure of the money, and I do not believe that very much of it will be put in permanently good roads. Most of it will be spent in repairing present roads, in maintaining present roads, and at the end of the five years, when we have spent $75,000,000, the roads of the country will be in but little better condition than they are to-day.

For these reasons, Mr. President, I ask the Senate to adopt the amendment which I have offered to the bill.

Mr. GALLINGER. Mr. President, I will inquire of the Senator from Alabama if he expects a vote on the bill to-day?

Mr. BANKHEAD. Mr. President, I had very much hoped, of course, that we would get a vote on the bill to-day, but I fear that it will not be possible, and I am going to ask that the bill be laid aside temporarily, with a view to making a motion that the Senate proceed to the consideration of executive business.

## PETITIONS AND MEMORIALS.

Mr. TAGGART. I present a telegram in the nature of a petition from Daniel Foley and other citizens of Indianapolis, Ind., which I ask may be printed in the RECORD and referred to the Committee on Foreign Relations.

There being no objection, the telegram was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

[Telegram.]

INDIANAPOLIS, IND., *May 5, 1916.*

Hon. THOMAS TAGGART,
*Washington, D. C.:*

At a mass meeting of citizens of Irish blood held here to-night the following resolution was passed and ordered sent to you for presentation to the Congress, that in view of the dreadful reign of terror which we know has existed for months in Ireland under British rule and the awful sufferings of her people, we ask the Government of the United States, through our representatives in the Senate and in Congress, to make immediate inquiry through our consuls in Ireland for a complete report as to actual conditions in Ireland prior to and during the recent revolt of the Irish patriots and to ascertain the fate of the many American citizens, both students and business men, known to have been in Ireland at the time of the outbreak, and that a request to this effect be immediately telegraphed to our Senators and Congressmen.

DANIEL FOLEY, *Chairman.*
MICHAEL E. HOWARD, *Vice Chairman.*
W. H. FOLEY, *Secretary.*
MAURICE DONNELLY.
P. J. KELLEHER.
J. J. LIDDY.

Mr. TAGGART presented a petition of sundry citizens of Franklin, Ind., praying for the enactment of legislation to recognize the services of certain employees of the Government in the Canal Zone, which was referred to the Committee on Interoceanic Canals.

Mr. CHAMBERLAIN presented petitions of sundry citizens of Oregon, praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Beaverton, Oreg., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

He also presented memorials of sundry citizens of Portland, Oreg., remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

Mr. NELSON presented a petition of Norman L. Sandberg Camp, No. 18, United Spanish War Veterans, of Albert Lea, Minn., praying for the enactment of legislation to grant pensions to widows and orphans of veterans of the Spanish-American War, which was ordered to lie on the table.

Mr. NORRIS presented a memorial of sundry citizens of College View, Nebr., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. PAGE presented petitions of Industrial Grange, No. 127, Patrons of Husbandry, of Andover; of Lamoille Grange, No. 233, Patrons of Husbandry, of Morrisville; and of Mount Philo Grange, No. 329, Patrons of Husbandry, of North Ferrisburg, all in the State of Vermont, praying for Government ownership of telegraph and telephone systems, which were referred to the Committee on Post Offices and Post Roads.

Mr. WORKS presented a memorial of sundry citizens of Ontario, Cal., remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

He also presented petitions of sundry citizens of Los Angeles, Santa Barbara, and San Luis Obispo, all in the State of California, praying for the adoption of an amendment to the Constitution granting the right of suffrage to women and remonstrating against the failure of the Committee on the Judiciary

of the House of Representatives to report the proposed amendment, which were ordered to lie on the table.

He also presented a memorial of sundry citizens of Ontario, Cal., remonstrating against the proposed creation of a juvenile court in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. POINDEXTER presented the memorial of H. H. Hayes and sundry other citizens of Tacoma, Wash., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

He also presented a petition of Crosby Grange, Patrons of Husbandry, of Nellita, Wash., praying for Government ownership of telegraph and telephone systems, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of the Commercial Club of Seattle, Wash., remonstrating against the adoption of the so-called Clarke amendment to the Philippine bill, to grant independence to the Philippine Islands in four years, which was ordered to lie on the table.

Mr. THOMAS presented a petition of sundry citizens of El Paso County, Colo., praying for the enactment of legislation to found the Government on Christianity, which was referred to the Committee on the Judiciary.

Mr. WADSWORTH presented petitions of sundry citizens of Delevan and Sullivan Counties, in the State of New York, praying for the enactment of legislation to found the Government on Christianity, which were referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Rochester, N. Y., remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TAGGART:

A bill (S. 5892) granting an increase of pension to Sarah E. Aldridge;

A bill (S. 5893) granting an increase of pension to Hamilton B. Pate; and

A bill (S. 5894) granting an increase of pension to Frank Lintz; to the Committee on Pensions.

By Mr. TOWNSEND:

A bill (S. 5895) granting a pension to Lorenzo J. McEvoy (with accompanying papers); to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 5896) granting an increase of pension to Sybilie Grossart; to the Committee on Pensions.

By Mr. SHEPPARD:

A bill (S. 5897) for addition and repairs to post-office building at Galveston, Tex.; and

A bill (S. 5898) for a site and building for customs and other Government offices at Galveston, Tex.; to the Committee on Public Buildings and Grounds.

### HARBOR IMPROVEMENTS.

Mr. BRANDEGEE submitted the following resolution (S. Res. 182), which was referred to the Committee on Naval Affairs;

*Resolved*, That the Secretary of War be, and he hereby is, authorized and directed to report to Congress, at the earliest practicable date, not later than December 4, 1916:

First. Specific plans for improvement of the harbors and connecting channels which, in his judgment, after consultation had with the Secretary of the Navy, will best provide adequate facilities for operations of the fleet for defense of the harbors of Portland, Me.; Boston, Mass.; Providence, R. I.; New London, New Haven, and Bridgeport, Conn.; New York, N. Y.; Norfolk, Va.; Savannah and Brunswick, Ga.; Charleston, S. C.; New Orleans, La.; Galveston, Tex.; San Diego and San Francisco, Cal.; and Seattle, Wash.

Second. The feasible extensions requisite to make existing approved projects for improvement of the aforementioned harbors available for the purposes stated in the foregoing paragraph.

Third. The cost of each such several improvements calculated upon the basis of completion thereof under contract within five years.

Fourth. The percentage, not exceeding 30 per cent of the cost of each such improvement, which, in the judgment of the Secretary of War, should be contributed by the several cities or State governments in consideration of the completion within five years of the improvement recommended by the Secretary of War.

Fifth. The replies of the local authorities and State governments to the propositions to them submitted by the Secretary of War to contribute to the carrying out and the cost of such several improvements.

### INDIAN APPROPRIATIONS—CONFERENCE REPORT (S. DOC. NO. 427).

Mr. ASHURST. I submit the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917. I ask that it be printed as a document, and also that it lie on the table and be printed in the RECORD.

The VICE PRESIDENT. Without objection, that order will be made.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses, as follows:

That the Senate recede from its amendments numbered 3, 4, 6, 8, 11, 12, 15, 23, 30, 31, 32, 38, 40, 43, 44, 45, 49, 69, 73, 77, 88, 91, 92, 100, 108, 117, 118, 119, 120, 123, 133, 135, 147, and 149.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 5, 9, 13, 16, 17, 18, 19, 20, 21, 22, 24, 25, 27, 28, 29, 33, 39, 46, 48, 50, 51, 52, 53, 54, 56, 58, 60, 61, 62, 63, 64, 66, 67, 68, 70, 71, 76, 80, 81, 85, 86, 89, 90, 93, 94, 96, 98, 99, 101, 103, 104, 106, 107, 109, 111, 112, 114, 115, 121, 122, 125 126, 128, 130, 131, 134, 136, 138, 139, 140, 141, 143, 144, 145, 148, 150, 151, 152, 153, 154, and 155, and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In line 7 of said amendment strike out the word "the" and insert in lieu thereof the word "Indian," and, in line 8, of said amendment, strike out the word "the" and insert in lieu thereof the word "such"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In line 1, of said amendment, strike out the word "to" and insert in lieu thereof the following: "$5,000 of which shall"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following: "*Provided further*, That not more than $200,000 of the amount herein appropriated may be expended for the tuition of Indian children enrolled in the public schools"; and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "two permanent warehouses"; and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: In line 1 of said amendment strike out the words "which has been," and in line 2 of said amendment strike out the words "heretofore or"; and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"For beginning the construction by the Indian Service of a dam with a bridge superstructure and the necessary controlling works for diverting water from the Gila River for the irrigation of Indian land and Indian allotments on the Gila River Indian Reservation, Ariz., as recommended by the Board of Engineers of the United States Army in paragraph 217 of its report to the Secretary of War February 14, 1914 (H. Doc. No. 791), $75,000, to be immediately available and to remain available until expended, reimbursable as provided in section 2 of the act of August 24, 1912 (37 Stat. L., p. 522), the total cost not to exceed $200,000."

And the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For beginning the construction by the Indian Service of a diversion dam and necessary controlling works for diverting water from the Gila River at a site above Florence, Ariz., as estimated by the Board of Engineer Officers of the United States Army in paragraph 138 of its report to the Secretary of War of February 14, 1914 (H. Doc. No. 791), $75,000, to remain available until expended, the total cost not to exceed $175,000: *Provided*, That said dam shall be constructed as a part of a

project for the irrigation from the natural flow of the Gila River of Indian lands on the Gila River Indian Reservation and private and public lands in Pinal County, Ariz.: *And provided further*, That the water diverted from the Gila River by said diversion dam shall be distributed by the Secretary of the Interior to the Indian lands of said reservation and to the private and public lands in said county in accordance with the respective rights and priorities of such lands to the beneficial use of said water as may be determined by agreement of the owners thereof with the Secretary of the Interior or by a court of competent jurisdiction: *And provided further*, That the construction charge for the actual cost of said diversion dam and other works and rights shall be divided equitably by the Secretary of the Interior between the Indian lands and the private and public lands in said county; and said cost as fixed for said Indian lands shall be reimbursable as provided in section 2 of the act of August 24, 1912 (37 Stat. L., 522); but the construction charge as fixed for the private and public lands in said county shall be paid by the owner or entryman in accordance with the terms of an act extending the period of payment under reclamation projects, approved August 13, 1914 (38 Stat. L., 686): *And provided further*, That said project shall only be undertaken if the Secretary of the Interior shall be able to make or provide for what he shall deem to be satisfactory adjustments of the rights to the water to be diverted by said diversion dam or carried in canals, and satisfactory arrangements for the inclusion of lands within said project and the purchase of property rights which he shall deem necessary to be acquired, and shall determine and declare said project to be feasible."

And the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For extension of the Ganado irrigation project on the Navajo Indian Reservation in Arizona for the irrigation of approximately 600 acres of land in addition to the area to be irrigated by said project, as authorized in section 2 of the act of August 24, 1912, $20,000; and for maintenance and operation of the project, $3,000; in all, $23,000, reimbursable and to remain available until expended."

And the Senate agree to the same.

Amendment numbered 37: That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment as follows: In line 16 of said amendment strike out the figures "$15,000" and insert in lieu thereof the following: "$10,000"; and the Senate agree to the same.

Amendment numbered 41: That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 100 Indian pupils at the Greenville Indian School, California, including pay of superintendent, $18,400; for general repairs and improvements, including purchase of additional land for school farm, $8,000; in all, $26,400."

And the Senate agree to the same.

Amendment numbered 42: That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"For the improvement and construction of roads and bridges on the Yuma Indian Reservation in California, $10,000, to be immediately available, reimbursable to the United States by the Indians having tribal rights on said reservation."

And the Senate agree to the same.

Amendment numbered 47: That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $10,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Potawatomi Indians in the State of Kansas, and to be expended under his direction for the construction of bridges across the Big Soldier Creek and Little Soldier Creek, within the Potawatomi Indian Reservation, Jackson County, Kans.: *Provided*, That no part of the money herein appropriated shall be expended until the Secretary of the Interior shall have obtained from the proper authorities of the county of Jackson satisfactory guaranties of the payment by the said county of Jackson of at least one-half of the cost of said bridges, and that the said proper authorities of the said county of Jackson shall assume full responsibility for and will at all times maintain and repair said bridges: *And provided further*, That any and all expenses above the amount herein named in connection with the building and maintaining of said bridges shall be borne by the said county of Jackson: *And provided further*, That this appropriation shall not become effective until approved by an Indian council to be called for that purpose."

And the Senate agree to the same.

Amendment numbered 55: That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment as follows: Strike out the following language of the amendment: "Hereafter on ceded lands in the State of Minnesota embraced within the provisions of the law entitled 'An act for the relief and civilization of the Chippewa Indians in the State of Minnesota,' approved January 14, 1889, the minerals in and mineral rights pertaining to any of the lands, the cession of which was provided for in said act, and for which the United States has not conveyed title, shall be and remain in and are reserved for the use and benefit of the Chippewa Indians in the State of Minnesota"; and the Senate agree to the same.

Amendment numbered 57: That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same with an amendment as follows: In line 6 of said amendment strike out the following: "at Keewaton, Wis." and the comma; and the Senate agree to the same.

Amendment numbered 59: That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment as follows: In line 1 of said amendment, after the word "balance," insert the following: "of $3,436.03"; and the Senate agree to the same.

Amendment numbered 65: That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment, as follows: In line 2 of said amendment strike out the word "section" and in line 3 strike out the word "one" and insert in lieu thereof the words "this act"; and the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In line 2 of said amendment strike out the figures "$50,000" and insert in lieu thereof "$25,000"; and the Senate agree to the same.

Amendment numbered 74: That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The work to be done with the amounts herein appropriated for the completion of the Blackfeet, Flathead, and Fort Peck projects may be done by the Reclamation Service on plans and estimates furnished by that service and approved by the Commissioner of Indian Affairs: *Provided*, That not to exceed $15,000 of applicable appropriations made for the Flathead, Blackfeet, and Fort Peck irrigation projects shall be available for the maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles for official use upon the aforesaid irrigation projects: *Provided further*, That not to exceed $7,500 may be used for the purchase of horse-drawn passenger-carrying vehicles and that not to exceed $1,500 may be used for the purchase of motor-propelled passenger-carrying vehicles."

And the Senate agree to the same.

Amendment numbered 75: That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment as follows: In lieu of the matter proposed, insert the following:

"That the Secretary of the Interior be, and he is hereby, authorized and directed to announce, at such time as in his opinion seems proper, the charge for construction of irrigation systems on the Blackfeet, Flathead, and Fort Peck Indian Reservations in Montana, which shall be made against each acre of land irrigable by the systems on each of said reservations. Such charges shall be assessed against the land irrigable by the systems on each said reservation in the proportion of the total construction cost which each acre of such land bears to the whole area of irrigable land thereunder.

"On the 1st day of December after the announcement by the Secretary of the Interior of the construction charge the allottee, entryman, purchaser, or owner of such irrigable land which might have been furnished water for irrigation during the whole of the preceding irrigation season, from ditches actually constructed, shall pay to the superintendent of the reservation where the land is located, for deposit to the credit of the United States as a reimbursement of the appropriations made or to be made for construction of said irrigation systems, 5 per cent of the construction charge fixed for his land, as an initial installment, and shall pay the balance of the charge in 15 annual

installments, the first 5 of which shall each be 5 per cent of the construction charge and the remainder shall each be 7 per cent of the construction charge. The first of the annual installments shall become due and payable on December 1 of the fifth calendar year after the initial installment: *Provided*, That any allottee, entryman, purchaser, or owner may, if he so elects, pay the whole or any part of the construction charges within any shorter period: *Provided further*, That the Secretary of the Interior may, in his discretion, grant such extension of the time for payments herein required from Indian allottees or their heirs as he may determine proper and necessary, so long as such land remains in Indian title.

"That the tribal funds heretofore covered into the Treasury of the United States in partial reimbursement of appropriations made for constructing irrigation systems on said reservations shall be placed to the credit of the tribe and be available for such expenditure for the benefit of the tribe as Congress may hereafter direct.

"The cost of constructing the irrigation systems to irrigate allotted lands of the Indians on these reservations shall be reimbursed to the United States as hereinbefore provided, and no further reimbursements from the tribal funds shall be made on account of said irrigation works except that all charges against Indian allottees or their heirs herein authorized, unless otherwise paid, may be paid from the individual shares in the tribal funds, when the same is available for distribution, in the discretion of the Secretary of the Interior.

"That in addition to the construction charges every allottee, entryman, purchaser, or owner shall pay to the superintendent of the reservation a maintenance and operation charge based upon the total cost of maintenance and operation of the systems on the several reservations, and the Secretary of the Interior is hereby authorized to fix such maintenance and operation charge upon such basis as shall be equitable to the owners of the irrigable land. Such charges when collected shall be available for expenditure in the maintenance and operation of the systems on the reservation where collected: *Provided*, That delivery of water to any tract of land may be refused on account of nonpayment of any charges herein authorized, and the same may, in the discretion of the Secretary of the Interior, be collected by a suit for money owed: *Provided further*, That the rights of the United States heretofore acquired, to water for Indian lands referred to in the foregoing provision, namely, the Blackfeet, Fort Peck, and Flathead Reservation land, shall be continued in full force and effect until the Indian title to such land is extinguished.

"That the Secretary of the Interior be, and he is hereby, authorized to prescribe such rules and regulations and issue such notices as may be necessary to carry into effect the provisions of this act, and he is hereby authorized and directed to determine the area of land on each reservation which may be irrigated from constructed ditches and to determine what allowance, if any, shall be made for ditches constructed by individuals for the diversion and distribution of a partial or total water supply for allotted or surplus unallotted land: *Provided*, That if water be available prior to the announcement of the charge herein authorized, the Secretary of the Interior may furnish water to land under the systems on the said reservations, making a reasonable charge therefor, and such charges when collected may be used for construction or maintenance of the systems through which such water shall have been furnished."

And the Senate agree to the same.

Amendment numbered 78: That the House recede from its disagreement to the amendment of the Senate numbered 78, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "for the purpose of making necessary repairs on the Government bridge across the Niobrara River near Niobrara, Nebr.; also to reconstruct one span of 90 feet over the back channel of the Niobrara River at the same point, the sum of $6,500; said sum to be expended under the direction of the Secretary of the Interior"; and the Senate agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$91,100"; and the Senate agree to the same.

Amendment numbered 82: That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 290 Indian pupils at the Indian school at Carson City, Nev., including pay of superintendent, $50,430; for general repairs and improvements, $8,000; for irrigating school farm, $4,000; in all, $62,430."

And the Senate agree to the same.

Amendment numbered 83: That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: In line 4 of the amendment, after the figures "$15,000," strike out the period and insert a colon and the following: "*Provided*, That no part of this appropriation shall be expended for mileage, salaries, or expenses of employees"; and the Senate agree to the same.

Amendment numbered 84: That the House recede from its disagreement to the amendment of the Senate numbered 84, and agree to the same with an amendment as follows: In line 2 of the amendment strike out the following: "and to remain available until expended"; and the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 350 Indian pupils at the Indian school at Santa Fe, N. Mex., and for pay of superintendent, $59,550; for general repairs and improvements, $6,000; for water supply, $1,600; for the construction of an assembly hall and gymnasium, $25,000; in all, $92,150."

And the Senate agree to the same.

Amendment numbered 95: That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 220 Indian pupils at the Indian school, Wahpeton, N. Dak., and pay of superintendent, $38,540; for general repairs and improvements, $5,000; for new school building, $20,000; in all, $63,540."

And the Senate agree to the same.

Amendment numbered 97: That the House recede from its disagreement to the amendment of the Senate numbered 97, and agree to the same with an amendment as follows: Strike out all of said amendment and insert the following:

"To enable the Secretary of the Interior to redeem a mortgage on the allotment selection of Starr McGillis, a Turtle Mountain Chippewa Indian, described as the northwest quarter of section 34, township 164 north, range 70 west of the fifth principal meridian, North Dakota, $1,500, or so much thereof as may be necessary."

And the Senate agree to the same.

Amendment numbered 102: That the House recede from its disagreement to the amendment of the Senate numbered 102, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the unexpended balance of $9,533.38 is hereby reappropriated and made available for continuing the relief and settlement of the Apache Indians formerly confined as prisoners of war on the Fort Sill Military Reservation, Okla., for the purchase of allotments in Oklahoma, as provided for in the act of June 30, 1913 (38 Stat. L., p. 77), for the three adult heads of families who have not heretofore received allotments."

And the Senate agree to the same.

Amendment numbered 105: That the House recede from its disagreement to the amendment of the Senate numbered 105, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "except that the Secretary of the Interior is hereby authorized within 30 days after the passage of this act, to investigate claims not to exceed $1,950 growing out of contracts alleged to be in existence between John Calvin Gray, William T. Lancaster, Arthur Jennings, and Clyde Jennings, as enrolled members of the Choctaw or Chickasaw Nations, and Henry W. Blair, Kappler & Merillat, James K. Jones, Charles M. Fechheimer, and Eugene Hamilton, as attorneys, and in case such claims are found to be valid and the contracts approved in accordance with existing law, the said Secretary of the Interior may, in his discretion, apply any amounts that may be found due under this paragraph to the aforesaid enrolled members of the Choctaw or Chickasaw Nations to the payment of such fee, but the amounts due hereunder to other enrolled members of the Choctaw and Chickasaw Nations shall not be held in abeyance to this claim but shall be paid promptly without reference to same"; and the Senate agree to the same.

Amendment numbered 110: That the House recede from its disagreement to the amendment of the Senate numbered 110, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$15,000"; and the Senate agree to the same.

Amendment numbered 113: That the House recede from its disagreement to the amendment of the Senate numbered 113, and agree to the same with an amendment as follows: In lieu

of the matter proposed insert the following: "$12,000; for remodeling sewer system, $5,000; for three high-pressure steam boilers, $7,200: *Provided*, That the unused balance of $9,830 of the amount appropriated by the act of August 1, 1914 (38 Stat. L., 602), and an additional amount of $2,500 may be expended for an addition to the assembly hall; in all, $128,700"; and the Senate agree to the same.

Amendment numbered 116: That the House recede from its disagreement to the amendment of the Senate numbered 116, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $3,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Klamath Indians of the State of Oregon, and use the same for the construction of a bridge across the Williamson River, on the Klamath Indian Reservation, Oreg., under such rules and regulations as he may prescribe."

And the Senate agree to the same.

Amendment numbered 124: That the House recede from its disagreement to the amendment of the Senate numbered 124, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "$67,500: *Provided*, That the unexpended balance of $1,607.44 appropriated by the act approved August 1, 1914, for repairing buildings and replacing equipment destroyed or damaged by the tornado of June 10, 1914, at Flandreau Indian School, S. Dak., is hereby reappropriated and made immediately available for the purchase and installation of a water tank and the purchase of dairy cattle for said school"; and the Senate agree to the same.

Amendment numbered 127: That the House recede from its disagreement to the amendment of the Senate numbered 127, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized and directed to cause investigation to be made as to the probable cost of providing on the various Sioux Indian reservations adequate school facilities for the children of the Sioux tribes who are now without Government or public-school facilities on the respective reservations, and to make a report thereof to Congress on or before the first Monday in January, 1917, together with a complete and detailed statement of the per capita cost per annum, including mileage paid, now expended for the education of the Sioux Indian children in all the schools, whether on or off the respective reservations, and there is hereby appropriated for the expense of such investigation and report the sum of $1,000, or so much thereof as may be necessary, to be immediately available."

And the Senate agree to the same.

Amendment numbered 129: That the House recede from its disagreement to the amendment of the Senate numbered 129, and agree to the same with an amendment as follows: In line 7 of said amendment, after the word "highway," insert a comma and the following: "reimbursable out of any funds now or hereafter placed to the credit of said Indians in the Treasury of the United States"; and the Senate agree to the same.

Amendment numbered 132: That the House recede from its disagreement to the amendment of the Senate numbered 132, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $1,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Uintah Tribe of Indians, in the State of Utah, and to use the same to protect the north abutment of the Government bridge at Myton, Utah, under such rules and regulations as he may prescribe, said sum to be immediately available."

And the Senate agree to the same.

Amendment numbered 137: That the House recede from its disagreement to the amendment of the Senate numbered 137, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the Secretary of the Interior be, and he hereby is, authorized to sell and dispose of not to exceed 20 acres of that portion of the lands situated on the north side of and within the limits of the abandoned Fort Spokane Military Reservation, State of Washington, not necessary for hospital purposes, as provided for in the act approved August 1, 1914 (38 Stat. L., 584), at not less than the appraised value thereof, and to place the proceeds thereof in the Treasury of the United States to the credit of the Spokane Indians in said State."

And the Senate agree to the same.

Amendment numbered 142: That the House recede from its disagreement to the amendment of the Senate numbered 142, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$5,000"; and the Senate agree to the same.

Amendment numbered 146: That the House recede from its disagreement to the amendment of the Senate numbered 146, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That without bias or prejudice to the rights or interests of any party to the litigation now pending, the Secretary of the Interior be, and he hereby is, authorized to sell the timber on the so-called "school lands" and "swamp lands" within the boundaries of the Bad River and Lac du Flambeau Indian Reservations in Wisconsin, and to which the State of Wisconsin has asserted a claim; to keep a separate account of the proceeds of such sale with each legal subdivision of such land and to deposit the said proceeds at interest in a national bank, bonded for the safe-keeping of individual Indian moneys, to be paid over, together with the interest thereon, to the party or parties who shall finally be adjudged to be entitled to such fund: *Provided*, That the consent of the State or parties claiming title therefrom be obtained before any such sale shall be made."

And the Senate agree to the same.

Amendment numbered 156: That the House recede from its disagreement to the amendment of the Senate numbered 156, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"SEC. 27. On the first Monday in December, 1917, and annually thereafter, the Secretary of the Treasury shall transmit to the Speaker of the House of Representatives estimates of the amounts of the receipts to, and expenditures which the Secretary of the Interior recommends to be made for the benefit of the Indians from, all tribal funds of Indians for the ensuing fiscal year; and such statement shall show (first) the total amounts estimated to be received from any and all sources whatsoever, which will be placed to the credit of each tribe of Indians, in trust or otherwise, at the close of the ensuing fiscal year, (second) an analysis showing the amounts which the Federal Government is directed and required by treaty stipulations and agreements to expend from each of said funds or from the Federal Treasury, giving references to the existing treaty or agreement or statute, (third) the amounts which the Secretary of the Interior recommends to be spent from each of the tribal funds held in trust or otherwise, and the purpose for which said amounts are to be expended, and said statement shall show the amounts which he recommends to be disbursed (a) for per capita payments in money to the Indians, (b) for salaries or compensation of officers and employees, (c) for compensation of counsel and attorney fees, and (d) for support and civilization: *Provided*, That hereafter no money shall be expended from Indian tribal funds without specific appropriation by Congress except as follows: Equalization of allotments, education of Indian children in accordance with existing law, per capita and other payments, all of which are hereby continued in full force and effect: *Provided further*, That this shall not change existing law with reference to the Five Civilized Tribes."

And the Senate agree to the same.

Amendment numbered 157: That the House recede from its disagreement to the amendment of the Senate numbered 157, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"SEC. 28. On or before the 31st day of December, 1916, the Bureau of Efficiency shall prepare and submit to the Secretary of the Interior a system of bookkeeping and accounting for the Bureau of Indian Affairs that will enable the said Secretary, on or before July 1, 1917, to meet the requirements of section 26 of the Indian appropriation act approved June 30, 1913 (38 Stat. L., p. 103)."

And the Senate agree to the same.

CARL HAYDEN,
P. P. CAMPBELL,
*Managers on the part of the House.*

HOUSE BILLS REFERRED.

H. R. 10668. An act to repeal section 4 of the act of Congress approved June 11, 1906, known as the forest-homestead act, and for other purposes, was read twice by its title and referred to the Committee on Public Lands.

H. R. 15005. An act to appropriate $200,000 for training the Organized Militia of any State, Territory, or of the District of Columbia, was read twice by its title and referred to the Committee on Military Affairs.

EXECUTIVE SESSION.

Mr. BANKHEAD. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 25 minutes spent in executive session the Senate, in executive session (at 4 o'clock and 30 minutes p. m.), took a recess until Monday, May 8, 1916, at 11 o'clock a. m.

## NOMINATIONS.

*Executive nominations received by the Senate May 6 (legislative day of May 5), 1916.*

UNITED STATES DISTRICT JUDGE.

J. Warren Davis, of Trenton, N. J., to be United States district judge for the district of New Jersey. (Additional position, created by the act approved April 11, 1916.)

UNITED STATES DISTRICT ATTORNEY.

Charles F. Lynch, of Paterson, N. J., to be United States attorney for the district of New Jersey, vice J. Warren Davis, nominated to be United States district judge for the district of New Jersey.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate May 6 (legislative day of May 5), 1916.*

APPOINTMENTS IN THE ARMY.

MEDICAL RESERVE CORPS.

*To be first lieutenants with rank from April 12, 1916.*

Howard James Knott.
Edwin Roy Tenney.
Edmund McCollam Connely.
Marion Cherigny Palmer.
Alonzo Bolen Middleton.
Warren David Calvin.
Edward Cochrane Gow.
John Kelso Ormond.
Frank Nicholls Dealy.
Frank Marion Barker.
Frank Lawrence Putman.
Harry Emerson Foster.
George Ross Winters.
John Charles Calhoun.
Henry Norton Torrey.
Charles Willard Selover.
Lucius Wales Hotchkiss.
Jesse Irving Sloat.
Joseph Leidy.
Charles Venable Carrington.
Paul Hudson Zinkhan.
Carrington Williams.
Edward Douglas Piper.
John Staige Davis.
Austen Fox Riggs.
Emil Altman.
Arthur Bradley Eisenbrey.
Frederick Tilney.
William Evans Bruner.
Gordon Niles Morrill.
Harry Roswell Wahl.
John Eugene Brooks.
Robert Leland Maynard.
Joseph Edgar Rowan.
George Alden Lewis.
Sydney Robotham Miller.
Henry Richmond Slack, jr.
Ralph R. Ryan.
Thomas Caldwell Savage.
William Robert Cubbins.
David Melvin Davis.
Peregrine Wroth, jr.
James Ely Talley.
Oliver Hazard Perry Pepper.
Mordecai Robert Bren.
George Nicholas Acker, 2d.
Samuel Swift.
George Roger Dempsey.
Harry Ezekiel Isaacs.
John William Sluss.
Elliott Carr Cutler.
Albert Alphonso Wood Ghoreyeb.
Frederic Augustus Washburn.
Jacob Jerome Steinfelder.
Edwin I. Bartlett.
Theodore Caldwell Janeway.
Daniel Webster Prentiss.
Howard Thomas Karsner.
Charles Walter Stone.
Albert Clifford Hirshfield.
Harold Colton Herrick.
Wilson George Smillie.
Charles Booth Spruit.
José Penteado Bill.
Harold Everett Eggers.
Eben Winslow Fiske.
Archibald McKay Fraser.
William Joseph McDonald.
Samuel Clark Harvey.
Mortimer Edwin Danforth.

PROMOTIONS IN THE ARMY.

COAST ARTILLERY CORPS.

First Lieut. Sidney H. Guthrie to be captain.
Second Lieut. Edward Roth, jr., to be first lieutenant.

INFANTRY ARM.

Second Lieut. Martin C. Shallenberger to be first lieutenant.

CORPS OF ENGINEERS.

Second Lieut. Oscar O. Kuentz to be first lieutenant.
Second Lieut. William E. R. Covell to be first lieutenant.
Second Lieut. Edwin R. Kimble to be first lieutenant.

POSTMASTERS.

INDIANA.

Alden H. Baker, Westfield.
George P. DeHoff, Winona Lake.
Simeon L. Frost, Orleans.
Daniel A. Riley, Greentown.
William F. Wake, Roanoke.

ILLINOIS.

Charles J. Paar, Warsaw.
Jessie J. Wesse, Dolton.

MICHIGAN.

Harold Murphy, Harbor Beach.
William P. Nisbett, Big Rapids.

MINNESOTA.

M. H. Baskfield, Zumbrota.
J. M. Benson, Lindstrom.
H. J. Essler, St. Peter.
O. J. Rea, Tracy.

NEW JERSEY.

John Y. Bellis, Clinton.
Oliver R. Kugler, Frenchtown.

NEW YORK.

John F. Gilmartin, East Hampton.
T. Benson Smith, Freeport.

NORTH DAKOTA.

H. S. Davies, Devils Lake.

PORTO RICO.

E. W. Keith, San Juan.

# HOUSE OF REPRESENTATIVES.

## SATURDAY, *May 6, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We bless Thee, our Father in heaven, for every life that has poured itself out for the betterment of mankind, whether in science, literature, art, statesmanship, or religious endeavor; for these are the human dynamos that move the wheels of progress toward the ideal civilization for which every true heart longs, and for the full appreciation accorded to such men in the hearts of their fellows. We thank Thee for the recognition of the long and faithful service of one who stands to-day on the threshold of his eightieth birthday, who, for half of his life, has been a conspicuous figure on the floor of this House; a leader, wise in his counsels, a strong advocate of every measure

for the betterment of popular government, known throughout the length and breadth of the land for his strong personality, independent thought and action, affectionately esteemed by all for faithful service to his country. May Heaven's richest blessing attend him and bring him at last to that immortal youth where a fuller service waits on the faithful. So may Thy blessing attend every Member and crown his efforts with successful service, and Thine be the praise forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

CALL OF THE HOUSE.

Mr. MANN. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Illinois makes the point of order that there is no quorum present, and evidently there is not.

Mr. KITCHIN. I move a call of the House.

A call of the House was ordered.

The SPEAKER. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The Clerk proceeded to call the roll, when the following Members failed to answer to their names:

| | | | |
|---|---|---|---|
| Allen | Flynn | Langley | Ragsdale |
| Anthony | Focht | Lee | Rainey |
| Bacharach | Fordney | Lehlbach | Riordan |
| Barchfeld | Gardner | Lesher | Roberts, Mass. |
| Barkley | Garland | Lieb | Rowe |
| Beales | Godwin, N. C. | Liebel | Rowland |
| Bennet | Goodwin, Ark. | Lindbergh | Saunders |
| Browning | Gould | Linthicum | Schall |
| Bruckner | Graham | Littlepage | Scott, Pa. |
| Brumbaugh | Gray, N. J. | Lobeck | Scully |
| Burke | Green, Iowa | Loft | Sears |
| Burnett | Griest | Longworth | Sells |
| Byrnes, S. C. | Griffin | McDermott | Shouse |
| Caldwell | Guernsey | McFadden | Sinnott |
| Candler, Miss. | Hamill | Maher | Sloan |
| Carew | Hamilton, N. Y. | Martin | Smith, Mich. |
| Carter, Okla. | Harrison | Miller, Minn. | Snell |
| Casey | Hart | Miller, Pa. | Snyder |
| Chandler, N. Y. | Haskell | Mooney | Sparkman |
| Church | Haugen | Moore, Pa. | Stafford |
| Coady | Heaton | Morin | Stout |
| Coleman | Helm | Moss, Ind. | Sutherland |
| Conry | Helvering | Moss, W. Va. | Swift |
| Costello | Henry | Mudd | Switzer |
| Cox | Hinds | Neely | Tague |
| Cullop | Hulbert | Nichols, Mich. | Talbott |
| Dale, N. Y. | Humphreys, Miss. | Nolan | Tinkham |
| Darrow | Husted | North | Treadway |
| Dooling | Hutchinson | Norton | Vare |
| Driscoll | James | O'Shaunessy | Ward |
| Drukker | Johnson, S. Dak. | Paige, Mass. | Watkins |
| Edmonds | Kelster | Parker, N. J. | Watson, Pa. |
| Fairchild | Kiess, Pa. | Parker, N. Y. | Williams, Ohio |
| Fields | Konop | Patten | Wilson, Fla. |
| Flood | Kreider | Pou | Wilson, Ill. |

During the calling of the roll Mr. CANNON entered the Hall and was greeted with prolonged applause.

The SPEAKER. Two hundred and ninety-two Members, a quorum, have answered to their names.

Mr. KITCHIN. I move to dispense with all further proceedings under the call.

The motion was agreed to.

JOSEPH GURNEY CANNON.

The SPEAKER. Under a special order of the House made some time ago, the gentleman from Illinois [Mr. RODENBERG] is to control one hour, and he is now recognized. [Applause.]

Mr. RODENBERG. Mr. Speaker, if all sentiment were taken out of life, to live would not be worth while. Sentiment rules the world and controls the action of all mankind. Love of country, devotion to home and family, friendship for our fellow man, all are based on sentiment. It is one of the divine attributes of every true and manly heart; without it the world would be dreary and desolate, forever lost to love and laughter. It fills the soul with hope and joy and lifts the clouds of doubt and gloom. It is humanity's greatest boon, for it brings to all the cheer that makes life worth the living. It is in response to a sentiment that has its foundation in genuine affection that we meet to-day to do honor to the best-beloved Member of this great legislative body. [Applause.]

Mr. Speaker, many stirring and exciting scenes have been staged in this Hall. Here in days gone by many of the Nation's greatest men have engaged in intellectual combat and the world has been enriched by their wit and their wisdom. To-day there rise before us again the towering forms of Garfield and Blaine, of Randall and Cox, of McKinley and Reed, of Crisp and Carlisle, and, as memory reverts to some of the great historic scenes enacted here, and in which they played their parts so well, our blood tingles and throbs, and we thank God that it has been our good fortune to have had service in this House. [Applause.]

I am now concluding my seventh term as a Member of Congress, and during my service here I have often been profoundly impressed by the fact that nowhere is the doctrine of the "survival of the fittest" better exemplified than in this Chamber. Here every man is measured at his real worth, and the measurement is always true and accurate. The House has no difficulty in separating the wheat from the chaff, and is as quick to applaud merit and industry as it is to condemn sham and pretense. The prestige of the man of intellectual integrity is as lasting as that of the demagogue is fleeting.

Leadership in this House is never accidental. On the contrary, it is always natural and entirely logical. Length of service may place a Member at the head of one of the great committees of the House, but the chairmanship of a committee, no matter how important, does not carry leadership with it. It requires something else to be a leader and a man of genuine influence. The real leaders in a legislative body such as this are the men who do not adjust their sails to catch every passing breeze, but who, when the storms of criticism beat and the waves of opposition roll, "stand foursquare to all the winds that blow," let come what may. [Applause.]

If there be one such man among us, if there be one man who has steadfastly pursued the path of public duty, and who, at all times and under all circumstances, in good and ill report, has had the superb courage to give expression to honest conviction, that man is he whom we delight to honor to-day, the grand old hero of a thousand legislative battles, JOSEPH G. CANNON, of Illinois. [Prolonged applause.]

For almost 40 years the calcium light of publicity has been turned full and fair upon him; and the stronger and the brighter the light, the more it has served to reveal to all the world those sterling qualities of head and heart that have given him an enduring place among the ablest and most courageous statesmen of his day and generation. He has made mistakes—of course he has. To err is human, and UNCLE JOE has at all times been intensely human; but no man, living or dead, ever saw him lower his colors or hoist the white flag of surrender. No matter how fast or furious the contest, he was never known to ask for quarter, but, throwing his warlike shield before him, he bade defiance to the enemy, shouting:

Lay on, Macduff,
And damn'd be him that first cries "Hold, enough!"

[Applause.]

Mr. Speaker, including the Continental Congresses, 7,865 men have served in the various Congresses of the United States, and of all this number our distinguished friend enjoys the unique distinction of having had the longest service in the House of Representatives. The record shows that in all the years of our national existence only three men have excelled him in length of legislative service. At the head of the list stands Justin Smith Morrill, of Vermont, whose service in House and Senate covers a period of 43 years, 9 months, and 24 days. Next comes William Boyd Allison, of Iowa, whose combined service in the two bodies totals 43 years and 5 months. The third on the list is William Pierce Frye, of Maine, who served in both Chambers for 40 years, 5 months, and 4 days. And then comes JOSEPH GURNEY CANNON, of Illinois, who, upon the completion of his present term, will have been a Member of the House of Representatives for 40 years; and I know that I voice the sentiments of every man in this Hall when I express the hope that he will continue as a Member of this body until he has established a record for length of service that will never be equaled in all the future history of the Republic. [Applause.]

UNCLE JOE, to-morrow will be the eightieth anniversary of your birth. Entertaining for you, as I do, the deep and abiding affection that a son feels for his father, I deem it an honor indeed to have been selected to extend to you on this happy occasion the felicitations and good wishes of the entire membership of this House. We wish you full measure of life's pleasure to the end of your days, and we unite in the fervent hope that it will be many, many years before the shades of night begin to fall; and when they do, we know their gloom will be mellowed and softened by the golden glow that radiates from the halo that crowns and glorifies the patriotic life of a great American. [Prolonged applause.]

The SPEAKER. The gentleman from Ohio [Mr. SHERWOOD] is recognized. [Applause.]

Mr. SHERWOOD. Mr. Speaker, 43 years ago, when I was on earth for the first time [laughter], I drifted into this Congress, that being the first term of the distinguished American whose birthday we celebrate to-day. It has already been said, better and more eloquently than I am capable of saying it, that he is the most remarkable man this country has ever produced, counting his service in public life. He has had a public service of 47 years—40 years in Congress—and has been four times

Speaker of the House of Representatives. I understand that UNCLE JOE and the modest Member who is now addressing you are the only surviving Members of the Forty-third Congress now in public life, and it has appeared to me to be fitting to refer to some of the incidents of that Congress, because we were called upon to deal with great questions growing out of the Civil War, questions that appealed to the hearts and the emotions of public men. Gen. Grant, the foremost man of all the world, was starting on his second term as President. I want to call your attention to some of the developments in science and social ethics that have occurred since that time. I remember that the appropriation for the President in that Congress, for salary and for upkeep of the White House, was $42,000. President Grant had no bodyguard, no military aide. We Members were serving at $5,000 a year. We had to furnish our own quarters. We were not allowed any secretaries. The Speaker had no parliamentary expert. We had no Hinds' Precedents. The country had no automobiles. We had no wireless; we had no flying machine; we had no canned music. Edison, the wizard of the scientific world to-day, had not yet appeared. We had no electric cars; we had no moving pictures; no typewriting machines. We had no preparedness talk on this floor [laughter]; we had no Calendar Wednesday [laughter]; we had no Army and Navy League.

We had no twilight tango. [Laughter.]

We are here to-day with a living and knock-down argument against the theory of Dr. Osler. [Applause and laughter.] It *is a mistake to* suppose that a man who has reached the age of 80 years has reached the acme of his intellectual development. [Applause and laughter.] Pope Leo XIII and John Adams were in the full possession of their intellectual powers at 90. John Wesley was at the height of his eloquence and at his best at 88. Michelangelo painted the greatest single picture that was ever painted since the world began at 80. He made the sky and sunshine glorious with his brush at 83. Gen. Von Moltke was still wearing the uniform at 88, and he commanded the victorious German Army that entered the gates of Paris at 70. George Bancroft was writing deathless history after 80. Thomas Jefferson, Herbert Spencer, Talleyrand, and Voltaire were giving out great ideas at 80. Tennyson wrote his greatest poem, "Crossing the Bar," at 83. Gladstone made his greatest campaign at 80, and was the master of Great Britain at 83. Humboldt, the naturalist, scientist—the greatest that Germany ever produced—issued his immortal Kosmos at 90.

I saw Joe Jefferson play Rip Van Winkle at his best at 75. Goethe wrote Faust, the greatest literary achievement in all literature—the masterpiece of literature—the last section—at 80. The Irish actor Macklin was still on the stage at 99. Robert Browning was as subtle and mysterious as ever at 77, and Victor Hugo was at his best from 75 to 80.

We will concede that UNCLE JOE has passed the period of adolescence [laughter] and that he has reached the age of discretion. You will all concede with me that the best effort of his life was undoubtedly his oration on Abraham Lincoln, which was delivered in this Congress. He has not reached the acme of his intellectual development; that will come later. [Laughter and applause.] When he delivers his masterpiece in this Chamber or in a larger forum, I hope I may be present with ears erect to hear or eyes alert to read. [Laughter and continued applause.]

The SPEAKER. The gentleman from Wisconsin [Mr. COOPER] will take the chair. [Applause.]

Mr. COOPER of Wisconsin took the chair as Speaker pro tempore.

The SPEAKER pro tempore. The Chair will recognize the gentleman from Massachusetts [Mr. GILLETT]. [Applause.]

Mr. GILLETT. Mr. Speaker, I am the only person in the House who ever served on the Appropriations Committee when Mr. CANNON was its chairman. To my mind that was the most glorious and useful part of his career. Perhaps my opinion is biased by the fact that as we grow older we are less impressionable, and that when I was younger I was more of a hero worshiper; but to me, even when he sat omnipotent in the Speaker's chair and tried to be dignified and judicial and nonpartisan, and to regulate this disorderly and sometimes turbulent assembly, he was not so imposing as when he was on the floor, sure to be in the center of any conflict, contributing in no small measure to the heat and violence and interest of the debate, ready always to "ride the tempest and direct the storm." [Applause.]

To see him in his glory you should have seen him as chairman of Appropriations, in the thick of the fray, without manuscript or notes, but all ablaze with energy, now entertaining the House with his quaint conceits and now convincing them with his powerful and ingenious arguments.

That, to my mind, was the sphere where his abilities shone to the best advantage. He is by nature a floor leader. He has the courage, the fearlessness, and that quickness of mind and of tongue accelerating under fire, which make a man effective on this floor.

Those of you who have come here this session can have little appreciation, it seems to me, of what the American Congress has sometimes been and what it may be again. Everything this year has run so smoothly and amiably—there has been so little bitterness and belligerency—that it is difficult to realize the contests of the past. Our Speaker is so genial and so popular with both sides [applause], the minority leader cooperates so heartily with his kindly spirit, and the issues which thus far have arisen have contained so little to excite passion that we seem to be sailing on an eternal summer sea. I hope it may always continue so serene. [Applause.]

But it was in a very different atmosphere that Mr. CANNON was trained. It was different when I first came here. I can remember when the air of this Chamber seemed surcharged with animosity, and there were occasions when it seemed as if the two sides of the House were so hostile and furious that they might at any moment rise against each other in forcible collision.

And yet I suppose during my service it has been calm compared with what preceded it. I suppose in the Fifty-first Congress party heat reached its extreme. It needed then dauntless courage and unfaltering poise to be a successful leader. And it was in that Congress I have always understood that Mr. CANNON really won his indisputable right to be at the front. In that historic contest over the rules it was on him that Speaker Reed, the most powerful and formidable figure I have ever seen within these walls, leaned for his most reliable and effective support.

I came here 23 years ago. I suppose many of you think, as I know some ambitious men in my district have long thought, that 12 terms are an unconscionable time for anyone to serve. [Laughter.] But when I arrived here Mr. CANNON could look back nearly as far as that to the commencement of his service. He was in his prime. In debate his directness, his shrewdness, his brightness of illustration, and his gymnastics always attracted universal attention. I remember being told that once when he was making a speech with his customary vigor, rising on his toes and prancing up and down the aisle, Mr. Reed called out to him, sotto voce, "JOE, are you making this speech on mileage?" [Laughter.]

But while his peculiarities of manner attracted attention, they were but the publicity agents for the real power and originality of his arguments. No one knew better than he how to appeal to both the judgment and the prejudices of the House. His quick and fertile mind not only grasped and developed all the intrinsic force of the argument but also took advantage of the foibles and self-interest of his audience. He did not simply argue the merits of the proposition but he fought strenuously to make his side prevail. He made speeches, not to circulate in his district or to win applause, but to win votes, and if he could not succeed the cause was hopeless.

The chairman of the Appropriations Committee generally has the unpopular side, for he is generally fighting for economy. I do not believe it is simply the natural prejudice of my own membership which makes me feel that a spirit of economy always permeates that committee far more than any other committee of the House. Now is not the time to discuss the reason for it, which would be interesting.

But ever since I have been here the chairman of that committee has been the watch dog of the Treasury and the champion of retrenchment. Mr. CANNON filled that rôle preeminently, but with a good nature, a practical common sense, a sagacious judgment of the temper of the House, and a prudent mitigation of abstract justice by personal necessities which won him extraordinary success. He was ready to compromise when he thought it wise and reasonable, but he never shunned a fight, and he never surrendered till every resource was exhausted. The adversary who anticipated an easy victory just because he had the popular side had little appreciation of the persistence, the knowledge, and the resourcefulness of Mr. CANNON. He was, of course, sometimes beaten, but he often won where another would not have dared to fight.

When I first came to Congress I had a strong prejudice against him. But, as I watched his leadership, the time came when if I suddenly had to vote on a question of which I knew

nothing, there was no man in the House whom I would follow so confidently as him.

In committee he was alert, wise, timesaving, and he had that charming quality so appreciated by ambitious younger men, of giving them plenty of opportunity to show their powers. He never tried to monopolize the chances of distinction, but shared them generously with his lieutenants.

I trust he will not think it disparaging if I say that he is a debater rather than an orator. You will recall that in the golden days of English eloquence Edmund Burke, who, in my opinion, wrote the finest orations ever produced, said of his rival, Charles James Fox, that he was "the most brilliant and accomplished debater the world ever saw."

Some of Fox's friends took umbrage at the phrase, and thought the word "debater" did not do him justice. But I am not sure it is not quite as complimentary as "orator." A debater like Mr. CANNON measures his strength squarely with his opponent, asks no time for preparation, but is always ready, and must rely on his native powers to repel assaults, grapple with his antagonist, and from a hand-to-hand contest win his laurels. The orator at leisure ponders and develops and elaborates his material. In the one case you see the engine at work and can measure its actual force; in the other you see only the result.

It always seemed to me Mr. CANNON had not the taste, if he had the capacity, for elaborate preparation. He seemed to need the stimulus of a fight to arouse his faculties. Then he could summon his resources with unfailing facility, and showed a readiness, an astuteness, a variety, and a vigor which were marvelous.

Of course he was prepared, in the sense that he knew all about his subject, for he was a most thorough and thoughtful student of the questions which came before him. But he never seemed to make any special preparation for his speeches, but to trust to the inspiration of the moment, which has brought the downfall of so many would-be orators, but which never failed him. Indeed, I think his example was a bad influence on young men by discouraging preparation. I, like other New England boys, was brought up to believe that the price of success was industry. I always had dinned into my ears the verse—

> The heights which great men reached and kept,
> Were not attained by sudden flight;
> But they, while their companions slept,
> Were toiling upward in the night.

Since I have known him Mr. CANNON's "toiling in the night" has not been exclusively over his congressional duties [laughter], and yet his mind always seems saturated with knowledge of the varied subjects which come before us.

As he moves among us now, kindly, sedate, respected, beloved—a sort of perpetual statesman emeritus, bearing his 80 years more lightly than anyone I ever saw—he is an honor and a blessing to the American Congress; but I shall always cherish most the memory of the dauntless, resourceful, militant head of the Appropriations Committee, defending the National Treasury against all comers, fearlessly, tenaciously, judiciously, and with a success I have never seen paralleled. [Applause.]

The SPEAKER pro tempore. The gentleman from North Carolina [Mr. KITCHIN] is recognized. [Applause.]

Mr. KITCHIN. Mr. Speaker, I count it a real privilege and pleasure to participate in these ceremonies to-day. I believe the House honors itself more than it honors the distinguished gentleman from Illinois [Mr. CANNON] in taking, amid its busy labors, this hour to celebrate the eightieth birthday of a man who, in my judgment, is the most marked and unique character that has sat in either end of the Nation's Capitol for the last half century. [Applause.] I am going to say in public here now what I have a hundred times said in private, that of all the public men whom I have ever met the gentleman from Illinois is the most remarkable and possesses the strongest, most practical common-sense intellect.

I remember when I first came here 15 years ago he impressed me more particularly as being a big man than any other man in the House. I sat here in my seat for three years without ever opening my mouth on the floor of this House, and that is somewhat remarkable, it seems to me now [laughter], but I had an idea that it was wiser for me at first to hear and see rather than be heard and seen. During that time I was an intent observer, sizing up the men in this body. Outside of partisan politics the gentleman from Illinois impressed me as being the wisest legislator in the House. I have said that, too, a hundred times, and I have really not seen much since then to change my opinion. [Laughter and applause.] But when it came down to partisan questions and partisan politics, and especially when his blood was up—Good Lord, deliver us! [Laughter.] And, Mr. Speaker, his partisanship was not confined to men on the Democratic side of the House, either. One of the most interesting and remarkable debates I ever witnessed in this House was between the gentleman from Illinois [Mr. CANNON] and a gentleman on that side of the Chamber who is now deceased, Col. Pete Hepburn, which occurred some 12 or 13 years ago when the bill for the construction of the interoceanic canal was under consideration. The question then was whether we should build a canal across the Isthmus of Panama or along what was known as the Nicaraguan route. The committee had reported unanimously in favor of the Nicaraguan route. Mr. Hepburn was chairman of the committee, and, of course, strongly advocated the Nicaraguan route. Only a few, led by the gentleman from Illinois, favored the Panama route. I had seen many heated courthouse contests between lawyers, but I never witnessed anything more interesting and exciting than that debate between these two gentlemen. Mr. Hepburn was right-handed and Mr. CANNON was left-handed, both on their feet most of the time, within a step or two of each other, their arms waving about as if in a pugilistic contest. It was a fur-flying debate, but a great debate. I will never forget it. Two giants were wrestling with each other in intellectual combat. The House has had few men equal as a debater to Col. Hepburn. He was a strong, forceful, resourceful man.

Mr. Speaker, I have heard Mr. CANNON in several debates; I have seen him in action in the House for a number of years; I have seen him confront serious and critical situations often; but, in my opinion, the time when he loomed up bigger and stronger and braver than ever was during those two nights and two days' fight over what we called Cannonism—on the Norris resolution—in the Sixty-first Congress. I never saw a man in my life who stood forth such a complete master of the situation. He rode the very whirlwinds and directed the storms for his party. While many harsh things on this side and many on that side were spoken during those two days and nights of the hottest and most exciting contest the House has witnessed in a quarter of a century, I never saw the gentleman from Illinois lose his temper or his head for one moment. He was courteous, cool, courageous, and determined to the last to do what he started out to do the very first moment the fight began. He was going to hold the House here and not make a decision upon the question of order pending until the Republican whip had gathered in from all quarters of the United States every single Republican Member of this House, and he knew exactly how each would vote. Just as soon as he ascertained that every Republican who would vote on his side was here in the House, without sleep for two days and nights, he rapped the House to order and calmly said, "The Chair is ready to rule." [Applause.] And he ruled against us, of course. [Laughter and applause.] In all the conflicts in his long and eventful career as a Member of the House, some of them bitter and severe, he stood out always before the eyes of friend and foe the embodiment of courage, of directness, of integrity. [Applause.]

Mr. Speaker, I think this occasion illustrates the truth of what I heard the minority leader say some time ago, that while that aisle separated the Democrats from the Republicans it did not divide the hearts of the men in this House. [Applause.] It does not divide our respect, confidence, esteem, and affection for each other. There are men on that side of the House whom I regard with as much esteem, admiration, respect, and affection, as on this side, and no doubt that is the case with most of us on either side of the aisle. We differ on questions of policy for the country, on what we call political principles, but we do not differ in our loyalty and love and devotion to our country and our flag, and in our respect, esteem, and affection for one another. When I was a great deal younger than I am now, I used to think that the good folks were all in the Democratic Party and the bad folks all in the Republican Party. I used to think that the big Republicans in Washington had horns and that they were all reaching out with both hands toward somebody else's pocket. But, gentlemen, since I have served in this House I have found so many good and splendid fellows in the Republican Party that, individually, I am willing to admit that it is a pretty good party. Collectively—well, I am not profane and will not be unparliamentary, but anyway, since my association with these splendid Republicans here I have come to the conclusion that a Republican is never dangerous to a good Democrat—except in an election [laughter and applause], and never harmful to the public—except in office. [Laughter.]

In the Sixty-first Congress we had a lot of talk about "Cannonism." I believe the best speech I ever made in the House was on "Cannonism." That was not a fight against Mr. CANNON; it was a fight against a system which the rules created and which he inherited from former Congresses, and, perhaps,

from Democratic Congresses, too, as well as Republican Congresses. I said at the time that we were making a fight against the rules and the power which the rules gave the Speaker, called then "Cannonism," not against Mr. Cannon; that the rules then in force had been in force in both Republican and Democratic Congresses, and only a weak man, without courage, would have done less than the distinguished gentleman from Illinois if exigencies demanded. When the rules of the House put into the hands of one man the life and death of all legislation and all procedure and made him more powerful than even the President of the United States, any strong, intellectual, courageous man would have exercised that power, whether he was a Democrat or a Republican, under the conditions that then confronted the party in control. Since then, as the gentleman from Massachusetts [Mr. GILLETT] says, we have come to smooth and better-tempered times, when most of us vote alike and think alike on many questions. When the people made a change in the House, why, we, with the approval of many gentlemen on that side changed the rules, and we never hear of "Cannonism" now, but we are proud and glad to hear to-day of "Cannon." [Applause.] We are glad to know, too, that every heart that beats within these walls is hoping and praying that we shall have the happiness on many and many another birthday of the gentleman from Illinois to meet here in his presence and do him honor. [Loud applause.]

The SPEAKER pro tempore. The Chair recognizes the Speaker of the House of Representatives. [Loud applause.]

Mr. CLARK of Missouri. Mr. Speaker and gentlemen of the House, this performance here to-day reminds me of one in which Mr. Speaker CANNON and myself participated five or six years ago in the city of New York. About six months after Mark Twain died they memorialized him in Carnegie Hall before an immense audience. The chairman was Dr. William Dean Howells. The Speakers were Joseph H. Choate, Henry Van Dyke, "Marse" Henry Watterson, Mr. Speaker CANNON, George W. Cable, and myself. I believe if Mark Twain knew what was happening that that was exactly the kind of a crowd he would have elected to have participated in his funeral exercises. We did not do anything for four mortal hours except crack jokes and tell anecdotes. I think this hour and a half is well spent [Applause.] It shows the House in its most pleasing phase.

Mr. Speaker, this Government has existed 127 years under the Constitution—a brief, fleeting period in the existence of a nation, but longer than the span of life vouchsafed to any of the latter-day sons of Adam. We are engaged in celebrating the birthday of the only man in our history who has been elected to the House of Representatives 20 times—a unique achievement, which may be duplicated in the next 127 years, but probably will not. Such a record can be made only under a rare and peculiar set of circumstances: First. The constituency must remain in the same political faith during two score years. Second. The man himself must be as constant as the northern star and be possessed of unusual endowments, mentally and physically. Third. His constituency must have such faith in him as would remove mountains.

Mr. Speaker CANNON is now well into his fortieth year in the House, and is in fine fettle in both body and mind—at which we all rejoice. [Loud applause.]

Only three men have exceeded him in length of service in Congress, and they only by adding their House and Senate service together. Justin Smith Morrill, of Vermont, sat 12 years in the House and 31 years, 9 months, and 24 days in the Senate—a total of 43 years, 9 months, and 24 days—while William Boyd Allison, of Iowa, served 8 years in the House and 35 years and 5 months in the Senate—a total of 43 years and 5 months, and William P. Frye, of Maine, who served 10 years and 13 days in the House and 30 years, 4 months, and 20 days in the Senate—a total of 40 years, 5 months, and 3 days. Thus it will be seen that Morrill tops them all by 4 months and 24 days.

William Ewart Gladstone served 53 years in the British House of Commons. I am by no means certain that his service was the longest in that body. Over there, however, they begin younger than we do. Charles James Fox, perhaps the greatest parliamentary orator that ever lived, entered the House of Commons at 19, and the younger William Pitt at about the same age. Another thing that tended for length of service there was the old and condemned borough system, whereby a duke or earl or viscount would take a fancy to some bright youngster and practically appoint him to a seat in the Commons—an agreeable custom, but not promotive of the public welfare, and now happily fallen into "innocuous desuetude."

Henry Clay, the most renowned of all Speakers, served the longest time in the Speaker's chair, being elected for six full terms, resigning twice, with a total actual service of 10 years and 245 days, although the Capitol guides will have it that he served 12 years—a historic fable.

Mr. Speaker CANNON comes next with four full terms—eight years—and if the political complexion of the House had not changed he would in all probability be in his fourteenth year in the chair, thereby exceeding the record of "The Great Kentuckian." [Applause.]

Mr. Speaker Stevenson of Virginia was elected for four full terms, but in the middle of his fourth term he resigned both as Speaker and as Member of the House, having been nominated as envoy extraordinary and minister plenipotentiary to the Court of St. James by President Jackson; but alack! and also alas! a refractory Senate refused to confirm his nomination for more than a year, during which time he was, like Mohammed's coffin, suspended betwixt heaven and earth. At last the Jackson men became strong enough in the Senate to confirm him and he went on his way rejoicing, having learned a lesson about premature resignations which he probably never forgot and which added somewhat to his stock of wisdom.

Mr. Speaker CANNON and Gen. SHERWOOD were both first elected to Congress at the November election in 1872, when under the lead of Horace Greeley the Democrats met with a crushing disaster, from which they recovered in 1874, only two years later, and swept the country from sea to sea. Speaker CANNON has served under 10 Presidents—Grant, Hayes, Garfield, Arthur, Cleveland, the younger Harrison, McKinley, Roosevelt, Taft, and Wilson. Presidents come and Presidents go, but he, like Tennyson's brook, goes on forever.

James Gillespie Blaine, one of the most brilliant of all the Speakers [applause] administered the oath to him upon his entrance here. While the Speaker's term is two years and the presidential term is four, he has seen the same number of Presidents in the White House and Speakers in the chair, 10—Blaine, Kerr, Randall, Kiefer, Carlisle, Reed, Crisp, Henderson, CANNON, and CLARK.

When he was first elected only about a dozen of the present Members could vote. Many were in their swaddling clothes, trying to achieve the first acrobatic feat any of us and all of us ever essayed to get our big toe into our mouth. [Laughter.] A majority of the Members were then unborn. What an astounding amount of history has been made in this country in the 44 intervening years, all of which he saw and part of which he was!

I am glad that Mr. Speaker CANNON made his great speech on the immigration bill recently—for it was a great speech—glad on his account, glad on my own account; glad most especially on account of you newer Members who have come into the House in the last 13 years; glad that you had the opportunity of not only hearing but seeing him as James Steerforth wished to be remembered, "at his best." We are all James Steerforths in that regard. J. B. McCullough, long-time editor of the St. Louis Globe-Democrat, once said that he had often thought that had there been present a man who could see but could not hear and one who could hear but could not see when Roscoe Conkling delivered his superb speech, nominating Gen. Grant in the famous Chicago convention of 1880, he believed that the deaf man who could see would have derived as much pleasure from Conkling's performance as the blind man who could hear. I confess that seeing Mr. Speaker CANNON in action has always interested me quite as much as what he said. [Laughter and applause.] He has always appeared to me to be made up chiefly of spiral springs. [Laughter.] I saw him once do, while speaking, a thing that I doubt if any other speaker ever duplicated since the confusion of tongues at Babel. In the heat of debate I saw him make a complete circle on his heel. [Laughter.]

He is one of the strongest rough-and-tumble debaters I ever heard or tackled. He belongs to the topnotcher class of mental pugilists. He hits and hits hard, but never below the belt. I remember with pleasure now—though not so pleasant then—that in the first real debate in which I ever participated in the House he catechized me in extenso. It was a red-hot political debate—a cut and thrust affair—on the repeal of the Federal election law. I had not been here more than two months, and was ambitious to break into the limelight, or, as the Kaiser would say, to achieve "a place in the sun." [Laughter.] I did it on that occasion, largely by aid of Mr. Speaker CANNON, though I entertain serious doubt whether he intended assisting a rampant, greenhorn Democratic Congressman, for the billows of politics ran mountain high at that time.

Fight in those brave days of old? Of course we did—many of us, tooth and nail, hammer and tongs. Scars? All who participated in those fierce conflicts bear them—honorable scars, all in front; none of us escaped unscathed. Sometimes we fought over political principles, sometimes about governmental business, and sometimes by reason of what Cæsar denominates cer-

taminis gaudium—the sheer joy of combat. Once Speaker CANNON was in the full tide of speech when I interrupted him, and he waved or shoved me off by saying, "Oh! Not now. I will attend to the Missouri Cyclone presently"—which he did, and I came near having fastened onto me the sobriquet borne now and for many years by the gentleman from Texas [Mr. DAVIS]. [Laughter and applause.].

Mr. DAVIS of Texas. Amen! [Laughter.]

Mr. CLARK of Missouri. On another occasion I had the floor, and when Speaker CANNON interrupted me I conferred upon him the alliterative title of "The Dancing Dervish of Danville"; but out of it all we came forth good, warm personal friends, and will, in the language of the wedding ceremony, so remain "'till death do us two part."

Fame is the scentless sunflower with gaudy crown of gold,
But friendship is the treasure rose, with sweets in every fold.

In 1894 there was the worst slaughter of the innocents since the reign of King Herod. I was one of the victims of that awful landslide. I remember with gratitude that Speaker CANNON was the first person who suggested to me that I might come back. He spoke and predicted from experience.

On the day a few weeks ago when the bill authorizing the Government to take over the title deeds to the land in Kentucky on which stands the splendid memorial building covering and protecting the humble log cabin in which Abraham Lincoln was born, we witnessed a pleasing and amazing spectacle—Mr. Speaker CANNON, 80 to-morrow, and Gen. SHERWOOD, some months his senior, straight as arrows, lithe as men of 50, delivering speeches which thrilled our hearts; and the strangest feature of that remarkable scene was that these two well-beloved octogenarians read whatever they wanted to read without glasses! Verily, like Moses, the master law giver of all the centuries, their eyes are not dimmed nor their natural force abated. [Applause.]

For a long time people poked fun at the Scotch theory of "second sight"; but on the occasion to which I refer we had the best sort of evidence that these two veterans have received their "second sight"—"the ocular proof" which Othello demanded.

In passing, it may be apropos to state that one of the finest couplets in our vernacular grew out of the Scotch theory of "second sight" conferring the gift of prophecy:

"'Tis the sunset of life gives me mystical lore,
And coming events cast their shadow before."

When I first read those splendid lines as a college student they appeared to me so fine that I wanted to read the context. Somehow I got it into my head that Alexander Pope was the author and read all his works to find them, which I did not do for the all-sufficient reason that he never wrote them. They are in Thomas Campbell's poem "Lochiel"; but my time spent in reading Pope was profitably spent. He polished his poems till they glitter as a gem, and he excelled all poets in making couplets or quatrains, each conveying an idea complete within itself. I committed hundreds of them to memory, greatly to my advantage.

While Speaker CANNON was delivering his Lincoln speech, I noted what a remarkable profile resemblance there is in his face and Lincoln's, just as there is a striking resemblance in the face of my good, dear friend, Maj. STEDMAN of North Carolina and the face of Gen. Robert E. Lee.

Mr. Speaker CANNON owes it to himself and to his countrymen to write a book of reminiscences, Job's vengeful declaration, "Oh! that mine adversary had written a book," to the contrary notwithstanding. Evidently the Man of Uz did not have in his mind's eye Theodore Roosevelt and Woodrow Wilson when he gave voice to that far-resounding and malicious desire.

There are two other distinguished Americans who owe it to themselves and the country to write books of reminiscences—Senator Chauncey Mitchell Depew, the incorrigible optimist, and "Marse" Henry Watterson, the last of that marvelous school of editors of whom Horace Greeley, George D. Prentice, James Gordon Bennett the elder, Henry J. Raymond, Shadrack Penn, Thurlow Weed, and Samuel Bowles were the founders. What books these three men could write for our instruction and delight! They would be eagerly read by untold and unborn thousands so long as this Republic endures, which we all fondly pray will be—

"Forever and forever,
As long as the River flows,
As long as the heart hath passions,
As long as life hath woes."

[Applause.]

We, one and all, most cordially and affectionately congratulate Mr. Speaker CANNON on attaining the psalmist's extreme allotment of four-score years and upon having that which should accompany old age, "As honor, love, obedience, troops of friends"; and we hope from the bottom of our hearts that he will live many years full of usefulness, happiness, and prosperity. [Prolonged applause.]

Mr. MANN. Mr. Speaker, I ask unanimous consent that the Speaker may recognize my colleague Mr. CANNON. [Applause].

The SPEAKER pro tempore (Mr. COOPER of Wisconsin). The Chair feels, as he was about to say when the gentleman from Illinois [Mr. MANN] arose, that he voices the earnest wish of every Member—Republican, Democrat, Progressive, Socialist, Catholic, Protestant, Jew, and Gentile—in expressing the hope that the distinguished gentleman from Illinois [Mr. CANNON] will now address the House. [Applause.]

Mr. CANNON. Mr. Speaker and gentlemen of the House of Representatives, it is pleasant for an old man to meet his fellows in the public service, to look in their faces, and feel that they accord to him the same honesty of purpose that they claim for themselves.

And yet upon this occasion, if you will bear with me for a few moments, I recollect a story that John O'Neill told me many years ago. He was an Irishman who represented a St. Louis district, and he had all the brightness, wit, and humor that Irishmen generally have. One day, sitting in the cloakroom, when the conversation was running, he said, "When I was at home last week, having leave of absence for a few days, an Irish client of mine was about to die. He had no relatives in this country and all his relatives in Ireland had crossed over, and he sent for me to write his will. I had been his attorney. He gave so much for the repose of his soul, so much to this hospital, and so much to that hospital, and so much for various charities. He knew exactly what he had, and I wrote the will and read it over to him, and he discovered when he came to make the addition that there was $10 left over that had not been disposed of."

O'Neill said the dying Irishman realized that his time was short and asked if there was time to write the will over. O'Neill said to him, "Oh, I can fix it all right. I will just put in what we call a 'codicil.' What do you want to do with the $10?" He thought a minute and said, "I'll not be knowin' what I want to do with the $10 exactly—but, yes; it can be invested in whisky, to be drank at my funeral." "Going or returning?" asked O'Neill. "Going, of course. I'll be wid 'em then." [Laughter.]

Brother SHERWOOD, you and I came into this House together, elected in 1872. I have been here more of the time than you have, but I think you have been doing as good service, and probably better than I have. You are my senior in years; and, looking in your eye, I appreciate your friendship. We were political friends when we served in the Forty-third Congress. We are political opponents now, but really I think I respect and love you as much as it is lawful for one man to love another. [Applause and laughter.]

These doctors have made great progress in medicine and surgery. Why, with the bloodletting that there was, with the thrust of a lancet that obtained in the West, while the West was being settled, and the 10 grains of calomel, and 10 grains of jalap, you know it would kill people if it was administered now, and the great doses of quinine, and so on. That was heroic treatment. [Laughter.] In medicine and surgery the world has progressed more in your time and mine than it did in the whole history of the race, from Eden down to your time and mine. They talk now about being on the eve of discovering a medicine or elixir, or something, that will make us all live to be at least 150 years old. I want them to hurry up, Brother SHERWOOD. [Laughter.]

Always there have been during my service here, Mr. Speaker, and I believe there always will be in the House of Representatives, fierce contests touching policies, and no truer thing was said by those who have preceded me than when they said, quoting the minority leader [Mr. MANN], that while this side of the aisle contested with that side of the aisle, after the partisanship passed, and even while it was on, we had as many friends on your side, and you as many friends on our side that would go as far outside of the partisanship or the policies to serve one another, as we have upon our respective sides. [Applause.]

The scene here to-day is a sample of the partisanship of the House. I can say with the psalmist, "The lines have fallen unto me in pleasant places;" and as I look into the faces of friends on both sides of the House I am more inclined to accept the plain evidence of fact than the popular and picturesque fiction which divides this body into partisan groups on all questions, shuts out personal relations and the cooperation of Representatives, regardless of party, to work out in legislation the greatest good to the greatest number.

We should not be human if we did not disagree at many points, and there would be no work for Congress if there were not many men of many minds in the country. We are sent here as the Representatives of those people who have different ideas as to Government activities, and we must here thrash out these differences, whether pleasant or unpleasant, for harmony can not always be produced out of the conflicts of the people, even by the best of friends. My own experience here inclines me to the view expressed by Charles Lamb, that he could not hate the man he knew, rather than to the old proverb that "Biting and scratching is the Scots' wooing."

One of my earliest friends on this floor was Alexander H. Stephens, who returned to the House when I came as a new Member. I had heard of the man who, as vice president of the Confederacy was the ablest adversary of Lincoln, and I had opinions; but here on the floor and in the hotel where we both lived I came to know him as a man as different from my opinions, formed by reading the war news, as are my opinions of the archangel and the archdemon of the universe.

So it has been through the years; and to me partisanship means the necessary contests over policies by which the Republic must be governed. There are no personalties in partisanship, and men who meet face to face and discuss different political views are less arbitrary in their views than are those who read headlines and fear that the House has fallen to a low estate, where party advantage is the one aim and effort.

I have seen some changes in partisan policies. When I came here, believing in nationalism, I was impressed with the State *rights doctrines* of some of the men on that side, and I remember a speech by Randolph Tucker of Virginia, in opposition to Randall's bill to loan fifteen hundred thousand dollars to the Philadelphia Centennial Exposition.

Mr. Tucker warned the House against stretching the welfare clause of the Constitution. He said it would be an advertisement, inviting any clever man who had an idea about spending Government money for the general welfare to come to Congress, and it would not be long before we were crowded off our stools by the lobbyists who wanted to get their hands into the Treasury. Mr. Tucker, then, turning to Randall, shouted a final warning that should that appropriation be made Chicago and even Yorktown would some day come for aid to an exposition. Well, they both came, and many others, and Mr. Tucker's son was president of the Jamestown Exposition. That is only an example of some of the changes that have come about the use of Government money to promote the general welfare. We have had quite a spell of it in the consideration of the Agriculture appropriation bill.

In our partisanship we have not been as keen for party advantage as is often represented. There was Gen. Benjamin F. Butler, who was a stormy petrel of American politics, if we have had one, and he is remembered as the author of the civil-rights bill, which caused such a storm of indignation throughout the South. But Gen. Butler was also the chairman of the Judiciary Committee which reported and put through the House the amnesty bill, which removed the political disabilities from many thousands of southern men.

And this leads me to suggest that it was not party advantage which inspired this side of the House when in control to pass amnesty bills which in a large measure gave control to that side; nor was it party advantage which led that side when in the majority to propose an electoral commission to find a judicial method for settling the great controversy over the Presidency. You lost by that machinery; but it was your own creation, and its creation was inspired by patriotic motives to save the country from another civil strife.

May I here cast a doubt on another popular fiction in which a former Member was the hero? I refer to the story which has even got into some political histories, that Col. Watterson organized an army of 100,000 stalwart Democrats to march on Washington and by force place Mr. Tilden in the White House. I have always doubted the correctness of that story, because Col. Watterson was a Member of the House at that time and was here using his influence and his diplomacy to work out a peaceful solution of that controversy. He was one of the best losers I ever saw. When the report of the commission on the Oregon vote was adopted Col. Watterson made a short speech in which he expressed his disappointment over the impending decision and described the blue-grass region in springtime, where the flowers were the signals of God's love and bounty, giving assurance that the heavens should not be robbed of their sunshine, the earth of its fruition, nor the future of hope.

That was at the end of February and the beginning of March, 1877. The Democrats thought Tilden was elected and we Republicans thought Hayes was elected. There was a real contest at the polls and a real contest as to which was elected. You were in good faith and we were in good faith. You carried the country and had a Democratic House, which you elected in 1874—strongly Democratic. It was a Republican Senate. The 4th of March was approaching, and in that Democratic House, presided over by Samuel J. Randall, with such Democrats as Ben Hill and Randolph Tucker—noted men, both North and South—there originated on that side the legislation which was agreed to by the Senate for the electoral commission—five judges of the Supreme Court, five Members of the Senate, and five Members of the House.

You supposed you would have a majority of one. You supposed that David Davis, one of the five judges, would be on your side. That would have given you a majority of one. But two days before that commission was appointed Gen. Logan, contesting for reelection to the Senate, was defeated by Justice Davis, and that put Justice Davis out. So Justice Bradley was selected, and he threw the casting vote. It was settled, but it did not turn out as you expected it would turn out. But it was patriotically acquiesced in.

I recollect very well what Col. Watterson said when they commenced to filibuster on that side of the aisle with a motion to adjourn, and a motion to adjourn to a day certain, alternating one motion with the other, as they could do under the rules of the House as they then existed, as long as a man could stand and make the motion. Watterson said:

> I shall join in no movement to obstruct the progress of the presidential count. We have had enough of anarchy.

[Applause.]

I never shall forget the scene before the electoral count was completed, when Speaker Randall rose in his place, when it was necessary that action should be had to a point of order being made on the motion under the rule, and declared that it was a filibuster and dilatory, and that the Constitution provided for the count of the electoral vote. He sustained the point of order, and then in the House we did have pandemonium for some time. [Laughter.] But the count was made.

So I have found the partisanship of this House throughout these 40 years sometimes warm and vigorous, but largely mixed with patriotism and much common sense; no barriers in the center aisle to prevent men from crossing that partisan line, and no prohibition against meeting in the lobby or the cloakroom and talking it over in private. It has been to me a pleasant and, I hope, a profitable experience.

There are, so far as I know, only four of my colleagues in the Forty-third Congress, which assembled here 43 years ago, still living. They are my friend and colleague, Gen. SHERWOOD, on this floor; ex-Senator Eugene Hale, of Maine; ex-Secretary of Agriculture James Wilson, of Iowa; and John R. Lynch, of Mississippi. All others who sat in that Congress have crossed over to the beyond.

If I sometimes see the faces and hear the voices of others not now here to answer the roll call, I may not be charged with dreaming, for among these 3,000 men with whom I have been associated in legislative efforts and over partisan contests there were hosts of personal friends of whom I never thought as Republicans or Democrats, except as we discussed different policies. These men had their hour on this stage, did their work in their time, as you are doing it now, following in the line of precedent; here amending where changes in conditions make it necessary, but not attempting to uproot and reconstruct the whole fabric of the people's law. And when I see ghosts in this Chamber I am not frightened, for they typify the spirit of a representative democracy as truly as do the words and works of those who laid the foundation of this Government in the beginning.

Who could fear the ghosts of Blaine and Randall? Of old Alexander H. Stephens and Henry L. Dawes, of Ben Butler and George F. Hoar, of Sunset Cox and Tom Platt, of Fernando Wood and William A. Wheeler, of Charles O'Neill and Pig-Iron Kelley, of Holman and Tyner, of Beck and Blount, of Bland and Mills, of Jerry Rusk and Philetus Sawyer, of Stephen B. Elkins and George Q. Cannon, of Ben Hill and Gen. Banks, of Proctor Knott and David B. Culberson, of John H. Reagan and Randolph Tucker, of Tom Reed and John G. Carlisle, of McKinley and Frank Hurd, of Nelson Dingley and William L. Wilson, of Crisp and Henderson, and the hosts of others whose names are familiar to you or to any who know the history of our country?

There are now more great men and more great women in the United States than there ever have been in the past history of the Republic. Some one asks, "Where are they?" And I answer, They are everywhere, following their vocations; but when necessary, whether it be in Congress or in civil life, or upon the bench, in the State legislature; whether it be in diversifying the industry of the country and carrying on the business of the country, whether it be following the plow or working in the

machine shop, there will be found more people capable for self-government and ready to defend the flag than there ever have been since the discovery of America. [Applause.]

Is there humor in the House of Representatives? Yes. The first notoriety I ever obtained in this House and in the country was by the aid of Sunset Cox, who came into Congress from Ohio and then from New York. A great man was Cox. He had a versatile mind. He was full of humor. One day he was "running amuck," attacking the Republican side, as only he could. We were cheering him at times on both sides, and sometimes there was gnashing of teeth on this side. [Laughter.] Finally he made a remark about a constituent of mine who had just been nominated for Commissioner of Internal Revenue, Gen. Green B. Raum, a good, strong man, a former Member of Congress. Just at that time Alice Oates was here in opera bouffe. She was inimitable. One of the characters in her opera, as I recollect it, was "General Boom." Sunset Cox in his remarks said: "Why, here at last they have turned out a good, honest Commissioner of Internal Revenue and appointed somebody—I think he is from Illinois—General Boom." Well, that aroused me, and I jumped up and said, "Will the gentleman yield?" "Oh, no," said Cox, "I can not yield. The gentleman shakes his finger, and he scares me." Then a smile came over his face and he said, "Yes; I will yield." "For what time?" inquired Mr. Speaker Blaine. "As long as the gentleman will keep his left hand in his pocket," answered Cox. [Laughter.] I accepted the yielding and stood in that aisle, and I began vigorously to defend Gen. Raum; but I had not talked 60 seconds until I forgot all about the left hand, and out it came. "Time's up," said Cox. And it was up. [Laughter.]

That was my first notoriety. In the campaign of 1874 that finger was cartooned all over the country. The joke was good, and that cartoon abounded on handbills on every tree in my district, with the left hand out, and sometimes one finger and sometimes all the fingers, and they had the fingers sprouting out of the forehead, you know. [Laughter.]

I have had two terms, four years, of absence that I did not ask for; otherwise my service in Congress would measure 44 years. [Laughter.] During that time, with the exception of that great struggle—the Civil War—there has been more of history written, not only upon this continent but I believe more than was ever written anywhere else on earth in the same length of time. Think of it! It was the winding up of that great struggle, when valiant, courageous men of the same race and the same blood fought for four long years. You of the South thought you were right. We knew you were wrong, or thought we did, but it took four years to determine. I see before me a few men who were in that struggle in the Southern Army, and I see the sons of many who were in that great struggle. It was fierce. The world up to that time had never seen such a contest. When it began the navies of the world were wooden walls. Then came the *Merrimac* and the *Monitor*, and when that war closed all the navies of the world were obsolete.

Then came reconstruction, but I will not go into it. None of us remember the many things that happened with pleasure; but as I think about it sometimes I realize it necessarily could not have been otherwise than it was. But how marvelously it has been forgotten, because we sit here upon each side of this aisle friends, Americans, all marching under the Stars and Stripes, each with an equal love for the great Republic. [Applause.]

There was no such contest with any such result in the lifetime of a generation and a half in the history of the world. Why, bless my soul, the Battle of the Boyne was fought 200 years ago, if I remember aright, and on each anniversary it is fought over again now. [Laughter.]

A man said to me the other day, "What would you give, Mr. CANNON, for an insurance policy that you would live to be 100 years old?" I said, "A real policy that would make me live—and would I have to die then?" "Yes," he said; "just a policy of that kind." I said, "Give? I would rather pay something not to have it." "Why?" he said. "Well, there is probably one man in half a million in the United States now living that will live to be 100 years old, and I am going to take my chances." [Laughter and applause.] He said, "That is a slim chance." I said, "Yes; but I would not have the policy anyway, because every day that would pass it would occur to me that it was one day less." The Great Father has arranged it properly; no man can foresee when he will die.

Now, I do not desire to keep you longer. I thank you, Mr. Speaker and gentlemen, with all the sincerity in my power for this compliment. I never had such a compliment before. It would be impossible to have another such, and I appreciate it. [Prolonged applause.]

### MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 4603) to authorize the Jackson Highway Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Tom Beckby, commonly called Tombigbee, River at Princes Lower Landing, near Jackson, Ala.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 4432) to amend section 8 of an act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914.

### RURAL CREDITS.

Mr. GARRETT. Mr. Speaker, I offer the following privileged report from the Committee on Rules.

The Clerk read as follows:

House resolution 225 (H. Rept. 649).

*Resolved*, That immediately upon the adoption of this resolution the House shall resolve itself into the Committee of the Whole House on the state of the Union for the consideration of S. 2986; that the first reading of the bill shall be dispensed with; that there shall be not exceeding six hours of general debate, the time to be controlled one-half by the gentleman from Virginia [Mr. GLASS] and one-half by the gentleman from California [Mr. HAYES]; that all debate shall be confined to the subject matter of the bill; that while the bill is under consideration the House shall meet at 11 o'clock a. m., and that the bill shall be in order on all legislative days, except Wednesdays. At the expiration of general debate the bill shall be considered under the five-minute rule and the Committee of the Whole House on the state of the Union shall perfect and report the bill to the House; whereupon the previous question shall be considered as ordered upon the bill and all amendments thereto to final passage without intervening motions except one motion to recommit.

The amendments recommended to the rule are as follows:

On line 1, page 12, after the word "except," insert the word "calendar."

Line 12, page 1, after the word "Wednesdays," strike out the period and insert a semicolon and insert:

*Provided*, That nothing herein shall interfere with the special order made by the House on May 5, 1916, for the consideration of H. R. 12766.

Mr. GARRETT. Mr. Speaker, I ask unanimous consent that the amendments may be agreed to without interfering with the regular order.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that the amendments be agreed to. Is there objection?

There was no objection.

Mr. GARRETT. Mr. Speaker, I will ask the gentleman from Kansas whether we can agree on time for debate?

Mr. CAMPBELL. I think we can. I have requests for 15 or 20 minutes on this side.

Mr. GARRETT. Mr. Speaker, I ask unanimous consent that debate may proceed for not longer than 40 minutes, 20 minutes to be controlled by the gentleman from Kansas and 20 minutes by myself, and that at the end of that time the previous question shall be considered as ordered on the rule.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that debate on the rule be limited to 40 minutes, one-half to be controlled by himself and one-half by the gentleman from Kansas [Mr. CAMPBELL], and that at the end of that time the previous question shall be considered as ordered. Is there objection?

Mr. WINGO. Mr. Speaker, reserving the right to object, I suggest to the gentleman that he omit from his request the ordering of the previous question for this reason. The understanding was that the bill reported by the House committee as a substitute is one amendment and that it will be considered as an original proposition. The rule, I find on examination within the last few minutes, does not provide for that, and I suggest he leave off the request for the ordering of the previous question on the rule. Of course he can move the previous question at any time. I desire to take the matter up with him and the gentleman from Virginia, Mr. GLASS.

Mr. GARRETT. The gentleman means that he objects to the previous question on the rule?

Mr. WINGO. Yes; because we want to amend the rule. I think the gentleman from Tennessee and myself and Mr. GLASS can agree upon the amendment.

Mr. GARRETT. Then I withhold that request.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that time be limited to 40 minutes—20 minutes to be controlled by himself and 20 minutes by the gentleman from Kansas [Mr. CAMPBELL]. Is there objection?

Mr. LINTHICUM. Mr. Speaker, reserving the right to object, I would like to ask the gentleman if it is the intention to proceed with debate on the bill to-day after the adoption of the rule?

Mr. GARRETT. It is.

Mr. LINTHICUM. What about Monday?

Mr. GARRETT. There is a special order for Monday which was made yesterday afternoon; and this rule provides, by an amendment which has just been agreed to, that the consideration of the rural-credits bill shall not interfere with the special order which was made yesterday.

The SPEAKER. Is there objection?

Mr. FITZGERALD. Mr. Speaker, reserving the right to object, do I understand that after debate on the rule some amendments to it are to be proposed?

Mr. GARRETT. The gentleman from Arkansas [Mr. WINGO] asked me to withhold the request for ordering the previous question on the rule for the time being.

Mr. FITZGERALD. The gentleman controls the time himself.

Mr. GARRETT. Certainly; and I intend to move the previous question.

Mr. FITZGERALD. I suggest that the gentleman not have debate closed by unanimous consent until some one knows what the proposed amendment is to be. The gentleman controls the time anyway.

Mr. GARRETT. Yes.

Mr. MANN. The gentleman can move the previous question at the end of 40 minutes.

Mr. GARRETT. Certainly. I desire that gentlemen on the Republican side may have 20 minutes.

Mr. MANN. If the House should determine not to order the previous question, the gentleman might want to debate the amendment.

Mr. GARRETT. I will change the request. I will yield 20 minutes to the gentleman from Kansas [Mr. CAMPBELL], and will ask unanimous consent that he may be permitted to yield out of that 20 minutes as he may choose.

Mr. MANN. He would have that right anyway.

Mr. GARRETT. Then I yield to the gentleman from Kansas 20 minutes.

The SPEAKER. Is the gentleman going to proceed upon the theory that he has an hour?

Mr. GARRETT. Yes.

Mr. CAMPBELL. Mr. Speaker, I should like to have the gentleman from Tennessee or some one favoring the bill or the rule make an opening statement.

Mr. GARRETT. Mr. Speaker, I will take pleasure in doing so. This rule is to provide for the consideration of what is commonly known as the rural-credits bill. It provides that the first reading of the bill shall be dispensed with; that there shall be not more than six hours general debate, the time to be controlled by the gentleman from Virginia [Mr. GLASS] and the gentleman from California [Mr. HAYES], to be equally divided between them; that all debate shall be confined to the subject matter of the bill; that while the bill is under consideration the House shall meet at 11 o'clock; and that the bill shall be in order on all legislative days except Calendar Wednesday with the provision that the special order which was made on Saturday for next Monday shall not be interfered with. It then provides that the bill shall be read under the five-minute rule for amendments. There is no limitation placed upon the power to amend. On the completion of the bill under the five-minute rule it is to be reported to the House, the previous question shall be considered as ordered on the bill and amendments to final passage except one motion to recommit. That is the entire proposition.

Is the gentleman ready to use some time? If so, I will yield 20 minutes to the gentleman from Kansas [Mr. CAMPBELL].

Mr. CAMPBELL. Mr. Speaker, I have no objection to this rule. I do not know of any on this side of the House. It makes a bill in order that is not, in my judgment, such a bill as meets the expectations of the country on the question of rural credits. I regret, therefore, that the rule does not make in order a bill that does not justify the House of Representatives in laying aside the consideration of other important legislation. The rule is worthy of a better rural-credit law than it makes in order. The farmers of the country and those interested in rural-credits legislation have expected that when a rural-credits law was enacted that it would provide easy facilities for securing loans at lower rates of interest than borrowers can now secure them. This bill will not, in my judgment, reduce interest rates to borrowers, especially throughout the mid continent, the Northwest, nor in the Northeast. I am not sure as to what the effect will be in the cotton States, but I am very certain that the provisions of this bill will not benefit borrowers in the mid-continent country. I have received a great many letters relative to rural-credits legislation. Recently I have been in receipt of letters from farmers with reference to this bill, and every letter I have received has been in criticism and opposition to it. The criticism of the bill is that it creates a great bureau, provides for a large number of high-salaried officials, that will entail an expense estimated by the proponents of the bill at 1 per cent of expense in operating the law. This is an enormous charge for securing loans. The farmers of Kansas and of Missouri, Nebraska, and, I take it, of Arkansas and Oklahoma and of the great Northwest are now securing money cheaper, in my judgment, than they can secure it under the provisions of this bill and in any quantities they desire, and——

Mr. TILSON. Will the gentleman yield for a question?

Mr. CAMPBELL. Yes.

Mr. TILSON. Who pays these expenses, the borrowers, or are the members of this large force to be paid out of the Federal Treasury?

Mr. CAMPBELL. The bill provides that the force is to be paid out of the Federal Treasury, of course. It creates a system very similar to that of the Federal reserve act. It follows the lines of that act. My judgment is that it is wholly unnecessary to create a highly organized and high-salaried corps of officers and officials, as are provided for by this bill, in order to secure real rural-credits legislation and provide easier facilities for securing farm loans. Now, it is stated by many that they can support this bill in the hope that it can be made better later on. My judgment is that when you have once established this bureau, when you have once started these officials with their $10,000 salaries, with the corps of officers provided here and there, that you will never be able to reduce the number or the salary of any one of these officials while the law remains upon the statute books, and the law will remain if it is enacted. I would rather see a more simple and direct method of supplying the country with money for farm loans than to provide this expensive machinery that I fear will always be fastened upon the country. I would like to give my support to a rural-credits bill that would bring cheaper money upon longer time to the farmers of the country. I would rather support a proposition to amend the Federal reserve act taking off all the limitation upon national banks, permitting them to loan money upon real estate security, on farms and urban properties for long periods than to see this bill enacted into law, giving us two great expensive systems where one would do.

And I have been unable to understand why the Committee on Banking and Currency and why those in charge of our financial legislation have not suggested that the national banking law be so amended that the national banks that are now in existence throughout the country, many of them having farmers as their directors, as their presidents; many of them having farmers as the majority of their stockholders—why those banks are not permitted to take the best security in the communities in which they exist for as long periods as they see fit.

Mr. RUSSELL of Missouri. Will the gentleman yield?

Mr. CAMPBELL. Yes.

Mr. RUSSELL of Missouri. My understanding is that the Glass bill, passed last Congress, provided that national banks may loan upon real estate. Is not that the fact?

Mr. CAMPBELL. It does not provide for farm loans for longer periods than five years.

Mr. RUSSELL of Missouri. I understood the gentleman to say they could not loan upon real estate.

Mr. CAMPBELL. They can upon limited conditions, and there is no reason why the national banks should not be given all the privileges as to farm loans given by this bill, and State banks could do the same under proper State law. Mr. Speaker, I reserve the remainder of my time.

The SPEAKER pro tempore. The gentleman has used nine minutes.

Mr. GARRETT. Mr. Speaker, I would like to prefer a unanimous-consent request if I may before there is further debate. My attention has just been directed to the fact that there was an agreement in the Committee on Banking and Currency that this House bill which has been substituted for the Senate bill should be read section by section in lieu of the Senate bill.

The gentleman from Kansas understands the situation. The Senate bill has been stricken out entirely and the House bill has been substituted.

Mr. CAMPBELL. The House bill has been substituted.

Mr. GARRETT. Of course, that is only one amendment, and when they reach it under the five-minute rule under this rule we have here it would be in the power to shut off debate at any time, because that is only one amendment. And what I desire to ask is unanimous consent that the rule may be modified by striking out, in line 13, the words "the bill" after the word

"debate" and inserting "the committee amendment shall be read in lieu of the Senate bill and considered section by section," so that it will read:

At the expiration of general debate the committee amendment shall be read in lieu of Senate bill and considered section by section under the five-minute rule, and the Committee of the Whole House on the state of the Union shall perfect—

And so forth.

Mr. LENROOT. It is not the gentleman's understanding that it shall be so considered and deprive the House, if it so desires, of treating the Senate bill separately?

Mr. GARRETT. No.

Mr. LENROOT. It is merely to get a section-by-section amendment to the substitute?

Mr. GARRETT. It provides that it shall be read in lieu of the Senate bill. I ask unanimous consent that that amendment be agreed to.

The SPEAKER pro tempore. The gentleman from Tennessee [Mr. GARRETT] asks unanimous consent that the amendment suggested by him be agreed to. Is there objection? [After a pause.] The Chair hears none.

Mr. CAMPBELL. Mr. Speaker, how much time have I remaining?

The SPEAKER pro tempore. The gentleman has 11 minutes remaining.

Mr. CAMPBELL. Does the gentleman from Tennessee wish to use some of his time now?

Mr. GARRETT. No; I do not.

Mr. HILL. Will the gentleman yield to me for five minutes?

Mr. GARRETT. Yes; I will yield to the gentleman from Connecticut five minutes.

Mr. HILL. Mr. Speaker, I do not know whether I favor this bill or not. During the past two years, while I was not with you, at the request of the gentleman from Texas [Mr. EAGLE], I read every word of the testimony taken by the joint committee with reference to this matter carefully. I have not had time—I see that it was reported on May 3—to review and study this bill. I had formed a clear and distinct impression as to the testimony in fifteen hundred or more pages, which I carefully read and studied during my vacation, and was not strongly impressed with the character of the bill that then seemed to be pending.

But I have the most profound confidence in the chairman of the Committee on Banking and Currency and in his judgment with reference to these matters, and therefore I look at this measure, prejudiced in favor of it, believing that probably many of the unfortunate tendencies which prevailed a year or two ago with regard to proposed legislation of this character have not found a place in this bill. The thing that I regret now, gentlemen, is that the matter is brought forward at all at this time. I do not think that the Federal reserve system as yet has had such a trial as to justify repeating the process of its organization in this measure. I introduced yesterday—and I state it with reference to the remark made a moment or two ago by the gentleman from Kansas [Mr. CAMPBELL]—I introduced yesterday a very brief amendment to the Federal reserve act, which in my judgment will do more and do it more promptly than it is possible to get done under this law in the next five years.

There is now in the hands of the national banks, carried in what is known as savings bank departments, in this country about a thousand millions of dollars loaned to national banks as savings bank deposits. I introduced a bill yesterday providing that national banks having savings bank departments and keeping segregated savings accounts against which a 5 per cent reserve was carried, in accordance with the requirements of the Federal reserve act for time deposits, should have the right to invest those loans under the laws of the respective States in which they were doing business, provided those laws first received the approval of the Federal Reserve Board and regulations were made providing for their supervision and examination.

Now, there are $1,000,000,000 of savings funds already accumulated by national banks. Part of this can be loaned in Texas by the national banks under the laws of Texas and part in Connecticut under the laws of Connecticut, and so in every State which permits savings investments in real estate on either farm or urban property.

Mr. GARNER. Will the gentleman yield?

Mr. HILL. Certainly.

Mr. GARNER. That would not relieve the situation to the extent that it is proposed in this bill, because the rate of interest in Texas is too great, and you can not expect a bank to loan at a lower rate of interest than the usual money loaner did.

Mr. HILL. It depends entirely upon the rate of interest which the banks themselves pay for those deposits as to the amount of the loan. We have in Connecticut a system of mutual savings banks. My impression is there is a very large amount so invested. The savings banks as a rule pay 4 per cent on those deposits, and as a rule the loans are made at 5 per cent. It is true not only in every New England State, but it is true in New York, and I think the same system obtains in California. That system and the system of trust companies which has like privileges is gradually driving the national banking system to the wall, strange as it may seem. But now I propose by the bill which I introduced yesterday to allow national banks to invest under the laws of their respective States savings banks deposits in savings departments of national banks on first-mortgage real estate loans at lower rates than discount loans of current deposits are now made.

Mr. LINTHICUM. Will the gentleman yield?

Mr. HILL. Yes.

Mr. LINTHICUM. I find in my State the savings banks do not want to loan much on real estate.

Mr. HILL. That is undoubtedly true in New York City and other large cities, where the loans can be made on the moment and collected on the moment on stock-exchange collateral. It is not so true in country communities.

Mr. LINTHICUM. I feel that if the savings banks of my city, Baltimore, in particular, would loan more on real estate than on bonds, as they are doing, it would be a great help; but they will not do it.

Mr. RAGSDALE. Mr. Speaker, will the gentleman yield?

The SPEAKER pro tempore. Does the gentleman from Connecticut yield?

Mr. HILL. Certainly.

Mr. RAGSDALE. Does not the gentleman know that one of the great troubles that the banks of the South have in taking this sort of paper is that they experience so much difficulty in rediscounting it in the North? Now, the banks of the gentleman's State do not have that trouble, but in our country many of the banks are dependent on the North at certain seasons of the year for rediscounts. The gentleman should know that in New York and many of the other money centers they are absolutely averse to rediscounting paper of this kind.

Mr. HILL. That is where this thing is going to fall down. You can not fix an interest rate by legislation. You can, it is true, fix a limit above which the rate shall not go; but you can not fix the limit down to which it shall go. It is a matter of supply and demand, and it is impossible for you to legislate arbitrarily in this matter or expect to maintain the same low rate of interest in a new State, in a new country, and under new conditions that you can in the old-settled localities of this country. It can not be done.

The SPEAKER pro tempore. The time of the gentleman from Connecticut has expired.

Mr. CAMPBELL. Mr. Speaker, I yield six minutes to the gentleman from Wisconsin [Mr. LENROOT].

The SPEAKER pro tempore. The gentleman from Wisconsin is recognized for six minutes.

Mr. LENROOT. Mr. Speaker, it is not very often that the minority members of the Committee on Rules are able to congratulate the majority members on bringing in a rule that is absolutely fair and just. I am glad that they do that occasionally, and I am glad to be able to say that they have done so upon this occasion.

Mr. GARNER. And in behalf of a worthy cause.

Mr. LENROOT. This rule that is now pending does provide for full and fair consideration upon a very important bill—a bill that ought to be considered and acted upon before the adjournment of the present session of Congress.

The only criticism that could be made of this rule and of the Democratic majority is that they are bringing in a rule for the consideration of this bill at this time, when great and important appropriation bills are pending, which should have been considered before this bill is brought up for consideration, because this bill has already passed the Senate, and there is no question but that this bill could be brought up two or three weeks later, go into conference, and be enacted into law before the adjournment of the present session.

However, I realize that it is the province of the Democratic majority to determine the order of their program, and inasmuch as they have seen fit to go ahead in this very unbusinesslike fashion, it is not for us of the minority to complain. They have that privilege, and they also take the responsibility for doing it.

Mr. Speaker, while I am upon this subject, it might be well to call attention to the absolute incompetency of the Democratic majority in this House to do business in a businesslike way. It is now the 6th day of May. We have been in session since the 7th day of December, and not a single regular appropriation

bill, outside of three urgent deficiency bills, has been signed by the President. Only one regular appropriation bill has been agreed to by both Houses, and that is the legislative, executive, and judicial appropriation bill. Four of the great bills have not even been reported to this House at the present time, namely, the District of Columbia bill, the sundry civil bill, the Naval bill, and the Army bill. There are two appropriation bills now on the calendar awaiting action, the Diplomatic and Consular bill and the fortifications bill. If the Democratic majority had any business sense, if they had any idea of doing business in a businesslike way, they would pass these appropriation bills that are pending; they would report and pass appropriation bills that should have been reported and passed long ago, send them over to the Senate, there to be considered by the Senate; and while the Senate was considering those bills the House could take up the rural-credits bill and other legislation that has been passed by the Senate and consider them in the House and pass them.

But it is only an illustration, Mr. Speaker, of the fact that the Democratic majority does not know how to do business in a businesslike way. They ought to have some interest in knowing what the appropriations are going to be, some time before the 1st of July, because they will have at some time to bring in a revenue bill raising a very large additional amount of revenue. They ought to be interested in getting these appropriation bills enacted promptly, so as to know something about how much revenue they may need. But that is something that they seem to regard as absolutely immaterial and of not the slightest importance; and, as things are going, Mr. Speaker, we will undoubtedly reach the 1st day of July, when the next fiscal year begins, before the appropriation bills have been enacted, and they will be compelled to do as the Democratic majority have been compelled to do ever since they came into power in this House—pass resolutions continuing the appropriations of the previous year because they have not been able, have not been competent, to enact the general appropriation bills by the time they should be enacted into law.

Why, to-day, Mr. Speaker, two of the great departments of the Government, namely, the Post Office Department and the Indian Department, are running not upon appropriations made last year in any appropriation bill, but upon appropriations made the year before. The Democratic majority is so incompetent with reference to legislation that they were not able to pass the appropriation bills for either of those great and important departments last year, but they were compelled to continue by resolution the appropriations of the year before and extend them over the present year. [Applause on the Republican side.]

The SPEAKER pro tempore. The time of the gentleman from Wisconsin has expired.

Mr. FOSTER. Mr. Speaker, I just wanted to suggest to the gentleman, if he will permit, following the suggestion of the gentleman from Wisconsin [Mr. LENROOT], that if we stop indulging in the kind of talk he has been indulging in now and get down to business we would probably pass these bills. But the great difficulty on that side of the House is that they are continually talking about something that does not concern anything in the House or the country.

Mr. LENROOT. Mr. Speaker, will the gentleman yield?

Mr. FOSTER. Yes.

Mr. LENROOT. In reply to the gentleman from Illinois, I am very glad to state to him publicly, as I have privately to him and other Democratic Members heretofore, that if the Democratic majority would keep as many men on that side of the House during the consideration of appropriation bills as the Republicans keep on this side they would have a quorum all the time and we would be able to do business. The reason why they can not do business is that they can not keep enough Democrats on that side of the aisle in attendance to constitute a quorum of 100 Members.

Mr. HOWARD. Mr. Speaker, I make the point of order that there is no quorum present. It is a travesty on legislation, Mr. Speaker, that there are only 38 Members in this House when such important legislation is pending.

Mr. GARNER. Mr. Speaker, may I have the attention of the gentleman from Georgia?

Mr. GARRETT. I will ask the gentleman from Georgia to let us get to the previous question.

Mr. GARNER. Let me ask the gentleman from Georgia this question: This is a rule passed unanimously by the Committee on Rules, both the majority and the minority; and, being in that condition, the discussion is academic, more or less, and the membership are not here for this discussion.

Mr. GARRETT. Will the gentleman from Georgia at least permit me to move the previous question?

Mr. HOWARD. Mr. Speaker, I do not want to be captious about this proposition at all; but we are voting on a rule, and I think there ought to be somebody on the floor of the House while it is being considered. This is one of the most important pieces of legislation that has been before this Congress in 50 years. I will withdraw the point on this rule, but I am going to serve notice now that the minute this bill comes under consideration if the Members do not stay here I am going to make the point of no quorum and keep enough Members here to learn something about rural credits that they have not yet learned.

Mr. CAMPBELL. Mr. Speaker, I yield five minutes to the gentleman from Oklahoma [Mr. MORGAN].

Mr. MORGAN of Oklahoma. Mr. Speaker, I am very glad that this bill is to be brought before the House at this time. A few weeks ago I made some remarks in this House in which I called attention to the apparent delay there has been in bringing rural-credits legislation before the House. If I remember correctly, the chairman of the Banking and Currency Committee informed the House that as soon as the bill could be considered before the House the report of the committee would be ready. At that time I called attention to the fact that that was one difficulty—that the Committee on Banking and Currency would not report the bill, according to the statement of the chairman, until about the time it was ready to be considered—and that that did not give sufficient time for the study of the proposition.

On the 3d of May the bill was reported into the House, a bill of about 75 pages of printed matter; a bill which, in my judgment, is as important as any bill that has been before this House for many years last past. Yet we have only had the real proposition before us since the 3d of May, three days ago. If I remember right, the able chairman of the Banking and Currency Committee told the House at that time that there would be ample time for debate. The objection that I have to this rule is that it provides for only six hours' general debate upon this great measure, a new proposition involving constructive legislation of the greatest importance, a proposition that ought to be discussed in the most thorough manner. In my judgment, if the time for general debate was limited at all, there ought to be at least several days. We all understand the common practice—that the members of the committee are supposed to have the preference right to engage in the general debate. Here is a large committee, composed of about 20 members. This gives six hours for the entire 20 members of the committee to speak. But what are those outside of the committee to do for time? I have indicated to the gentleman on this side of the House who controls our time that I would like to have an hour in which to discuss this bill in general debate. It may be presumption on my part to take that much time, but I ask it simply because I feel that it is my duty to contribute my utmost to make this bill what it should be. I do not know how much time I can have. The gentleman who controls the time on this side of the House has indicated that he would do the best he could. You know, gentlemen, that no man can take up a bill involving this great, important subject, involving so many important points, about which there is bound to be a difference of opinion, and discuss that bill within 10 or 20 minutes.

Then we will go on to the five-minute rule. Of course, there we have unlimited time, but we know how difficult it is to discuss any proposition in five minutes. We know by experience here that it is seldom, if ever, that you can present an amendment to a committee bill and by discussing it for five minutes secure the attention of the House and secure its adoption. It is true that in general debate usually there is not the attendance here that there should be, and yet I feel that if we had three or four days in which to discuss this bill under general debate, there are so many men in this House whose constituents are largely farmers that they would be interested to come into this House and listen to the debate. So, I believe, we are not going to have sufficient time for general debate.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. GARRETT. Mr. Speaker, this resolution proposes to bring up for consideration legislation which looms larger in the public thought than any domestic question of which I have knowledge. Gentlemen have said that we should pass the appropriation bills before we take up these matters of legislation. There is no danger about the appropriation bills, and in order to make them up intelligently it is necessary that we should have such legislation as we can pass in advance, in order that we may know what appropriations will be required.

This is a matter of intense public interest. It is a matter for which there is a universal demand—that is, a universal demand for legislation in some form. The effort of the Committee on

Rules has been to provide a fair method for the consideration of this legislation. It seems to me it has provided a fair method. There can be no objection to it, as it seems to me, and I move the previous question on the adoption of the resolution.

The SPEAKER pro tempore (Mr. HARRISON). The gentleman from Tennessee moves the previous question on the adoption of the resolution.

The previous question was ordered.

The resolution was agreed to.

Mr. GARRETT. Mr. Speaker, one moment before the Chair declares the House in Committee of the Whole. I ask unanimous consent that all gentlemen may have the privilege for 10 legislative days following the conclusion of the consideration of this bill in the House to extend their remarks upon this bill in the RECORD.

The SPEAKER pro tempore. The gentleman from Tennessee asks unanimous consent that all gentlemen may have 10 legislative days, after the conclusion of the consideration of this bill, in which to extend their remarks on the bill in the RECORD. Is there objection?

There was no objection.

The SPEAKER pro tempore. Under the rule, the House automatically goes into the Committee of the Whole.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. GARNER in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of the bill of which the Clerk will read the title.

The Clerk read as follows:

An act (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes.

The CHAIRMAN. Under the rule, the first reading of the bill is dispensed with.

Mr. GLASS. Mr. Chairman, by reason of the fact that I was chairman of the Joint Committee on Rural Credits created by the Sixty-third Congress, and by virtue of the fact that I am chairman of the Banking and Currency Committee of the House, which reported this bill, I have nominally taken charge of it. That, however, should not imply that I am the chief proponent or the architect of the bill presented here to-day for consideration. Quite the contrary is the fact. I had a very modest part in the deliberations and work of the joint committee, and quite as inconsequential a part in the deliberations of the Banking and Currency Committee of the House on the bill.

I want to say to the House that it is a source of infinite gratification to me that the problem, both in the Joint Committee on Rural Credits and the Banking and Currency Committee of the House, was considered in an absolutely nonpartisan way. The utmost frankness prevailed between the members of the joint committee and in the Committee on Banking and Currency, and all members of both committees took an earnest interest in the work submitted to them, and all of them, in a degree, had a part in the construction of this measure in the effort to present to the Congress a rural-credits bill that will prove efficient in its operation and afford just such relief as the proponents may hope for it to the farming community of the United States.

The problem as submitted to the joint committee was very earnestly considered over a period of many months, and that committee, as you know, submitted a measure to Congress last January. That bill was referred to the Banking and Currency Committee, and the latter committee, since last January, has been giving its most diligent and earnest attention to the solution of the problem. As a result of its labors, it to-day presents to the House the bill S. 2986, with all after the enacting clause stricken out, and the House bill, known as the Moss bill, submitted as an amendment in the nature of a substitute.

Mr. Chairman, unlike many people, I have never been willing to concede that nothing in the direction of rural credits has been accomplished by Congress in recent years. On the contrary, my belief and firm conviction is that we have embodied millions of dollars of rural-credits facilities in the Federal reserve act. We have by one provision in the Federal reserve act alone, by a computation of one of the most efficient actuaries and financial experts this country has ever had, afforded land-mortgage facilities in the aggregate of nearly $400,000,000. In other words, for the first time in the history of the country the Federal reserve act has enabled national banks, if they will, to put at the disposal of the farming community in excess of $369,000,000 of their funds, to be loaned on land mortgages for a period of not exceeding five years.

It has been said that the national banks will not loan these funds, but that does not affect the proposition that the Federal reserve act has made these funds, so far as a statutory authorization may do it, available to be loaned on farm mortgages for a period not exceeding five years. No law can compel a bank to loan its funds to anybody, for any purpose, on any character of security, or for any length of time. But we have made it possible for the farming community of this country, through organization, to bring such influence and pressure and self-interest to bear on the banking communities as to insure them use of these funds.

Mr. KINKAID. Will the gentleman yield?

Mr. GLASS. No, I do not care to yield; I have only taken 10 minutes to make a preliminary statement. In another provision of the Federal reserve act, that is to say, the rediscounting provision of the act, we have especially favored the farming community of the United States. We have made the period of maturity for farm paper, for paper used in stock transactions and in all commercial transactions relating to farm products, 100 per cent longer than that of commercial paper. We have not only done these things, but in another provision of the bill we have made it possible for the farmers engaged in exportation of the great staple crops of this country, such as cotton and grain crops, to realize instantly on their commercial transactions through the medium of bank acceptances on the exportation and importation of goods. So I say that Congress has already supplied the farming community of the United States with a wonderful amount of farm credits.

Nevertheless, I realize that the requirements of the farming community are distinctly different from those of the commercial interests of this country. I realize that never has there been any provision for long-time farm loans, and never has there been established this system of amortization payments which the farmers in Europe enjoy and which the farmers in this country ought to have and which we propose in this measure speedily to give them.

Therefore I join with great earnestness my colleagues on the Banking and Currency Committee in the effort to supply those requirements to the farmers. We think we have done it in this bill.

I shall not undertake to outline the general principles of the bill, although I hoped to do so; but the Committee on Rules, contrary to my request, has so restricted the time for general debate that I did not feel like consuming a large part of it. I am rather disposed to yield it to those gentlemen on the committee who deserve vastly more credit than I should like to take to myself for the work accomplished. Therefore, Mr. Chairman, with this preliminary recital of the incidents leading up to the presentation of this bill, I yield 30 minutes to my colleague on the committee, Mr. Moss of Indiana.

Mr. MOSS of Indiana. Mr. Chairman and gentlemen, we are beginning an action to-day that will make this Congress an historic body, and I would rather have my name entered on a roll call in favor of this bill than in favor of any bill devoted to agricultural development that has passed Congress since the homestead law was placed on the statute books. We are to-day creating a system of banks that shall be dedicated exclusively to the interest and to the service of American agriculture. I am aware of the fact that the present banking system was enacted into law about the day that I was born and that we have a great national banking system, but the very best evidence that we need a new banking system is the fact that so far as land-mortgage credit is concerned there is a separate and different rate in every State in the Union, beginning with Vermont, with the lowest average rate of 5 per cent, and running over to Montana, with the highest average rate of 10 per cent, making in the United States a general average of 7½ per cent on farm mortgages. We have 48 different rates, and everyone of them too high. If the variation in individual rates be considered, you will find that the rates on individual loans vary very much more widely. Therefore I submit it as absolute proof of the necessity for the enactment of this bill, that farmers of the Nation, each one having precisely the same class of security, are charged 48 different average rates of interest in the different sections of the United States. This new system is to be composed of organizations chartered and supervised by the National Government; and the very best defense of a national charter is the fact that I have instanced, that every State has a different prevailing interest rate. If it were possible under the present system to bring about anything like uniformity of interest rates, we would have attained it before 50 years.

Mr. Chairman, agriculture is national in its scope, and to secure a more uniform development farmers must be given a more nearly uniform rate of interest and more nearly uniform terms of loaning than is possible under our present system. Therefore, we propose to invoke national authority because it is only through the exercise of national power that these results can be secured.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. MOSS of Indiana. I have only 30 minutes, and I can not yield. Not only do we propose to invoke national authority, but we propose to make this system a separate and distinct system, having no connection whatever with existing commercial banks. We commence in the organization of this proposed system by the creation of a farm-loan board, composed of three members, to be appointed by the President of the United States and confirmed by the Senate. Not more than two members of this board shall be of one political party. General supervisory powers is given to the farm-loan board. I shall not go into details of the board's duties They are given the power to supervise the rates under which bonds shall be sold and loans to farmers made. I heard a very distinguished Senator at the other end of the Capitol make an argument that the great favors in this bill would never reach the farmer, because the capitalists would be the ones to name the terms under which the loans should be made. This very condition was anticipated by the committee, and we have given the farm-loan board the same degree of power to control and supervise the rates of interest under this bill as are given by law to the Interstate Commerce Commission over the railroad rates of the country. Everyone knows that the Interstate Commerce Commission has no power to make a confiscatory rate, but everyone recognizes that the power of supervision over rates by that commission has given us more nearly uniform and lower rates and much better service. The public interests have been safeguarded by the commission. So the Federal farm-loan board is given similar broad powers, and we anticipate equally good results.

The members are appointed for full terms of nine years, removable only for cause. We have provided a generous salary, as we hope to have the board composed of the three best qualified men in the United States. We feel that it will be safe to vest such a board with the general supervisory powers granted in this bill. In addition, the board also has the power to appoint the appraisers who will make the appraisement under which the loans are to be made. I desire to call attention also to the fact that not only is the board appointed by the President, but the salaries are paid out of the Treasury of the United States. I have no desire to criticize the Federal reserve banking system. It has rendered invaluable service to the industries of our Nation and has given us the financial leadership of the world; but one weakness is the fact that the salaries of the Reserve Board are paid by the member banks. We have given the Reserve Board general supervisory power over commercial banks, and every dollar of their salaries and expenses is paid by those who have subscribed to the system and whose activities are to be regulated by the Reserve Board. I am proud that it is proposed in this bill to pay the salaries and expenses of supervision out of the Treasury of the United States. We will have a governing board appointed by the President of the United States with salaries paid by the people of the United States, making them absolutely independent in every sense. One of the difficult features of mortgage credit is the system of appraisement. An honest, conservative appraisement of every tract of land accepted as security will prevent favoritism and will insure perfect safety to the system. Losses are practically impossible under a safe system of appraisement. Under this bill, appraisers are to be public officials. They are appointed by the farm-loan board and are removed from every possible influence, either by borrower or lender. The appraisers have no connection whatsoever with the banks nor any other agency controlling the loan. We give the farmers of the country an impartial official appraisement on their lands.

Having spoken of the general powers of the farm-loan board, we come to the organization of the land banks. The territory of the United States is to be divided into 12 land districts by the Federal farm-loan board. We have here the same problem that has come up on every question of banking in the United States—Shall you have a great central bank or several district organizations? I think it is admitted by ever person that the plan of the Federal reserve system is better than one central bank; but if that were not true of a commercial banking system, I should still contend that the district plan is a better one for land-mortgage credit. One of the problems is to bring the loan agency into immediate contact with the borrowers. The district plan more nearly accomplishes this than the central plan. But there is another important reason. If it shall happen that there is any difficulty in maintaining a uniform rate in the United States, which I do not believe there is, if you had a great central bank, the minimum rate would be fixed at the point of greatest difficulty of getting the money rather than upon the average difficulty of obtaining it. That is to say, the lowest rate for the whole system would be the highest rate which will prevail under the district plan. Therefore I feel that the proposed plan of dividing the United States into districts will commend itself to the judgment of Congress. In each one of these districts a land bank is organized with a minimum capital of $750,000. There will thus be organized 12 land banks, having a combined minimum capital of $9,000,000. Your committee believes this sum to be ample to inaugurate the new system and to give it that sense of security, stability, and importance which will enable it to command the confidence of the farmers on the one hand and the investing public on the other.

The temporary organization is controlled by the Government of the United States. Some weeks ago my friend from Georgia [Mr. HOWARD] inserted in the RECORD an elaborate criticism of the House bill by Charles Hull Davis, of Virginia—and took occasion to say that Mr. Davis is—the most expert authority on rural credits in the United States. The very first item in his criticism on the House bill was that in the temporary organization of these land banks the great banking interests of this country would secure control through the ownership of the temporary stock. This absurd statement proved conclusively that Mr. Davis had never read the House bill or that he is unable to comprehend its plain terms and provisions. Now, how is the bank organized and how is it controlled? As indicated, there is a temporary organization after the minimum capital stock is subscribed. The first step is to secure subscriptions to capital stock; and for a period of 90 days after the books are opened any citizen, corporation, company, or any State in the Union is given permission to subscribe to the captial stock in the amount of $750,000, and if at the end of 90 days this stock has not been fully subscribed then the Treasurer of the United States completes the subscription, precisely as in the organization of the Federel Reserve System.

No voting power goes with any of the stock except that held by the Government of the United States, so that the sole power to organize these banks is vested in the Government of the United States, and it is impossible for any private interests to secure control, as was asserted by Mr. Davis. The Federal farm-loan board organizes the banks by appointing three directors. These directors complete the organization and operates the bank during the period that full control is vested in the Government. I repeat, the land bank is instituted, organized by the Government of the United States, controlled absolutely by the United States Government until the borrowers in that land district shall become strong enough to take over the permanent control under the terms of the bill. The permanent organization is perfected by the borrowers themselves.

Now, when the land bank organizes, how are the loans made? There are two methods in the bill under which loans can be made by the land bank in the federated system. The bill permits the organization of joint-stock land banks. I will speak of that provision of the bill later if I have the time. I am now speaking of the general or cooperative banking system embodied in the bill. There are two methods of making loans under the federated system. One is through the national farm-loan association to be organized by farm borrowers, and the other is through the existing banks of the country. The first method is preferred by the committee and is given first opportunity to control all territory. If, however, such associations are not organized in any part of the United States after fair opportunity for such organizations shall have been given, then loans in such territory may be made through State banks. We are asked, Why organize farm-loan associations? Why not loan direct to the farmer? The first and strongest reason for the national farm-loan association is the question of organization. In union there is strength. We want to have an organization through which the farmers of the United States may act in a business capacity. We hope these associations will form the nucleus which will ultimately extend cooperative methods among farmers to include marketing of standard farm crops and the purchase for cash of standard farm supplies. Better credit facilities is but one phase of better farm organization. There are three great movements among farmers to be organized, fostered, and wisely directed. Farmers need a larger volume of credit at lower rates and upon more favorable terms of repayment. We desire to purchase standard farm supplies for cash at the closest approach to the cost of manufacture, and we desire to sell our farm crops at the smallest possible margin below the price paid by the actual consumer. These desirable results are attainable only through the growth of cooperative organi-

zation, and your committee believes that a greater ultimate benefit will inure to American farmers from these farm-loan associations than from any other one feature of the bill.

The second reason is that if the farmers have an organization they will secure equality as to rates and service in that territory better than any individual farmer can do. Here is a Nation of 48 States, with wide diversity of industrial conditions, over which we seek to extend the farm-land banking system, and I can readily apprehend that without local organization among farm borrowers some section of the country might be greatly neglected. But wherever 10 farm borrowers come together there is an organization and a selection of officers. These borrowers create an instrumentality, and a necessary result is that particular section will secure all the benefits that should come to it under this bill. These associations are favored in order to make the system cheaper in its operation. Now, manifestly the central land bank ought to be under obligation to make loans under certain conditions, and under other conditions the central bank ought not to make loans. The question of reliability of the borrower and the value of his land are vital questions to be determined. It will require an expensive organization if the land bank is compelled to make these preliminary investigations at the instance of every applicant for a loan. It is this difficulty which effectually precludes small borrowers in sparsely settled country districts from securing mortgage loans. The loan agency can only investigate the more profitable deals. We propose in this bill to serve the small borrower. We propose to make loans as small as $100. Such a system is impossible without cooperation on the part of borrowers in making this preliminary investigation of land and character.

The first step in securing a loan under the provisions of this bill is to make application for membership in a farm-loan association or organize one in the community. Any 10 persons who desire to become borrowers can organize one. But it has been alleged in reference to this bill it will be difficult to secure membership in the farmers' loan association. Permit me to say that as far as my experience goes as a member of different fraternal organizations, I have found it is easy enough to secure membership. It is more difficult to debar people who ought not to have membership in such organizations than it is to accept only those who are worthy. I have no reason to believe that any man of good character and credit and good standing in his community can not obtain membership in such an organization.

This association passes upon the character of the borrower and admits or refuses membership. It takes this action through its board of directors. Then this loan association, through its loan committee, makes its estimate upon the land that is offered as security for the proposed loan. We thus impose the duty of making an investigation of a man's character and submitting an estimate on the value of the land that he offers for security, on the membership of the local association without any expense whatsoever to the central bank. If the membership is accepted and the loan committee has passed favorably upon the value of the land offered for security, the bill makes it obligatory upon the land bank to send an appraiser to appraise the land officially; and if the loan for any reason shall be refused there is no expense to be paid by the applicant. It would be exceedingly unjust to compel the central bank, without the payment of earnest money, to investigate every application for loan until there had been a preliminary examination made. Under this bill that preliminary examination is made at the point where the application for loan originates by the local association; then we compel the loaning bank to make a final official investigation by an appraiser appointed by the National Farm Loan Board.

But now then, upon what terms is the loan made to the borrower? First a borrower subscribes 5 per cent of the amount of his loan to the capital of the loan association and takes out shares of stock at par. The loan association at once subscribes an equal amount at par to the capital of the land bank. But some one tells me the farmers will not subscribe this capital. One fact is worth more than all the theories in the world. I am proud of the fact that in the great State of Indiana we now have four farm-loan associations in each one of which the borrower is compelled to subscribe 10 per cent of his loan in cash to the capital of the association. Each of these four associations have a capital stock of a million dollars, and are doing a successful business in the State of Indiana to-day. The same thing is true in the State of Kansas. It is true in the State of Kentucky. It is true in the State of Louisiana, and I believe also it is true in the State of New York.

If Congress were to sit here idle five years longer, under the very plan that the committee is presenting to you and under which these great land banks have been organized since this agitation was begun in America, you will find this business being organized under private initiative in every State of the Union in substantial compliance of the very plan laid down by the committee here in this great bill. We come before you not with a theoretical plan, but with the facts of successful American experience behind us. We can point to at least five States in America where the plan is already in successful operation. We do not impose a 10 per cent subscription under this bill—the farmer pays 5 per cent cash and assumes a credit liability of 5 per cent more. Under this bill we give the borrower the advantage of half the subscription he takes under the private loan association in the different States, and he will be given better credits under the operation of this bill. You will notice, then, that the capital of the land bank grows automatically as the loan grows, remaining always 1 to 20. Each farmer subscribes 5 per cent of his loan to the capital of the loan association, the loan association making a like subscription to the land stock of the bank. Thus the capital of the latter will remain at least 1 to 20.

Now, then, we have the question of making the loan. Perhaps I had better take up the question of how the Government, if it subscribes its stock, recovers its money and how the dividends are passed out of the bank to the borrower. No one can get a membership in a loan association except one who makes an application for a loan, and no one can make an application for a loan except he be a farmer or some one who wishes to purchase land for agricultural uses. After the first capital of the bank is subscribed no stock can be acquired except by some one who takes out a loan. The system goes exclusively into the hands of the borrowers. My friend Mr. Herrick has recently uttered a criticism of this system by saying that it is not cooperative. I shall pause to remark that either Mr. Herrick, when he made that statement, had never read the bill or he most certainly is guilty of making a misstatement of fact.

The system of federated banks is as truly cooperative and mutual as the German Landschaft associations. Every dollar of dividends go to the borrowers in exact ratio to the loans made and every vote is cast, either by the Government in the public interest, or by the borrowers in their own interest.

Under the operation of this bill, so far as its cooperative features are concerned, no man can exercise any control over it whatsoever except he be a borrower. No man can get a dollar of stock after the minimum capital is subscribed except by taking a loan, and then only 5 per cent of his loan. No man can gain membership in the association except he be a landowner, or a purchaser of land for agricultural uses, and makes an application of a loan of between $100 and $10,000.

Then the whole earnings of the system are divided as follows: First, 25 per cent of the net earnings is set aside as reserve, and the other 75 per cent is paid out as dividends on the stock held by the National Farm Loan Association; these associations pass these dividends to their stockholders who are the borrowers in the system. Thus every dollar of surplus earnings is paid out to the borrowers who own the stock, and thus the service of this great system is given at actual and absolute cost to its membership, less only 25 per cent set aside for reserve. The system is purely cooperative. As soon as the borrower pays off the loan the land bank must cancel the shares of stock held by the farm-loan association which were issued when that particular loan was made by paying it off at par. The borrower thus goes automatically out of the system, leaving it at all times absolutely in control of those who hold loans in the system.

The land bank can not begin to make loans until 10 of these farm-loan associations are organized. Its capital may be subscribed and it may be fully organized, pending the organization of these associations, as soon as there shall be $100,000 of subscriptions made by the National Farm Loan Association in any one land-bank district to the capital stock of the land bank, then the Government surrenders absolute control over the system. These farm-loan associations elect six directors, and the Government appoints three, making a new board of nine directors, six of whom are appointed by the borrowers, and they thereby take absolute and final control of the bank.

It is possible under the terms of this bill that the United States Treasury may purchase $9,000,000 stock. This is the full amount of Government funds which may be invested in the system. No guaranty is given by the Government to any bonds issued by the bank. And whenever the subscriptions by farm-loan associations shall aggregate $750,000, making the total capital of any land bank $1,500,000, thereafter one-fourth of all of the subscriptions made by farm-loan associations to the capital of the land bank is turned back to the Government by

the land bank to retire the shares of stock held by it. If any such stock is held by any other subscriber than the Government, payment is likewise made by the bank in the same manner until all the original stock of $750,000 is retired from the system.

Now, having briefly sketched the operation of making the loans, what is the method of securing the money to be loaned by the bank to the borrowers? Here is the real test of any mortgage banking system. If you want to ask me which is the best mortgage banking system in the world, I will answer that it is the system which can get its money in the largest volume at the lowest rate of interest. The question of whether this system shall be a success or a failure will depend largely on the question of price at which they can sell their bonds. And I want to emphasize the fact that any mortgage credit system depends on the sale of its bonds. Mortgage banks do not depend upon deposits nor subscription to capital stock for funds to make loans. They sell bonds. Now, what price do the various systems of mortgage credit which are well established have to pay for money?

I had the reference librarian go over the quotations of land bonds issued by the mortgage associations of the principal nations of the world to secure the actual market quotations of these securities and how such rates compare with the price of bonds issued by the public authority in each particular country. We selected the 1st day of April, 1914, which was before the war, as being a fair date. Germany is one of the countries where land-mortgage credit is best organized. On the 1st day of April, 1914, 4 per cent bonds of the German National Government sold at 100.1; bonds of the State of Bavaria, one of the most prosperous States of the German Empire, sold at 96.5. Land bonds issued by the Frankfort Joint Stock Land Bank sold at 95.10, and the bonds of the Central Landschaft Association of Germany sold at 94.25. These bonds all bore 4 per cent interest. France is one of the wealthy countries of the world and one where interest rates are generally low, when compared with adjoining countries. French national bonds, 4 per cent, sold the same day at 98.70; bonds of the Haute-Marne division were quoted at 96.20; and the 4 per cent bonds of the Credit Foncier, the great joint-stock land bank of France, sold for 97.70. There is no question more vital to the consideration of mortgage credit than the price of land bonds. Here we have valuable data. In these two great European countries, where land credit has reached, perhaps, its most perfect development, though along widely different lines and by means of radically different organizations, we find the land bonds selling at a practical parity—German bonds issued by a private corporation selling at 95.10, while bonds of a like French corporation sell on the same day in that market at 97.70. German Landschaft bonds of same interest rates sold at 94.25. In comparison the national Governments were able to borrow money on slightly more favorable rates. The smaller States, both in France and Germany, paid practically the same price for money as the land banks and associations of their respective countries. That means that under their systems of credit the farmers of Germany and the farmers of France are borrowing money as cheaply as their State Governments, and we believe we have a system here under which we will secure money at a price which will compare favorably with the market quotations of the Government bonds as the banks do either in France or in Germany.

If that be true, it will mean a uniform rate of interest to the farmers of this country below what even any advocate has demanded.

How are the bonds to be issued? Let us take one of these Federal land banks with $750,000 of capital. It starts out by making its first loan. You ask me at what rate of interest it shall be fixed. I answer at once that the Federal farm-loan board appointed by the President of the United States will fix that rate. They will fix the rate until the first issue of land bonds is made in the United States. So we start out the system with 12 great banks endowed with $9,000,000 of capital subscribed—it may be either by altruistic citizens of the United States or by the Federal Treasury—and the first rate of interest to borrowers under this system is fixed at whatever rate the farm-loan board says it ought to be made at the time the loan is negotiated. As soon as a substantial volume of this money is loaned land bonds can be issued. When $50,000 is loaned to farmers these mortgages are deposited by the banks with an official of the United States Government called a registrar under the terms of this bill. Having deposited $50,000 or more of mortgages, and after such securities have been examined by the farm-loan board, permission is given to that bank to issue $50,000 of bonds and offer them on sale in the markets of the United States. What rate of interest will that first issue of bonds bear? Again that is controlled, under the terms of the bill, by the Federal farm-loan board. After the first issue of bonds, then the matter of rates becomes more nearly automatic, but the first bonds will be sold at whatever rate the Federal farm-loan board may authorize.

Under what condition are the bonds to be offered for sale? Federal land bonds will be issued, based on an equal volume of first mortgages, taken after an official appraisement at not exceeding 60 per cent of the value of the land mortgaged. If improvements are estimated, such improvements must be permanent in their character, be fully insured, and provision made in the mortgage contract for the payment of all insurance premiums. The loans will be amortizable, which means that the principal must be reduced at every interest due date, so that the margin of security is constantly widening in favor of the bondholder. The capital and reserves of the land bank issuing the bonds is primarily responsible for the payment of interest and principal at par, and under the terms of the bill each of the other 11 land banks are made to indorse the issue. The assets and credit liability of one loan association is behind every mortgage held by the land bank; and, finally, the borrower is liable under the law of the State for his obligation to the land bank to the full extent of his property subject to execution under the laws of that State. We have here all the elements of financial strength and safety. No critic of the bill has dared to criticize the security of the land bond. It is to be borne in mind that the price of the bond determines the interest rate to the borrower; and these various elements of financial security are granted in the interest of the borrower, because it is only by a credit instrument of undoubted strength that a low interest rate can be granted to the borrower. For the same basic reason land bonds are freed from all forms of taxation—State, municipal, and National—including income taxes. They are given every exemption in this regard which is granted to Government bonds. We expect then to sell at approximately the price of Government bonds, and we are giving them all the attractive elements of such a security.

Mr. MADDEN. Will the gentleman yield for a question there?

Mr. MOSS of Indiana. Will the gentleman pardon me? I am afraid I will not have time. I would like to finish this matter, and then I will try to approach other features of the bill. Some gentlemen say, "Why are you exempting these bonds from taxation?" I am going to tell you why, and I want to make it very plain. There is just one of two systems that is going to prevail in this country. Either the farmers of this country are going to be given the privilege of assembling their securities and selling their bonds on the market under as favorable terms as public bonds, or the Government of the United States will be compelled to borrow this money and loan it direct to the farmers. I do not care who the man is, if any Member shall stand before this Congress in the face of public opinion and in the face of the history of this movement and attempts to defeat the issue of these bonds tax free, the moment that motion prevails you may just as well prepare to vote for a motion directing this Government to issue its own bonds and loaning the proceeds to the farmer.

The Government bonds will be issued tax free and the farmers of the United States will get essentially tax-free money. I want to leave no question about that in the mind of anybody. Let there be no doubt in any man's mind as to the alternative. That is the history of this system in every country where it has been organized. There is no Government in the world that would dare to tax bonds issued on farm mortgages by a land-mortgage bank. I challenge any man to go to any country in the world and find where the farmers of that country have organized land-mortgage credit and have been compelled to pay a tax on the bonds they issue in order to get money.

Mr. GLASS. As a matter of fact, is it not true that many of the States of the United States exempt these mortgages from taxation?

Mr. MOSS of Indiana. That is correct; and by proposing this feature of tax exemption we are enforcing uniform conditions as to taxation of mortgages throughout the United States. If you propose to adopt a system which taxes the land that a man owns and then propose to tax his mortgages, representing his debt, and then propose to tax land bonds, which represent his mortgage, you are placing triple taxation on the farmers of this country who are in debt and who may seek relief through this system. I hope I will live long enough to see the time when debts which are made in order to stimulate the production of food, clothing, and shelter in this country shall everywhere be exempt from taxation. I believe that bonds issued for the purpose of promoting productive operations on the farm should be free from taxation, and that is the answer I am sure gentlemen would want me to make to the question why these bonds are to be issued tax free. We believe under this system we will en-

courage the farmers of the country to come together in a co-operative capacity——

The CHAIRMAN. The time of the gentleman has expired.

Mr. GLASS. I yield to the gentleman from Indiana five minutes more.

The CHAIRMAN. The gentleman from Indiana is recognized for five minutes.

Mr. CLINE. Will the gentleman yield for a question?

Mr. MOSS of Indiana. I yield to my colleague.

Mr. CLINE. Will the farmer have the privilege of taking an exemption against these loans the same as he does with any other loan?

Mr. MOSS of Indiana. That is a question for State legislatures to settle. We are not bothering ourselves with State systems of taxation and have no control over it. This is a national system.

Mr. CLINE. Suppose he takes out a mortgage on Indiana real estate. Will the farmer be permitted to schedule that against his taxable property?

Mr. MOSS of Indiana. That is a question for the Legislature of Indiana to determine by its statutes.

Mr. CLINE. I am asking whether this will be included in that, being exempt from taxation?

Mr. MOSS of Indiana. I trust that the gentleman will accept my answer to his question and permit me to proceed.

The next question that comes up is that of amortization payments.

One of the greatest disadvantages of the present system not only is the small volume of credit offered to the farmer at a high rate of interest, but the fact that such accommodation is granted for a short time. It is not possible for him to convert his loan into a saving investment. In order that I might bring the advantages of amortization before the House in an adequate way I will print in my remarks a computation made for every section in the Union as to the length of time it will require to amortize the loans at a 5 per cent interest rate if payments be continued annually at the present rate for interest alone; but I will here repeat the one made in the report on this bill. The farm loans at the present time aggregate more than $4,000,000,000, and the average rate of interest is 7.5 per cent. That means that the farmers throughout the country are paying interest charges of $300,000,000 a year. If it were possible to refund this debt under an amortization system at the rate of 5 per cent interest, and the farmers of the United States would continue to pay the same rate of 7.5 per cent as at the present—that is to say, if the farmers could borrow $4,000,000,000 at 5 per cent and amortize it by agreeing to pay 7.5 per cent annually—they would pay every cent of their indebtedness, principal and interest, in 22 years and 6 months. That would save them $175,000,000 a year.

Standing here and making this speech and remembering the fact that it is to be taken down on the RECORD, I want to make the prediction that just as certainly as this bill is enacted into law, without substantial or unfriendly modification within five years from the day of its enactment, loans will be made all over the United States at an interest rate lower than 4½ per cent. [Applause.]

Now, Mr. Chairman, having given the main outlines, I think I ought to take the rest of the few minutes allotted to me to let any gentleman ask me any question he cares to ask. I will yield to anyone.

Mr. BAILEY. Mr. Chairman, do I understand from the gentleman's statement that interest is an arbitrary matter?

Mr. MOSS of Indiana. No, sir; you did not understand me to assert that at all.

Mr. BAILEY. Then we are going to control the rate of interest by legislation?

Mr. MOSS of Indiana. No, sir; we are not going to do that. What we are going to do is this: We are going to present a credit instrument based on the security of the farms of this country that will be as attractive to the investors of this country as the security issued by any State or by the Government of the United States, and we confidently expect to get as low a rate of interest as is secured by the Government on its securities.

Mr. BAILEY. A mobilization of credit?

Mr. MOSS of Indiana. Yes; a mobilization of credit and freeing the credit transaction of the burdens imposed in many sections by law at the present time.

Mr. CRISP. Mr. Chairman, will the gentleman yield?

Mr. MOSS of Indiana. Yes.

Mr. CRISP. The gentleman's idea is that the borrower would get the money at the same rate of interest that the bonds are sold at?

Mr. MOSS of Indiana. Yes. I am glad the gentleman spoke of that. Under the provisions of this bill, after the first issue of farm-loan bonds the land banks must loan to the farmers thereafter at the same rate of interest that is stated in the bonds plus the rate of amortization, depending on the length of time of maturity, plus not exceeding 1 per cent on the unpaid principal for profits and expenses.

I want to call the attention of the House to the language of this bill: "One per cent on the unpaid principal." The rate of interest is precisely the same to the farmer as that at which land bonds may be circulated. To this rate will be added the amount in the authorized tables of amortization which will pay the principal agreed upon for the life of the loan, which must be between 5 and 35 years. To this the bank may charge not exceeding 1 per cent on the unpaid principal.

Now, 1 per cent on the unpaid principal is a constantly diminishing sum, and if you average it for the entire life of any loan you will find that it is about three-fifths of 1 per cent on the sum originally borrowed. You who are familiar with the European tables will say: "Moss, some banks loan for 0.35 per cent for an administration charge." That is true; but they are estimating this upon the full principal and not upon the unpaid principal. The Bank of France is allowed by law to charge sixty one-hundredths on the full principal, and that is precisely the same charge that the banks in this bill are permitted to make by charging 1 per cent on the unpaid part of the principal. The board, however, has the right to reduce the administration charge at any time whenever they feel that it is in the interest of the borrowers to do so. It may be observed that all surplus net earnings are prorated to the borrowers.

Mr. TILSON. I was interested in what the gentleman was saying about the mortgage loan associations in Indiana. What would be the effect upon a State or private association?

Mr. MOSS of Indiana. The effect would be that they would incorporate under the provisions of this bill and grant loans on more favorable terms than they are now granting, provided the bill is retained in its present form. In all of these States where these associations are formed this law will be broad enough to permit them to continue their beneficent work and to permit them to make their terms more favorable to the borrowers.

Mr. KINCHELOE. Mr. Chairman, will the gentleman yield?

Mr. MOSS of Indiana. Yes.

Mr. KINCHELOE. As a prerequisite under this bill a man must subscribe 5 per cent of the bonds and take that in stock?

Mr. MOSS of Indiana. That is true.

Mr. KINCHELOE. Suppose, as an example, a farmer wanted to borrow $4,000 from the bank. Then he would have to subscribe $200 worth of stock, as I understand?

Mr. MOSS of Indiana. Yes; that is correct.

Mr. KINCHELOE. In case he did not have that $200 in money, is there any way he can get credit at the bank for that stock?

Mr. MOSS of Indiana. Yes. It will be made a part of his loan. He makes the application and subscribes for the stock, but does not pay for it. Now, when the loan is granted the land bank deducts from the loan the amount of 5 per cent and pays the residue over; the borrower begins to pay for his stock subscription as part of his loan. He can pay it in cash in advance or permit the land bank to deduct it, as he prefers.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. MOSS of Indiana. Yes.

Mr. FESS. Early in your discussion you spoke of the interest rate in Vermont being 5 per cent and the rate in Montana as being 10 per cent, or an average of 7½ per cent. Do we understand you are attempting to secure a uniform rate by this legislation throughout the United States?

Mr. MOSS of Indiana. We know the rate will be uniform in each one of the 12 districts. There can not be more than 12 interest rates in the United States under this bill. Now, as the assets of the different banks are all merged together, and each land bank insures the bonds issued by every other land bank, it follows that every land bond will have the same security back of it, and we believe these conditions will secure very close to a uniform rate. I will not predict that there will be an absolute uniform rate any more than there is a uniform rate under the present Federal Reserve System, but it will approach more and more nearly to a uniform rate.

Mr. TRIBBLE. Will the gentleman yield?

Mr. MOSS of Indiana. Yes.

Mr. TRIBBLE. Suppose A, B, C, D—in all, 10 farmers—go and establish a loan association, and each are borrowers. Suppose D, who borrowed $4,000, failed to pay it back and there is a loss. Do the other nine who compose that institution sustain the loss, or who sustains it?

Mr. MOSS of Indiana. The land bank will ultimately sustain the loss. The borrowers, who own the land bank, will pro rate the loss by receiving lower dividends on their stock.

The CHAIRMAN. The time of the gentleman from Indiana has again expired.

Mr. HAYES. Mr. Chairman, the chairman of the Banking and Currency Committee has correctly stated that this bill is in no sense a partisan measure. It has been a source of great satisfaction to me to serve upon the Joint Committee on Rural Credits appointed by the last Congress and upon the Banking and Currency Committee during the consideration of this measure. The members of the joint committee, as well as the members of the Banking and Currency Committee, have given no indication that they have thought of politics in connection with its consideration. The members of both committees have sat around the board and have brought to the consideration of this measure the best that they had, without reference to which side of the House they served upon. This measure is, therefore, strictly and purely a nonpartisan measure. I believe that, being nonpartisan, it is vastly better than it could possibly have been if it had been framed as a party measure by either party.

This bill probably does not fully satisfy any member of the committee. Like all such measures, many things in it have been the result of compromise. Representing, as we do, all sections of the country, with different laws and different existing conditions, it is impossible that a measure could be made exactly to suit all, and indeed it is impossible that it can be made to fit exactly the conditions of any one of us. I believe that the measure reported to this House is the best measure it is possible to frame at this time under present conditions. This question has been under consideration by some of us for years. I think it is three years since I began the study of it, and during the last year some of the members of the committee have had almost constant study and consideration of it.

In the matter of rural credits this country is farther behind than almost any civilized country in the world. In almost every other civilized country provision is made by the government in some way for long-term loans by agricultural communities, and opportunity given for amortization payments, so that a man can buy or improve land, or buy stock for stocking his farm, or do any other useful thing in connection with agriculture, and have all the time that he needs to pay for it without being obliged to pay big commissions, expenses of renewal, and excessive interest rates, such as farmers in most parts of the United States now have to pay.

In considering this measure the members of the committee found, as all students of the subject find, that one of two systems have geen generally employed in the world in providing credit for farmers. First, a subvention by the Government, notably in the case of France, where $2,000,000 was appropriated by the Government and given to the Credit Foncier of France, that had authority to make loans on long time to farmers. As a matter of fact, most of the loans of this bank have been made to owners of urban property rather than to owners of agricultural land; but the principal purpose of the subvention was to assist the owners of farm lands in securing long-time loans.

The other system is the cooperative system, of which the landschaft of Germany is the most notable. This system would probably never have been in existence, but for the fact that Frederick the Great after his great wars, finding his country greatly impoverished and the owners of land in debt, practically bankrupt, by a decree forced the owners of land in certain sections to combine together in the landschaft. The members of this landschaft were required each to become responsible for the debts of all the others. So that the members of the landschaft in Silesia, for instance, were all liable for the debts of all the other members of the landschaft, and every owner of land was obliged by law to assume this liability. This joint liability made the bonds issued by the landschaft so safe that soon they sold at a very low rate of interest. In a very few years the landowners of Prussia were raised from this condition of practical bankruptcy to a condition of great prosperity. As the result, this landschaft system spread over the whole of Germany and some of its features have been copied in many other countries.

When I began the study of this subject, I was prejudiced in favor of the landschaft system. Having done such wonderful things for the German farmer, I tried to find some way to apply its principles to our conditions. I finally came reluctantly to the conclusion that this system in its purity is not adapted to our farmers, our people being more independent and more migratory in their habits than the Germans. The committee also came unanimously to this conclusion, and so we have been obliged to formulate a cooperative system that we believe will be adapted to this country. We believe that no system would be acceptable to our farmers that requires them to become liable for the debts of one another without limit. In order to incorporate the cooperative principle in this measure, we have therefore permitted the would be borrowing farmers to incorporate themselves into a corporation, a national farm-loan association, subscribing for the stock of the association 5 per cent of the amount of their loan. Only those who desire loans can become members of this association. The bill makes each liable in double the amount of his subscription; that is, liable for the subscription of 5 per cent of the amount of the loan and liable for a like amount, as stockholders in national banks and nearly all subscribers to stocks and corporations in this country are liable. In this way we secure a cooperative system, but with only a limited liability of the members, all the members of the association being borrowers and all of them subscribers to the stock of the association in proportion to the amount of their loans.

When the local association in turn makes application to the land bank, which the bill creates, for a loan for one of its members, it must subscribe to the stock of the land bank to the amount of 5 per cent of the loan applied for.

Mr. McKELLAR. Mr. Chairman, will the gentleman yield?

Mr. HAYES. Yes.

Mr. McKELLAR. When these land associations make applications for mortgages, does it mean that every member who makes an application for a loan is bound for every other member's loan?

Mr. HAYES. It means that he is bound as a member of that corporation, the loan association.

Mr. McKELLAR. Is his land obligated for the debts of his comember?

Mr. HAYES. No; we eliminated that principle of the landschaft, because, as I have said, we were satisfied that our people would not take advantage of any such system. He is liable, however, to the extent of his stock which he subscribed, and for as much more money as his stock represents.

Mr. McKELLAR. How is that liability secured? Is it secured by the mortgage upon his land to that extent?

Mr. HAYES. No; it is secured in this way. He gives a mortgage or a trust deed upon his land for the amount of his loan to the association, and the association indorses or guarantees, as it were, his loan to the land bank, and the land bank makes the loan and supplies the money. Suppose there were a default upon any loan and a loss, that loss would be assessed, first, against the land of the man who made the loan, and if he had any other assets that could be reached, then his assets would next be liable for that loan, and lastly, the association would be called upon to make good the loss.

Mr. McKELLAR. Where would the association get the money to make it good?

Mr. HAYES. Out of its profits; or, if there were no profits to be reached, then the members of the association would have to be assessed in proportion to the amount of their loans or to the amount of their stock in the loan association to make good the loss.

Mr. McKELLAR. Does not that practically mean that the property of each member of the association is really mortgaged to secure the debt of his coborrower?

Mr. HAYES. No. His property would be liable to respond, of course, to the extent of the subscription that he has made to the stock of the association and as much more. That is all. It is a limited liability, and limited in the most extreme case to 10 per cent of the amount of his loan.

Mr. McKELLAR. I believe, as a prerequisite for the farmer's making the loan, he must subscribe for 5 per cent of stock in the land association?

Mr. HAYES. He must.

Mr. McKELLAR. Is not that very nearly what the ordinary commission is when the farmer undertakes to make a loan now? Does not the agent charge him a commission, and is not that practically in lieu of the commission, and will it not be so regarded by the farmer?

Mr. HAYES. It may be so; but the difference is this, that the farmer gets stock worth 100 cents on the dollar for his 5 per cent, and upon that stock he will draw in dividends whatever the land bank may make in profits, and it will go to reduce the amount of his payments of interest and principal.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. HAYES. Yes.

Mr. WINGO. Possibly the gentleman from Tennessee [Mr. McKELLAR] may have in mind a provision that was in the House bill when it originally was framed, and which is still in the Senate bill, and that is the "unlimited-liability" feature, which, the gentleman will recall, was stricken out of the House bill in the committee upon my motion?

Mr. McKELLAR. Yes.

Mr. WINGO. Possibly that is what the gentleman from Tennessee is speaking of?

Mr. McKELLAR. That is what I had in mind.

Mr. WINGO. That has been cut out of the House bill, but it is in the Senate bill.

Mr. HAYES. Yes; that is in the Senate bill, and was originally in the House bill as reported by the joint committee, but the Committee on Banking and Currency has stricken that out, believing that the farmers of the country would not take advantage of that provision, and that it might serve to confuse them and prejudice them against the system which will be created by this bill.

Mr. McKELLAR. I will say to the gentleman, I think it was wise to take that out, as I think it would prejudice the farmers very much against this.

Mr. HAYES. It is not in the bill as reported to the House.

Mr. WINGO. In the House bill, as it now stands, the only liability of a borrower is that of a stockholder in the local association?

Mr. HAYES. Yes.

Mr. WINGO. In other words, he is simply liable as a stockholder in the association, as a stockholder in a national bank now is liable for the losses that the bank may suffer?

Mr. HAYES. Just exactly the same.

Mr. WINGO. And so far as his 5 per cent subscription to the stock is concerned, the only loss that he can suffer will be by reason of loss as a member of the association?

Mr. HAYES. That is all.

Mr. WINGO. An assessment to the amount of this subscription being made upon him to meet the loss, if any, of the association?

Mr. HAYES. That is it, exactly.

Mr. TILSON. What becomes of a man's stock after he pays his indebtedness?

Mr. HAYES. His stock is paid for by the land bank, or the association, rather, the land bank paying for the stock the association subscribed in the land bank, and the association in turn paying for the stock which the member subscribed at the time of the loan, and then he ceases to be a member of the association.

Mr. TILSON. He must cease to be a member?

Mr. HAYES. Yes.

Mr. TILSON. He can not continue to hold stock?

Mr. HAYES. He can not. The stock is confined entirely to the borrowers. They are the stockholders of both the local corporation and the general corporation or the land bank. The borrowers are the only stockholders.

Mr. HELGESEN. In other words, he can pay the last 5 per cent of his loan with his stock?

Mr. HAYES. He can. That will liquidate the last 5 per cent of his obligation.

Mr. GLASS. And in the meantime he may draw dividends on his stock.

Mr. HAYES. Yes; he will.

Mr. FESS. How many kinds of associations do you provide?

Mr. HAYES. We provide for one kind only, the national farm-loan association, which is the local association.

Mr. FESS. Nothing like the national bond or mortgage association?

Mr. HAYES. Not at all. A national farm-loan association is a local association. Ten or more individuals desiring to borrow money upon farm lands may form such an association, and they must certify or show by their application that they desire loans to the extent of at least $20,000 before they can become an association. These loans with their applications are put up to the national farm-land bank of their district. After the lands are examined and found to be all right for the loan for which they apply and the amount sufficient under the law, then the farm-land bank recommends a charter be granted, and a charter is granted by the Federal farm-loan board to that association and the loans are made and they become stockholders in the local association, which in turn becomes a stockholder in the land bank to the extent of 5 per cent of whatever loans are taken out by that association. That is the system.

Mr. STEENERSON. Will the gentleman yield?

Mr. HAYES. I will.

Mr. STEENERSON. Is there any limitation upon the amount of interest to be paid?

Mr. HAYES. Yes; there is a limitation that not to exceed 5 per cent shall be paid upon the bonds, and not to exceed 1 per cent above that paid upon the bonds shall be charged the farmer by the land bank. Now, it is not provided in this bill that not less than that shall be exacted for interest, profits, and operation expenses, administration expenses, but not more than that. In my judgment, half of 1 per cent would cover these charges after this system gets into operation—and I believe it will in a year or two—half of 1 per cent will probably be sufficient to cover profits and expenses.

Mr. STEENERSON. What is the rate of interest the gentleman anticipates that the farmer will be able to get money for under this bill?

Mr. HAYES. My expectation is that they will get money anywhere in the United States for 5 per cent.

Mr. RUSSELL of Missouri. Will the gentleman yield?

Mr. HAYES. I will.

Mr. RUSSELL of Missouri. I am asking purely for information. What is the lowest amount of money, or is there a minimum amount that can be borrowed?

Mr. HAYES. One hundred dollars is the lowest amount any land bank can loan to the farmer.

Mr. RUSSELL of Missouri. Is there a limit beyond which they can not go?

Mr. HAYES. Yes; $100 is the lowest and $10,000 is the maximum that they can loan to any one party.

Mr. RUSSELL of Missouri. I understand this must be loaned upon farms?

Mr. HAYES. Yes.

Mr. RUSSELL of Missouri. That no money can be loaned upon city property?

Mr. HAYES. It can not.

Mr. RUSSELL of Missouri. How about a farmer who owns land not in cultivation, but he wants to make a farm out of it? Can he borrow the money?

Mr. HAYES. He can borrow the money to buy it.

Mr. RUSSELL of Missouri. On unimproved land?

Mr. HAYES. He can.

Mr. HUGHES. Will the gentleman yield for a question to see if I understand his statement?

Mr. HAYES. I will.

Mr. HUGHES. For instance, a man wishes to borrow $10,000. In that event he must subscribe for $500 of stock?

Mr. HAYES. He must.

Mr. HUGHES. That is 5 per cent. Now, in the event of a defalcation or for nonpayment of interest he is liable to the amount of that sum, to the amount of $500?

Mr. HAYES. Yes; and $500 in addition.

Mr. HUGHES. He borrows $10,000 and therefore he is liable only in the amount of $1,000?

Mr. HAYES. That is all he can ever be liable for.

Mr. HUGHES. That is the extent of his liability?

Mr. HAYES. That is the limit of it.

Mr. MADDEN. Will the gentleman yield?

Mr. HAYES. I will.

Mr. MADDEN. This bill proposes to establish 12 regional banks.

Mr. HAYES. Yes.

Mr. MADDEN. Do I understand under the provisions of the bill any man who wants to borrow money on a farm would be obliged to visit the regional bank in order to make application for the loan?

Mr. HAYES. Not at all. He makes the application to his local association. He joins an association in his neighborhood, or if there is not one he unites with nine other men and they form a local assocation and elect a secretary-treasurer and a loan committee, and they get a charter from the Federal farm-loan board and then he can send his application to the bank as soon as the charter is issued. The bank sends its appraiser to appraise the land and if the land is found to be sufficient, the loan is made. He does not have to go there at all but the money is sent to the association, to the secretary-treasurer of the local association for payment to him upon the loan.

Mr. MADDEN. Does the gentleman think under any possibility of the provisions of this bill it would be necessary for a man who wanted to make a loan to go any considerable distance in order to make application for a loan? If he had to do that would not the expense of the application more than offset the low rate of interest?

Mr. HAYES. If that were true it might, but that is not the situation. There is no need for him to go any great distance.

Mr. VENABLE. Will the gentleman yield?

Mr. HAYES. I do.

Mr. VENABLE. As I understand the bill there are three processes of loaning machinery, one the Federal land bank and then the loan association——

Mr. HAYES. That is subsidiary to the land bank; that is part of the same system.

Mr. VENABLE. And a joint-stock land bank?

Mr. HAYES. That is an entirely different system, and I have not spoken of that at all.

Mr. VENABLE. Possibly this question is not at the proper time, and I do not want to interrupt the gentleman in the continuity of his discussion.

Mr. HAYES. That is all right.

Mr. VENABLE. Is there any difference in the liability of the borrower from one of these banks or associations and another? Is the liability any different?

Mr. HAYES. The gentleman means to ask whether there is a different liability to a joint-stock bank and a Federal land bank?

Mr. VENABLE. Yes, sir.

Mr. HAYES. Oh, yes; the liability is quite different. The joint-stock bank is a private institution and not cooperative at all.

Mr. VENABLE. That is the point I am getting at. In other words, these banks can be competing

Mr. HAYES. Yes; they can be.

Mr. VENABLE. And what do you think will be the probable effect, for instance, on the Federal land bank of a joint-stock association wherein, say, the borrower does not assume the same amount of liability that he does if he borrows from the Federal land bank?

Mr. HAYES. If you want to know my opinion—and it is purely a matter of judgment—it is that very few joint-stock banks will be organized, because they never can compete with the cooperative organizations. It will be impossible for them to make the same rate of interest that the cooperative organizations can make, because they must make profits for their stockholders, and in case of the cooperative organization no profits need to be made, or, if they are made, they go to reduce the payments of the borrowers. The rate of interest on the bonds issued by the Federal land banks should be much lower than on the bonds issued by the joint-stock banks, and therefore the rate of interest to the borrower should be much less.

Mr. VENABLE. Now, if they can not compete, they eventually will be driven out of the business?

Mr. HAYES. In some places they may thrive—where there is no cooperative effort. That is the reason I have agreed to permit them to be organized. I do not think they will be largely organized in the United States; but I think they will do no harm.

Mr. VENABLE. You think that the competition of the Federal land bank will drive these joint-stock organizations out of the business?

Mr. HAYES. I do. In Germany the joint bank and the landschaft exist side by side. The landschaft makes the long term and the joint-stock bank makes the short-term loan. The borrowers are not circumscribed in the purposes of the loan by the joint-stock bank as they are by the landschaft. So it may be possible that I am mistaken. A joint-stock bank may be organized and thrive side by side with the cooperative institution, because they can grant loans that the cooperative institutions would not care to grant, for a shorter time, for instance, and can grant them for other purposes than they will be granted by the cooperative institutions. These cooperative institutions, by the law, and properly so, in my judgment, are restricted in their loans to those things that are going to increase the agricultural efficiency of the country; for the purchase of land for farms, for the improvement of farms, by erecting buildings, and for the stocking of the farms, for buying machinery, or something of that kind, that will make the farmer able the more perfectly and fully to meet the demands of the country for agricultural products. Whereas the joint-stock bank has no such limitation.

Mr. CRISP. I would like to ask the gentleman where the application is made for the loan, what provision is made for inspecting or examining the title to the land? Who is to pay the expense of this examination, and if there is any limitation as to the amount of expense that may be incurred for making the legal investigation?

Mr. HAYES. The provisions of the bill are that a charge limited to the real, exact cost of making the examination may be made against the borrower, and that is all. The land bank, of course, will make that examination, and will have its agents, its attorneys, and examiners for that purpose, and may make a charge limited to the exact cost of the examination.

Mr. PHELAN. And I may suggest in addition, that that is subject to the rules and regulations of the farm-loan board, so that there will be no excessive charges by lawyers.

Mr. POWERS. Will the gentleman yield?

Mr. HAYES. Yes.

Mr. POWERS. Before loaning any money, do I understand that money has got to be invested in the farm in some sort of way, either in stocking or buying?

Mr. HAYES. The provision of the bill is this: That the applicant must be an owner or about to become an owner of farm land which he is trying to cultivate or proposing to cultivate.

Mr. FESS. When this is complete, what will be the legal relation to the Federal reserve bank—that is, what will be the relation of the Federal land bank and the Federal reserve bank?

Mr. HAYES. No relation whatever.

Mr. FESS. Two entirely different systems?

Mr. HAYES. Entirely independent systems.

Mr. FESS. Can one invest in the other?

Mr. HAYES. Yes. There is a provision of the bill that the members of the Federal Reserve System may purchase the bonds and they may be used as security for deposits, and things of that kind, but other than that there is no connection.

Mr. WINGO. Referring again to the question of competition between the joint-stock banks and the Federal land banks, the gentleman stated a few moments ago that he doubted if the joint-stock banks would be able to compete successfully with the land banks, for the reason that they could not make a profit. Now, is not this true, that the joint-stock banks will have a greater opportunity to make a profit than the Federal land banks? Is it not true that the joint-stock banks can issue bonds to the extent of fifteen times their capital stock? That would give them a gross earning on the 1 per cent margin out of which they would pay expenses and dividends of 15 per cent on their capital stock?

Now, the experience of other countries, and the experience of concerns of that kind that are already operating in this country, shows that the administrative expenses would be less than 1 per cent. Then, if they went to the maximum of their capacity, is it not probable that they will be very profitable institutions, because they have that margin, and, in addition, there are no limitations upon them to the extent that there are on the land banks?

Mr. HAYES. Yes; they may in some places become profitable if they do a large business; but they will not be as profitable as the other associations, which are authorized to loan twenty times the amount of their stock, and which may have less overhead charges to pay.

Mr. WINGO. What difference will there be in the overhead charges between a joint-stock bank and a land bank?

Mr. HAYES. None occurs to me just now.

Mr. WINGO. I take it that this is the real question involved: Would it not be impossible for the Federal land bank to compete with the joint-stock bank in the same territory for this reason? Here is a farmer who wishes to take out a loan. If he wishes to patronize the Federal land bank, he must assume a stock liability amounting to 5 per cent of the amount of the loan. If he wishes to take a loan from the joint-stock bank, he does not assume that liability and does not have to go into the organization.

Mr. HAYES. That is true.

Mr. WINGO. Will not that make it possible for the joint-stock bank to crowd out the Federal land bank in that territory?

Mr. HAYES. No. There are other advantages that will offset that.

Mr. MOSS of Indiana. I think in this matter actual experience is worth more than theory. I would like to call attention to the fact that in Germany the landschaft has something like $750,000,000 of loans on the farm lands of Germany, and the joint-stock banks, without restrictions of any kind, have $170,000,000 of loans on the lands of Germany.

Mr. WINGO. But there is no comparison between that and the conditions that will operate here.

Mr. PHELAN. There is some difference in the expenses. For example, the stock of the joint-stock bank is taxable, and the stock of the cooperative banks or the Federal land banks is not taxable.

Mr. HAYES. That is true, and the security behind the bonds of the cooperative bank is much more perfect than that behind the joint-stock bank, making it certain the interest rate of the former will be lower.

Mr. SUMNERS. Mr. Chairman, will the gentleman yield?

Mr. HAYES. Yes.

Mr. SUMNERS. As to the 5 per cent margin in stock which is provided for in this bill, if that should be absorbed, what authority is there in the bill to prevent the general system from going into bankruptcy?

Mr. HAYES. Of course, there is no power conferred upon anyone by the bill, and there could not be any power conferred—you can not prevent by law any system of financial institutions

from becoming bankrupt. The only thing that can be done is to provide by law for every possible emergency and to make it as safe as it can be made. That is the attempt here. That is the reason for stock subscription by the borrower and for his liability for as much more as his stock, in order to make the institution absolutely safe. It has another purpose also. That stock liability and the liability for 5 per cent in addition makes the loan committee, who are all members of the local association who make the loans and who would be liable for poor loans and for any default on the part of the borrower—it makes them cautious to see to it that they do not make loans that will not be paid back in full by the borrower.

Mr. SUMNERS. In these cooperative associations you permit loans of 20 to 1, and 15 to 1 of the other sort?

Mr. HAYES. Yes.

Mr. SUMNERS. What is the reason for that?

Mr. HAYES. Because we did not want to give the joint-stock bank any advantage over the cooperative. The joint-stock bank stands by itself. It is not bolstered up by all the borrowers, as the cooperative system is. It has to look out for itself and not depend upon anyone or anything else. The cooperative banks have all the rest of the banks to lean upon. The security behind their bonds is therefore much better and the rate of interest should be much lower.

Mr. MADDEN. In the case of the national banks, loans are made in the proportion of 1 to 8.

Mr. HAYES. It depends on whether they are in a reserve or a central reserve city or otherwise.

Mr. MADDEN. That is the average.

Mr. HAYES. Yes; I think it is. I have not figured it out, but I will say to the gentleman from Illinois that the savings banks loan 20 to 1; that is the provision of the Federal reserve act, that the national banks may loan on farm lands on a 5 per cent reserve.

Mr. PHELAN. Mr. Chairman, May I make another suggestion to the gentleman in that connection?

Mr. HAYES. Yes.

Mr. PHELAN. It is practically impossible ever to reach that proportion of 20 to 1. Also in connection with the question that the gentleman from Texas [Mr. SUMNERS] asked; in the case of a joint-stock bank, the proportion is 15 to 1 of the capital and surplus in the joint-stock banks and 20 to 1 in the others?

Mr. HAYES. Yes. The same thing is true of the joint-stock bank. Practically the joint-stock bank could not loan 15 to 1 any more than the land bank could loan 20 to 1.

Mr. McKELLAR. Mr. Chairman, will the gentleman permit a question?

Mr. HAYES. Yes.

Mr. McKELLAR. Suppose I am a farmer and I want to loan $10,000 on a piece of property that is capable of borrowing that much. Do I have to pay $500 in cash to begin with?

Mr. HAYES. You do not.

Mr. McKELLAR. How is that arranged?

Mr. HAYES. If you have not the money so as to pay it in cash, you can have it added to the loan.

Mr. McKELLAR. Or deduct it out of the loan?

Mr. HAYES. Yes. Suppose you borrow $10,000. Your 5 per cent subscription to the loan is added to the $10,000, and the $500 as well as the $10,000 is apportioned in the amortization payments and paid off with the loan.

Mr. SIMS. What per cent of the value of the mortgaged land has the loan?

Mr. HAYES. Sixty per cent.

Mr. SIMS. Is not that the basis of the appraisement?

Mr. HAYES. It should be, if the appraisement is properly made. It is 60 per cent of the value of the land, and 20 per cent of the value of the permanent insured improvements.

Mr. SIMS. What is the limit of the loan as to time?

Mr. HAYES. Not less than 5 nor more than 36 years.

Mr. FERRIS. I want to ask the gentleman a little bit about this cooperative-borrowing association. Of course, the committee considered the proposition of getting rid of that agency, and I want the gentleman to give us his information on that proposition. For instance, I can see why it is necessary for the borrower to be held liable for a certain per cent of his loans, and I can see why he should be held for a limited liability; but it seems to me it will be cumbersome and ponderous to force a local community of unschooled farmers to form an organization, and it seems to me that the committee would have made a more workable proposition if they had designated some national bank in each county or in each county seat, and let the applicant go direct to that bank, subject himself to the same liability as you provide for, and eliminate this cumbersome organization. I do not believe that part of it will pan out.

Mr. HAYES. A national bank would not be under any obligation to act as agent for the borrower unless it chose to do so, and the committee having in mind the fact that the national banks are commercial banks, which should not be engaged in loaning money on farm lands or any other real estate on long time or making any other long-time loans, the committee did not desire to mix up the national banks in this sort of business. They did not think it would be sound.

Mr. FERRIS. But if the gentleman will pardon me, national banks are subjected to national inspection.

Mr. HAYES. That does not matter.

Mr. FERRIS. And they are subjected to national control.

Mr. HAYES. Yes.

Mr. FERRIS. And the National Government could more easily make an arrangement with them, I assume.

Mr. HAYES. But the Federal Government should not do so, in my judgment. I should be absolutely against any such proposition. The national banks are commercial banks, and they should be confined to that business, and should not engage in making long-time loans to farmers.

Mr. FERRIS. I think you will find difficulty getting a group of farmers to organize into a loan association.

Mr. HAYES. Only experience can determine. The gentleman might think so, and I might think differently.

Mr. GLASS. They do form themselves into associations, and they can borrow through an agent who is willing to indorse their paper, and they can borrow through the joint-stock banks.

Mr. HAYES. Yes; and the agent can be paid for his services.

Mr. HASTINGS. I was going to suggest to the gentleman that he explain section 15, which provides for the appointment of agents.

Mr. HAYES. I have not spoken of that. I should like to ask how much time I have consumed, Mr. Chairman?

The CHAIRMAN. The gentleman has consumed 40 minutes.

Mr. HILL. The gentleman comes from a State, as I do, where there are a very large number of savings banks, and a large amount of mortgage loans held by them.

Mr. HAYES. Yes.

Mr. HILL. Has the gentleman investigated at all the effect of this nontaxable bond, or practically nontaxable mortgage loan, upon the savings-banks system of his State and mine?

Mr. HAYES. I can only say that so far I have not received a single protest——

Mr. HILL. I would value the gentleman's opinion more than that of most of the people who might protest.

Mr. HAYES. My opinion is that many of the savings banks will buy these bonds, and it will save them largely the expense and trouble of making the loans individually. I have an idea that they will invest largely in these bonds.

Mr. HILL. What becomes of their existing loans?

Mr. HAYES. Of course they will mature.

Mr. MADDEN. Is there any provision made for an examination of the abstracts, and the survey of improvements, and so forth?

Mr. HAYES. Yes; certainly.

Mr. MADDEN. How do they do that?

Mr. HAYES. The land bank does it, and charges the actual cost only, under regulations of the Federal farm-loan board, to the borrower.

Mr. GLASS. Might it not be explained there that it is under a system that will insure the very least possible cost to the borrower?

Mr. HAYES. Yes; certainly.

Mr. MOSS of Indiana. In regard to what the gentleman from Connecticut [Mr. HILL] has said, I should like to call attention to the fact that notwithstanding the marvelous development of this organized land credit in Germany, the savings banks of the German Empire hold $850,000,000 of mortgages on rural real estate in Germany, or more than any other one class of banks that there is.

Mr. HAYES. And they do it in all countries where they have the landschaft, but, of course, those are mortgages that are on shorter time and for other purposes than those that the landschaft would grant loans for.

Mr. RAGSDALE. In addition to the economy that would necessarily follow the purchase of these bonds by reason of a system of looking into the titles, this would also be a matter of satisfaction and economy in the future purchase of lands in that it would definitely fix the title after it had been once examined.

Mr. HAYES. That is all true.

Mr. SMITH of Idaho. Will the gentleman yield?

Mr. HAYES. I yield to the gentleman from Idaho.

Mr. SMITH of Idaho. What provision is made for requiring the borrower to expend the amount borrowed upon his farm in the way of improvements?

Mr. HAYES. He applies to the local association, and it is made the duty of the secretary-treasurer of that association to see to it that the money is spent for the purposes provided in the application for the loan. It is his duty to report to the land bank any breach of that agreement on the part of any borrower.

Mr. RAGSDALE. Just as where money is borrowed from a loan building association the association sees to it that the money is used on that lot?

Mr. HAYES. Yes.

Mr. POWERS. What is the remedy if he does violate the agreement?

Mr. HAYES. The loan is declared due and payable and he may be called upon to pay it at once.

Mr. EMERSON. I listened with much interest to the question of the gentleman from Oklahoma as to why this loan matter could not be carried on through the national banks and save the expense.

Mr. HAYES. I do not see that it would save expense. The national banks could not afford to do it without being paid for it. The other banks are paid for it by the people who are the borrowers, and if any profit comes out of it they get it back, and besides that, the national banks ought not to be mixed up in making long-time loans to farmers.

Mr. RAGSDALE. Would it not impair the credit of the national banks on the part of the depositors by feeling that the money was not liquid, as it would be if the bank dealt in ordinary securities?

Mr. HAYES. Yes; it would impair the safety of the bank.

Mr. SNYDER. Is it not a fact that the national banks are handling the loans of all the farm paper to-day?

Mr. HAYES. It is not a fact.

Mr. SNYDER. They are in many communities.

Mr. HAYES. Well, small banks in the country that are national banks, it is true, may handle long-time farmers' paper.

Mr. SNYDER. These are not small banks, but thousands and thousands of dollars are carried for farmers from year to year, and at a very low rate of interest.

Mr. HAYES. Not very.

Mr. SNYDER. I am of the belief that arrangements could be made where this banking business for farmers would be better carried on than in the way proposed.

Mr. HAYES. I can not yield to the gentleman for a speech, but I can not agree with him.

Mr. BAILEY. I want to ask the gentleman if he has considered the possibility of the effect of this measure in the way of stimulating an increase in farm-land values.

Mr. HAYES. Yes; we considered that very carefully. It may have some such effect, and I fear that it will.

Mr. BAILEY. There have been increases in recent years——

Mr. HAYES. In Iowa, which has the greatest facility in the way of cheap loans—I believe they have the cheapest rate of any Western State—the result has been a large increase in the value of farm land.

Mr. BAILEY. And an actual decrease in population.

Mr. HAYES. Not serious—many of the younger men, of course, have gone from farms to the cities, and Iowa has no large cities.

Mr. MORGAN of Oklahoma. Referring to the question of the national banks issuing loans for this land bank, I want to know why it would not be proper to use the national bank, and likewise the State banks, as agents for the Federal land bank without indorsement, but simply receive the applications and transmit them.

Mr. HAYES. Oh, no; I could not agree to that proposition at all, for the reason that the bank making the loan and passing upon it and acting as agent would have no pecuniary interest in the matter at all, and therefore their agency could not possibly have any value.

Mr. MORGAN of Oklahoma. I do not intend that——

Mr. HAYES. I can not yield to the gentleman for a speech; he will have time to make his own speech.

Mr. FESS. The gentleman provides for the principle of amortization in this bill. What is the limit of time?

Mr. HAYES. Thirty-six years.

Mr. SMITH of Minnesota. Is not one of the chief features of this plan to reduce the initial cost of making the loan?

Mr. HAYES. Certainly.

Mr. SMITH of Minnesota. If we use the national banks or any other outside agency, there will be some expense attached to it.

Mr. HAYES. Necessarily.

Mr. SMITH of Minnesota. But under the local associations all of the initial expense is donated by the members of that association.

Mr. HAYES. Absolutely.

Mr. SMITH of Minnesota. No man connected with the local association gets any pay except the secretary-treasurer.

Mr. HAYES. That is true.

Mr. SMITH of Minnesota. He is the only one that does not have to be a member of the association.

Mr. HAYES. Yes.

Mr. GLASS. In connection with the question asked by the gentleman from Oklahoma, is not the basic principle of the bill the sale of the land-bank bonds, and if we should eliminate the indorsement of the land banks, would it not impair the security of the bonds?

Mr. HAYES. I doubt if they would be saleable at all.

Mr. MORGAN of Oklahoma. How does the indorsement of the local association affect the bonds?

Mr. HAYES. Just as the indorsement of the landschaft in Germany makes the bonds saleable. It would be impossible to sell the bonds in the general market without it.

Mr. MORGAN of Oklahoma. A loan association takes it for the Federal land bank and that is all they have.

Mr. HAYES. They have the security from the individual borrower and in addition 10 per cent of the amount of his loan. Besides this each loan has behind it the responsibility of all the members of the local association to the extent of 10 per cent of the amount of their loans; second, the stock and surplus of the Federal land bank; and third, the responsibility of all the other land banks in the system, making it absolutely certain that every bond issued by this system will be paid, principal and interest. Now, I must in justice to my colleague close.

Mr. EMERSON. Mr. Chairman, before the gentleman concludes, will he yield?

Mr. HAYES. Yes.

Mr. EMERSON. As I understand the point, in having these national banks and local banks act as agents it is to save expense?

Mr. HAYES. Not at all.

Mr. EMERSON. Why could not the expense be saved?

Mr. HAYES. It would not save any expense. I can not go into that matter for I have not the time, but the purpose in having the agencies provided for in this bill is to provide opportunities to farmers to get loans from this system before local associations are organized. There may be places in the country where farmers will be very slow to organize into local associations and assume this 10 per cent liability, and in that case we permit the local banks or farm-mortgage associations, or other like instrumentalities, to act as agents for the farm-land bank to make these loans; but in order to do so they must indorse the loan and become liable as indorsers on it.

Mr. SMITH of Michigan. Mr. Chairman, I want to be clear on one point, and that is the expense preceding the making of the loan. I understood the gentleman to say that the expense of the examiners and attorneys in looking up the title, and the clerks and agents, and so on, is paid by these associations?

Mr. HAYES. No. I said that the expense of the appraisement is paid by the land banks and that the expense of examining the title may be paid by the land banks, and the cost of that examination only is chargeable to the borrower. The initial expense is cut down to the very lowest limit by the bill.

Mr. SMITH of Michigan. The appraisement of the land is charged to the association?

Mr. HAYES. I believe not, if I remember right.

Mr. SMITH of Michigan. To whom is it charged?

Mr. HAYES. The land bank. That is a part of its operation expenses.

Mr. SMITH of Michigan. Then that expense is paid by the Government?

Mr. HAYES. Not at all. It comes out of the profits of the system.

Mr. SMITH of Michigan. What does this mean: "The national farm-loan board"——

Mr. HAYES. Its salary is paid by the Government.

Mr. SMITH of Michigan. I wish to read this from page 76:

The Federal farm-loan board—

And it is admitted that their salaries are paid by the Government—

shall be authorized and empowered to employ such attorneys, experts, assistants, clerks, laborers, and other employees as it may deem necessary to conduct the business of said board * * * and shall be paid in the same manner as the salaries of the Federal farm-loan board—

Which is out of the Treasury of the United States.

Mr. HAYES. These attorneys, clerks, agents, and laborers are to be employed in the office of the farm-loan board here in Washington and paid, like any other employees in a bureau, out of the Federal Treasury, not to be charged up to the borrower at all.

Mr. CARAWAY. Mr. Chairman, will the gentleman yield?

Mr. HAYES. Yes.

Mr. CARAWAY. At page 18 it is provided that the secretary-treasurer of the local association enters into a bond conditioned, among other things, upon the prompt collection and payment of interest and principal. I take it that under the language of the bill he and his bond will be responsible for any payment due and unpaid by any member.

Mr. HAYES. For negligence—lack of faithfulness in the discharge of his duties only.

Mr. SNYDER. In a section of the country where farmers are borrowing money now on a basis of 6 per cent for a period of from 1 year to 36 years, how much better off does the gentleman think the farmer of the country would be under this act?

Mr. HAYES. Just as much better off as the interest rate is lower.

Mr. SNYDER. That is what I would like to have the gentleman's judgment upon.

Mr. HAYES. Of course, nobody can tell what interest rate can be obtained on the bonds. They may be before long as they are in Germany. There the landschaft bonds sell at as low a rate of interest as the Government bonds, and there is no reason that I can see why these bonds should not sell as low as 4 per cent. In that case the farmer would get his money, as the gentleman from Indiana [Mr. Moss] has said, probably at 4½ per cent. That is my expectation. If this system works out—and we hope it will—the ultimate result will be that in a few years the farmers of the country will get their money at 4½ per cent.

Mr. SNYDER. I sincerely hope that will come true.

Mr. FERRIS. Mr. Chairman, I hope the gentleman will deal with section 15 before he concludes. In reply to a question of the gentleman from Ohio [Mr. FESS], the gentleman from California admitted that there were times when it would not be feasible to make up these local cooperative associations for the purpose of borrowing, and I think that will be true all of the time. I do not think that will be feasible at any time, myself, but, inasmuch as the gentleman has conceded that in certain cases it would be, I want to know whom, under section 15, you could get to indorse this paper?

Mr. HAYES. If the gentleman is asking my opinion, I will say frankly to him that I do not think there is much in that provision.

Mr. FERRIS. I do not either. What is it in there for?

Mr. HAYES. Because some gentlemen wanted it there, and the rest of us could see no harm in it, and we let it remain.

Mr. GLASS. May I not say it was in there not because the committee believed there were any farming communities that would not organize any of these associations, but that one member of the joint committee did believe that there might be some communities who would not, and asked to safeguard us against the possibility.

Mr. FERRIS. But what benefit can you get under a provision which everybody admits will not accomplish anything?

Mr. GLASS. That is not the case; everybody does not admit it. It was put in——

Mr. FERRIS. I have never found any banking institution or any other institution that had that affection and generosity so that they would be willing to indorse other people's paper——

Mr. HAYES. They get paid for it.

Mr. FERRIS. Even so, there is no use putting it in when——

Mr. HAYES. But I am not sure that it would not be valuable in some parts of the country.

Mr. MOSS of Indiana. Will the gentleman permit?

Mr. HAYES. I will.

Mr. MOSS of Indiana. There were several statements that I wanted to correct, but I should now like to make this statement: That there are now 11,000 cooperative business organizations among the farmers of the United States, and last year they did a business exceeding $1,400,000,000, and that statement was made before the Committee on Agriculture of the House, and people generally do not seem to understand the extent of this cooperative business.

Mr. LA FOLLETTE. Will the gentleman yield?

Mr. HAYES. I am sorry I can not. Mr. Chairman, in conclusion I want to say that this bill is not all that I would have it. There are many things lacking in it that I should like to see in it. There are some things in it that I should like to see out of it; but its imperfections can be corrected by amendment after they have been fully disclosed by actual operation. I believe it is the best bill that can be presented at this time, and I firmly believe that if the farmers will accept it and act upon its provisions and organize these local associations, it will come to be the greatest blessing that ever was conferred by the Federal Government upon the agricultural communities of this country. [Applause.] For that reason I am going to support the bill, although, as I say, it is not all that I could wish for.

Mr. HASTINGS. Mr. Chairman, the gentleman has made such a very comprehensive statement that I wish the gentleman would tell the members of the committee how a member could join a local loan association after one has been formed.

Mr. HAYES. He simply makes application to his local association for a loan and his application for membership goes with that application for the loan. The loan committee immediately takes it up and the association passes upon the loan. If they accept his loan, then he is accepted as a member of that association, subject to be eliminated if the land bank afterwards refuses to make the loan.

Mr. HILL. Will the gentleman yield?

Mr. HAYES. I will.

Mr. HILL. Will the gentleman inform me—I do not seem to find it—whether the bonds issued by the joint-stock bank are exempt from taxation?

Mr. HAYES. Yes.

Mr. HILL. The simple fact is that this farm mortgage is construed to be an instrument of the United States?

Mr. HAYES. Absolutely.

Mr. HILL. Then I would like to ask this question: Would the gentleman believe this Congress had the right to declare that the mortgage bonds of the railroads of the country were instruments of public utility and that they should be exempt from all taxation?

Mr. HAYES. I would say to the gentleman that I am not a great constitutional lawyer, and he will have to propound that proposition to somebody who knows more about constitutional law than I do. The committee has taken the advice of men in whom they had confidence as lawyers, and they tell us it is proper and constitutional for us to exempt the bonds or the mortgages under this system from taxation.

Mr. HILL. Take a State where the land is taxed and mortgage bonds are issued under this banking system; do you think the Federal Government has the right to make them free from taxation in Connecticut when my State taxes them?

Mr. HAYES. I think there is an equity in it. It would be inequitable to the farmer to permit his mortgage instrument, representing a percentage of the value of his land, to be taxed in some other locality when his land has already been taxed at its full value in the State where located.

Mr. HILL. Then this bill practically renders invalid taxation in every State where the tax is now imposed.

Mr. SIMS. In every State where they tax these bonds they certainly will not be sold, because there is a market where they are untaxed; so they would not go there.

Mr. HAYES. I think so.

Mr. GLASS. Will my colleague use some more of his time?

Mr. HAYES. Mr. Chairman, I yield 30 minutes to the gentleman from Oklahoma [Mr. MORGAN]. How much time have I consumed?

The CHAIRMAN. Sixty-two minutes.

Mr. MORGAN of Oklahoma. Mr. Chairman and gentlemen of the committee, I can not in a 30-minute talk discuss the important propositions in this bill. I have some very positive views on the questions involved. I do not agree with other gentlemen who I know have given great study to this question and who I know are equally as sincere and honest in their views as I am in mine. There are quite a number of changes that I would like to make in this bill, but I can only discuss a few of them. I may be able to discuss really only one. So I will begin my talk by stating what I think should be the first thing eliminated from this bill, namely, section 16, which authorizes the creation of joint-stock banks. I believe that we should create but one system of banks in starting out with our system of land credits in this Nation. If the joint-stock bank shall be created and organized and have begun the business of issuing bonds, running for 36 years, they will always remain a part of our system. It is a matter of conjecture, of course, as to how many of these banks will be organized and what amount of business they will do, but once organized and doing business they will remain a part of our land-credit system for centuries to come.

I wish to present some arguments against the creation of joint-stock banks as instruments to provide the farmers of the United States with land credit. As introductory to the discussion I present the following propositions:

First. Private banking corporations organized for gain, conducted for profit, managed in the interest of shareholders, whose chief concern must be in the receipt of dividends and clothed with power to levy unjust tribute upon both borrowers and lenders, should not be made Government instrumentalities to act as middlemen between farmers and investors and, by national authority, clothed with power to levy unjust tribute on both borrowers and lenders.

Second. The joint-stock banks will neither enlarge land-credit facilities for the farmers of the United States nor augment the amount of credit at their command.

Third. The creation of joint-stock banks to do business in conjunction with the 12 Federal land banks will increase the average rate of interest paid on farm mortgages by the farmers of the United States.

Fourth. The joint-stock banks will largely increase the total amount paid by the farmers of the United States as administration expenses of the land-credit institutions.

Fifth. The creation of joint-stock banks will largely increase the amount of money expended by the United States in the supervision of our land-credit institutions.

Sixth. The creation of joint-stock banks will make our land-credit institutions less secure and increase the danger of loss to investors.

Seventh. With joint-stock banks operating in conjunction with the 12 Federal land banks there can not be standardization in business methods, in appraisement, or along any other lines of activity.

Eighth. With joint-stock banks and 12 Federal land banks all issuing farm-mortgage bonds, we will fail to attain one of the objects of land-credit legislation, namely, the creation of a standard form of investment.

Ninth. The creation of joint-stock banks will compel farmers to compete against farmers in securing their credit.

Tenth. The creation of joint-stock banks will make uniformity in interest rates an impossibility.

Eleventh. The creation of joint-stock banks will make it impossible to provide equal credit facilities for the farmers of the United States.

Twelfth. In type, in purpose, and in business methods the joint-stock banks are modeled after existing national and State banks. The demand for their creation comes not from farmers, but from men with capital who wish to enlarge and perpetuate their control over the credit power of the people.

I can not discuss all of these proposition at this time, but I will consider some of the main objections to the joint-stock banks.

In discussing the question of the wisdom of creating two kinds of land banks as the instruments of our land-credit system it will be useful to get clearly in our minds how the joint-stock banks and the 12 Federal land banks differ. The committee bill authorizes the creation of 12 Federal land banks operating in connection with local farm-loan associations. It authorizes the organization of any number of joint-stock land banks, each one to be entirely separate and independent of all others, and also all of them entirely distinct and independent of the 12 district banks. The Federal land banks are public institutions; the joint-stock banks are private institutions. The directors of the district banks will be selected by the Government and by the borrowers. The directors of the joint-stock bank will be selected by the stockholders thereof. Temporarily the Government may furnish a part of the capital for the Federal land banks, but ultimately all the capital of these banks will be furnished by the borrowers. The capital of joint-stock banks will all be provided by private individuals. The district banks—that is, the 12 Federal land banks—will be nonprofit sharing. The profits or dividends thereof will go to the borrowers. The joint-stock banks are strictly profit sharing. All the profits of these banks will go to the individuals owning the capital stock thereof. The 12 Federal land banks will be altruistic in their aim. The joint-stock banks will have no altruistic purpose. They will be organized as money-making institutions. Under the joint-committee bill the 12 Federal land banks are made responsible for each other's obligations. The bonds of one bank would thus be guaranteed by all other Federal land banks. The joint-stock banks, whether many or few, are in no way made responsible for each other's contracts or debts. One bank would be under no obligation to pay the bonds issued by another. Being bound for each other's contracts the 12 Federal land banks would in reality be one institution, operated through 12 divisions or departments. The joint-stock banks would constitute many institutions.

Under the provisions of the joint committee bill the 12 Federal land banks, in a large measure, would be controlled by the Federal Government. The Federal Government would not, however, in any manner control the joint-stock banks, but would merely supervise them. The Federal land banks are given no choice in the selection of territory in which they shall do business. The owners of joint-stock banks are free to select the State as well as the county in which they shall do business. Under the provisions of the joint committee bill the 12 Federal land banks are restricted in the purposes for which they may make loans. The money loaned by them must be used for certain purposes only. Joint-stock banks may make loans wholly without regard to the use or uses which borrowers shall make of the proceeds of the loan. Persons borrowing of the 12 Federal land banks must reside upon the land mortgaged to secure the loan. No such requirement is made of borrowers from joint-stock banks.

After the most careful study that I could give this question, I have concluded that in organizing our system of land credits for the farmers of this Nation we should not create private, profit-sharing, surplus-creating, dividend-paying, land-credit banks. It is true, as the gentleman says, that Germany has joint-stock banks. There are 37 of them in Germany. But the joint-stock banks of Germany were not intended primarily as farm-mortgage banks. They were designed mainly for loans on urban property, and have been largely so used. Only 6 per cent of the business of these banks consists of loans on farm lands.

Mr. MOSS of Indiana. Will the gentleman yield for a moment?

Mr. MORGAN of Oklahoma. I will be glad to yield to my friend from Indiana.

Mr. MOSS of Indiana. Is not the Credit Foncier of France a joint-stock bank, with stock owned by citizens of all classes in France?

Mr. MORGAN of Oklahoma. That is a very appropriate question. The gentleman knows as much, and probably more, about that great institution as I do. He knows that the Credit Foncier is a public institution. He knows that France contributed $2,000,000 to its capital to start with. He knows the president and vice president and three of the directors are appointed by the President of France. He knows that the institution is given the benefit of public officers in collecting interest and other dues, and he knows it is a public and not a private institution. I concede that with the exception of this $2,000,000, private persons have subscribed the remaining part of the stock of the bank and that it is also a profit-sharing institution.

Mr. MOSS of Indiana. If the gentleman will yield again, the only assistance the Credit Foncier got from the Bank of France was the $2,000,000 subscribed to the capital stock. What other favors does it get from the treasury of France than that?

Mr. MORGAN of Oklahoma. That is not the question. That institution, as you know, is one of the greatest land-credit institutions in the world. It is an institution, however, that loans upon the city property; that loans to corporations, and does not restrict its business to farm-mortgage loans. The greater part of its loans are not loans upon farm lands.

Mr. HELVERING. Is it not a matter of fact that the Credit Foncier of France offers a premium of a certain number of bonds in order to facilitate the sale? It is a sort of lottery?

Mr. MORGAN of Oklahoma. That is true. But the Credit Foncier is just one institution covering all France with its business. It has a capital of $50,000,000 and commands the best credit of any institution of its kind, perhaps, in the world. You propose to create any number of little joint-stock banks, scattered all over this country, with varying capital stock ranging from $250,000 up to $1,000,000 or $10,000,000 or more, with authority to issue bonds running 36 years. By so doing you destroy the credit of the other system, composed of the 12 Federal land banks.

Mr. MOSS of Indiana. Will the gentleman yield again?

Mr. MORGAN of Oklahoma. Yes.

Mr. MOSS of Indiana. Now, in Chile are there not joint banks in successful operation against associations where the country of Chile itself guarantees the bonds of the associations?

Mr. MORGAN of Oklahoma. It is true, but that great land-credit bank of Chile, as the gentleman knows, dominates the farm-loan business of Chile, a great public institution conducted by that Republic, and the other institutions are comparatively small concerns.

Mr. MOSS of Indiana. There is one bank of $6,000,000 capital that is absolutely a private bank. There are 10 joint-stock banks in Chile.

Mr. MORGAN of Oklahoma. Now, I believe when the National Government undertakes to create a system of land credit for the farmers of this country that we ought, so far as we can, provide equal credit facilities throughout the Nation, to the farmers of the different States. I believe if we create the joint-stock banks that we will not have equal credit facilities in the different States of the Union. Under this bill joint-stock banks

can do business only in the State where they are organized. There is no certainty that they will be organized in any State. We might have one, two, or ten in Indiana, and they might have none in Kansas, Nebraska, or the Dakotas.

Now, then, in this bill you have placed restrictions upon the loans made by the Federal land banks. Loans can be made for only four purposes. The money borrowed must be used to purchase land for agricultural purposes, or to purchase live stock or equipment, or to erect buildings, or to pay debts contracted prior to a certain time. There are other legitimate purposes for which farmers will want to borrow money. If a farmer in a State where there are no joint-stock banks wants to borrow money for a purpose for which the Federal land bank loans, he will not be able to make a loan through any national land-credit institution.

This bill will, then, give the farmers of one State facilities not enjoyed by those of another State. Again, in States which have joint-stock banks farmers may make loans on the amortization plan without contributing to the capital stock of these banks and without assuming in any way financial responsibility for others. But in States which have not joint-stock banks the only way to secure a long-time loan on the amortization plan will be to take stock in the Federal land banks and assume a 10 per cent liability on the amount of the loan for others. This would be rank discrimination. If joint-stock banks shall be created at all, they should be placed within the reach of all.

I believe in equal land-credit facilities. Those joint-stock banks may be popular in Indiana. They may be popular in Illinois. They may be popular in some other States, but they may not be popular in still other States. If you create them, you must understand that you are giving to one State what you are not giving to another. I am in favor of equal land-credit facilities to the South and the North and to the East and West. If a State creates its own institution for its own farmers, it can take into consideration its own farmers only; but when the National Government acts, we should, as far as possible, act for all and give equal credit facilities to all.

Now, second, I believe that when you create these joint-stock banks you place farmers in competition with each other. All of this talk about one bank competing against another is all imagination. Do you think that the banks of this Nation compete with each other in matters of interest rates? Certainly not. There will be no competition of that kind.

Now, what is a land-credit institution? It is simply a corporation instituted between the farmers and the investors, between the farmers who furnish the security and the investors who buy the bonds issued on that security. That is a very simple proposition.

I say, first, that the middleman ought not to be a profit-sharing institution. If there are any profits in this institution, they ought to revert back to the borrowers, as they will under the 12 Federal land banks. If the farmers have the right to complain of anything in the past, if they have the right to complain of anything to-day, so far as the existing order of things goes, it is of the profit that goes to the selfish middleman, existing between the farmer and the consumer. If there is some statesman in this country who can draw the consumer and the producer closer together, he would certainly confer a great blessing upon his country. The $250,000 capital is not what gives the bank credit. It is the farms of the farmers that will give these banks credit. But the stockholders or these private stockholders will be just like stockholders in all private corporations—they will use these banking corporations to make money out of both the farmers and the investors in farm-mortgage bonds.

I am opposed to that. It is unnecessary. When we are creating 12 public Federal land banks that will cover every foot and every inch of our territory, giving equal credit facilities to every farmer in the United States, so far as he has the security, under the control of the Federal Government, with local associations to do every kind and character of business done, why should you deface, weaken, and endanger this great system by introducing these private profit-sharing institutions?

Mr. LA FOLLETTE. Mr. Chairman, will the gentleman yield there?

Mr. MORGAN of Oklahoma. Yes.

Mr. LA FOLLETTE. Would not the formation of those profit-sharing banks really defeat the system in many localities because some would go to the profit-sharing bank and you would not get enough to join the association?

Mr. MORGAN of Oklahoma. Yes. Now, incorporators of these banks will select the State in which they will do business. They will go where the most money is to be made. They will not only go to the best State, but they will go to the best part of that State. It is not only a discrimination by giving unequal credit facilities throughout the country generally, but there will be discrimination as between different counties in the same State.

Now, addressing myself particularly to the gentleman from Indiana [Mr. Moss], I will say that I was reared in Indiana, and I know something about conditions there. There are some splendid agricultural counties; others are inferior. These banks will do business in some of the choice counties, while in some other counties, where the land is poor, they will not do business. Here will be unequal credit facilities in the same State.

Mr. MOSS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. MOSS of Indiana. How will they do business in these poorer counties if they do not grant a lower rate than the cooperative banks grant?

Mr. MORGAN of Oklahoma. Oh, the gentleman need not worry about that. Those gentlemen will run those banks at less expense than they will run the other system. I believe that. They will have but one object, and that will be to make money. They will have every department fully equipped. They will organize and conduct it in a way to keep down expenses. They are there for business purposes, just as men are engaged in any other kind of business. They have the right to be there to make money.

Now, it is just as much expense to make a thousand-dollar loan and go to see the land and make the appraisement as it is to make a $10,000 loan. But the profit is only 1 per cent a year on the $1,000. If they make a $10,000 loan, they will have 1 per cent on the $10,000 loan at the same expense. They will do business where they will make the most money and not where it is most needed. If we think that 1 per cent annually upon every borrower, running through a period of 36 years, will not give a mortgage company ample funds to make money, you are mistaken.

Mr. PHELAN. Mr. Chairman, will the gentleman yield there?

Mr. MORGAN of Oklahoma. Yes.

Mr. PHELAN. If they give a cheaper credit to certain farmers, as the gentleman asserts, why should we not in the bill that we will frame give an opportunity to those farmers to get cheaper credit?

Mr. MORGAN of Oklahoma. I do not believe they will give cheaper credit.

Mr. PHELAN. How will you deal with the other banks?

Mr. MORGAN of Oklahoma. There are some farmers who will not deal with the other banks at all. They will have a monopoly of those farmers, will they not? There is a large number of farmers who can not do business with the other banks.

Mr. PHELAN. Why not?

Mr. MORGAN of Oklahoma. Because they can not comply with the restrictions.

Mr. PHELAN. We are not concerned in devising a credit system for the benefit of the farmer who wants to borrow money to go and buy automobiles. We are trying to give credit to the farmers who need money for other purposes.

Mr. MORGAN of Oklahoma. I can not yield to the gentleman for a speech. Of course, I believe the American farmer is capable of taking care of himself to a large extent. I believe the average American farmer is an intelligent business man, who understands his business. The average American farmer will not borrow money unless it is for good purposes, and I am opposed to making a ward out of him.

Mr. MOSS of Indiana. Will the gentleman yield for a question?

Mr. MORGAN of Oklahoma. Yes.

Mr. MOSS of Indiana. What reason would the gentleman give to the House for wanting to strike out this section, if, as a matter of fact, there are farmers who you say can not borrow from the 12 land banks and would not have any facilities at all offered under this legislation?

Mr. MORGAN of Oklahoma. I am in favor of striking out the joint-stock bank provisions and I am in favor of striking out all the restrictions. I maintain that the landschaften and every other land-credit system in Europe, where they do a general business, make loans without restrictions.

Mr. KINCHELOE. I understand the gentleman is against this bill. I should like him to give us the benefit of his suggestions in an epitomized way of what he conceives would be a practical rural-credit bill.

Mr. MORGAN of Oklahoma. If I had an hour or two, of course, I might say a good many things; and, indeed, I would be glad to if I had the time.

Mr. GLASS. Will the gentleman yield to me for a question?

Mr. MORGAN of Oklahoma. I shall be glad to yield to the distinguished chairman of the committee.

Mr. GLASS. Can the gentleman cite any banking system in any civilized country of the earth that does not make restrictions on the uses to which its loans may be put?

Mr. MORGAN of Oklahoma. The landschaften of Germany do not.

Mr. GLASS. Do not make restrictions?

Mr. MORGAN of Oklahoma. No, sir.

Mr. GLASS. Do they not say for what purpose the man shall use his money?

Mr. MORGAN of Oklahoma. No.

Mr. GLASS. On the contrary, the landschaft advises itself very particularly about the habits, about the household expenditures, and about everything that affects the credit of the applicant for a loan.

Mr. MORGAN of Oklahoma. The gentleman is mistaken. It will be easy to settle that before we get through with the consideration of this bill. I will get my authorities, and I hope the gentleman will get his; and if the landschaften and the general loan institutions of Europe—the land-credit institutions—make these restrictions, I shall be glad to know it. Of course, there are certain banks that are created for certain specific, definite purposes, and they loan only for those purposes; but the landschaft, the credit foncier, and the principal land-credit institutions of Europe do not make restrictions in the use of their loans, and I can show it before I get through with this bill.

Mr. GLASS. Does the gentleman think there is a National or State bank in the United States that does not advise itself of the purposes for which borrowers seek their loans?

Mr. MORGAN of Oklahoma. When I go to a bank to borrow money on my personal credit, they have a right to know something about what I am going to do with the money; but when I say, "Here is a 160-acre farm worth $10,000, and I want $3,000 on it," there is the security, and it is the security that they are asking for——

Mr. MADDEN. Will the gentleman yield for a question?

Mr. MORGAN of Oklahoma. I yield to the gentleman from Illinois.

Mr. MADDEN. Does the gentleman contend that when he gives security to a bank that does not protect them in the making of the loan?

Mr. MORGAN of Oklahoma. I do not quite understand the gentleman.

Mr. MADDEN. I understood the gentleman a moment ago to make the statement that when he went to a bank with security they had a right to inquire what he was going to do with the money.

Mr. MORGAN of Oklahoma. I said on my personal security. If you go there with bonds, or some collateral that you propose to put up, they do not care what you are going to do with the money, because they have the collateral.

Mr. MADDEN. Does not the gentleman think they have the same right to inquire if you go there with a farm as security?

Mr. MORGAN of Oklahoma. I do not think so. Now, I want to touch upon another proposition. I believe that, in so far as we can, we ought to have not only equal credit facilities but uniform rates of interest throughout the country. Under this 12 federated banks system I believe you get practically a uniform rate of interest throughout this country, because these banks are tied together. They are responsible for each other's bonds, and that will give them equal credit and equal rates of interest. In other words, the South will get the same rate of interest as the North, and the West will get the same rate of credit as the East; but if you create joint-stock banks, you destroy to a large extent any possibility of uniform rates of interest.

Mr. PHELAN. Oh, no; not what they please. There is a limit. No bank can issue a bond with a higher rate of interest than 5 per cent, and the difference between the mortgage rate and the bond rate can not exceed 1 per cent.

Mr. MORGAN of Oklahoma. Well, one bank may make it 5 per cent and the other bank may make it 4 per cent. It destroys the uniform rate of interest.

Mr. MOSS of Indiana. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. MOSS of Indiana. I would like to call the gentleman's attention to the provision that no joint-stock bank can issue a bond except with the consent of the farm-loan board. They have a control over it.

Mr. MORGAN of Oklahoma. But here are two systems. The joint-stock bank will be at liberty to make a loan as they please and at the rate they can, and will sell their bonds at a different rate from the other bank, so there will be a question between the two systems, and if one joint-stock bank does not have as good credit they must sell their bonds at a higher rate of interest. That destroys the credit of both institutions. There is still more than that. Here is one joint-stock bank perhaps with a capital of $250,000, and another with a possible capital of $10,000,000. A joint-stock bank in New Mexico with $250,000 capital will not have as good a credit as the joint-stock bank in Ohio with $10,000,000. But when you put banks in competition with each other in selling their bonds you are putting the farmers into competition with each other.

Mr. LA FOLLETTE. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. LA FOLLETTE. The gentleman from Massachusetts said that the joint-stock bank could not sell a mortgage for over 5 per cent.

Mr. PHELAN. Oh, no; I did not say that. I said that the joint-stock banks could not issue a bond with a higher rate than 5 per cent, and the difference between the bond and the mortgage rate could not be in excess of 1 per cent.

Mr. LA FOLLETTE. I can not find anything here that they can not issue a bond at a higher rate than 5 per cent.

Mr. PHELAN. I am not talking about what they charge; I am talking about the rate of the bond that is in the bill.

Mr. MORGAN of Oklahoma. I say that you are introducing a variety of conditions throughout every department of the two systems, but who is to get the benefit out of that? Certainly not the farmer. We must remember that the farmers will be the ones that will have to pay all the expenses. A little capital of $250,000 will be put in in these joint-stock banks, and it will not go in until assured of proper dividends. Who pays the dividends? The borrowers pay them, as they are the ones who pay for the business they are to transact. It is not costing the men who own the capital a cent, but this is all contributed by the farmers. They are the ones who are interested and should be considered when we come to security of land institutions for the farmers of the United States.

Mr. RAGSDALE. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. RAGSDALE. There was a question asked as to a restriction of the interest rate. On page 101, section 3, it states the rate of interest charged for such loan shall not exceed 6 per cent per annum.

Mr. MORGAN of Oklahoma. Now, I want to come to one other point, because I can not spend all of my time on joint-stock banks. I believe if every man in this House fully understood the interest of the farmers of the United States it would strike that provision out. You remember at the close of the last session of the Sixty-third Congress a bill was brought in providing for two systems of banks, as we have here to-day. The gentleman from Ohio, Mr. Buckley, not a Member of the House at the present time, moved to strike from the bill the joint-stock land provision. After full and complete discussion the House went on record against the provision for joint-stock banks by a large vote, and so it should on this. I know and I have great respect for my friend from Indiana [Mr. Moss]. He has given a great deal of study to this question. He is honest in his views, but I can not agree with him. [Applause.]

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. GLASS. Mr. Chairman, I yield five minutes to the gentleman from Alabama [Mr. HEFLIN].

[Mr. HEFLIN addressed the committee. See Appendix.]

Mr. PLATT. Mr. Chairman, I yield 15 minutes to the gentleman from Michigan [Mr. SMITH].

Mr. SMITH of Michigan. Mr. Chairman, I acknowledge the importance of this act. I do not know whether it will accomplish the purposes claimed for it or not. One gentleman said it was provided for in the Democratic platform. I think he will find that the Democrats and Republicans and Progressives all declared for rural credits in their last political national platforms.

Mr. MORGAN of Oklahoma. The Republicans first.

Mr. SMITH of Michigan. The Republicans first, my friend informs me, of course; and a good deal has been taken from the provisions of the Republican platform, and the Democrats are all right in pursuing them. They will find many other good things in the Republican platform.

I had not expected that this measure would come on this afternoon, and what I shall say possibly will come from practical experience more than from a study of the measure. I see the bill has been changed a good deal since it was first introduced in the House and Senate, and as reported by the joint committee on rural credits. The first bill provided that a farmer could get a loan up to 50 per cent of the value of the farm upon a

mortgage. This provision now which comes in here from the Senate provides for 60 per cent of the value of the farm to be loaned upon a mortgage, plus 20 per cent of the value of the buildings furnishing the improvements, which is a considerable advance over what was originally provided. Now, the bill provides for a system of banks in the United States. I do not know whether or not those banks are necessary for the purpose of putting in operation the loaning of money to the farmers on real-estate mortgages. Why, under the provisions of this bill you cut off more than half the farmers. There are only but very few farmers who can qualify for money under this bill. The farmer must be, as I understand it, an actual resident upon the farm before he can qualify under the provisions of this law. And the farmer must have his farm half paid for.

Mr. MOSS of Indiana. Will the gentleman yield?

Mr. SMITH of Michigan. I will.

Mr. MOSS of Indiana. I would like to inform the gentleman that his interpretation of the bill is entirely too narrow. The bill refers to a person who intends to qualify, but there is no provision in the bill which requires him to reside on the farm.

Mr. SMITH of Michigan. I will state to the gentleman that the bill states that he must be in actual cultivation of that farm, or is immediately to commence cultivation on that farm. In the discussion of the bill in the Senate of the United States it was considered upon the theory that a man must be an actual resident upon the farm. Now, the farm-loan board, I presume, afterwards could make certain provisions or changes, but we are considering this bill the way it is now. The benefit that the farmer is going to get from the bill is so slight that it is going to be disappointing to the farmer, because there is not any farmer who has a farm half paid for—that is, a farm that would appeal to a person to loan money upon it—who can not go down to the bank and get a temporary loan of such an amount that will temporarily bridge him over. Why, do you know, my friends——

Mr. QUIN (interrupting). But do not they charge him a big rate of interest?

Mr. SMITH of Michigan. Let me tell you something: You can pass laws here until you get black in the face and you can not control the rate of interest. You can not find a political economist who ever wrote a book that said you could control the rate of interest by process of law. That is all right.

Mr. DAVENPORT. Will the gentleman yield?

Mr. SMITH of Michigan. I do.

Mr. DAVENPORT. I want to ask the gentleman if the difficulty experienced in borrowing money from local banks is not in the length of time for which you can procure the loan?

Mr. SMITH of Michigan. Let me say to the gentleman from Oklahoma that ordinarily the lender of money is only too happy to extend the time.

Mr. QUIN. Where is that place? I want to locate that place where the farmer can get those long-time loans.

Mr. STEELE of Iowa. Come out to Iowa.

Mr. SMITH of Michigan. I also extend you an invitation to come to Michigan. Let me say to the gentleman who asked where is that bank, that more than three-fourths of the money loaned upon farms to-day is loaned by banks, insurance companies, and so on, and I want to say to my good friend who a little while ago said the rate of interest was 9½ per cent——

Mr. DAVENPORT (interrupting). That probably is true, and I think I agree with the gentleman, in a great many of the older States, but in the Central and Western States that is not true.

Mr. SMITH of Michigan. And the Southern States.

Mr. DAVENPORT. And probably some of the Southern States, that you can not secure long-time loans on your real estate nor can you secure a reasonable rate of interest. In my State I think the average farm loan is from 7 to 8 per cent.

Mr. SMITH of Michigan. That is all right. My friend, the benefit your State will get under this is in the Government of the United States furnishing the money, and they can furnish it at 2 per cent or they can furnish it for nothing.

A MEMBER. I wish they would do it.

Mr. SMITH of Michigan. They can exempt it from interest or exempt it from any other taxation. You dwell in a section which considers this upon the theory they would have this money furnished by the Government in order to loan out to these farmers. I am not complaining about the benefit you gentlemen are going to get in the States where they have that high rate of interest if you can qualify. My good friends from the Southern States, the day is dawning for you. Let me tell you that in coming here to Washington I went through Arkansas and stopped along in Mississippi County. It is as level as a barn floor and the soil is black as the proverbial black hat.

There were not only rods but miles of beautiful crops growing there. A field would look almost like a snow bank. The cotton was being picked, and there were miles of rows of the finest corn that I ever saw. And those people out there were splendid people. The day is coming when that land there will be eagerly sought. It is very productive and is growing into one of the garden spots of the country.

Let me tell you another thing about Texas. My friend the gentleman from Mississippi [Mr. QUIN] lives near that State. The German Empire is only four-fifths the size of Texas. There is more arable land in Texas than in the German Empire. Sixty per cent of Texas is capable of producing crops, while only 48 per cent of Germany is subject to being tilled. And a benefit will come from that. I hope the benefit will come from the fact that you are to have this money. Germany supports a population of 60,000,000; the population of Texas is 4,500,000. Germany has 290 people to the square mile; Texas has 17. I will submit a proposition here and see whether it will come out. The bill provides that as soon as you have loaned $50,000 on mortgages you can issue bonds for a like amount. You loan that $50,000 from some central farm-loan bank. When that $50,000 is loaned I will take those mortgages and convert them into bonds, then I will sell those bonds and get $50,000 more in cash. Then I will loan that $50,000 on mortgages and again convert them into bonds, sell these bonds and get $50,000 more mortgages, and go on in an indiscriminate, endless chain. In this way we can loan all the money we want on mortgages from any of the central land banks in any of the divisions with $50,000. And you can turn your money and sell your bonds, and you only need $50,000 to make the first loan on mortgages, and that will be all the money you want to loan on all the mortgages offered.

Mr. QUIN. If that process will work out, what is the use of having any more money at all?

Mr. SMITH of Michigan. If you think it will not work out, figure it out and see how it will work.

Mr. MORGAN of Oklahoma. Will the gentleman yield?

Mr. SMITH of Michigan. Certainly.

Mr. MORGAN of Oklahoma. Is it not a fact that the landschaft will do better than that? They do not have even $50,000. They go on without any money at all.

Mr. SMITH of Michigan. Yes. The Federal Reserve System is helping the farmer out. You can loan one-third of your time deposits upon real estate, and if this Government is going to exempt the mortgages——

Mr. HASTINGS. That is limited to loans for five years, is it not?

Mr. SMITH of Michigan. You will never find a farmer who will come in and want a loan for more than five years. You will not get a farmer to come down there and make an application that must be considered by the farm-loan association if the association must send people out to examine the land, if that association must send an abstract up to the attorney to be examined, if the farmer must wait until the land will have been appraised, then when you get through with that farm-loan association it will take the papers and run them up to the farm-loan bank; and when the farm-loan bank sends an appraiser out to examine the land and make his report, then the farm-loan bank will send it up to the national farm-loan board and that board will examine it, and so on.

Let me tell you what the farmers do. The farmer after dinner goes out and cranks up his Ford self-starter. He will get his wife and put her in the automobile, and he will go down town to some bank or money lender and say that he wants $1,000 or $2,500. He can not get back home quick enough. He is usually in a hurry. He wants it that afternoon, and he gets it if he has got the proposition that you present here. He gets his money that afternoon.

Mr. HASTINGS. If the gentleman will permit me, will that system hurt that man at all?

Mr. SMITH of Michigan. Not at all. I do not see that it will. Now, that is one of the things I say. I do not know that it is going to hurt anything by having a bank on every four corners. But when I come up through places in the South and I see a farmer farming on the side of a mountain, to which he can hardly get up, and where he has to plow the land with a pickax and plant the seed with a shotgun, he does not know how much money he is going to get out of a loan on his farm.

Mr. GLASS. If the farmer can do what the gentleman says that he can do and get an automobile as easily as he says that he can, I am going to resign my seat in Congress and go to farming.

Mr. SMITH of Michigan. Well, I will say to the gentleman from Virginia that I do not know what kind of a farmer he

would make. He makes a pretty good Congressman. [Applause.]

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Michigan. Yes.

Mr. WINGO. Of course there are some farmers that belong to the class that the gentleman describes.

Mr. SMITH of Michigan. Oh, I beg the gentleman's pardon. I say that all farmers who can qualify under this bill come under that class. Every such farmer that comes to the bank and applies for the money can get the money.

Mr. WINGO. Of course the gentleman is not familiar with the farmers all over the United States. There is not any question but there are some portions of this country that are undeveloped and——

Mr. SMITH of Michigan. Yes; and they will not come under this bill.

Mr. WINGO. And where the lands are just as rich as the lands in Iowa.

Mr. SMITH of Michigan. Yes; they will be when the time comes.

Mr. WINGO. Now, in some portions of the country that are as yet undeveloped the farmers have no adequate credit facilities. Would the gentleman deny to those who are out on the border or frontier of agriculture, so to speak, adequate credit facilities?

Mr. SMITH of Michigan. Oh, not at all.

Mr. WINGO. Simply because some of the farmers of Iowa and Michigan own automobiles and have ample credit facilities, do you want to deny the less prosperous farmer in Texas and other States the right to proper credit facilities?

Mr. SMITH of Michigan. No. I would not deny it to him. If he will qualify he will get it under this bill.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. SMITH of Michigan. I ask unanimous consent, Mr. Chairman, to proceed for one minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. SMITH of Michigan. Let me read what is stated in this report here:

DIFFICULTY OF SECURING CAPITAL.

The farmer applies to the nearest bank for a loan and offers his farm as security. The banker makes excuses. He doesn't know the farmer; he doesn't know the value of his farm; he doesn't like to tie his demand deposits up in long-term loans; his commercial customers, who carry a substantial line of deposits, have the first claim. These excuses are well founded.

There may be additional excuses not so genuine, such as the scarcity of money, the hard hearts of the directors, unusual demands for loans, and the like. If the farmer gets a loan at all, he pays a high rate or he must be subject to foreclosure on short notice. He usually pays some one a large commission; he is subject frequently to substantial renewal fees; he is sometimes compelled to pay taxes on the mortgage as well as on the land; and he finds himself in the power of some hard-headed banker. He can not complain of this; it is the business of the banker to be hard-headed.—(H. Doc. No. 494, 64th Cong., 1st sess.)

Anybody who has any experience with farmers knows that the banker does not make such excuses. What do you think, gentlemen, of a person writing a report like that, about a farmer coming into a bank to borrow money on his farm and the banker makes such excuses and does not know the farmer? [Laughter.] If the banker does not know the farmer ten chances to one the farmer knows the banker. But as a matter of fact, the banker knows the farmer.

Mr. HEFLIN. The gentleman knows that the banker he speaks of, when the farmer comes in now and says, "I want to borrow some money for five years," would not listen to him?

Mr. SMITH of Michigan. Oh, no. He would get it for 5 years, and for 10, if he wanted it. Men who have experience with men who loan money know that lenders want it loaned out all the time, if the security is good. If the security was not good he would not get it at all under this bill, while the private lender sometimes is willing to take a chance on his friend.

Mr. HAUGEN. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Michigan. No; I regret I can not yield to my friend. The writer of this report says the banker does not know the value of the farm. What do you think of that? [Laughter.]

Mr. GLASS. What is the gentleman reading from?

Mr. SMITH of Michigan. From the report made by the Senator from New Hampshire [Mr. HOLLIS], who reported this bill (S. 2986) to the Senate.

The CHAIRMAN. The time of the gentleman from Michigan has again expired. The time is controlled by the gentleman from Virginia [Mr. GLASS] and the gentleman from California [Mr. HAYES].

Mr. GLASS. I ask unanimous consent, Mr. Chairman, that the gentleman may continue for one minute.

Mr. MANN. The time has been fixed by the House.

Mr. SMITH of Michigan. This report says:

The banker does not like to tie his demand deposits up in long-term loans; his commercial customers, who carry a substantial line of deposits, have the first claim. These excuses are well founded.

[Laughter.]

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

Mr. SMITH of Michigan. All I want to say is that the hearts of the directors of country banks are not hard. I wish I had time to tell you more about that report. I thank you. [Applause.]

Mr. GLASS. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GARNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes, and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. FAIRCHILD, for one week, on account of illness.

To Mr. HUDDLESTON, for 10 days, beginning Monday, May 8, on account of important business.

ENROLLED BILLS SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 3575. An act to amend section 5234 of the Revised Statutes of the United States so as to permit the Comptroller of the Currency to deposit upon interest the assets of insolvent national banks in other national banks of the same or of an adjacent city or town.

The SPEAKER announced his signature to enrolled bills of the following titles:

S. 4726. An act to permit issue by the supply departments of the Army to certain military schools and colleges;

S. 4603. An act to authorize the Jackson Highway Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Tombigbee River at Princes Lower Landing, near Jackson, Ala.; and

S. 4432. An act to amend section 8 of an act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 12207. An act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1917, and for other purposes; and

H. R. 759. An act to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof.

INDIAN APPROPRIATION BILL.

Mr. CARTER of Oklahoma, from the Committee on Indian Affairs, presented for printing under the rule the conference report and statement on the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917, as follows:

CONFERENCE REPORT (NO. 651).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 4, 6, 8, 11, 12, 15, 23, 30, 31, 32, 38, 40, 43, 44, 45, 49, 69, 73, 77, 88, 91, 92, 100, 108, 117, 118, 119, 120, 123, 133, 135, 147, and 149.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 5, 9, 13, 16, 17, 18, 19, 20, 21, 22, 24, 25, 27, 28, 29, 33, 39, 46, 48, 50, 51, 52, 53, 54, 56, 58, 60, 61, 62, 63, 64, 66, 67, 68, 70, 71, 76, 80, 81, 85, 86, 89, 90, 93, 94, 96, 98, 99, 101, 103, 104, 106, 107, 109, 111, 112, 114, 115, 121, 122, 125, 126, 128, 130, 131, 134, 136, 138, 139, 140, 141, 143, 144, 145, 148, 150, 151, 152, 153, 154, and 155, and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In line 7 of said amendment strike out the word "the" and insert in lieu thereof the word "Indian," and in line 8 of said amendment strike out the word "the" and insert in lieu thereof the word "such"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In line 1 of said amendment strike out the word "to" and insert in lieu thereof the following: "$5,000 of which shall"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following: "*Provided further*, That not more than $200,000 of the amount herein appropriated may be expended for the tuition of Indian children enrolled in the public schools"; and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "Two permanent warehouses"; and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: In line 1 of said amendment strike out the words "which has been," and in line 2 of said amendment strike out the words "heretofore or"; and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"For beginning the construction by the Indian Service of a dam with a bridge superstructure and the necessary controlling works for diverting water from the Gila River for the irrigation of Indian land and Indian allotments on the Gila River Indian Reservation, Ariz., as recommended by the Board of Engineers of the United States Army in paragraph 217 of its report to the Secretary of War of February 14, 1914 (H. Doc. No. 791), $75,000, to be immediately available and to remain available until expended, reimbursable as provided in section 2 of the act of August 24, 1912 (37 Stat. L., p. 522), the total cost not to exceed $200,000."

And the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For beginning the construction by the Indian Service of a diversion dam and necessary controlling works for diverting water from the Gila River at a site above Florence, Ariz., as estimated by the Board of Engineer Officers of the United States Army in paragraph 138 of its report to the Secretary of War of February 14, 1914 (H. Doc. No. 791), $75,000, to remain available until expended, the total cost not to exceed $175,000: *Provided*, That said dam shall be constructed as a part of a project for the irrigation from the natural flow of the Gila River of Indian lands on the Gila River Indian Reservation and private and public lands in Pinal County, Ariz.: *And provided further*, That the water diverted from the Gila River by said diversion dam shall be distributed by the Secretary of the Interior to the Indian lands of said reservation and to the private and public lands in said county in accordance with the respective rights and priorities of such lands to the beneficial use of said water as may be determined by agreement of the owners thereof with the Secretary of the Interior or by a court of competent jurisdiction: *And provided further*, That the construction charge for the actual cost of said diversion dam and other works and rights shall be divided equitably by the Secretary of the Interior between the Indian lands and the private and public lands in said county; and said cost as fixed for said Indian lands shall be reimbursable as provided in section 2 of the act of August 24, 1912 (37 Stat. L., p. 522); but the construction charge as fixed for the private and public lands in said county shall be paid by the owner or entryman in accordance with the terms of an act extending the period of payment under reclamation projects, approved August 13, 1914 (38 Stat. L., p. 686): *And provided further*, That said project shall only be undertaken if the Secretary of the Interior shall be able to make or provide for what he shall deem to be satisfactory adjustments of the rights to the water to be diverted by said diversion dam or carried in canals, and satisfactory arrangements for the inclusion of lands within said project and the purchase of property rights which he shall deem necessary to be acquired, and shall determine and declare said project to be feasible."

And the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For extension of the Ganado irrigation project on the Navajo Indian Reservation in Arizona for the irrigation of approximately 600 acres of land in addition to the area to be irrigated by said project, as authorized in section 2 of the act of August 24, 1912, $20,000; and for maintenance and operation of the project, $3,000; in all, $23,000, reimbursable and to remain available until expended."

And the Senate agree to the same.

Amendment numbered 37: That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment as follows: In line 16 of said amendment strike out the figures "$15,000" and insert in lieu thereof the following: "$10,000"; and the Senate agree to the same.

Amendment numbered 41: That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 100 Indian pupils at the Greenville Indian School, California, including pay of superintendent, $18,400; for general repairs and improvements, including purchase of additional land for school farm, $8,000; in all, $26,400."

And the Senate agree to the same.

Amendment numbered 42: That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"For the improvement and construction of roads and bridges on the Yuma Indian Reservation in California, $10,000, to be immediately available, reimbursable to the United States by the Indians having tribal rights on said reservation."

And the Senate agree to the same.

Amendment numbered 47: That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $10,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Potawatomi Indians in the State of Kansas, and to be expended under his direction for the construction of bridges across the Big Soldier Creek and Little Soldier Creek, within the Potawatomi Indian Reservation, Jackson County, Kans.: *Provided*, That no part of the money herein appropriated shall be expended until the Secretary of the Interior shall have obtained from the proper authorities of the county of Jackson satisfactory guaranties of the payment by the said county of Jackson of at least one-half of the cost of said bridges, and that the said proper authorities of the said county of Jackson shall assume full responsibility for and will at all times maintain and repair said bridges: *And provided further*, That any and all expenses above the amount herein named in connection with the building and maintaining of said bridges shall be borne by the said county of Jackson: *And provided further*, That this appropriation shall not become effective until approved by an Indian council to be called for that purpose."

And the Senate agree to the same.

Amendment numbered 55: That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment as follows: Strike out the following language of the amendment: "Hereafter on ceded lands in the State of Minnesota embraced within the provisions of the law entitled 'An act for the relief and civilization of the Chippewa Indians in the State of Minnesota,' approved January 14, 1889, the minerals in and mineral rights pertaining to any of the lands, the cession of which was provided for in said act, and for which the United States has not conveyed title, shall be and remain in and are reserved for the use and benefit of the

Chippewa Indians in the State of Minnesota"; and the Senate agree to the same.

Amendment numbered 57: That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same with an amendment as follows: In line 6 of said amendment strike out the following: "at Keewaton Academy, Wisconsin," and the comma; and the Senate agree to the same.

Amendment numbered 59: That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment as follows: In line 1 of said amendment, after the word "balance," insert the following: "of $3,436.03"; and the Senate agree to the same.

Amendment numbered 65: That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment as follows: In line 2 of said amendment strike out the word "section," and in line 3 strike out the word "one," and insert in lieu thereof the words "this act"; and the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In line 2 of said amendment strike out the figures "$50,000," and insert in lieu thereof "$25,000"; and the Senate agree to the same.

Amendment numbered 74: That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The work to be done with the amounts herein appropriated for the completion of the Blackfeet, Flathead, and Fort Peck projects may be done by the Reclamation Service on plans and estimates furnished by that service and approved by the Commissioner of Indian Affairs: *Provided*, That not to exceed $15,000 of applicable appropriations made for the Flathead, Blackfeet, and Fort Peck irrigation projects shall be available for the maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles for official use upon the aforesaid irrigation projects: *Provided further*, That not to exceed $7,500 may be used for the purchase of horse-drawn passenger-carrying vehicles, and that not to exceed $1,500 may be used for the purchase of motor-propelled passenger-carrying vehicles."

And the Senate agree to the same.

Amendment numbered 75: That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the Secretary of the Interior be, and he is hereby, authorized and directed to announce, at such time as in his opinion seems proper, the charge for construction of irrigation systems on the Blackfeet, Flathead, and Fort Peck Indian Reservations in Montana, which shall be made against each acre of land irrigable by the systems on each of said reservations. Such charges shall be assessed against the land irrigable by the systems on each said reservation in the proportion of the total construction cost which each acre of such land bears to the whole area of irrigable land thereunder.

"On the 1st day of December after the announcement by the Secretary of the Interior of the construction charge the alottee, entryman, purchaser, or owner of such irrigable land which might have been furnished water for irrigation during the whole of the preceding irrigation season, from ditches actually constructed, shall pay to the superintendent of the reservation where the land is located, for deposit to the credit of the United States as a reimbursement of the appropriations made or to be made for construction of said irrigation systems, 5 per cent of the construction charged fixed for his land, as an initial installment, and shall pay the balance of the charge in 15 annual installments, the first 5 of which shall each be 5 per cent of the construction charge and the remainder shall each be 7 per cent of the construction charge. The first of the annual installments shall become due and payable on December 1 of the fifth calendar year after the initial installment: *Provided*, That any allottee, entryman, purchaser, or owner may, if he so elects, pay the whole or any part of the construction charges within any shorter period: *Provided further*, That the Secretary of the Interior may, in his discretion, grant such extension of the time for payments herein required from Indian allottees or their heirs as he may determine proper and necessary, so long as such land remains in Indian title.

"That the tribal funds heretofore covered into the Treasury of the United States in partial reimbursement of appropriations made for constructing irrigation systems on said reservations shall be placed to the credit of the tribe and be available for such expenditure for the benefit of the tribe as Congress may hereafter direct.

"The cost of constructing the irrigation systems to irrigate allotted lands of the Indians on these reservations shall be reimbursed to the United States as hereinbefore provided, and no further reimbursements from the tribal funds shall be made on account of said irrigation works except that all charges against Indian allottees or their heirs herein authorized, unless otherwise paid, may be paid from the individual shares in the tribal funds, when the same is available for distribution, in the discretion of the Secretary of the Interior.

"That in addition to the construction charges every allottee, entryman, purchaser, or owner shall pay to the superintendent of the reservation a maintenance and operation charge based upon the total cost of maintenance and operation of the systems on the several reservations, and the Secretary of the Interior is hereby authorized to fix such maintenance and operation charge upon such basis as shall be equitable to the owners of the irrigable land. Such charges when collected shall be available for expenditure in the maintenance and operation of the systems on the reservation where collected: *Provided*, That delivery of water to any tract of land may be refused on account of nonpayment of any charges herein authorized, and the same may, in the discretion of the Secretary of the Interior, be collected by a suit for money owed: *Provided further*, That the rights of the United States heretofore acquired to water for Indian lands referred to in the foregoing provision, namely, the Blackfeet, Fort Peck, and Flathead Reservation land, shall be continued in full force and effect until the Indian title to such land is extinguished.

"That the Secretary of the Interior be, and he is hereby, authorized to prescribe such rules and regulations and issue such notices as may be necessary to carry into effect the provisions of this act, and he is hereby authorized and directed to determine the area of land on each reservation which may be irrigated from constructed ditches and to determine what allowance, if any, shall be made for ditches constructed by individuals for the diversion and distribution of a partial or total water supply for allotted or surplus unallotted land: *Provided*, That if water be available prior to the announcement of the charge herein authorized, the Secretary of the Interior may furnish water to land under the systems on the said reservations, making a reasonable charge therefor, and such charges when collected may be used for construction or maintenance of the systems through which such water shall have been furnished."

And the Senate agree to the same.

Amendment numbered 78: That the House recede from its disagreement to the amendment of the Senate numbered 78, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "for the purpose of making necessary repairs on the Government bridge across the Niobrara River near Niobrara, Nebr.; also to reconstruct one span of 90 feet over the back channel of the Niobrara River at the same point, the sum of $6,500; said sum to be expended under the direction of the Secretary of the Interior"; and the Senate agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$91,100"; and the Senate agree to the same.

Amendment numbered 82: That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 290 Indian pupils at the Indian school at Carson City, Nev., including pay of superintendent, $50,430; for general repairs and improvements, $8,000; for irrigating school farm, $4,000; in all $62,430."

And the Senate agree to the same.

Amendment numbered 83: That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: In line 4 of the amendment, after the figures "$15,000," strike out the period, insert a colon and the following: "*Provided*, That no part of this appropriation shall be expended for mileage, salaries, or expenses of employees"; and the Senate agree to the same.

Amendment numbered 84: That the House recede from its disagreement to the amendment of the Senate numbered 84, and agree to the same with an amendment as follows: In line 2 of the amendment strike out the following: "and to remain available until expended"; and the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 350 Indian pupils at the Indian school at Santa Fe, N. Mex., and for pay of superintendent, $59,550; for general repairs and improvements, $6,000; for water supply, $1,600; for the construction of an assembly hall and gymnasium, $25,000; in all, $92,150."

And the Senate agree to the same.

Amendment numbered 95: That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"For support and education of 220 Indian pupils at the Indian school, Wahpeton, N. Dak., and pay of superintendent, $38,540; for general repairs and improvements, $5,000; for new school building, $20,000; in all, $63,540."

And the Senate agree to the same.

Amendment numbered 97: That the House recede from its disagreement to the amendment of the Senate numbered 97, and agree to the same with an amendment as follows: Strike out all of said amendment and insert the following:

"To enable the Secretary of the Interior to redeem a mortgage on the allotment selection of Starr McGillis, a Turtle Mountain Chippewa Indian, described as the northwest quarter of section 34, township 164 north, range 70 west of the fifth principal meridian, North Dakota, $1,500, or so much thereof as may be necessary."

And the Senate agree to the same.

Amendment numbered 102: That the House recede from its disagreement to the amendment of the Senate numbered 102, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the unexpended balance of $9,533.38 is hereby reappropriated and made available for continuing the relief and settlement of the Apache Indians formerly confined as prisoners of war on the Fort Sill Military Reservation, Okla., for the purchase of allotments in Oklahoma, as provided for in the act of June 30, 1913 (38 Stat. L., p. 77), for the three adult heads of families who have not heretofore received allotments."

And the Senate agree to the same.

Amendment numbered 105: That the House recede from its disagreement to the amendment of the Senate numbered 105, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "except that the Secretary of the Interior is hereby authorized, within 30 days after the passage of this act, to investigate claims not to exceed $1,950 growing out of contracts alleged to be in existence between John Calvin Gray, William T. Lancaster, Arthur Jennings, and Clyde Jennings, as enrolled members of the Choctaw or Chickasaw Nations, and Henry W. Blair, Kappler & Merillat, James K. Jones, Charles M. Fechheimer, and Eugene Hamilton, as attorneys; and, in case such claims are found to be valid and the contracts approved in accordance with existing law, the said Secretary of the Interior may, in his discretion, apply any amounts that may be found due under this paragraph to the aforesaid enrolled members of the Choctaw or Chickasaw Nations to the payment of such fee, but the amounts due hereunder to other enrolled members of the Choctaw and Chickasaw Nations shall not be held in abeyance to this claim but shall be paid promptly without reference to same"; and the Senate agree to the same.

Amendment numbered 110: That the House recede from its disagreement to the amendment of the Senate numbered 110, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$15,000"; and the Senate agree to the same.

Amendment numbered 113: That the House recede from its disagreement to the amendment of the Senate numbered 113, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "$12,000; for remodeling sewer system, $5,000; for three high-pressure steam boilers, $7,200: *Provided*, That the unused balance of $9,830 of the amount appropriated by the act of August 1, 1914 (38 Stat. L., p. 602), and an additional amount of $2,500 may be expended for an addition to the assembly hall; in all, $128,700"; and the Senate agree to the same.

Amendment numbered 116: That the House recede from its disagreement to the amendment of the Senate numbered 116, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $3,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Klamath Indians of the State of Oregon, and use the same for the construction of a bridge across the Williamson River, on the Klamath Indian Reservation, Oregon, under such rules and regulations as he may prescribe."

And the Senate agree to the same.

Amendment numbered 124: That the House recede from its disagreement to the amendment of the Senate numbered 124, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following: "$67,500: *Provided*, That the unexpended balance of $1,607.44 appropriated by the act approved August 1, 1914, for repairing buildings and replacing equipment destroyed or damaged by the tornado of June 10, 1914, at Flandreau Indian School, S. Dak., is hereby reappropriated and made immediately available for the purchase and installation of a water tank and the purchase of dairy cattle for said school"; and the Senate agree to the same.

Amendment numbered 127: That the House recede from its disagreement to the amendment of the Senate numbered 127, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized and directed to cause investigation to be made as to the probable cost of providing on the various Sioux Indian Reservations, adequate school facilities for the children of the Sioux Tribes who are now without Government or public facilities on the respective reservations, and to make a report thereof to Congress on or before the first Monday in January, 1917, together with a complete and detailed statement of the per capita cost per annum, including mileage paid, now expended for the education of the Sioux Indian children in all the schools, whether on or off the respective reservations, and there is hereby appropriated for the expense of such investigation and report the sum of $1,000, or so much thereof as may be necessary, to be immediately available."

And the Senate agree to the same.

Amendment numbered 129: That the House recede from its disagreement to the amendment of the Senate numbered 129, and agree to the same with an amendment as follows: In line 7 of said amendment, after the word "highway," insert a comma and the following: "reimbursable out of any funds now or hereafter placed to the credit of said Indians in the Treasury of the United States"; and the Senate agree to the same.

Amendment numbered 132: That the House recede from its disagreement to the amendment of the Senate numbered 132, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States the sum of $1,000, or so much thereof as may be necessary, of the funds on deposit to the credit of the Uintah Tribe of Indians, in the State of Utah, and to use the same to protect the north abutment of the Government bridge at Myton, Utah, under such rules and regulations as he may prescribe, said sum to be immediately available."

And the Senate agree to the same.

Amendment numbered 137: That the House recede from its disagreement to the amendment of the Senate numbered 137, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That the Secretary of the Interior be, and he hereby is, authorized to sell and dispose of not to exceed 20 acres of that portion of the lands situated on the north side of and within the limits of the abandoned Fort Spokane Military Reservation, State of Washington, not necessary for hospital purposes, as provided for in the act approved August 1, 1914 (38 Stat. L., p. 584), at not less than the appraised value thereof, and to place the proceeds thereof in the Treasury of the United States to the credit of the Spokane Indians in said State."

And the Senate agree to the same.

Amendment numbered 142: That the House recede from its disagreement to the amendment of the Senate numbered 142, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$5,000"; and the Senate agree to the same.

Amendment numbered 146: That the House recede from its disagreement to the amendment of the Senate numbered 146, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"That without bias or prejudice to the rights or interests of any party to the litigation now pending, the Secretary of the Interior be, and he hereby is, authorized to sell the timber on the so-called 'school lands' and 'swamp lands' within the boundaries of the Bad River and Lac du Flambeau Indian Reservations in Wisconsin, and to which the State of Wisconsin has asserted a claim; to keep a separate account of the proceeds of such sale with each legal subdivision of such land and to deposit the said proceeds at interest in a national bank, bonded for the

safe-keeping of individual Indian moneys, to be paid over, together with the interest thereon, to the party or parties who shall finally be adjudged to be entitled to such fund: *Provided*, That the consent of the State or parties claiming title therefrom be obtained before any such sale shall be made."

And the Senate agree to the same.

Amendment numbered 156: That the House recede from its disagreement to the amendment of the Senate numbered 156, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"SEC. 27. On the first Monday in December, 1917, and annually thereafter, the Secretary of the Treasury shall transmit to the Speaker of the House of Representatives estimates of the amounts of the receipts to, and expenditures which the Secretary of the Interior recommends to be made for the benefit of the Indians from, all tribal funds of Indians for the ensuing fiscal year; and such statement shall show (first) the total amounts estimated to be received from any and all sources whatsoever, which will be placed to the credit of each tribe of Indians, in trust or otherwise, at the close of the ensuing fiscal year, (second) an analysis showing the amounts which the Federal Government is directed and required by treaty stipulations and agreements to expend from each of said funds or from the Federal Treasury, giving references to the existing treaty or agreement or statute, (third) the amounts which the Secretary of the Interior recommends to be spent from each of the tribal funds held in trust or otherwise, and the purpose for which said amounts are to be expended, and said statement shall show the amounts which he recommends to be disbursed (a) for per capita payments in money to the Indians, (b) for salaries or compensation of officers and employees, (c) for compensation of counsel and attorney fees, and (d) for support and civilization: *Provided*, That hereafter no money shall be expended from Indian tribal funds without specific appropriation by Congress except as follows: Equalization of allotments, education of Indian children in accordance with existing law, per capita and other payments, all of which are hereby continued in full force and effect: *Provided further*, That this shall not change existing law with reference to the Five Civilized Tribes."

And the Senate agree to the same.

Amendment numbered 157: That the House recede from its disagreement to the amendment of the Senate numbered 157, and agree to the same with an amendment as follows: In lieu of the amendment proposed insert the following:

"SEC. 28. That on or before the 31st day of December, 1916, the Bureau of Efficiency shall prepare and submit to the Secretary of the Interior a system of bookkeeping and accounting for the Bureau of Indian Affairs that will enable the said Secretary, on or before July 1, 1917, to meet the requirements of section 26 of the Indian appropriation act approved June 30, 1913 (38 Stat. L., p. 103)."

And the Senate agree to the same.

STATEMENT.

The effect of the recession of the House conferees on the amendments on which they have unqualifiedly receded is as follows:

No. 1. Makes the reimbursable appropriation for repairs and maintenance of irrigation ditches available until expended.

No. 5. Increases limit of cost of hospitals from $15,000 to $17,500, which are now under construction.

No. 9. Strikes out the word "and" and inserts the word "or" to include blind children so they can receive benefit of the fund to educate Indian children.

No. 13. Provides that hereafter Indian farmers must hold and file a certificate of competency from some college recognized before employment in the service.

No. 16. Increases the reimbursable appropriation for determining heirs of deceased Indian allottees $10,000.

No. 17. Permits the use of $25,000 of the reimbursable appropriation for determining heirs of deceased Indian allottees for employment of clerks in the Indian Office here.

No. 18. Corrects total in accordance with amendment 16.

No. 19. Strikes out the word "heir" and insert "heirs."

No. 20. Places a limit of value of $250 or more upon an heirship in order to charge the fee for determining the heirs.

No. 21. Permits the partition of an allotment of a deceased Indian regardless of competency of heirs.

No. 22. Permits extension of trust period specified in patent to incompetent heirs if necessary.

No. 24. When an Indian allottee by reason of old age or incapability can not personally occupy their allotment that is susceptible of irrigation, the Secretary of the Interior may, in his discretion, lease said allotment for a term not to exceed 10 years for benefit of said Indian.

No. 25. Any Indian who is mentally or physically incapable of managing his or her affairs may apply to Secretary of Interior, who may, in his discretion, withdraw from the Treasury any part of said Indian's pro rata share of funds to their credit and use for their benefit.

No. 27. An appropriation of $2,000 to pay Charles J. Kappler for compiling, annotating, and indexing the third volume of Indian Laws and Treaties.

No. 28. Provides that all bidders for supplies for goods furnished the Indian Service may deposit a certified check or approved bond to guarantee the fulfillment of contract instead of the money in amounts exceeding $5,000.

No. 29. Increases the appropriation $3,500 for the purchase of additional land adjacent to the Phoenix (Ariz.) Indian School.

No. 33. Strikes out the words "to remain available until expended."

No. 39. Makes an appropriation of $3,000 for preservation and repaid of prehistoric pueblo ruins and cliff dwellings in Arizona, under supervision of the Smithsonian Institution.

No. 46. Provides for an appropriation of $8,000 for erection of a barn at Haskell Institute, Lawrence, Kans.

No. 48. For traveling and incidental expenses amounting to $250, to Joseph Bradley, for appearing before Congress in behalf of Indians in Michigan.

No. 50. An appropriation of $3,000 to improve road and to blast out and deepen the ditch and creek leading to the Pipestone Indian School in Minnesota.

No. 51. Provides that not to exceed $60,000 of the $185,000 withdrawn from the trust funds of the Chippewas in Minnesota, and one-fourth of the interest on said tribal funds, may be used for school purposes and compensation of employees, and that $10,000 may be used for road improvements, and that $10,000 may be used for the installation of an electric-light plant at White Earth Agency, provided the residents pay a proportionate share.

No. 52. Provides for sale and conveyance at not less than appraised value of certain lands to independent school district 1 of Mahnomen County, Minn.

No. 53. Provides for the issuance of a fee patent to 40 acres of land on the Nett Lake Indian Reservation in Minnesota to the Methodist Episcopal Church.

No. 54. Appropriates not to exceed $25,000 from amounts derived from sale of timber of the Chippewa Indians in Minnesota, for payment of scalers and check scalers.

No. 56. Appropriates $6,000 out of tribal funds of the Chippewa Indians to pay expenses of general council of said tribe to meet in July, 1916.

No. 58. Amends the act of June 30, 1913 (38 Stat. L., p. 89), by appointing an Assistant Attorney General instead of a selection to be made by the Attorney General.

No. 60. Provides for the completion of the enrollment of allottees within the White Earth Reservation in Minnesota and appropriates $5,000 for that purpose.

No. 61. Provides for the establishment and administration of a forest reserve and for sale of timber within the Red Lake Indian Reservation in Minnesota.

No. 62. That lands within said Red Lake Indian Forest Reserve not covered with merchantable timber and suited for agricultural purposes and that front lake shores may be allotted to individual Red Lake Indians under certain conditions.

No. 63. Authorizes the Secretary of the Interior to issue permits or grant leases on such lands in said forest reserve covered in amendment 61, for a limited time.

No. 64. Authorizes the Secretary of the Interior to select not exceeding 200 acres in sections 20, 21, 28, and 29 for town-site purposes and to be held subject to future legislation of Congress.

No. 66. Authorizes investigation of condition of Indians living in Mississippi and approprates $1,000 for that purpose.

No. 67. Corrects secton number.

No. 68. Increases appropriation for civilization of Indians at Flathead Agency, Mont., from $14,000 to $20,000 and limits amount to expend in salaries to not exceeding $4,500.

No. 70. Appropriates $750,000 (reimbursable) for continuing construction of the irrigation system on the Flathead Indian Reservation, Mont.

No. 71. Appropriates $100,000 (reimbursable) for continuing construction of the irrigation systems on the Fort Peck Indian Reservation, Mont.

No. 76. Corrects section number.

No. 80. Is a reimbursable appropriation of $30,000 to pay drainage assessments and grant right of way for location of drainage ditches on lands belonging to Omaha and Winnebago Indians in Dixon, Wayne, and Thurston Counties, Nebr.

No. 81. Corrects section number.

No. 85. Corrects section number.

No. 86. Adds the words "in the vicinity of," so that additional land either adjoining or in the vicinity of may be purchased as a school farm for the Indian School at Albuquerque, N. Mex.

No. 89. Corrects section number.

No. 90. Corrects section number.

No. 93. Corrects section number.

No. 94. Makes the appropriation of $4,000 for sinking wells and improving the water system at the Fort Totten Indian School, North Dakota, immediately available.

No. 96. Authorizes the Secretary of the Interior from time to time within his discretion to withdraw from the Treasury money derived from sale of surplus lands and any interest thereon accrued belonging to the Fort Berthold Indians in North Dakota and distribute same per capita, or where any Indian is incompetent said share may be withheld and deposited in some bank and used for benefit of said incompetent Indian.

No. 98. Is an appropriation of $1,497.44 to reimburse Benson County, N. Dak., for caring for certain insane Indians.

No. 99. An appropriation of $100 for the erection of a headstone to mark the grave of Scarlet Crow, a Sioux Indian chief.

No. 101. Corrects section number.

No. 103. Corrects section number.

No. 104. An increase of $10,000 for expenses and administration of affairs of the Five Civilized Tribes and makes it immediately available.

No. 106. Authorizes the Secretary of the Interior to make a per capita payment of $300 to each Seminole Indian in Oklahoma, same to be paid out of their tribal or trust funds.

No. 107. An appropriation of $275,000 for the benefit and aid of the common schools in the Cherokee, Creek, Choctaw, Chickasaw, and Seminole Nations, and the Quapaw Agency in Oklahoma.

No. 109. Authorizes the Secretary of the Interior to use tribal funds of the Choctaws, Chickasaws, Creeks, and Seminoles, Oklahoma, for school purposes.

No. 111. Authorizes a settlement of a compromise of a suit between the United States and E. Dowden in regard to the Tuttle town site, Oklahoma.

No. 112. Corrects section number.

No. 114. Provides that the money derived from sale of lands belonging to Indians on the Siletz Indian Reservation, in Oregon, may be paid out to said Indians, share and share alike.

No. 115. Permits the withdrawal of not exceeding $1,000 from tribal funds of the Klamath Indians in Oregon, to pay the expenses of two delegates elected by their council to come to Washington.

No. 121. Corrects section number.

No. 122. Corrects section number.

No. 125. Strikes out the word "boiler" and inserts the word "boilers," to be installed at the Indian School, Pierre, S. Dak.

No. 126. Increases the appropriation $5,000 for the construction of a barn at the Indian School, Pierre, S. Dak., and corrects total.

No. 128. Corrects section number.

No. 130. An appropriation of $1,684 to reimburse the board of education of Box Elder County, State of Utah, for education of 23 Indian pupils during the years 1913 and 1914, and for the education of 21 pupils during the years 1914 and 1915.

No. 131. An appropriation of $832 for the education of 22 Indian pupils at Washakie, Box Elder County, Utah, for the years 1915 and 1916.

No. 134. Corrects section number.

No. 136. A reimbursable appropriation of $100,000 to pay the third installment for water supply of 40 acres of each Indian allotment on the Yakima Indian Reservation, in the State of Washington.

No. 138. Authorizes the Secretary of the Interior to lease for mining purposes the unallotted mineral lands on the diminished Spokane Reservation, in Washington.

No. 139. An appropriation, reimbursable, of $95,000 and authorizes the Secretary of the Interior to negotiate and pay for water rights for lands heretofore allotted to Indians situated within the boundaries of the West Okanogan Valley irrigation district, Okanogan County, Wash.

No. 140. Corrects section number.

No. 141. This amendment is intended to provide an appropriation to pay certain members of the Stockbridge and Munsee Tribe of Indians enrolled under the act of March 3, 1893 (37 Stat. L., 744), the amount of payments made prior to their respective enrollments. Section 6 of the act of February 6, 1871, provided for the determination of the persons who were members of the Stockbridge and Munsee Tribe and their future relations to the Government. Two rolls were prepared, one containing Indians who it was thought desired to separate their relations from the tribe and become citizens and the other those who desired to retain their tribal character and remain under the guardianship of the Government. It subsequently appeared that some of those Indians who were placed on the first roll did not desire to sever their relations with the tribe, and they were again enrolled under the provisions of the act of March 3, 1893 (37 Stat. L., 744–745).

No. 143. In order to train Indians in the use and handling of money, not exceeding $25,000 of the appropriation allowed may be paid them per capita or deposited in some bank for their use and benefit under such rules as the department may prescribe.

No. 144. That no lands of the Menominee Indians in Wisconsin shall be cleared for agricultural purposes, excepting such lands as have been heretofore completely cut over.

No. 145. Amends the act of March 28, 1908, by permitting the Secretary of the Interior to sell lumber, laths, shingles, crating, ties, piles, poles, posts, bolts, logs, bark, pulp, and other materials, under such rules as he may prescribe, and deposit the money in the Treasury for the benefit of the Menominee Indians in Wisconsin.

No. 148. Provides for the granting of flowage rights over unallotted Indian lands under rules and regulations prescribed by the Secretary of the Interior and consent of Indians, and the leasing of the allotted lands with consent of allottee for flowage and storage reservoir purposes, and allottee to determine, subject to approval of Secretary of the Interior, as to consideration therefor.

No. 150. A reimbursable appropriation of $6,500 for the completion of a road on the Red Cliff Reservation, in Wisconsin.

No. 151. Corrects section number.

No. 152. Reduces the appropriation 66 cents for repairs at the abandoned military post of Fort Washakie, Wyo.

No. 153. To enable the Secretary of the Interior to prepare and submit to Congress plans and estimates of cost for completing the irrigation of all irrigable lands in the Shoshone or Wind River Reservation, in Wyoming, to also include in the estimates for the ceded lands within said reservation.

No. 154. Provides an appropriation of $5,000 to carry the provisions of amendment No. 153 into effect.

No. 155. For payment of salary and expenses of Joseph H. Norris as supervisor of Indian schools from October 21 to November 11, 1912, $257.

On the following amendments the House conferees receded with modifying or substitute amendments, to wit:

No. 2. Makes the provisions of sections 2140 and 2141, Revised Statutes, apply to beer as an intoxicating liquor, and the possession of intoxicating liquor in an Indian country prima facie evidence of unlawful introduction.

No. 7. Makes $5,000 of the appropriation for maintenance of the sanatoria for the Choctaw and Chickasaw Indians immediately available.

No. 10. Provides that $200,000 of the appropriation for day and industrial schools may be expended for tuition of Indian pupils in public schools.

No. 14. Provides for two permanent warehouses for use of Indian Service.

No. 26. Is an appropriation of $100,000 to reimburse Indians for live stock that may be hereafter destroyed on account of dourine.

No. 34. For beginning the construction of a dam with bridge superstructure for diverting the water of the Gila River in Arizona for irrigating Indian lands on the Gila River Indian Reservation. Reduces appropriation from $200,000 to $75,000 and limits the cost of said work to $200,000.

No. 35. For beginning the construction of a diversion dam and necessary canals in Pinal County, Ariz., at or near Florence, for irrigation of Indian lands. Reduces amount appropriated from $175,000 to $75,000 and limits cost of work to $175,000.

No. 36. For extension of the Ganado irrigation project in Arizona and makes it reimbursable.

No. 37. An appropriation of $10,000 for the purpose of making investigation, survey, and cost of practicable means of holding the Gila River in its channel in Graham County, Ariz.

No. 41. Increases the number of pupils, also appropriation for care of said increase allowed, and permits the purchase of additional land for school farm at the Indian school in Greenville, Cal.

No. 42. Makes the appropriation for improvement and construction of roads on the Yuma Indian Reservation in California reimbursable.

No. 47. Authorizes the Secretary of the Interior to withdraw from the tribal funds on deposit in the Treasury to the credit of the Potawatomi Indians the sum of $10,000 for the construction of a bridge across the Big and Little Soldier Creeks on their said reservation.

No. 55. Strikes from the bill the entire paragraph.

No. 57. Strikes from the bill the words "Keewaton Academy, Wisconsin."

No. 59. Makes the unexpended balance of $3,436.03 available for payment of expenses incurred in preparing a roll of the Indians within the White Earth Reservation, Minn.

No. 65. Provides for sale of timber on lands of the Red Lake Indian Reservation outside of the forest reserve created by amendment No. 61.

No. 72. Decreases the reimbursable appropriation for continuing construction of the irrigation systems on the Blackfeet Indian Reservation, Mont., from $50,000 to $25,000.

No. 74. The work to be done on the irrigation projects on the Blackfeet, Flathead, and Fort Peck Indian Reservations, Mont., may be done by the Reclamation Service with plans approved by Indian Bureau, and authority is also given that a limited amount of said appropriations may be used for purchase of motor vehicles, horses, and horse-drawn vehicles.

No. 75. That the Secretary of the Interior shall assess the charge for cost of irrigation projects as mentioned in amendment No. 74 against the persons who own the land and are receiving benefit of said system.

No. 78. An appropriation of $6,500 for repairs on the Government bridge across the Niobrara River in Nebraska.

No. 79. Corrects total.

No. 82. Increases the number of pupils at the Indian School, Carson City, Nev., and provides for their care.

No. 83. An appropriation of $15,000 to purchase homes, farm sites, water rights, and aid to nonreservation Indians in Nevada, also provides that no part of said appropriation shall be used for payment of salaries, mileage, or expenses of employees.

No. 84. Strikes out the words "to remain available until expended," in the appropriation for support and civilization and purchase of land and water rights for the Washoe Indians in Nevada.

No. 87. Increases the amount for repairs and improvements, and for the construction of an assembly hall at the Indian school, Santa Fe, N. Mex.

No. 95. Increases the number of pupils and provides for their care at the Wahpeton Indian School, Wahpeton, N. Dak., decreases appropriation for repairs and improvements from $8,000 to $5,000, and provides for the construction of a new building to cost $20,000.

No. 97. Makes an appropriation of $1,500 to redeem a mortgage on the allotment selection of Starr McGillis, a Turtle Mountain Chippewa Indian.

No. 102. Making the unexpended balance of $9,533.38 available for the purpose of continuing the relief of the Apache Indians, and for the purchase of lands in Oklahoma.

No. 105. Authorizes the Secretary of the Interior to adjudicate, and, if he deem it proper, to apply the per capita payment or any part of the same herein authorized to be made, to John Calvin Gray, Williams T. Lancaster, Arthur Jennings, and Clyde Jennings, enrolled members of the Choctaw and Chickasaw Nations, in the settlement of attorneys' fees for services rendered said Indians in being restored to the rolls.

No. 110. An appropriation of $15,000 for the salaries and the expenses of six oil-and-gas inspectors to supervise the oil, gas, and mining operations in the Five Civilized Tribes.

No. 113. Appropriates $7,200 for the purchase and the installation of boilers at the Indian school at Salem, Oreg., and makes available an unexpended balance of $9,830, and an additional amount of $2,500 for an addition to the assembly hall.

No. 116. Permits the Secretary of the Interior to withdraw from the Treasury $3,000 out of the tribal funds belonging to the Klamath Indians in Oregon to construct a bridge across the Williamson River.

No. 124. Corrects the total and also makes available an unexpended balance of $1,670 out of a $10,000 appropriation, approved August 1, 1914, for the installation of a water tank and the purchase of dairy cattle.

No. 127. Is an appropriation of $1,000, and authorizes the Secretary of the Interior to make an investigation as to the school facilities among the different Sioux Tribes of Indians and to report to Congress on or before January 1, 1917.

No. 129. Makes the appropriation of $9,000 to pay a proportionate share for the construction of a highway or wagon road through the Kaibab Indian Reservation, Utah, reimbursable.

No. 132. Authorizes the Secretary of the Interior to withdraw $1,000 from the tribal funds now in the Treasury to the credit of Indians in Utah and use the same to protect abutment of the bridge at Myton, Utah.

No. 137. Authorizes Secretary of the Interior to sell not to exceed 20 acres of land on the north side and within the limits of the abandoned Fort Spokane Military Reservation, Wash., that will not be needed for hospital purposes, and place the proceeds in the Treasury to the credit of the Spokane Indians.

No. 142. An appropriation of $5,000 to purchase dairy cattle for the Indian school at Oneida, Wis.

No. 146. Provides that the Secretary of the Interior may sell the timber on the so-called "school lands" and "swamp lands" within the Bad River and Lac du Flambeau Indian Reservations in Wisconsin, and to which there is a disputed claim, and to hold the money derived therefrom until it is ascertained to whom it belongs.

No. 156. Requires the Secretary of the Interior to submit annually to Congress a certain detailed statement as to appropriations and disbursements of tribal funds belonging to Indians.

No. 157. Provides that the Bureau of Efficiency shall submit a system of bookkeeping and accounting for the Indian Bureau in order that the Secretary of the Interior may meet the requirements of existing law.

The following table shows the amounts carried in the bill as it passed the House, the Senate, and as agreed to by your conferees, and is exclusive of amounts appropriated out of trust funds belonging to the Indians:

| Item. | Passed House. | Passed Senate. | Agreed in conference. |
|---|---|---|---|

C. D. CARTER,
CARL HAYDEN,
P. P. CAMPBELL,
*Managers on the part of the House.*

EXTENSION OF REMARKS.

Mr. ADAMSON. Mr. Speaker, the gentleman from Virginia [Mr. MONTAGUE] requests unanimous consent to extend his remarks in the RECORD on the leprosarium bill that was passed the other day.

The SPEAKER. The gentleman from Georgia asks unanimous consent that the gentleman from Virginia [Mr. MONTAGUE] may extend his remarks in the RECORD on the leprosarium bill. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. GLASS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 2 minutes p. m.) the House adjourned, pursuant to the order previously made, until Monday, May 8, 1916, at 11 o'clock a. m.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. REAVIS, from the Committee on War Claims, to which was referred the bill (H. R. 3690) repealing certain sections contained in the urgent deficiency act approved December 22, 1911, reported the same without amendment, accompanied by a report (No. 650), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills were introduced and severally referred as follows:

By Mr. GALLIVAN: A bill (H. R. 15434) for erecting a suitable memorial to John Patrick Holland; to the Committee on the Library.

By Mr. ADAMSON: A bill (H. R. 15435) for the establishment of Columbus, Ga., as a port of delivery, under the act of June 10, 1880, governing the immediate transportation without appraisement of dutiable merchandise; to the Committee on Ways and Means.

By Mr. GREGG: A bill (H. R. 15436) providing for an addition and repairs to the post-office building at Galveston, Tex.; to the Committee on Public Buildings and Grounds.

By Mr. KENT: A bill (H. R. 15437) to establish a national park service, and for other purposes; to the Committee on the Public Lands.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. CANTRILL: A bill (H. R. 15438) granting a pension to Joseph L. Martin; to the Committee on Pensions.

Also, a bill (H. R. 15439) for the relief of John Curtis; to the Committee on Military Affairs.

By Mr. CARAWAY: A bill (H. R. 15440) granting a pension to Leon C. Johnston; to the Committee on Pensions.

By Mr. EDWARDS: A bill (H. R. 15441) for the relief of R. L. Horne, executor estate of Hendley F. Horne; to the Committee on Claims.

By Mr. GRAY of Indiana: A bill (H. R. 15442) granting an increase of pension to Washington E. Carothers; to the Committee on Invalid Pensions.

By Mr. LAFEAN: A bill (H. R. 15443) granting an increase of pension to Ernestine Shetrone; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15444) granting an increase of pension to Sarah Wagner; to the Committee on Invalid Pensions.

By Mr. LITTLEPAGE: A bill (H. R. 15445) granting an increase of pension to Mary M. Samples; to the Commitee on Invalid Pensions.

By Mr. McLAUGHLIN: A bill (H. R. 15446) for the relief of Ira C. Hoover; to the Committee on Claims.

By Mr. O'SHAUNESSY: A bill (H. R. 15447) granting a pension to Teresa F. Farrell; to the Committee on Invalid Pensions.

By Mr. PARK: A bill (H. R. 15448) granting an increase of pension to John P. Phillips; to the Committee on Pensions.

By Mr. RAYBURN: A bill (H. R. 15449) for the relief of Nancy M. Cockerham, heir of Cirley Fairchilds, deceased; to the Committee on War Claims.

By Mr. SANFORD: A bill (H. R. 15450) granting an increase of pension to Emil B. Koenig, or King; to the Committee on Invalid Pensions.

By Mr. SHALLENBERGER: A bill (H. R. 15451) granting an increase of pension to Edward McVey; to the Committee on Invalid Pensions.

By Mr. STEELE of Iowa: A bill (H. R. 15452) granting an increase of pension to James P. Martin; to the Committee on Invalid Pensions.

By Mr. TAGGART: A bill (H. R. 15453) granting an increase of pension to William Alice Glenn; to the Committee on Invalid Pensions.

By Mr. TAYLOR of Arkansas: A bill (H. R. 15454) for the relief of the estate of Robert C. Martin, deceased; to the Committee on Claims.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. CURRY: Memorial of California Metal Producers' Association, against the passage of House bill 12275, to revise the mining laws; to the Committee on Mines and Mining.

By Mr. DAVIS of Minnesota: Memorial of Civic Club of Stillwater, Minn., favoring the passage of House bill 175; to the Committee on Mines and Mining.

By Mr. DILL: Petition of Mr. E. J. Crockett and other residents of Twisp, Wash., protesting against the passage of House bill 13048; to the Committee on the District of Columbia.

By Mr. DILLON: Petitions of sundry citizens of Lennox, Freeman, Tyndall, and Spencer, S. Dak., favoring the maintaining of friendly relations with Germany; to the Committee on Foreign Affairs.

By Mr. DYER: Memorial of the Protestant churches of Greater New York, against war with Germany; to the Committee on Foreign Affairs.

Also, memorial of Major E. M. Brown Camp, No. 22, United Spanish War Veterans, in re civil-service laws; to the Committee on Reform in the Civil Service.

By Mr. ESCH: Petition of Mr. Carl Hilke and 43 other residents of La Crosse County, Wis., in favor of embargo on munitions of war; to the Committee on Foreign Affairs.

Also, petition of Otto Meyer and 56 other residents of Unity, Wis., protesting against House bills 491 and 6468, authorizing the Postmaster General to exclude certain publications from the mails; to the Committee on the Post Office and Post Roads.

Also, petition of Mr. Carl Hilke and 43 other residents of La Crosse County, Wis., favoring the warning of American citizens not to take passage on armed merchantmen belonging to belligerents; to the Committee on Foreign Affairs.

Also, petition of Mr. Carl Hilke and 45 other citizens of La Crosse, Wis., protesting against any action which might involve the United States in war; to the Committee on Foreign Affairs.

Also, petition of Dr. H. A. Klever and 10 other citizens of Taylor, Wis., protesting against House bill 13048, to amend the juvenile court act for the District of Columbia; to the Committee on the District of Columbia.

Also, memorial of Protestant Churches Association of Greater New York City, favoring maintaining friendly relations with Germany; to the Committee on Foreign Affairs.

By Mr. FLYNN: Memorial of United Singers of Philadelphia, favoring maintaining peace; to the Committee on Foreign Affairs.

Also, memorial of Protestant Churches Association of Greater New York City, favoring maintenance of friendly relations with Germany; to the Committee on Foreign Affairs.

By Mr. FULLER: Petition of Rockford (Ill.) Chamber of Commerce, for the Shields water-power bill; to the Committee on Rivers and Harbors.

Also, petition of Protestant Churches Association of Greater New York, favoring the maintenance of friendly relations with Germany; to the Committee on Foreign Affairs.

By Mr. HILLIARD: Petition of Ellis Meredith Clement and 27 others, all of Denver, Colo., urging the passage of the Tinkham bill, providing a training school for mental defectives in the District of Columbia; to the Committee on the District of Columbia.

By Mr. KELLEY: Petition of 54 citizens of Flint, Mich., against Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of 29 citizens of Flint, Mich., against bills amending the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. LAFEAN: Petition of citizens of New York, recommending retention of section 56 of the Chamberlain bill; to the Committee on Military Affairs.

By Mr. LOUD: Memorial of And. Reuther, president, and J. W. Putz, secretary, in behalf of Local No. 6, Bay City, Mich., composed of 118 members, protesting against war with Germany, and requesting strict neutrality; to the Committee on Foreign Affairs.

By Mr. McDERMOTT: Petition of Messrs. Michael P. Duggan, Charles F. Brown, Frank A. Mulholland, Charles E. Nouck, Walter Kull, Daniel F. Lane, William M. Konen, and others, all of Chicago, Ill., favoring the passage of the Lobeck classification bill; to the Committee on Agriculture.

By Mr. McLEMORE: Petition of citizens of Brenham, Tex., against war with Germany; to the Committee on Foreign Affairs.

By Mr. MOORES of Indiana: Petition of 30 members of the Association of Indiana Industrial Teachers, favoring House bill 11250, national vocational education bill; to the Committee on Education.

By Mr. RANDALL: Memorial of United Singers of Philadelphia, protesting any action which may involve this country in war; to the Committee on Foreign Affairs.

Also, memorial of people of Los Angeles, Cal., favoring woman suffrage; to the Committee on the Judiciary.

Also, memorial of Protestant Churches Association of Greater New York City, protesting against breaking relations with Germany; to the Committee on Foreign Affairs.

Also, memorial of people of San Luis Obispo, Cal., favoring woman suffrage; to the Committee on the Judiciary.

Also, petition of Vocational Guidance Society of California, favoring Smith-Hughes bill for vocational education; to the Committee on Education.

Also, memorial of 150 people of Santa Barbara, Cal., favoring woman suffrage; to the Committee on the Judiciary.

Also, petition of Ida Alexander and 33 other citizens of Beaverton, Oreg., protesting against bill to amend postal laws; to the Committee on the Post Office and Post Roads.

By Mr. STINESS: Memorial of New England Southern Conference of the Methodist Episcopal Church, favoring national prohibition; to the Committee on the Judiciary.

By Mr. WALSH: Petition of New England Southern Conference of the Methodist Episcopal Church, in session assembled at Norwich, Conn., by J. Francis Cooper, its secretary, advocating passage of Sheppard-Gallinger national prohibition resolution, Senate joint resolutions 55 and 64, and for passage of Webb-Smith resolutions, House joint resolutions 84 and 85; to the Committee on the Judiciary.

# SENATE.

## MONDAY, *May 8, 1916.*

*(Legislative day of Friday, May 5, 1916).*

The Senate reassembled in executive session at 11 o'clock a. m., on the expiration of the recess, and at 12 o'clock and 20 minutes p. m. the doors were reopened.

### GOVERNMENT OF THE PHILIPPINES.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives on the bill (S. 381) to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for those islands, insisting upon its amendments and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HITCHCOCK. Mr. President, I move that the Senate concur in the amendments made by the House of Representatives.

Mr. CLARKE of Arkansas. Mr. President, I trust the motion to concur will be adopted. The amendment by the House relates to what I deem to be only a minor feature of one of the largest questions that have ever been presented to the American people. I, of course, refer to the effort to grant independence to the Filipino people, recently disposed of by the Congress in a way that I think will hereafter provoke further consideration of it not wholly dissociated from frank comment about the influences and groups which brought this about. The conceded circumstances attending this event involves the disclosure of a situation that ought not to be overlooked nor ignored. It goes to the vital interests of the Republic, and if it be found to exist as a permanent feature of our national life we must resist and expose it or take the consequences. This particular House substitute bill relates to merely administrative matters and is not at all related to the question as to whether or not we ought to get out of the Philippines nor when we should get out.

Mr. NORRIS. Mr. President——

Mr. CLARKE of Arkansas. I shall not occupy more than a few minutes. My views on the separation question are——

Mr. NORRIS. I want to ask the Senator from Arkansas a question. I do not understand what the amendment is.

Mr. CLARKE of Arkansas. It is what is called the Jones bill, offered by the House as a substitute for the Senate bill recently passed.

Mr. NORRIS. Is it the entire Jones bill?

Mr. CLARKE of Arkansas. It is substantially identical with the bill which passed the Senate with the proposed prohibition amendment and the so-called Clarke amendment left out of it, and probably several other things of minor character.

Mr. President, I do not intend to obstruct the passage of this Jones bill or any bill which deals with merely administrative questions. I think they are distinct from and subordinate to the great question of our getting out of the Philippine Islands. Indeed, I am glad that all questions of procedure and local administration have been separated, so that we may deal now with that one single proposition of withdrawing from the Philippines without having to gain or lose votes because certain other debatable provisions are annexed to a general bill in which the vital provision appears. In view of all that has occurred, I think that the question as to whether or not we ought to go out of the Philippines and when should be made the subject of a discussion and consideration when this is the only question presented. I do not know that an opportune occasion will present itself during the present session, but I hope it may. But I think as much of the general question of Philippine administration as is contained in the pending House amendment in the form of the so-called Jones bill ought to be disposed of now, whether we are to eventually get out of there or whether we are to retain the islands forever.

There are many very wholesome provisions contained in the pending Jones bill. I simply desire to say that I do not want the impression to arise that those of us who believe that we ought to get out of the Philippines now are at our row's end. We believe that that question ought to be still further and more seriously considered in the light of recent developments. I do not believe that we have as yet taken the judgment of the American people upon the main proposition, and certainly not on the difficulties to be encountered and overcome before the interests of the American and Filipino people involved can receive that intelligent, independent, and patriotic consideration which their transcendent importance demands.

For the present I think the wisest course will be taken if the motion of the Senator from Nebraska—to concur in the House amendment—shall be adopted.

The VICE PRESIDENT. The question is on concurring in the House amendment.

Mr. LIPPITT. Mr. President, I wish this matter could be laid over a day or two. I was not aware that the conferees had agreed upon a report.

Mr. BANKHEAD. This is not a conference report.

The VICE PRESIDENT. It is not a conference report.

Mr. LIPPITT. What is it?

Mr. HITCHCOCK. Mr. President, there seems to be some misapprehension here; and, if the Senator from Rhode Island will permit me, I will set it straight.

This is not a conference report. The bill as it passed the Senate went to the other House. A substitute was offered for it there and carried. The substitute is the original Jones bill with a minor change relating to the date of the election. The bill was then sent back to the Senate and has been upon the President's desk.

Mr. LIPPITT. When did the bill come to the Senate?

Mr. HITCHCOCK. Last week. My motion is to concur in the House amendment, the effect of the adoption of which will be to substitute the original Jones bill for the bill which was considered and passed by the Senate.

My reason for making that motion now is that the election provided for is to be held in June, and in order to allow adequate time for the holding of that election prompt action should now be taken.

Mr. LIPPITT. Mr. President, it would seem to me that in that situation this subject should go to a committee for consideration. This is not a conference report and it has no right of way here in any way. The very suggestion which the Senator from Nebraska has made in regard to the short time that would be allowed for an election provided for in this bill is itself an indication that the bill ought to be considered with regard to that point and others. As a matter of fact, here it is now the middle of May and that bill, the Jones bill, requires very elaborate machinery to be put in motion. I should think, considering the long distance of the Philippine Islands from here and the time it takes to communicate with them, that the time was already too short for an election to be held in June. I would therefore ask that the bill be referred to the Committee on the Philippines.

The VICE PRESIDENT. The status of the parliamentary situation is exactly this: The House passed an amendment, requested a conference, and instructed its conferees. It is not possible to refer the matter to a committee. There is just one of two things to do, either to agree to the original House bill, as moved by the Senator from Nebraska [Mr. HITCHCOCK], or to take up the question as to whether or not the Senate will go into a conference with the other House on the question.

Mr. HITCHCOCK. If the Senator from Rhode Island will permit me, I want to call the attention of the Senate to this fact: This question is not new. The Jones bill was carefully considered by the committee, of which the Senator from Rhode Island is an active member. The changes made by the Senate committee, while I think they were helpful, were not of very commanding importance. The substance of the bill as passed by the other House was the original Jones bill. This simply means the abandoning of the amendments which the Senate committee proposed.

Mr. BANKHEAD. Mr. President, I am compelled to call for the regular order.

Mr. HITCHCOCK. Let us finish this.

Mr. BANKHEAD. No; we shall not finish this, because it will run along all day, I fear.

Mr. LIPPITT. Mr. President, it seems to me that under the condition, as described by the Senator from Nebraska—and I now see exactly what it is—the bill should go to conference in the ordinary way in which such bills are managed, and that a conference report should be made upon the bill.

The VICE PRESIDENT. The Senator from Rhode Island has not been here. What good would it do to send this bill to conference? The House of Representatives instructed their conferees to agree to nothing except this bill. So what would the conference amount to in view of an instruction of that kind issued by the House of Representatives?

Mr. LIPPITT. Mr. President, the President may have knowledge beforehand of exactly what the conference committee may do, but I have not been aware that anybody was in position to say in advance just what a conference committee might do. I will state to the Chair, however——

The VICE PRESIDENT. The Senator from Rhode Island has not been here. It is not a conference, in the opinion of the Chair, that the House of Representatives are asking for. They have passed the bill and have instructed their conferees to stand by it. That is not a full and free conference.

Mr. LIPPITT. I think the Chair is in error, if he will allow me to say so.

The House has instructed its conferees to stand by one or two certain items in the bill. There are a great variety of changes which have been made in this bill by the Senate, on which the House did not vote at all, and on which they gave no instructions to their conferees. The Senate committee, as a matter of fact, spent nearly a year studying the bill; they held elaborate hearings, and they made a great variety of changes in it, which have not attracted the attention of the public as much as the one overshadowing item of what shall be done in regard to the freedom of the islands; but in the details of the bill for the purpose of perfecting the management of Philippine affairs there were a large number of changes made, and I think it is certainly very inadvisable to take the action proposed. I should not want to agree to the Senate voting to-day on the question put in the form in which it is put by the Senator from Nebraska. It seems to me it ought to take the ordinary course, which is to have a conference and allow the conferees to decide upon these minor changes in the bill.

Mr. WORKS. Mr. President——

Mr. BANKHEAD. Mr. President, I am compelled to demand the regular order.

The VICE PRESIDENT. The matter, then, will have to go over.

### INDIAN APPROPRIATION BILL—CONFERENCE REPORT.

Mr. ASHURST. Mr. President, I desire to make a motion with regard to a privileged matter. On last Saturday the conference report on the Indian appropriation bill (H. R. 10385) was filed. I ask the Senate now to consider that report. It will take but a few moments.

Mr. LANE. Mr. President, I wish to say for the information of the Senator from Arizona that it will take more than a few moments. I want to discuss that conference report at length, if I may be allowed to do so.

The VICE PRESIDENT. The motion of the Senator from Arizona is not privileged. The presentation of a conference re-

port is a privileged matter, but it is not a privileged matter as to when it shall be taken up for consideration.

Mr. BANKHEAD. Mr. President, I understand the conference report is privileged, but I further understand that if this report is brought before the Senate to-day for consideration it will consume perhaps the entire day, and I think the Senator from Arizona should not insist upon it. Let us get the good-roads bill out of the way, as it has been here for several weeks.

Mr. SMOOT. Mr. President, the conference report is not privileged any further than its presentation is concerned; its consideration is not privileged.

The VICE PRESIDENT. The presentation of the report is privileged, but the question of taking it up is not a privileged matter.

Mr. BANKHEAD. Then I demand the regular order.

Mr. ASHURST. I move that the Senate proceed to the consideration of the conference report on the Indian appropriation bill.

The VICE PRESIDENT. The question is on the motion of the Senator from Arizona that the Senate proceed to the consideration of the conference report on what is commonly known as the Indian appropriation bill. [Putting the question.] The Chair is unable to determine by the sound, and will again put the question. [Putting the question.] The ayes seem to have it.

Mr. BANKHEAD. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. SAULSBURY (when his name was called). I have a general pair with the junior Senator from Rhode Island [Mr. COLT]. In his absence I withhold my vote.

Mr. STONE (when his name was called). In the absence of the Senator from Wyoming [Mr. CLARK], with whom I have a standing pair, I withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER]. In his absence I withhold my vote.

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Arkansas [Mr. ROBINSON] and vote "nay."

Mr. WADSWORTH (when his name was called). I have a general pair with the junior Senator from New Hampshire [Mr. HOLLIS]. I transfer that pair to the senior Senator from Iowa [Mr. CUMMINS] and vote "yea."

Mr. WILLIAMS (when his name was called). Transferring my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the Senator from Arizona [Mr. SMITH] I vote "nay."

The roll call was concluded.

Mr. BECKHAM (after having voted in the negative). I transfer my pair with the senior Senator from Delaware [Mr. DU PONT] to the junior Senator from Nevada [Mr. PITTMAN] and will let my vote stand.

Mr. CHILTON. I have a pair with the Senator from New Mexico [Mr. FALL], and on that account I do not vote.

Mr. HITCHCOCK (after having voted in the negative). I transfer my pair with the Senator from Maine [Mr. BURLEIGH] to the Senator from Oklahoma [Mr. GORE] and allow my vote to stand.

Mr. DILLINGHAM. Observing that the senior Senator from Maryland [Mr. SMITH], with whom I have a general pair, has not voted I withhold my vote.

Mr. TOWNSEND. The senior Senator from Michigan [Mr. SMITH] is absent, but is paired with the junior Senator from Missouri [Mr. REED], who, I am informed, is at liberty to vote because, if my colleague were present, he would vote "nay." I desire the statement of the pair of the senior Senator from Michigan with the junior Senator from Missouri to stand for the day.

Mr. REED (after having voted in the negative). I voted, without announcing my pair or a transfer of it, inadvertently; but since that time I am advised by the colleague of the Senator from Michigan [Mr. SMITH] that I am released to vote as I did. I therefore allow my vote to stand.

Mr. HARDING (after having voted in the affirmative). I note the absence of the junior Senator from Alabama [Mr. UNDERWOOD], with whom I am paired, and I therefore withdraw my vote.

The result was announced—yeas 29, nays 39, as follows:

YEAS—29.

| | | | |
|---|---|---|---|
| Ashurst | Kenyon | Nelson | Sutherland |
| Brandegee | La Follette | Norris | Wadsworth |
| Broussard | Lee, Md. | Oliver | Walsh |
| Catron | Lippitt | Owen | Warren |
| Clapp | Lodge | Page | Works |
| Curtis | Martin, Va. | Phelan | |
| Gronna | Martine, N. J. | Poindexter | |
| Jones | Myers | Smoot | |

NAYS—39.

| | | | |
|---|---|---|---|
| Bankhead | Hughes | Overman | Sterling |
| Beckham | Husting | Pomerene | Swanson |
| Borah | James | Ransdell | Taggart |
| Brady | Johnson, Me. | Reed | Thompson |
| Clarke, Ark. | Johnson, S. Dak. | Shafroth | Tillman |
| Culberson | Kern | Sheppard | Townsend |
| Fletcher | Lane | Sherman | Vardaman |
| Gallinger | Lea, Tenn. | Shields | Weeks |
| Hardwick | Lewis | Simmons | Williams |
| Hitchcock | O'Gorman | Smith, Ga. | |

NOT VOTING—28.

| | | | |
|---|---|---|---|
| Bryan | Dillingham | McCumber | Smith, Ariz. |
| Burleigh | du Pont | McLean | Smith, Md. |
| Chamberlain | Fall | Newlands | Smith, Mich. |
| Chilton | Goff | Penrose | Smith, S. C. |
| Clark, Wyo. | Gore | Pittman | Stone |
| Colt | Harding | Robinson | Thomas |
| Cummins | Hollis | Saulsbury | Underwood |

So the Senate refused to proceed to the consideration of the conference report on the Indian appropriation bill.

GOOD ROADS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7617) to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter.

The VICE PRESIDENT. The pending question is the amendment offered by the Senator from Utah [Mr. SMOOT] in the nature of a substitute.

Mr. BANKHEAD obtained the floor.

WOMAN SUFFRAGE.

Mr. CURTIS. Mr. President, will the Senator from Alabama yield to me to enable me to submit a resolution?

Mr. BANKHEAD. I will if it does not lead to any discussion.

Mr. CURTIS. If the resolution leads to discussion, we can let it go to the table or dispose of it in some other way. I ask unanimous consent for its immediate consideration.

The VICE PRESIDENT. The Secretary will read the resolution.

The resolution (S. Res. 183) was read, as follows:

Whereas there is now before the Senate of the United States a resolution, No. 1, favorably reported from the Senate Committee on Woman Suffrage, proposing to amend the Constitution of the United States by removing the qualification of sex as a bar to the exercise of the right of franchise; and

Whereas a large number of women voters have delegated to certain envoys the duty of conveying to this Congress an expression of the desire of said women voters that this Congress shall submit to the States for ratification the pending constitutional amendment, generally known as the Susan B. Anthony amendment; and

Whereas the question of woman suffrage is one of the foremost issues before the people of the United States: Therefore be it

*Resolved*, That on the calendar day of May 16, 1916, this body shall stand adjourned at 5 o'clock and 15 minutes p. m., and immediately thereafter, the envoys from the said women's convention shall be permitted to enter the Senate Chamber and present from the floor the message which they are to bring from the western women voters.

Mr. OVERMAN. Mr. President, I shall object to the present consideration of the resolution. It ought to go to the Committee on Rules, and I therefore move that it be referred to that committee.

The VICE PRESIDENT. The question is on the motion of the Senator from North Carolina. Without objection the motion is agreed to, and the resolution will be printed and referred to the Committee on Rules.

GOOD ROADS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7617) to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter.

The VICE PRESIDENT. The question is on the amendment of the Senator from Utah.

Mr. SMOOT. Mr. President, on Saturday afternoon I discussed this amendment for nearly an hour. I do not want to go over the same ground that I covered on Saturday, nor do I intend to, at this time. I hope that when the amendment is voted upon the Members of the Senate will vote their true convictions, and, if they believe in the system of road building as provided for in the amendment, vote for it; if they do not be-

lieve in it, I hope they will vote against it. I am sure from what Senators have told me that if this course is followed the amendment will be adopted.

Under the committee amendment as reported to the Senate I am positive that there will be very little permanent road building in the United States. There are 2,270,000 miles of road in the United States, and the appropriation called for by the amendment of the committee can not possibly cover 10 per cent of the roads of the country; and if the amount of money appropriated is expended in the building of permanent roads, the amount that could be built under the apportionment of the Senate amendment would be so small that there would be but little good done to the roads of the country.

I do not believe it is the intention of the Senators favoring the committee amendment that the money shall be expended in the building of permanent roads in the United States. The most of it will be expended for the refitting and the rebuilding of present roads, and a part of it, no doubt, will be expended in the building of dirt roads; but very few permanent roads, and those only in a very few States, will ever be built under the provisions of the committee amendment.

There are some who have said that they are opposed to the amendment I have offered because the State does not get anything out of the Public Treasury; it does not give us anything. Under my amendment we are not asking appropriations out of the Public Treasury for building the roads. As I stated on Saturday, we are simply asking that the Government of the United States extend its credit to the States. If that is done, and the amendment is adopted, there can be $500,000,000 expended in building substantial roads in the country that will not cost the Government of the United States one cent; and the system as provided for in the amendment is as nearly perfect as it is possible for it to be.

Let us begin right. I doubt whether there is a Senator but who will acknowledge that the committee amendment is nothing but a makeshift, which, if adopted, must sooner or later be changed; but in the meantime there will be expended millions of dollars of the people's money that will be of little and temporary service to the people.

I take it for granted that the Members of the Senate have read the amendment. There has been so much publicity given to it in years past—it is known as the Bourne plan—that I am going to take it for granted that the Senators understand its provisions.

I shall not take the time of the Senate further in discussing this amendment; but I do express the hope, now that the United States Government is to be asked to assist in building roads in this country, that there shall be no false step taken and no plan adopted that could be designated as a "pork-barrel" measure. Let us adopt a plan that most people admit is as nearly perfect as it is possible to provide, and in doing so we shall be establishing a system of road building in the country that will make our roads the equal of the roads of any other country in the world.

Mr. WORKS. Mr. President, from time to time since this debate commenced I have entered some mild objections to the pending bill. I have had occasion to consult with ex-Senator Bourne, who is the real author of this amendment, on various occasions. I know that he spent a great deal of time in an earnest effort to bring out of the situation that we are in legislation that would result in a proper way for the construction of good roads throughout the States. I am in favor of this amendment for two reasons: Because I think it is a more legitimate means of arriving at results, and because I think it will be infinitely more effective in bringing about what is really desired.

Mr. BANKHEAD. Mr. President, I do not intend to consume the time of the Senate in any extensive review of the substitute offered by the Senator from Utah; but I think the Senate is entitled to understand what the parliamentary situation would be in case this substitute should be adopted.

It will be remembered that the Senate for weeks has been considering a bill reported from the Committee on Post Offices and Post Roads, which is a substitute for a House bill commonly known as the Shackleford good-roads bill. The Senate committee struck out the whole of the House bill and substituted the bill that we have been considering. So that, if this amendment should be adopted, the bill that has been before the Senate for weeks and weeks, and has been discussed from every angle, and has been in some particulars amended—some of them good amendments—would be absolutely eliminated. The bill that we have here now would not be before the conferees. They could simply consider the original House bill and the substitute proposed by the Senator from Utah, if it shall be adopted, to take the place of the Senate bill.

Mr. President, briefly, what are the provisions of the House bill? It deals with two factors upon which appropriation shall be made under it. One is population; the other is road mileage. The question of area is not considered in that bill, and therefore it could not go before the conferees. So the Senate would be confined to the provisions of that bill and the substitute here pending.

There are many provisions of the House bill that I do not believe the Senate would consider for a minute. It starts out with a flat proposition of $65,000 to each State. What that is based upon, how that calculation could have been reached I have never been able to understand. The House bill provides for maintenance. This money appropriated from the Government may be used in the maintenance of roads by the States. That has been so emphatically discussed here that it seems to me the Senate of the United States would not want to consider a proposition that appropriated money from the United States Treasury to maintain roads that are built under the provisions of the bill we are now considering.

There are many other provisions of the bill that seem to me to be unwise, but this substitute proposes to put that bill into conference and to eliminate the bill we have had before the Senate.

Now, a word with reference to the substitute. It is a beautiful dream, Mr. President, and sometime in the future, when normal conditions in this country are restored and when we have made the progress toward road building that we expect to see under the provisions of the Senate bill that we have been discussing, will be the time, and time enough, to talk about the Government of the United States issuing $500,000,000 of bonds to this purpose.

I know it is said that it will not cost the Government anything. But the Government must sell those bonds at some price; and when we come to consider it, and we must consider the conditions that confront us—that the Government is likely to be called upon in the near future to issue many millions of bonds for the national defense—how can we accept a measure like this, that commits the Government to the issuance of this vast amount of bonds for the purpose suggested in the substitute?

There is another provision in the substitute which reckons with four factors of this appropriation and division—mileage, area, population, and assessed valuation. It so happens that there are six States in the Union whose assessed values are 50 per cent of the entire valuation in the country. Mr. President, I am not complaining of that. Those States that have accumulated this vast wealth have been fortunate. But, as has been suggested on the floor of the Senate, this wealth has not been created within the State. It has been drawn from every section of the Union. It has been drawn from every State and every hamlet.

The great State of New York, Mr. President, is the gateway to all the commerce, ingoing and outgoing, in this country, and it has collected the tolls from every section of the United States. There are other States, and I am not complaining of them; I am proud of their wealth and their prosperity; but we can not fail to understand the source from which this great wealth has come. It has been gathered from every hamlet in the United States by reason of favoritism shown in the taxing laws of the Government.

Now, these two questions will go to conference if this substitute is adopted, and I am going to venture the assertion now, and I do it with the greatest respect, that every man in the Senate who votes for the adoption of this substitute is opposed to any road legislation of any character, and they can only vote for its adoption with the view that in the end there will be no legislation at all on this subject. As I said, and I say it with the greatest respect and the greatest admiration for the splendid Senators who represent these vastly enormously wealthy States, there is no objection to that, but I am stating what will show on the roll call to be a fact, in my judgment.

I wish to say further, Mr. President, that the legislation we are now considering carries with it and brings with it more sympathy from the people of this country than any other measure which has been discussed in the Senate for a long, long time. The people are for it. They believe that it is just and fair and that they are entitled to this consideration from the Government that they support so cheerfully and whose battles they fight so valiantly when an occasion arises.

Senators talk about building good roads; they talk about throwing away the money that is to be appropriated. Mr. President, I have confidence in the honesty and the capacity of the people and their integrity; I have some confidence left in the governors of the States and their legislatures and their highway commissions and everybody who, directly or indirectly, is interested in this legislation.

When we go to the extent of emphasizing the fact as to how these roads shall be constructed and how this money shall be appropriated and that the States themselves shall have control and direction of the operation of building the roads after an agreement has been reached with the Secretary of Agriculture as to their location and character and the estimate of the cost, it is then turned over to the States practically, and I can not understand how any Senator on the floor can find it in his heart to say that he has no confidence in the people and in the highway commissions and in the governors and legislatures and the other people who are going to have the say as to how this money shall be expended.

There are many things in the House bill that are objectionable. There are many things in this substitute that are objectionable. Under its provisions there are many States in this Union that could not receive a cent of this appropriation so far as values are concerned. Many of them are now bonded to the limit, and added to the existing bonded indebtedness the amount they are supposed to receive under the provisions of this substitute would put them without the pale of the provisions of the law.

There is another provision in the bill, Mr. President, that ought to be designated as a joker. That is what it is. It is the provision creating a highway commission to supervise and direct the operation of this substitute. Who are that commission proposed in this bill? The chairman of the Committee on Post Offices and Post Roads of the Senate and the ranking minority member, the chairman of the Post Office Committee of the House and the ranking minority member, and the Director of Public Roads in the Agricultural Department, and one engineer to be appointed by the Secretary of War. If that is not purely and simply a political committee I never heard of one. No man who is mentioned as a member of that commission has any scientific knowledge of road building. They know nothing of the materials out of which roads should be built, when you are building substantial roads as the provisions of the bill require. They are authorized to appoint I do not know how many people all over the country in every State. There is no limit upon the number whom they may appoint and no limit on the salaries that may be paid. I say that that is a joker, and I say it with all respect.

Mr. President, this is all I care to say about this bill. I want to repeat that if this substitute is adopted it eliminates the Senate bill, and if it reaches the conference nothing can be considered in that conference but the original Shackleford bill and this substitute. I imagine, Mr. President, that it would be difficult to work out of that situation a bill that would meet with the approval of the Senate.

Mr. TOWNSEND. Mr. President, I have heard it stated many times by Senators who oppose the Senate bill that there was no sincerity on the part of the advocates of the measure but who regard it simply as a makeshift. Mr. President, I deny the statement so far as I am concerned, and I believe I can do it with equal truthfulness so far as the other members of the subcommittee which had this matter in charge are concerned.

I was at one time, and am yet, of the opinion that the Bourne bill, if it could be adopted by Congress, would be a scientific and an equitable solution of the road problem. I felt that way some years ago when there was a chance to pass it; that is, when it was not embarrassed by the situations or conditions of the country which now maintain. At that time most of the Senators, and I exclude the Senator from Utah [Mr. SMOOT], but most of the Senators who now are going to vote for the substitute, would not give it even a pleasant word. They denounced it as impracticable and as being simply a theory which could not be made to work. There was a prospect of passing it then and they opposed it. There is no chance to pass it now; hence their hearty support of it.

Mr. President, I realize that there are conditions existing in the country to-day which would make it impractical to adopt this plan at the present time.

The Committee on Post Offices and Post Roads had this matter before it and it was then discovered, at least to my satisfaction, that the House under no circumstances would consider this substitute. I do not believe that the Senate would consider favorably the House bill. Therefore it is simply a question at this time whether State aid of any kind will be afforded by Congress. So the Senator from Alabama is absolutely correct when he states that if the substitute is adopted by the Senate it means the end of Federal-aid legislation to the building of roads at this session of Congress.

I realize that many Senators who oppose Federal aid want just that thing to happen; but I submit, Mr. President, it is not quite a fair way to meet the issue. The issue should be met squarely and not be disposed of by a subterfuge.

I can imagine something of the effect upon the securities of the country if at this time there is authorized an additional issue of $500,000,000 of Government bonds and an attempt to float them for the purpose of building roads in the several States.

Therefore, with me, Mr. President, it is a practical question, not a theoretical one. I did advocate the Bourne bill several years ago, and at that time believed if we could start it under normal conditions it might have been made to work. It would require a change of laws in many of the States and constitutional amendments in others before it could be put into operation. That, of course, would require considerable time; in some instances, years.

I have received many letters from road commissioners in various States; men who, I think, are very familiar with the road question, and they have stated to me in those letters that they are opposed to the so-called Bourne proposition at this time. They favor the measure now pending before the Senate.

We are proposing to spend the money belonging to the people of the various States. Their experts have passed upon this subject, and I think with quite as much intelligence as theorists in the Senate have done.

Therefore, being in favor of good-roads legislation and being convinced that the bill before us is practical and economical and means the building of good roads, I can not vote for a substitute which would mean the end of legislation and thus deprive the people who have given years of careful study to this subject the opportunity to have desired legislation——

Mr. SMOOT. Mr. President, I am a little surprised at the Senator from Alabama [Mr. BANKHEAD] designating the proposed substitute as a beautiful dream. I have always understood that the Senator from Alabama was rather inclined to this scientific system of road building, and I believe that he, as chairman of the Committee on Post Offices and Post Roads of the Senate, reported it favorably to the Senate.

Mr. BANKHEAD. I will say that when that bill was reported to the Senate I was decidedly opposed to it, and I did everything I could to keep it from being reported to the Senate, and I said that I would file a minority report.

Mr. SMOOT. I accept the Senator's word. I understood he had been in favor of it. But I do know there are many other Senators, and nearly every one of them who has spoken against the amendment now, who were in favor of the amendment, and most of them have said on the floor of the Senate that they were at one time in favor of it. The excuse that is given now that the substitute should not be adopted is that conditions have changed, and it is intimated that it would be impossible to sell the bonds.

The Senator from Alabama said that he did not know at what the bonds would sell. The amendment provides that the bonds can not be sold at less than par. It provides that they shall carry a rate of interest of 3 per cent, and I say without a question of doubt that a 3 per cent Government bond can be sold to-day at par or above.

In fact, Mr. President, there is a better market for bonds of all kinds to-day than there has been for the last quarter of a century. The untold millions of dollars in the way of profits, I might say excessive profits, that have been made by American industries through the unfortunate war in Europe are being invested in all kinds of securities, and I have no doubt that to-day the 3 per cent Government bonds would sell most readily. Really, Mr. President, the conditions to-day for the establishment of this scientific system of road building are very much better than they were two or three years ago.

In relation to the apportionment, which was criticized by the Senator from Alabama [Mr. BANKHEAD], I want to say that I can not conceive of any way that that apportionment could be made better than it is made. There was an intimation that, because of the fact that one of the conditions of the apportionment was based upon the assessed valuation of the property of the State, therefore the State of New York would get an undue proportion of the money.

Mr. President, I notice in the apportionment that the State of Texas would be the State that would receive the next largest amount under the form of apportionment provided for in the substitute. If the State of Texas desired to secure Government aid under the provisions of the substitute, it could do so to the amount of $28,300,000; the State of Ohio could secure $25,100,000; the State of Pennsylvania, $28,250,000; the State of Georgia, $12,250,000. So the intimation that this is unfair to the States in which the property assessment is small is uncalled for and, I believe, unjust, because in the Western States and

in many of the Southern States, but particularly in the Western States, the area of the State should be taken into consideration, and that balances in a degree the amount of the apportionment based upon assessed valuation.

Mr. TAGGART. Mr. President, may I ask the Senator from Utah a question?

Mr. SMOOT. Certainly.

Mr. TAGGART. Take a State that has already a bonded indebtedness for the construction of free gravel roads; for instance, the State of Indiana, which has a bonded indebtedness of $39,000,000. What effect would that have in the issuing of bonds under the provisions of this proposed substitute?

Mr. SMOOT. None whatever, unless the bonded indebtedness of the State of Indiana exceeds 10 per cent of the assessed valuation of the property within the State. I will say to the Senator from Indiana that the assessed valuation for the fiscal year 1912 of the property in Indiana was $1,891,602,077. Indiana under this apportionment would, therefore, be entitled to $12,550,000. That would only amount to 2.50 per cent of the assessed valuation of the property in the State of Indiana. So, if Indiana is not bonded to-day to the extent of 10 per cent of the assessed valuation of her property, including the 2.50 per cent spoken of, she could apply under this substitute, and would receive $12,250,000.

Mr. TAGGART. Indiana is spending now from twelve to fourteen or sixteen million dollars a year for road construction by assessments on property in the State.

Mr. SMOOT. Then the substitute will not interfere with that at all. It simply goes to assist the State of Indiana to that amount.

It was also intimated, Mr. President, that the placing upon the market of $500,000,000 of bonds would upset the money market of this country, and dire results might come from such action. The substitute does not provide for that. It specifically states that in no single year can there be more than 20 per cent drawn by the State of the apportionment allotted to the State. If every State in the Union should immediately upon the passage of the bill decide that it wanted to draw every dollar possible to be drawn under the provisions of the substitute, the sum total could not amount to more than $100,000,000 in the first year. That, however, is a thing that is impossible to happen; it could not be. I doubt very much, Mr. President, whether the half of this fund would be applied for during the first or the second or even the third year. It would take time for the States to get into working order to avail themselves of the money provided for under the substitute.

So far as the proposed highway commission is concerned, the provisions for it state very plainly its office and the reasons for its existence. Section 7 reads:

SEC. 7. That there is hereby created a United States highway commission, to be composed of the chairman and ranking minority member of the Senate Committee on Post Offices and Post Roads, the chairman and ranking minority member of the House Committee on Roads, the Director of the Office of Public Roads, and a United States Army Engineer to be detailed from time to time by the Secretary of War. Such commission shall have only an advisory voice in the expenditure of the United States highway fund in the several States. It shall have its head office in the District of Columbia, but may create highway divisions—

Now, note the limitation—

never exceeding in number one for each State, and may maintain a division office in charge of a United States highway engineer in each division.

That does not look as though there was no limit to it; that does not look as though there was going to be built up throughout the United States a great body of employees.

I believe, Mr. President, that the time will come when Congress would rather have the affairs that affect Congress in its own hands than it would to allow those affairs to be in the hands of a bureau of this Government. This is the first piece of legislation which has been proposed that places Congress before the people in its proper light; this is the first piece of legislation proposed that does not transfer the power of its execution to the head of some division of our Government or some bureau of the Government.

Mr. CLAPP. My attention was occupied for the moment, and I will ask the Senator to read again the provision creating the United States highway commission.

Mr. SMOOT. Very well. It is as follows:

SEC. 7. That there is hereby created a United States highway commission, to be composed of the chairman and ranking minority member of the Senate Committee on Post Offices and Post Roads, the chairman and ranking minority member of the House Committee on Roads, the Director of the Office of Public Roads, and a United States Army engineer, to be detailed from time to time by the Secretary of War.

Mr. BANKHEAD. I will ask the Senator to read the remainder of that provision.

Mr. SMOOT. Certainly. It is as follows:

Such commission shall have only an advisory voice in the expenditure of the United States highway fund in the several States. It shall have its head office in the District of Columbia, but may create highway divisions, never exceeding in number one for each State, and may maintain a division office in charge of a United States highway engineer in each division.

Mr. BANKHEAD. That is not all; read the whole of it.

Mr. SMOOT. The Senator from Minnesota [Mr. CLAPP] had reference to the highways commission, I presume; but I am perfectly willing to read it all if the Senator from Alabama [Mr. BANKHEAD] so desires.

Mr. BANKHEAD. There is another provision which I should like to have the Senator read.

Mr. SMOOT. Very well; I will read it.

Said commission shall have power to employ such clerical and expert assistance as may be provided for by appropriations made by Congress from time to time, and may require the assistance and cooperation of the officers and employees of any department in its work.

In effect that is simply authorizing the highway division, which may be created in a State, never to exceed one, to have clerical assistance.

Mr. BANKHEAD. That would mean 48 highway divisions, would it not?

Mr. SMOOT. If they were all created, it would.

Mr. CLAPP. Mr. President, I should like to ask another question. That commission, then, would be the administrative force under this bill, would it not?

Mr. SMOOT. It would be an advisory commission under the bill.

Mr. CLAPP. Where is the final administration vested?

Mr. SMOOT. In the State road commission.

Mr. CLAPP. Is there any other Federal administrative board or commission created by the bill other than the one to which the Senator has just referred?

Mr. SMOOT. None under the bill.

Mr. TAGGART. Mr. President——

Mr. SMOOT. I will yield to the Senator in a moment. There is created, however, a fund to be known as the "United States highway fund," which will be under the supervision of the Secretary of the Treasury. The reason that there is not created a commission with administrative power comes from the fact that the State itself pays the money for the road building; that is, whenever it draws $100,000 under this apportionment from the Treasurer of the United States it deposits its bonds for that amount, drawing 4 per cent, with the Treasurer of the United States as security. The Treasurer of the United States, under the provisions of the amendment, is then authorized to sell $100,000 worth of United States Government bonds at 3 per cent. The difference between 3 per cent per annum interest on the Government bonds and 4 per cent per annum interest on the State bonds will in 50 years, the interest being compounded annually, pay the principal, so that all the States will pay under the provisions of the amendment will be interest upon the amount of money which they secure under the apportionment provided in the amendment from the Treasurer of the United States during the 50-year period.

Mr. TAGGART. Mr. President——

The PRESIDING OFFICER (Mr. WALSH in the chair). Does the Senator from Utah yield to the Senator from Indiana?

Mr. SMOOT. I yield to the Senator from Indiana.

Mr. TAGGART. I should like to ask the Senator a question. What provision, if any, is there in the bill concerning the specifications and plans for the construction of the roads before they are accepted?

Mr. SMOOT. That is done by the United States Highway Commission. I will read the provision.

Mr. TAGGART. What section is it?

Mr. SMOOT. It is section 1, and it reads:

That in order to establish, construct, improve, and maintain public roads that are now or may hereafter be needed for use as post roads, military roads, or for interstate commerce, there be, and hereby is, created a fund to be known as the United States highway fund. Said fund shall be raised in the manner herein provided, but the Treasurer of the United States is hereby authorized to receive and place to the credit of said fund any money that may be contributed from other sources and to expend the same upon the order of the United States Highway Commission or in accordance with the conditions of the contribution.

Mr. TAGGART. Is there any restriction placed on the commission regarding the kind and character of roads that may be constructed?

Mr. SMOOT. I want to call the Senator's attention, in connection with what I have just read, to section 3, which provides:

That before any State shall be entitled to take advantage of the provisions of this act it shall establish by law a State highway commission, which said commission shall have general supervision of road construction and improvement in that State and of the ex-

penditure of money received from the United States highway fund, subject only to the provisions of this act and of State laws not inconsistent herewith. It shall be the duty of each State highway commission annually, on or before the 1st day of January, to make to the governor of the State in which it is located a full and detailed report of its operations, including a statement of receipts and expenditures, copies of which said report shall be sent to the Treasurer of the United States and to the United States Highway Commission.

Then section 4 provides:

SEC. 4. That the United States highway fund shall be apportioned and credited to the several States in the following manner: The United States Highway Commission, hereinafter created, shall ascertain in the most practicable manner from the best information available the total land area, the population according to the last Federal census, the total assessed valuation of all taxable property, and the total mileage of public roads in each of the several States, and shall compute the percentage of the total of each of these four items possessed by each State. They shall then compute the average of the four percentages for each State, and this average shall be the per cent of the $500,000,000 United States highway fund that shall be apportioned and credited to each State. Said commission shall notify the Treasurer of the United States of the result of their ascertainment and computation, which shall be made as of a date to be fixed by the commission. Such fund so apportioned shall be paid to the States only in accordance with the provisions of this act.

Mr. TAGGART. There is nothing in the bill, however, is there, directly covering the point in regard to the requirements concerning plans and specifications for the construction of the road before it is accepted as a project or concerning the maintenance of the road after it is constructed?

Mr. SMOOT. The State highway commission has that in hand, and maintenance is provided for also, I will say to the Senator, in section 6, which reads as follows:

SEC. 6. That on the 1st day of February of each year after the year 1918, the Treasurer of the United States shall pay to the custodian of the public funds of each State, from any funds in the Treasury not otherwise appropriated, an amount of money equal to one-half the amount such State has expended out of its own funds for the maintenance of public roads during the preceding calendar year, but in no case to exceed 2½ per cent of the amount of State bonds said State has deposited with the Treasurer of the United States under the provisions of this act. The money so paid shall be expended by said State only in the maintenance of public roads. The Treasurer of the United States shall withhold the payment of moneys to any State under the provisions of this section in the event that such State shall default in payment of any interest or prinicipal due.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from North Dakota?

Mr. SMOOT. I yield to the Senator.

Mr. GRONNA. I wish to say to the Senator from Utah that, as I understand, under the amendment the Federal Government will supervise the type of road. As I understood the question of the Senator from Indiana, he wanted to know who would decide as to what kind of road should be constructed. The State highway commission would deal with that altogether, and the Federal Government would only exercise supervision. The type of road and the construction of the road would both be under the control of the State highway commission.

Mr. SMOOT. If I did not say that to the Senator from Indiana, I intended to do so; that was exactly what I meant to say.

Now, Mr. President, I think that covers the points which have been raised.

Mr. CLAPP. Mr. President, if the Senator will pardon me, if that be true, then what force is given to the language of section 6, on page 8, which leaves it to the highway commission——

Mr. SMOOT. To certify to the Treasurer of the United States——

Mr. CLAPP. To certify to the Treasurer that the money "has not been expended with reasonable effectiveness," and if they do so certify, then the Secretary may withhold the apportionment?

Mr. SMOOT. I will say to the Senator that that has reference to the maintenance of the road. Section 6 has reference to the maintenance of the road, as I just read. I stopped, however, on page 8, line 5, and did not continue reading the balance of the section; but all of that section has reference to the maintenance of the road.

Mr. BANKHEAD. Mr. President, I will ask the Senator if he does not believe that under the provisions of the substitute the State highway commission would build any kind of a road they wanted to build—a dirt road, a surfaced road, or any other kind?

Mr. SMOOT. No; I do not.

Mr. BANKHEAD. Then I should like to know what would keep them, under the provisions of the bill, from building any sort of a road?

Mr. CLAPP. Of course I should have gone over this substitute with more care before inquiring of the Senator concerning it. What I want to know is, What is the method and the instrumentality to determine the amount which the State may receive from the Federal Government?

Mr. SMOOT. The bill itself provides exactly the amount that each State can receive under the provisions of the bill.

Mr. CLAPP. That is based upon what?

Mr. SMOOT. That is based upon the apportionment found in section 4, under these conditions: The total land area, the population according to the last Federal census, the total assessed valuation of all taxable property, and the total mileage of public roads in each of the several States; and then it provides further that in no single year can more than 20 per cent of the amount apportioned be drawn from the fund.

Mr. CLAPP. Then, no matter how willing a new State might be to assume its share of the burden of the development of highways, its right to participate under this bill is fixed arbitrarily by the terms of the bill?

Mr. SMOOT. It is, Mr. President; not only as to the amount it shall withdraw, but as to the apportionment that is allowed it.

Mr. CLAPP. It seems to me that that is an unfortunate feature, and that was my impression of the bill; but I wanted to be certain as a result of the analysis which the Senator has given.

Mr. SMOOT. I will say to the Senator that if it were otherwise, then one State could in justice complain, perhaps, of the Government extending more aid than it ought to extend to a sister State. Under the plan of the substitute all of the States are upon identically the same footing. The apportionments are made upon the basis of all four of these subdivisions, and I can not conceive of any more just way of apportioning the money than is provided in this substitute.

Mr. CLAPP. It may be just in one sense; but, while it is said that the Federal Government is going to aid the State, I do not see how there is very much aid in this, except in the use of bonds. The Senator says that in 50 years the bonds would pay themselves through the interest; but, of course, the State has to pay the interest.

Mr. SMOOT. But the State can not borrow money for less than 4 per cent, and therefore the State loses nothing, but it does gain the principal of the bond by accepting the credit of the Government of the United States.

Mr. CLAPP. Yes; I can see that, but what I was getting at was this: So long as a State is willing to assume its share, whatever the relative share may be, in proportion to the benefit to be derived from the Federal Government, why ought not the newer State, or the State that has to-day the least roads and the greatest need for increasing its roads, to have the opportunity so long as that State is willing to comply and assume whatever burden the law imposes upon the State as the price of its receiving the benefaction from the Federal Government?

Mr. SMOOT. Well, there has to be a limit somewhere, and the amendment provides that the limit shall be $500,000,000.

Mr. TAGGART. Mr. President——

Mr. SMOOT. I yield to the Senator from Indiana.

Mr. TAGGART. What is the manner of repaying this bonded indebtedness by the various States?

Mr. SMOOT. Amortization, of course, is the plan; but I will say that this is how the bill provides that it shall be done: The bill provides that the time of the annual payment of interest upon the State bonds shall be the same as the time of the annual payment of interest upon the Government bonds. The bonds of the State are deposited with the Government of the United States, and then the amount of money secured by the sale of the same amount of Government bonds is turned over to the State. All the State has to do is to pay the annual interest of 4 per cent upon the amount of money it has received, being the same as the amount of bonds it has deposited.

The Government of the United States takes 3 per cent of that 4 per cent and pays the interest upon the Government bonds that she sold for that State. The remaining 1 per cent is held by the Treasury of the United States. The bill authorizes the investment of that 1 per cent, to draw compound interest. At the end of the 50 years, when the State bonds are due and when the Government bonds are due that were sold to furnish the money to the State for the deposit of its bonds, the fund created by the 1 per cent of interest difference and the profits compounded upon that will pay the bonds, and the Government of the United States will return to the State the canceled bonds of the State.

Mr. TAGGART. By simply the payment of the 4 per cent each year?

Mr. SMOOT. Yes; and there is no question but that that can be done.

Mr. TAGGART. Let me ask the Senator one more question.

Mr. VARDAMAN. Mr. President, will the Senator from Utah permit me to ask him a question?

Mr. SMOOT. Just as soon as the Senator from Indiana has finished his questions.

Mr. TAGGART. I want to ask the Senator if it is not a fact that under the bill, where 20 per cent is permitted to be used

each year, the probabilities are that those States which would have the benefit of the 20 per cent would not use any of their own money for the betterment of the roads, but would use the 20 per cent? In other words, where the 20 per cent was paid from the sale of bonds for the improvement of roads, would there be any other improvements in the State until that 100 per cent in the five years had been expended?

Mr. SMOOT. I think some of the States, of course, would spend more money than the 20 per cent provided for.

Mr. TAGGART. I was just wondering whether it would not stop road building.

Mr. SMOOT. But I will say to the Senator that there is no question but that that 20 per cent would be used before any other road building would be undertaken by the State.

Mr. TAGGART. That is the point I am getting at.

Mr. SMOOT. Because the States, in order to build the roads, have to sell bonds, anyhow, for that purpose, and the States can not sell their bonds for less than 4 per cent; and, of course, when they do that, at the end of whatever period the bonds are issued for, they have to pay back the principal, and in the meantime they have to pay the 4 per cent.

Mr. TAGGART. In the case of a State, most of whose roads are completed, the taxation has been imposed directly on the immediate township or the county for the construction of those roads. Under the bill, as suggested, instead of making it local to the township or county that had already built its roads, part of the 4 per cent would be paid generally by the entire State, would it not?

Mr. SMOOT. By the entire State; and not only that——

Mr. TAGGART. In other words, the men who had not built their roads would be getting the benefit of the taxation of the others for the purpose of building their roads?

Mr. SMOOT. I was going to say to the Senator that there is not a question but that no State in this Union has her road system complete.

Mr. TAGGART. That is true.

Mr. SMOOT. No county in any State in the United States has her road system complete. That was taken under consideration in framing the substitute. All of those things will adjust themselves; and I do not believe it is possible, under the provisions of the substitute, that there will be partiality shown, either to the county or to any State in the Union.

The PRESIDING OFFICER. Does the Senator from Utah now yield to the Senator from Mississippi?

Mr. SMOOT. I yield to the Senator; yes.

Mr. VARDAMAN. Mr. President, I desired to ask the Senator a question some time ago, but I will not ask it at this time. The matter about which I desired to interrogate the Senator from Utah has been fully discussed heretofore; therefore I shall not consume the time of the Senate for a repetition. The thing I most desire just now is a vote on the passage of the bill.

Mr. BANKHEAD. Mr. President, before the Senator takes his seat I hope he will find time to answer the question I asked; and that is, if there is any provision in the substitute that directs in any manner the character of roads which shall be built, and whether they shall be substantial, or how they shall be built? Is there anything in the substitute that would prevent the highway commission, if they desired to do so, from building an ordinary dirt road? The substitute provides for maintenance. Is there anything to keep them from using a large part of this money in filling up mudholes along the roads, as has been so often suggested here? Is there any limitation on that?

Mr. SMOOT. Why, certainly, Mr. President; there is no provision in the substitute for the filling up of mudholes or the repairing of existing roads. The money must be expended for the construction of roads that may be approved by the State road commission; and, Mr. President, there is a section in the substitute providing for the maintenance of roads.

Mr. BANKHEAD. Yes; I know there is.

Mr. SMOOT. But not one dollar of the apportionment of money could go toward the maintenance of the roads. Not only that, but the substitute provides that wherever a State does not expend money for the maintenance of the roads she can not receive the benefits of this measure.

Mr. CURTIS. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Kansas?

Mr. SMOOT. Yes.

Mr. CURTIS. Is there any provision in the amendment offered by the Senator from Utah taking care of States where the constitution prohibits the State from engaging in internal improvements, and where that work is left to the counties, townships, and road districts?

Mr. SMOOT. No; Mr. President, there is not; but, of course, if there is any State that has such a provision in its constitution, it can change its constitution so as to fall under the provisions of this act.

Mr. SWANSON. Mr. President, if the Senator will permit me, 24 States in the Union, as found by the joint committee that examined this matter, would have to change their constitutions, and in some of them it would take five or six years. Here are the names of the 24 States, if the Senator wants them, on page 175 of the report of the joint committee that investigated this matter. It is stated there that 24 States would have to make changes in their constitutions before they could get the benefit of this provision, and that in a great many of them it would take long years to change them. I will name the States: Alabama, Arizona, Arkansas, Colorado, Delaware, Florida, Georgia, Indiana, Kentucky, Louisiana, Minnesota, Michigan, Missouri, Nebraska, Nevada, North Dakota, Ohio, Oregon, Pennsylvania, South Dakota, Texas, Virginia, West Virginia, and Wisconsin. All of those States would have to change their constitutions before they could avail themselves of the provisions of this substitute.

Mr. SMOOT. The most of the States referred to by the Senator have provisions in their constitutions in relation to the amount of indebtedness they can assume. It is based upon the assessed valuation of the property. The substitute provides that no State can receive a benefit under the apportionment made if the indebtedness exceeds 10 per cent of the assessed valuation of the property of the State. I discussed that question Saturday, and I frankly state now that I do not believe that any State in this Union ought to be allowed to assume an indebtedness greater than 10 per cent upon the assessed valuation of its property.

Mr. SWANSON. But the Senator does not catch the point. This does not prohibit the States appropriating money to aid in the construction of roads, which they may do under the committee bill; but these 24 States are prohibited from issuing bonds under the Senator's amendment, which would deprive them of all the privilege of road improvement. Under the bill, as reported by the committee, the States are authorized to appropriate money, but there are 24 States whose constitutions prohibit the issuance of bonds for road improvement.

Mr. SMOOT. Mr. President, I think the Senator is wide of the mark when he makes that statement. Most of the very States that he has referred to and named fall under the limitation of the amount of indebtedness that they can assume. It is true that under the constitution of Arkansas, in article 16, section 1, it is provided that—

> Neither the State nor any city, county, town, or other municipality in this State shall ever loan its credit for any purpose whatever, nor shall any county, city, town, or municipality ever issue any interest-bearing evidence of indebtedness except such bonds as may be authorized by law to provide for and secure the payment of the present existing indebtedness, and the State shall never issue any interest-bearing treasury warrants or scrip.

They are not barred from this bill except temporarily.

Mr. SWANSON. If the Senator will permit me, I was on the joint committee that examined this matter, and we looked into this feature of it. Every Senator can look on page 175 of the report of the joint committee and ascertain the provisions contained in the constitution of his State with reference to this matter. If there is to be any equality and justice in this scheme, it certainly should be delayed until all these 24 States have changed their constitutions so as to permit them to be treated on an equality with the other States.

Mr. SMOOT. That would simply be holding up a proper system of road building, because some State would not or did not change its constitution.

Mr. SWANSON. No; a proper system is a system that will permit the credit of the Government to be used equally for all sections. The Senator comes in here and proposes to start at once a plan of which 24 States can not avail themselves. If that plan is to be adopted, the right course to pursue is to pass the bill reported by the committee, and then, when these States have been given an opportunity to change their constitutions, to let them start on this matter with an equal opportunity of getting the advantages of it.

Mr. SMOOT. Mr. President, we will take Arizona, for instance. If Arizona desires to come under the provisions of the bill—and the provisions of the bill are applicable to all of the States of the Union, and any State in this Union could more than likely change its constitution in order that it might receive the benefits of the provisions of the bill within the time that the bill could get into operation——

Mr. CLAPP. Mr. President——

Mr. SMOOT. Let me finish my statement about this matter, and then I will yield to the Senator.

Mr. CLAPP. Certainly.

Mr. SMOOT. For instance, take Arizona. Article 9, section 5, of the constitution of Arizona reads:

> The State may contract debts to supply the casual deficits or failures in revenues, or to meet expenses not otherwise provided for; but the aggregate amount of such debts, direct and contingent, whether contracted by virtue of one or more laws, or at different periods of time, shall never exceed the sum of $350,000.

Now, if the State of Arizona can not go into debt more than $350,000, she never can build roads to any extent, because $350,000 is not going to build very many roads in the State of Arizona; and therefore, before she can ever begin to establish roads to any extent, she will have to change that provision of her constitution.

Mr. SWANSON. Mr. President, will the Senator yield to me?

Mr. SMOOT. Certainly.

Mr. SWANSON. There is no limitation in any State that I have seen in regard to raising revenue as the committee bill provides to expend in appropriations for roads. These limitations are upon issuing bonds and going in debt for it. Our bill, as reported by the committee, does not require the issuance of bonds; but we think if you are going into the business of issuing bonds, before you take up that measure these 24 States certainly ought to be permitted to change their constitutions and have an equal opportunity with the other 24 States to avail themselves of the provisions of the bill.

Mr. SMOOT. There is nothing in the bill which prevents them from changing their constitutions.

Mr. SWANSON. The legislatures may not be able to make the change for four or five years. In some States it will really take that long. The legislatures in some States meet only once in two years, and in other States only once in four years, and it will be an absolute injustice to them. As I said, at this time it would put 24 States ahead when these conditions exist. Our bill as reported by the committee treats every State with equal justice. If the Senator will come here in five or six years and if Congress will pass a bill so that it will be operative five or six years from now, when every State will have had an equal opportunity, then it would have an element of justice in it. I am not discussing the relative merits, but I say to start now, as this amendment provides, it discriminates against 24 States in the Union by a constitutional provision which they can not get rid of.

Mr. SMOOT. I do not think the Senator is justified in saying that. Take, for instance, the State of Arizona, just cited. She can not build many miles of roads until she changes her constitution anyhow. This bill does not take anything away from her.

Mr. CLAPP. If the Senator will pardon me, there is this distinction. The State of Arizona can build roads under her existing constitution in conjunction with the pending bill of the committee.

Mr. SMOOT. That is because the money is given to the State.

Mr. CLAPP. Yes. I am loath always to question the fairness of a measure that is advocated by the Senator from Utah because I know if there is any man on earth who wants to be fair he does, but now here is where this leads us. It takes in some States five years at least to amend their constitution. At the end of five years those States which can now come under this measure will have had an opportunity to participate in five annual distributions of the benefactions of this proposed amendment. Under that advantage they have built roads which gives them another increased advantage, because under this bill one of the elements which determines the amount of benefit which a State may derive from the bill is the amount of roads which have been built. So you are not only placing from three to five of these annual distributions beyond the reach of the participation of those States that have to amend their constitutions, but in the meantime the States which do not require an amendment to their constitutions have built an increased amount of roads under the bill, and are consequently entitled to a greater participation in the benefits of the bill.

It does seem to me before the Federal Government adopts that plan a reasonable suggestion ought to be made to the States so that they can, if they desire, place themselves in a position where they may simultaneously at the outset come in and avail themselves of the benefit of the bill. To that extent it does really seem to me, I say to the Senator from Utah with a good deal of deference, because I know there is no man in the Senate who has been actuated by a more earnest desire to be absolutely fair in everything, it is placing 24 of these States at a great disadvantage.

Mr. SMOOT. The only disadvantage that there possibly could be would be the length of time it would take to change the constitution. After they change the constitution they can have the full amount of the apportionment for three years. The 20 per cent of previous years is not taken from them. There is no time limit, I will say to the Senator.

Mr. CLAPP. But they could not go back and take their share of the apportionment for those years.

Mr. SMOOT. I will admit under the committee amendment Arizona can build roads to the amount of her apportionment because of the fact that the money is given to her. It is taken out of the Treasury of the United States and given to the State, and, Mr. President, I do not think that is a proper system.

Mr. SWANSON. If the Senator will permit me——

Mr. SMOOT. I ask the Senator to wait just a moment until I get through with this point and then I will yield to the Senator gladly. Under the committee amendment there is no doubt but what the Treasury of the United States will be called upon for $75,000,000, and I want to say to the Senator from Minnesota that that is just the beginning. I believe it will increase before the end of five years. We are commencing with the system of road building in which the Government of the United States takes the money of the people and gives it for road building in a State. We need not deceive ourselves in that regard. It is a donation out and out.

Mr. SWANSON. If the Senator will permit me, this money in the Federal Treasury is the people's money. They pay the taxes and they put it here. If it is a great success and the roads are improved, the country is benefited. I have no doubt they will increase it. If it is not a success, they will not do so. Those of us who advocate this bill believe that this money is the people's money and that it is the best expenditure which can be made of their money. We believe under this bill if it proves a success the donations will be increased and they ought to be increased. If the benefit does not exceed the expense, it ought to stop, and I for one would favor stopping it.

Mr. SMOOT. On that same line of argument I might say that the capitol building of each State ought to be built by the Government of the United States, and if we appropriate money out of the Treasury of the United States for that purpose we could claim in the same way that that is the people's money, and there ought to be appropriations that the capitol building should be built in every State in the Union. Mr. President, I do not believe that ought to be done.

Mr. SWANSON. If the Senator will permit me, there is this distinction: Here is the Government, which has its Rural Delivery System of 45,000 carriers; it has a star-route system. The expense of delivering the mail over the star routes and the rural-delivery routes is dependent on the condition of the roads. We say the Federal Government ought to put these roads in a good condition, so that the star route and the rural-delivery mails can be promptly and cheaply delivered. There is a vast difference in a case where the Government is a vast user of rural-delivery routes and start routes; and, being a user with the State, we say, "The Government will pay its part to put the roads in a good condition."

Mr. SMOOT. The Senator from Virginia should not say that, because there is an amendment now on the committee amendment that he voted against providing that there shall be money appropriated to build roads in the forest-reserves property owned by the Government. The Senator from Virginia voted against the amendment.

Mr. SWANSON. If the Senator will permit me again, I voted against that amendment because I think that the Western States have been generously treated under the provisions of distribution. For the area of Government lands within the State lines a certain amount of money is given. Let me ask the Senator this question——

Mr. SMOOT. Wait, and let me reply to that. The Senator can not say that truthfully, when he knows in some of the States land has been withdrawn to the amount of over 50 per cent of the area of the State, and more miles of road are required to be built through the various reservations to get from one county to another than there would be within the State. The Senator voted against the proposition that 10 per cent of the amount collected from the people of the States for grazing their sheep and their cattle could be used for building roads through the Government-owned property. He was opposed to that.

Mr. SWANSON. If the Senator will yield again, I have made an estimate, and I have an idea that the bill treats all the States with Government land very generously indeed. They get a large proportion.

Mr. SMOOT. All the States are treated alike under my amendment.

Mr. SWANSON. I am not going to be diverted from the discussion. I should like to ask this question. The Senator always advocates fairness. Twenty-four States would have to wait four or five years to get the benefits of the provisions of the Senator's amendment to any appreciable extent. It will require a constitutional amendment. If bonds were issued to the other 24 States, and we should get into a war or an emergency should arise and the Government did not desire to strain its credit further and would repeal this law, those States would have a chance of getting nothing. I insisted, both in committee and on the commission, that if this plan is ever to be devised, it ought to so apply to the future that every State could have an opportunity to start on equal terms. I should like to ask the Senator this question: If you were to sell a billion dollars' worth of United States bonds, and in time of peace strain your credit, and war or other emergency should arise, and you had to sell bonds for that purpose, do you not think that a billion dollars' worth of bonds, in addition to our present indebtedness, would impair the ability of the Government in its war or trouble in using its credit for that purpose?

Mr. SMOOT. No, Mr. President; but the indebtedness that the Government of the United States has of $500,000,000 in this form would not in any way, shape, or form endanger the credit of the United States. The argument is far-fetched.

Mr. SWANSON. My idea is that the Government in time of peace should be very loath to issue bonds. Its credit should be reserved for an emergency, a time of war, or other time of trouble. Consequently I thought the wiser course to pursue in connection with road construction was for the Government to appropriate the money so that it could pay as it went, and then permit the States to supplement that and pay their part of the burden. That is what the committee thought and that has been the conclusion reached in reference to the merits of these two bills.

Mr. SMOOT. Mr. President, if there was any danger of the United States straining its credit or if the $500,000,000 that was to be paid out at the utmost in five years would have a tendency even to bring about that condition, there might be something in the Senator's argument, but there is nothing in it. No $500,000,000 of bonds that will be issued to the States of the Union secured by the bonds of the State are ever going to affect the credit of the United States.

Mr. SWANSON. If the Senator will permit me, he is very apprehensive that an appropriation of $75,000,000, supplemented by at least an equal amount from each State, will go so far as to bankrupt the Government. Now, if we once get to issuing bonds and the State under this plan can issue its own bonds and in 50 years pay nothing, does not the Senator believe that before we get through ten billions of bonds will be issued?

Mr. SMOOT. Not at all.

Mr. SWANSON. If this works successfully and you get all your bonds for nothing, there will be a greater demand for the issue of bonds than there would be to raise the taxes in the State and have them pay an equal amount.

Mr. SMOOT. No; the State is paying interest all the time upon the amount of bonds on deposit with the Government of the United States, and the State is not going to pay any more interest than the people of the State will vote or the people of the State want to expend in the building of roads. So the argument of the Senator falls to the ground by the mere statement.

Mr. President, I do not want to see the Government of the United States go headlong into debt. I would not for one moment approve of any such thing. The sale of these bonds will not interfere with the credit of the United States in time of war, if war should come, the loyalty of the people is sufficient to see that the money necessary for the Government to carry on whatever war it might be called upon to face is furnished.

Mr. CLAPP. If the Senator will pardon me, of course it would not interfere with the people carrying on a war if war came, but it might interfere with Congress carrying on the road proposition if they had already issued a vast amount of bonds when that occasion arose.

The Senator says that $500,000,000 of bonds would in no sense weaken our credit. What the Senator thinks would be the financial effect is not the question. The question is, what might Congress at that time think of continuing this process, and if they did suspend this process, whether injustice will not have been done to 24 States in this Union that can be avoided by adopting the committee bill.

Mr. SMOOT. There is no need of Congress taking action, because the bill itself is guarded. The bonds have to be sold at 3 per cent. Government bonds, in order to raise the money, must be sold at par; and if the bonds can not be sold at par then the Government of the United States can not raise the money.

Mr. CLAPP. Mr. President, these bonds might be sold at par, but it might occur to Congress at that time that the other bonds necessary to use in an emergency could be sold for less if we did not continue to put these 3 per cent bonds on the market.

Mr. SMOOT. When the Government can sell bonds at 3 per cent interest per annum there will be no emergency.

Mr. SWANSON. Will the Senator give us an assurance that there will not be any emergency within four or five years with the bonds selling at 3 per cent?

Mr. TOWNSEND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield; and if so, to whom?

Mr. SMOOT. The Senator from Virginia asks me if I can give him an assurance that there will not be an emergency in four or five years. Of course, no one can give that assurance, and that has not anything to do with the bill or the provisions of it—not in the least.

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Michigan?

Mr. SMOOT. I yield.

Mr. TOWNSEND. May I ask the Senator if he has considered carefully what might possibly be the effect upon lower bonds we have already issued if we would authorize an issue of $500,000,000 at 3 per cent?

Mr. SMOOT. This does not say that the bonds shall be sold. They shall not be sold for less than par, and these bonds will be sold upon the same basis as to the rate of interest as the bonds that are in the market to-day. If there is a premium, they will sell at a premium. But the bill provides that in no case can they be sold for less than par. So that question regulates itself.

Mr. President, all I shall do further is to content myself now by asking for a vote upon the amendment.

Mr. BANKHEAD. We are ready to vote on it.

Mr. SMOOT. I ask for the yeas and nays.

Mr. NORRIS. Mr. President, I know that the substitute offered by the Senator from Utah is offered in the best of faith; that ex-Senator Jonathan Bourne devoted a great deal of time to the consideration of the subject, and that this substitute is the result, or partially the result, of his labors.

Mr. SMOOT. Mr. President, I take it for granted that the Senator was not in the Chamber when I spoke on Saturday. In my opening statement I gave Jonathan Bourne credit above all other men for the preparation of this substitute, and I want now, as I did then, to state that I claim no credit whatever for it. I think the Senator heard me say that last Saturday.

Mr. NORRIS. I was not only in the Chamber on Saturday, but I interrupted the Senator with some questions that I think he has not yet answered. I heard all he said. I do not understand why the Senator makes that statement now with regard to Jonathan Bourne.

Mr. SMOOT. For the reason——

Mr. NORRIS. Does the Senator object to my giving some credit to Jonathan Bourne?

Mr. SMOOT. No; that was not it. It has been referred to a number of times to-day as being the Bourne plan—as I myself said it was—that it was prepared virtually by him, and is the Bourne bill. I did not want the Senators present who were not here Saturday to think for a moment that I was trying to claim any credit for the preparation of the amendment, because I had none other than simply advising with Mr. Bourne at the time he prepared it, but Mr. Bourne gave 21 months of his time night and day to the preparation of it.

Mr. NORRIS. I do not yet understand why the Senator should interrupt me with this statement, unless he does not want me to give credit to Mr. Bourne, which I was about to do when I was interrupted. Nobody has intimated that the Senator from Utah was claiming any credit that was not honestly his.

I was going to say, when I was interrupted, that I have the greatest respect and admiration for ex-Senator Bourne. When he devoted his great ability and energy to any subject he went to the bottom of it. He was noted as being a man of a great deal of ability and a great deal of enthusiasm, and when he took up the study of a question he went into all the details, and he was entitled to a great deal of credit. I wanted to say that much before I proceeded to oppose the adoption of the amendment.

I propounded to the Senator from Utah one or two questions on Saturday in regard to this amendment that he has not yet explained. I am going to take them up. One of them is in

reference to maintenance, and that I will take up second. The other is in reference to the payment of the bonds that are issued for the purpose of building roads. Briefly stated, the proposed substitute bill offered by the Senator from Utah provides that the States shall issue bonds drawing 4 per cent interest; that those bonds shall be deposited with the Treasurer of the United States; that the United States Government shall then issue bonds to the same amount, bearing 3 per cent interest; that the Treasurer of the United States will keep the State bonds—they will not be sold, they will be held by the Federal Government; but that the Federal 3 per cent bonds will be sold on the market at not less than par and with the proceeds of these bonds roads shall be built by the States. Then the Federal Government will turn the money over to the States in a certain proportion and in certain amounts provided for in the substitute, not exceeding in the aggregate $500.000,000.

It is proposed in the substitute that the States shall pay interest on those bonds deposited with the United States Treasurer at the rate of 4 per cent, and that when that interest is paid the Treasurer shall pay 3 per cent, and with that money pay the interest that is due on the Federal 3 per cent bonds. That leaves 1 per cent in the hands of the Treasurer of the United States, and it is the intention out of that 1 per cent to pay the principal of the bonds.

The Senator from Utah said, and he repeated it several times, that the adoption of this proposed substitute bill will not cost the Federal Government one cent. I want to demonstrate that it will cost the Federal Government a great deal of money. The bill provides that on this extra 1 per cent paid to the Federal Treasurer the Federal Government shall allow each State 3 per cent interest compounded semiannually, and it is figured that compounding this semiannually for 50 years, the term of the bonds, it will more than pay the bonds, and thus save the Government harmless. But if the Federal Government is going to pay the States 3 per cent interest on that sinking fund composed of this 1 per cent paid in by the State above the amount expended to pay the interest on the Federal bonds, the Federal Government is going to allow the State interest on that at the rate of 3 per cent compounded semiannually. So, if the Federal Government does not have to pay something, it must put that out at interest or do something with it so that it will bring in the money that it is bound by the bill to pay to the State, namely, 3 per cent interest compounded semiannually. Under the bill the Federal Treasurer has no authority to loan that money out or to invest it in anything except as specifically stated in the bill. These particular bonds are then floating on the market, and if every time he got a million dollars in this sinking fund he could take it up and buy a million dollars' worth of bonds, if the Government had issued these 3 per cent bonds, then he would come out whole, because those bonds draw 3 per cent interest, and the Government is liable for that interest.

But, Mr. President, how do you expect the Treasurer of the United States to buy these bonds? In the first place, especially at the beginning of this great system, the men or the institutions who invest their money in these 3 per cent bonds invest them there because the bonds run a long time, they are 50-year bonds, and they are exempt from taxation. They make, in other words, a permanent investment in these bonds. Would they next year sell them at par? Would they turn them over to the Government under any ordinary conditions and times? These bonds would be selling in the open markets of the world at a premium. They would probably be sold in the first instance at a premium, and it would be unreasonable to expect that the Treasurer of the United States could ever buy those bonds at par. The bill realizes that it provides that he must pay a premium of 2 per cent in order to get the bonds and to get the accrued interest on them.

When that can be done you can readily see that the Federal Government is losing some money. It will pay the State 3 per cent interest compounded semiannually, and it will have to go into the market and pay a premium of 2 per cent in order to retire those bonds. So it is going to lose that 2 per cent. It is liable for 3 per cent. If it buys them at par, it will make itself whole, but whatever premium it has to pay it loses. So the Government is out 2 per cent at least. I do not see how it can be figured any other way.

Again, when the Government issues a million dollars, we will say, this year and buys bonds with it during the next year, perhaps every day in the year accumulations are coming in from the various States of the Union in the way of interest, and the Government must pay, from the day it receives that money, to the State 3 per cent interest on it. So while it is accumulating and getting two million it pays interest.

Mr. LIPPITT. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. LIPPITT. The Senator says that under certain circumstances the Government of the United States might have to pay a premium of 2 per cent for these bonds. It is also possible that under other circumstances it will get those bonds below par.

Mr. NORRIS. Yes; I suppose that would be possible.

Mr. LIPPITT. In that case the Government would make money.

Mr. NORRIS. Yes.

Mr. LIPPITT. So when the Senator says the Government would at least have to pay a premium of 2 per cent, I think while it is possible it is by no means a certainty, as the Senator seems to think.

Mr. NORRIS. It is not only possible but it is probable, and there could be no imaginable condition where it would buy, as the Senator from Rhode Island says, at less than par, unless the very life of the Government was at stake in some catastrophe, either in a civil war or an international war.

Mr. LIPPITT. I will say to the Senator there are a great many contingencies that might arise. There might be a scarcity of money just at a moment when there was a plethora of money in the world. Those conditions do not last always. There is an ebb and flow in those matters. It is not at all impossible, not at all improbable, that over a long period of 50 years there will be more than one occasion where the Government of the United States might be able to buy those bonds at less than par. I just make that suggestion in reply to the Senator's supposition that they would always be at a premium.

Mr. NORRIS. Well, Mr. President, the suggestion which the Senator from Rhode Island makes is possible, but it is altogether improbable, and, in my judgment, can never come about, except under the conditions I have named. Take the 3 per cent bonds, take them all the way back from the very beginning of their issue, during which time, except for a short period during the Civil War when the life of the Nation was at stake—and such a condition as that I concede would put these bonds down probably to less than par—but I think from the time of the issue of those bonds up to the present day there has never been an hour of which I know when 3 per cent bonds would not sell at least at par and for nearly all the time at a premium. So, Mr. President, it is safe to say that the Government would have to pay this premium of 2 per cent, and that it would lose that money, which would come out of the Treasury of the United States and the taxpayers would have to pay it. It is not, therefore, true, as has been said in defense of this substitute, that it would not cost the Government of the United States a penny.

Mr. President, let us take up the question of maintenance. The bill before the Senate provides, not so specifically as I should like to have it, but it provides that the State must maintain these roads, and that it must agree to maintain them before it can get any money from the Federal Treasury. Under this substitute no such agreement is required. In the pending bill there is a provision which requires the use of this money for the building of good, stable roads, a provision by which the Secretary of Agriculture must first pass on the kind of road which it is proposed to build before the Federal money can go into it. Under the substitute it makes no difference what kind of a road the State wants to build, the Federal Government has nothing to say about it. The State can get its proportionate share of this money and build any kind of road it pleases, without any Federal supervision and without any Federal control whatever.

Now, as to maintenance. That is another respect in which I think the substitute is not so good as is the pending bill, because, as I have said, the bill before the Senate provides that the State must agree to maintain these roads and to keep maintaining them, and after formal notice is given if the State does not maintain them, and if within that four months it does not proceed to maintain the roads which the Government has assisted in constructing, then it gets no further money from the Federal Treasury.

But what do we find about the maintenance of roads in the substitute? If you want to again find a refutation of the statement that this substitute will not cost the Government a cent, read section 6 in its entirety, with all these provisos, and you will find there where the Federal Government is called upon to contribute to the State, whether they get any of these bonds or not. The only thing they are required to do is to have done some work in maintaining roads in the State. It is provided—

That on the 1st day of February of each year after the year 1918 the Treasurer of the United States shall pay to the custodian of the public funds of each State—

Not from this road fund—nothing of the kind—but that he shall take the money out of the Treasury—

from any funds in the Treasury not otherwise appropriated an amount of money equal to one-half the amount such State has expended out of its own funds for the maintenance of public roads during the preceding calendar year, but in no case to exceed 2½ per cent of the amount of State bonds said State has deposited with the Treasurer of the United States under the provisions of this act.

Then there is a proviso near the end of the section which reads:

*Provided*, That if any State shall fail to issue bonds as provided in section 5 hereof it shall nevertheless be entitled during the period such failure to issue bonds shall continue, subject to all the conditions and limitations set forth in this section, to receive the maintenance fund provided for in this section; but in no case shall such maintenance fund exceed the amount which such State would have been entitled to receive if it had issued the bonds authorized by section 5 hereof.

Whether or not it takes advantage of this substitute, if it becomes a law, to get a part of the money from the sale of the bonds, there is not a State in the Union but spends millions of dollars in the maintenance of roads within its borders, and under this proposed substitute one-half of what the State would spend it could get from the Treasury of the United States, and it would come out of the taxpayers of the country.

Mr. President, it is fair to assume that all of these $500,000,000 of bonds will be issued. It may be several years before it will be done, but eventually they will all be issued. Then we would have to pay to the States of the Union yearly out of the Treasury of the United States a direct payment of 2½ per cent on those bonds, because it is the limitation of the amount that the States can get for maintenance. There is not any doubt but that each State would pay out of its own funds, as it would have to do under any ordinary circumstances, much more than would give it the right to get the maximum amount from the Federal Treasury for maintenance.

But, Mr. President, it does not end with one year; that does not end the time when these bonds are all issued; but it goes on during all eternity, unless this law should be repealed. There is no end to it.

What would it amount to each year? I have just computed it here. After the act came into full operation it would amount to $12,500,000 every year. That is not out of these bonds, Senators; that is not coming from the interest on these State bonds or anything of that kind, but it is coming out of the Federal Treasury. It would come out of the Federal Treasury if there never was a bond issued. Every State can get that, whether it issues bonds or whether it does not. All it has got to show is that it has spent money during the previous year for the maintenance of its roads. That would give it the 2½ per cent; would give it the amount that I have named.

Mr. President, there is another weakness of the substitute that would cost a great deal of money. That is another refutation of the charge that this would not cost the Government one cent. I have already shown that it would cost the Government many millions of dollars, and a permanent appropriation through all time of $12,500,000 annually. That would not end even when the 50 years were up and these bonds were all paid off, unless the law were repealed.

There is, however, still another provision. This substitute provides for a highway commission, rather an ornamental body. It is stated in the bill that it has only a supervisory capacity. About the only thing it does definitely is to take the statistics, than anybody can get from the census, and figure out what each State should get. That has already been figured out and is already in the RECORD several times, and it would be a very easy matter to figure just to a cent how much a State would get when you knew the area of the State, its population, its taxable property, and the miles of road that it has. Those are the four things that must be averaged and taken into consideration in order to determine what a State will get.

This highway commission that is to do the figuring is composed of two members of the Senate committee and two members of the House Committee on Post Offices and Post Roads. That makes four. They would constitute a majority. One of them belongs to the majority party and one of them to the minority party. The commissioner of good roads would be another one and the engineer from the War Department would be the sixth. So these four Members of Congress, who do not know any more about good roads than do we, would always constitute a majority of that commission. After they had performed the duty which I have described and figured out the data—they would probably employ a clerk to do that—after they had figured out how much each State would get each year, then this is what they might do. I want to read the section.

SEC. 7. That there is hereby created a United States highway commission, to be composed of the chairman and ranking minority member of the Senate Committee on Post Offices and Post Roads, the chairman and ranking minority member of the House Committee on Roads, the Director of the Office of Public Roads, and a United States Army engineer to be detailed from time to time by the Secretary of War. Such commission shall have only an advisory voice in the expenditure of the United States highway fund in the several States.

They could advise, but their advice might be followed or it might not be, as the proper parties saw fit, and probably in most instances it would not be followed.

It shall have its head office—

Now, listen to this—

It shall have its head office in the District of Columbia, but may create highway divisions, never exceeding in number one for each State, and may maintain a division office in charge of a United States highway engineer in each division. Said commission shall have power to employ such clerical and expert assistance as may be provided for by appropriations made by Congress from time to time, and may require the assistance and cooperation of the officers and employees of any department in its work.

Mr. President, that would be a haven of rest for all of the "lame ducks" that ever go out of Congress. There would be or could be under that provision a highway commission established in each State, and undoubtedly there would be also one in the District of Columbia, with a man in charge in each State, with as many clerks and other employees as the highway commission might designate, and with four Members of Congress, meeting the thousands and thousands of applications for positions, and no civil-service law to control the matter. It would be the greatest place in the world to dole out to the various political machines and political bosses over the country safe places for faithful servants to draw upon the Federal Treasury a salary not fixed by law, but fixed by the same men who select the officers to fill the offices.

Mr. President, it seems to me that all this ought to defeat any proposition. To let the bars down in that kind of way and to permit a commission controlled by four men from Congress to establish 49 offices in the various States of the Union, with unlimited salaries and with unlimited numbers of employees, ought to be enough, it seems to me, to defeat any proposition which contained that kind of a provision.

For that reason, as well as for the others which I have outlined, it seems to me that the substitute ought to be defeated.

The PRESIDING OFFICER. The question is on the amendment offered as a substitute by the Senator from Utah [Mr. SMOOT] for the committee amendment.

Mr. SMOOT. On that I call for the yeas and nays.

Mr. TOWNSEND. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Gronna | Nelson | Smith, Md. |
| Bankhead | Hardwick | Norris | Smoot |
| Brady | Hitchcock | O'Gorman | Sterling |
| Broussard | Johnson, Me. | Overman | Sutherland |
| Catron | Jones | Owen | Swanson |
| Chilton | Kenyon | Page | Thomas |
| Clapp | La Follette | Phelan | Townsend |
| Clarke, Ark. | Lane | Poindexter | Underwood |
| Colt | Lea, Tenn. | Ransdell | Vardaman |
| Culberson | Lee, Md. | Saulsbury | Wadsworth |
| Curtis | Lewis | Shafroth | Walsh |
| Dillingham | Lippitt | Sheppard | Warren |
| Fletcher | Martin, Va. | Sherman | Williams |
| Gallinger | Martine, N. J. | Simmons | |
| Gore | Myers | Smith, Ga. | |

Mr. CHILTON. I desire to announce, for the day, that my colleague [Mr. GOFF] is absent on account of illness.

Mr. BROUSSARD. I have been requested to state that the Senator from Oregon [Mr. CHAMBERLAIN] is absent on official business.

The PRESIDING OFFICER. Fifty-eight Senators having answered to their names, a quorum is present. The question is on the amendment, in the nature of a substitute, offered by the Senator from Utah [Mr. SMOOT] to the amendment reported by the committee.

Mr. SMOOT. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I again announce my pair with the Senator from New Mexico [Mr. FALL] and withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER]. In his absence I withhold my vote. If at liberty to vote, I should vote "yea."

Mr. TILLMAN (when his name was called). Transferring my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Arkansas [Mr. ROBINSON], I vote "nay."

Mr. UNDERWOOD (when his name was called). I have a general pair with the junior Senator from Ohio [Mr. HARDING]. In his absence I withhold my vote.

Mr. WADSWORTH (when his name was called). I have a general pair with the junior Senator from New Hampshire [Mr. HOLLIS]. I transfer that pair to the Senator from Ohio [Mr. HARDING] and vote "yea."

Mr. WILLIAMS (when his name was called). Repeating my announcement made on the last roll call, I vote "nay."

The roll call was concluded.

Mr. TOWNSEND (after having voted in the negative). I transfer my pair with the junior Senator from Florida [Mr. BRYAN] to the senior Senator from Idaho [Mr. BORAH] and allow my vote to stand.

Mr. MYERS. I transfer my pair with the Senator from Connecticut [Mr. MCLEAN] to the Senator from New Jersey [Mr. HUGHES] and vote "nay."

Mr. OVERMAN (after having voted in the negative). I inquire if the junior Senator from Wyoming [Mr. WARREN] has voted?

The PRESIDING OFFICER. He has not.

Mr. OVERMAN. I withdraw my vote, having a general pair with that Senator.

Mr. BECKHAM. I transfer my pair with the Senator from Delaware [Mr. DU PONT] to the Senator from Indiana [Mr. TAGGART] and vote "nay."

Mr. REED. I have a pair with the Senator from Michigan [Mr. SMITH], but I understand if he were present he would vote as I am about to vote, and I therefore feel at liberty to cast my vote. I vote "nay."

Mr. WEEKS. I have a general pair with the senior Senator from Kentucky [Mr. JAMES], which I transfer to the senior Senator from Iowa [Mr. CUMMINS] and vote "yea."

Mr. WADSWORTH. In view of the return of the junior Senator from New Hampshire [Mr. HOLLIS], I withdraw the announcement of the transfer of my pair with him to the senior Senator from Iowa [Mr. CUMMINS] and will allow my vote to stand.

Mr. UNDERWOOD. I transfer my pair with the Senator from Ohio [Mr. HARDING] to the Senator from Nevada [Mr. NEWLANDS] and vote "nay."

Mr. BROUSSARD. I desire again to announce that the Senator from Oregon [Mr. CHAMBERLAIN] is detained from the Chamber on account of official business.

Mr. HITCHCOCK (after having voted in the negative). I transfer my pair with the Senator from Maine [Mr. BURLEIGH] to the Senator from Illinois [Mr. LEWIS] and allow my vote to stand.

Mr. CURTIS. I am requested to announce that the Senator from Wyoming [Mr. CLARK] is paired with the Senator from Missouri [Mr. STONE].

The result was announced—yeas 20, nays 47, as follows:

YEAS—20.

| | | | |
|---|---|---|---|
| Brady | Gallinger | Lippitt | Smoot |
| Brandegee | Gronna | Lodge | Sutherland |
| Colt | Jones | Oliver | Wadsworth |
| Curtis | Kenyon | Page | Weeks |
| Dillingham | Lane | Sherman | Works |

NAYS—47.

| | | | |
|---|---|---|---|
| Ashurst | Hollis | Owen | Smith, Ga. |
| Bankhead | Johnson, Me. | Phelan | Smith, Md. |
| Beckham | Kern | Pittman | Smith, S. C. |
| Broussard | La Follette | Poindexter | Sterling |
| Catron | Lea, Tenn. | Pomerene | Swanson |
| Clapp | Lee, Md. | Ransdell | Tillman |
| Clarke, Ark. | Martin, Va. | Reed | Townsend |
| Culberson | Martine, N. J. | Saulsbury | Underwood |
| Fletcher | Myers | Shafroth | Vardaman |
| Gore | Nelson | Sheppard | Walsh |
| Hardwick | Norris | Shields | Williams |
| Hitchcock | O'Gorman | Simmons | |

NOT VOTING—29.

| | | | |
|---|---|---|---|
| Borah | Fall | McCumber | Stone |
| Bryan | Goff | McLean | Taggart |
| Burleigh | Harding | Newlands | Thomas |
| Chamberlain | Hughes | Overman | Thompson |
| Chilton | Husting | Penrose | Warren |
| Clark, Wyo. | James | Robinson | |
| Cummins | Johnson, S. Dak. | Smith, Ariz. | |
| du Pont | Lewis | Smith, Mich. | |

So Mr. SMOOT's amendment to the amendment of the committee was rejected.

Mr. LIPPITT. Mr. President, I had hoped that the amendment offered by the Senator from Utah [Mr. SMOOT] might have prevailed. It seemed to me like a scientific and business-like method of distributing national aid for good roads to the States; and if it had prevailed, I should have been glad to vote for the bill. As the bill now stands I can not vote for it.

I have had prepared a table showing the amount of the $25,000,000 that each State would receive under the conditions of this bill, and also showing the amount that each State would pay if this money were collected under the provisions of the corporation and income taxes. This table shows that 36 States receive more than they would pay, and that 13 States pay more than they would receive. Of those 13 States that pay more than they receive, the States of Massachusetts, New York, and Pennsylvania will pay $12,948,750, or more than 50 per cent of the entire amount. Of the total amount of $75,000,000 that is proposed to be appropriated by this bill, those three States would pay a little over $38,000,000.

It seems to me that under the showing of that table this bill is a "pork-barrel" proposition that makes the most extravagant river and harbor bill look like an infant industry. I think if the conditions were reversed, and 36 States paid more than they received, and those 3 States received more than 50 per cent of the benefit, it would be as difficult to get this bill through this body as under the present conditions it is easy.

I ask to have this table printed as a part of my remarks.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The table referred to is as follows:

*Table showing the amounts each State would receive out of each $25,000,000 appropriated for good roads as proposed in House bill No. 7617, and the amount each State pays of $25,000,000 collected under the corporation and income taxes.*

| | States that pay less than they receive. | Amount each State would receive. | States that pay more than they receive. |
|---|---|---|---|
| Alabama | $81,500 | $536,000 | |
| Arizona | 39,250 | 358,750 | |
| Arkansas | 39,500 | 424,250 | |
| California | | 778,750 | $891,250 |
| Colorado | 175,000 | 434,000 | |
| Connecticut | | 159,500 | 400,000 |
| Delaware | | 41,500 | 88,000 |
| Florida | 71,500 | 280,250 | |
| Georgia | 137,500 | 693,250 | |
| Idaho | 29,750 | 313,750 | |
| Illinois | | 1,144,000 | 1,762,500 |
| Indiana | 308,500 | 703,000 | |
| Iowa | 228,500 | 753,500 | |
| Kansas | 173,000 | 743,750 | |
| Kentucky | 196,500 | 503,000 | |
| Louisiana | 164,000 | 339,750 | |
| Maine | 148,000 | 243,750 | |
| Maryland | | 220,750 | 318,500 |
| Massachusetts | | 380,000 | 1,413,750 |
| Michigan | | 753,250 | 908,250 |
| Minnesota | 556,000 | 730,250 | |
| Mississippi | 33,000 | 457,000 | |
| Missouri | 633,750 | 877,750 | |
| Montana | 57,750 | 504,250 | |
| Nebraska | 87,500 | 553,500 | |
| Nevada | 25,750 | 334,750 | |
| New Hampshire | 52,250 | 108,250 | |
| New Jersey | | 304,000 | 833,250 |
| New Mexico | 16,500 | 411,750 | |
| New York | | 1,292,500 | 8,615,000 |
| North Carolina | 118,750 | 582,000 | |
| North Dakota | 20,250 | 392,000 | |
| Ohio | | 968,500 | 1,255,250 |
| Oklahoma | 126,750 | 591,250 | |
| Oregon | 95,250 | 407,250 | |
| Pennsylvania | | 1,195,250 | 2,920,000 |
| Rhode Island | | 60,250 | 221,500 |
| South Carolina | 50,250 | 370,500 | |
| South Dakota | 23,000 | 418,750 | |
| Tennessee | 127,500 | 591,250 | |
| Texas | 326,750 | 1,505,250 | |
| Utah | 81,250 | 289,750 | |
| Vermont | 60,500 | 118,000 | |
| Virginia | 195,500 | 510,000 | |
| Washington | 160,500 | 366,250 | |
| West Virginia | 155,000 | 275,250 | |
| Wisconsin | 272,750 | 661,000 | |
| Wyoming | 20,500 | 318,750 | |
| Alaska, District of Columbia, and Hawaii | | | 238,750 |
| Total | 5,109,570 | 25,000,000 | 19,866,000 |

Mr. NELSON. Mr. President, time and again during this session I have heard it stated and reiterated that certain States pay a large share of the income tax. I have heard so much of it that I am getting tired of it.

What has enabled these States to pay these income taxes? Why, they have been drawing them from the whole country. If we penned up Massachusetts or New York or Rhode Island and shut them off from the rest of the country, they would not have any big incomes. What enables them to pile up money in these Eastern States and in the large cities but the fact that they have the whole country to draw upon? Yet they are parading before us the fact that they pay these big income taxes. What has enabled them to pay these taxes but the fact that they have been able to pile up these fortunes by drawing them from the rest of us? They ought to remember that.

When you speak about the great fortunes that you have piled up and the great income taxes you are paying you should remember that you have not gotten those from Europe. You have

gotten them from the American people by selling them your products. We consumers in the West have helped you to pile up those fortunes; and why should you parade them before us and say that you are paying more than your share? You are simply paying back, in the form of taxes, a part of that which we have enabled you to put in your pockets. That is all there is to it.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee as amended.

The amendment as amended was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes."

INDIAN APPROPRIATIONS.

Mr. ASHURST. I ask unanimous consent that the Senate proceed to the consideration of the conference report on the Indian appropriation bill.

The VICE PRESIDENT. Is there any objection?

Mr. SUTHERLAND. What was the request, Mr. President? I did not hear it.

The VICE PRESIDENT. To proceed with the consideration of the conference report on the Indian appropriation bill.

There being no objection, the Senate proceeded to consider the report of the committee of conference on the disagreeing votes of the two Houses on the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917.

Mr. ASHURST. Mr. President, I know that there are two Senators who are opposed to the conference report, both of whom wish to speak against it. I do not want to have the report adopted in their absence. I do not think it would be good faith; so I think I ought to suggest the absence of a quorum, in order that they may have an opportunity to be heard against the report.

I therefore suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Gronna | Norris | Smoot |
| Bankhead | Hardwick | O'Gorman | Stone |
| Beckham | Hollis | Oliver | Sutherland |
| Brady | Husting | Overman | Swanson |
| Brandegee | Johnson, Me. | Owen | Thomas |
| Broussard | Jones | Page | Thompson |
| Catron | Kenyon | Phelan | Townsend |
| Chilton | Kern | Pittman | Underwood |
| Clapp | La Follette | Pomerene | Vardaman |
| Clarke, Ark. | Lane | Ransdell | Wadsworth |
| Colt | Lea, Tenn. | Reed | Walsh |
| Culberson | Lee, Md. | Saulsbury | Warren |
| Curtis | Lippitt | Sheppard | Weeks |
| Dillingham | Martin, Va. | Sherman | Williams |
| Fletcher | Martine, N. J. | Shields | Works |
| Gallinger | Myers | Simmons | |
| Gore | Nelson | Smith, Md. | |

The VICE PRESIDENT. Sixty-six Senators have answered to the roll call. There is a quorum present. The question is on agreeing to the conference report.

Mr. LANE. Mr. President, before the report is finally adopted or rejected I wish to make a correction in the statement which the Senator from Arizona [Mr. ASHURST] made a few days ago, when this report was first submitted. The Senator said that under the amendment offered by me, providing for the inauguration of a new system of bookkeeping in the Indian Bureau by the Bureau of Efficiency there would be considerable expense involved; that a considerable sum of money would have to be expended in placing the new set of books in operation. I am informed, and so stated when I submitted the amendment, that it would not cost anything; that this bureau was already provided for, and that there would be no expense except that of the ordinary work which they are engaged in doing, whether they are engaged upon that particular task or not.

I also understood at the time, or I was informed before the report was submitted here, that it did not meet with the approbation of the Indian Bureau, and that they would defeat the bill if necessary to keep the amendment out of it. I got that information reliably. I see no reason why there should be an objection made to inaugurating a better system of bookkeeping in the Indian Bureau, which handles some eight or nine hundred millions or perhaps a billion dollars' worth of property belonging to a people who are helpless wards. I do not see any reason why there should be any objection to having the accounts kept in such a manner that the Senate and the Congress may know what they are doing when they make appropriations for the support of that department.

As a matter of fact, as nearly as I can ascertain, there has been no experting of those books since they were installed 60 or 70 years ago, since the department first began its work. There has been no balance taken, nor, it seems, can there be one made at this time; and it seemed to me that that was a mere matter of justice to the Congress—who are responsible in part, and in fact held responsible ultimately, for the legislation which carries on the work of that bureau—to have this done.

I do not think that the Senate or the majority of the Members of Congress of either House understand the status of the Indian. The Indian is a ward. He is a "mute and inglorious" ward. He has no voice in regard to his personal liberty or the manner in which his property is handled. He can not buy property; he can not lease his property, nor dispose of it in any way. He is without liberty, for the reason that he is confined to the reservation. His property is handled for him by guardians who are maintained in large part at his expense. In the management of the affairs of the Indians Congress makes appropriations of ten, eleven, or twelve million dollars a year, and I understand that is but a tithe of the expenditure; that hundreds of thousands of dollars and millions of dollars worth of property are handled without any accounting at all, without ever being brought into Congress or within the reach of Congress.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Colorado?

Mr. LANE. I do.

Mr. THOMAS. I want to suggest to the Senator that we have a Committee on Expenditures in the Interior Department, at the head of which is one of the most capable accountants in the United States—a man who seems to have abundant leisure. I suggest that he be requested to take some active part in this question, and inquire into it and report to the Senate his conclusions after a full and careful and exhaustive examination of expenditures in the Interior Department. Of course, I refer to the Senator from Utah [Mr. SMOOT].

Mr. LANE. I have an idea that if the Senator from Utah set to work upon analyzing these accounts he would not quit until he arrived at some definite conclusion. I have that confidence in him from three years' observation of his work here, and I am sorry that some one like the Senator from Utah has not had hold of it before.

The actual condition which presents itself, in a general way, is this: Some tribes have a great deal of property but no available cash. Some even have cash, but it is not available to them personally, although to their credit in the Treasury of the United States. There are Indians in one such tribe whose tribal holdings are valued at $40,000 per capita for each Indian belonging to the tribe. The baby that was born yesterday is worth $40,000 in its tribal rights, and the old man who dies tomorrow is worth the same; and, in addition to that, they have allotments. Yet some of those Indians, the old and the crippled, go hungry; they actually go without enough to eat, for the reason that they are unable to procure it. It is an anomalous state of affairs. It is wrong. There must be something wrong in the management of the affairs of a ward worth $40,000 that he should go hungry, that he should go cold in winter for lack of shelter and for lack of clothing.

It is against that sort of management of the affairs of a people who are voiceless that I make a protest, and against the continuance of that method of handling their affairs. I do that without prejudice to anyone, and without any desire to find fault; yet, being a member of the committee and a Member of this body, I am in part responsible if I allow it to continue without attempting to stop it. That is all I wish to do—to stop it, or to direct it into a channel where the helpless ward, the unfortunate, the ignorant, the person who neither speaks, reads, nor writes our language, who is at the mercy of his guardian and the trustee of his person and his property, may have an opportunity at least to get enough to eat.

There is one reservation in one of the States where $750,000 is appropriated out of the tribal funds, or, at least, made a mortgage upon the lands, for putting in a reclamation project—and it is in the bill at this time—where many of the members of that tribe are eating out of swill barrels, are actually going around and hunting swill barrels and picking up crusts of bread and cast-away potatoes and getting such scraps as will keep them from dying of starvation. There is something wrong about that. Without reflecting upon anybody, that is no way in which to administer the estate of helpless people, of wards—

wards who are tied down onto a reservation and may not depart therefrom, but have to keep within circumscribed limits and are forced to live under those conditions.

If they were given their freedom, if they were given an education, if they were given means with which to take care of themselves, and then they frittered it away and came to poverty, it might be said that they had had a fair chance, and it was "up to them." But not being allowed these opportunities, the responsibility rests elsewhere, and it rests in part right upon the good gentlemen who constitute this body, if you please. The majority of the Members of this body are ignorant of conditions; yet, if the conditions do exist and have existed for years, and go on year after year without any remedy, there comes a time, or there ought to come a time, when the thing should be stopped, or at least when a change should be made, or at least when knowledge should be given to the Members of the Senate of the facts as they exist; and then, if they do not object to them, the responsibility rests rightfully upon them.

I have been told that there is an official report in the possession of the Indian Bureau which states that if the present condition of affairs upon one reservation continues to exist, if there are not radical changes made in the method of handling the affairs of a certain tribe of Indians—and I refer to the Blackfeet Indians of Montana—it is but a matter of time, and not a long time, at that, until the Indians on that reservation will become extinct. They will have been exterminated, through no fault of their own. Those Indians, in the days when I was a boy, were a hardy people who cared for themselves, and they were an able-bodied tribe, too, to whom you had to pay respect if you traveled through their country. They were fighters. But now they have become so pitifully poor that they go hungry. The children die of disease resulting from inanition, from lack of sufficient food to give them vitality to fight off the most ordinary sickness. They live in squalor that is unbelievable, herded in huts without bedding, lying upon rags on the ground, 60 per cent of them tubercular, and 80 per cent of them going blind from trachoma, forced into huts in close contact with one another to keep from dying of cold; and at the same time their property has been mortgaged and a million of dollars has been expended in building a reclamation system which, when it is finished, will probably not be worth one dollar to them. They are barehanded and in hunger and in rags.

Such a condition should not exist. It is worse elsewhere, I am told, and better in some instances; but no such condition should exist. They have no opportunity to improve themselves. Upon that reservation not half of the children have school facilities. Not half of the little children that are now growing up to manhood and womanhood have the opportunity to learn the English language or to do anything in the world. They live at times upon prairie dogs, and are glad to get a skunk for dinner. Now, how can they ever improve? How are we civilizing those people? We are not doing it. We are simply neglecting our duty.

This conference report which is before us to-day upon the bill will pass, perhaps, in lieu of any other measure. Although I offered one abolishing the whole bureau, getting them off of the backs of the Indians, it will not pass at this time, for the reason that the sentiment of the Senate and Congress is not worked up to that point. I think it will come later. But how are these little folks who are growing up ever to escape from that condition, in a climate where it frosts nearly every night in the summer, where the very oats frost down in summer?

We have bought them some cattle lately, and their condition will be somewhat ameliorated by the sale of certain of their irrigable lands at a price, it was estimated in the beginning, of from $2.50 to $10 an acre, while the land just over across the line, the dry and unirrigated land of the white man, sold for $10 an acre. They may after a while, in the cattle business, pull out, but they can not do it farming, for they know nothing of farming, and have no means of ever learning farming.

Those Indians, a number of years ago, were a fairly prosperous tribe. They had cattle upon the range; but, like all Indians, they were improvident, and they did not put up hay, and there came a hard winter. Now, I want you to note this statement as being rather indicative of the manner in which we have handled their affairs. It was stated before the committee that one hard winter they lost nearly all their cattle. They died of starvation or froze to death. Some of them froze to death right at the supply of hay. It was so cold that they chilled and died with food in them, and that is a rare thing to happen to range cattle. But as soon as the majority of the cattle were dead, the Government, which had been furnishing rations to some of those Indians, withdrew the rations, and stopped feeding them just at the time when they needed it most. That forced them to sell their few remaining cattle; and it was testified before the Indian Affairs Committee at one of our hearings a short time ago that some of those traders made 1,000 per cent on the purchase of the cattle from the unfortunate, starving people.

Right then, it seems to me, as a civilized nation, as a nation which sets itself up as one of the greatest in the world, we should have gone to their relief; we should have made them a loan; we should have loaned them rations until they got upon their feet again. The result was, however, disastrous, and they have remained in that unfortunate condition ever since, dying, dying.

This is no new matter. Twenty years ago there was an inspector who visited all of these reservations—more than I shall refer to—and reported the actual conditions as they existed, and he was "fired" by telegraphic message for doing it. You can take his reports made then, at a time when McKinley was President, and redate them down to this day of the month, 1916, and locate them on the same reservation, and 99 per cent of the statements will fit the conditions as they existed at that time. The statements will fit to-day the conditions as they existed at that time. There has not been improvement. That inspector was ex-Gov. McConnell, of Idaho. I know him personally, and he is an able business man, and it is interesting to read his reports and see how they fit conditions as they still exist.

A little Indian woman came in the other day from one of the Western States to our committee and stated that she wanted to buy some "dead allotments"—that is, allotments which had belonged to an Indian who had died. She had 40 acres of land which lay near an irrigating ditch. We asked her if she had no more land than that. She said she had no home, she was without means of operating the land, as I understood her, which she told us she had been allotted by the department. I do not know whether it was a joke or not—it seemed to be a bit sarcastic at any rate—but they gave her 160 acres of pasture lands 50 miles from the former allotment. Just imagine driving cows back and forth morning and night for milking 50 miles each way! But this case is not peculiar. There are other cases that are similar to be found on other reservations.

A short time ago there came a delegation of Indians to the Indian Affairs Committee in relation to the sale of oil and gas land on the Osage Reservation. The gas lands had been leased for 10 years prior to some time in March this year to certain gentlemen, who paid the Indians one-twentieth of a cent per cubic thousand feet for gas; that is, in order words, the lessee received 2,000,000 cubic feet of gas for a dollar. I was looking over my bills this morning and find that I pay $1 for 1,000 cubic feet. Here were certain men who received 2,000,000 cubic feet for $1. Under the new terms which were provided by the Bureau of Indian Affairs for the ensuing 10 years these certain individuals and they were to be assigned the lands—they were not to be sold at public auction or in open market or in competition.

They were to be assigned to the same gentleman for the munificent sum of a half cent per cubic thousand feet; that is, 200,000 cubic feet of gas for a dollar. The gas was worth about 18 cents at the mouth of the well. It is hard to believe yet it is true.

I had passed to me a letter the other day which was written to the chairman of the committee by the Hon. Joseph H. Choate relating to proposed legislation for the administration of Indian affairs. It seems he is the honorary president of the Indian Rights Association, and he criticized me and others for putting in bills before Congress to change the conditions or to abolish them—to get rid of them, if you please—to free the Indians from such conditions, and he criticized me for having put in such a bill.

It would seem to me that here was a very fair opportunity for him to exercise some of his legal ability in securing those rights to the Indians. These lands were to go out at half a cent, we will say, per thousand cubic feet; but about that time there came along a man who had a factory located near these gas wells, and he made an offer of 3 cents per thousand cubic feet. That raised the price to all the other assignees. The gentlemen who were to be assigned this one-half-a-cent gas had to pay 3 cents for it. In assigning these lands, however, this outsider who had intruded himself was like the Indian woman's pasture, assigned land so far away from his factory that he could not use it, and he became rather out of humor about it.

So he went back, I am informed, and made an offer of 3½ cents for the gas, and in addition $50,000 as a premium for the use of that land. He took the precaution to take an attorney with him and a stenographer took down his statements. A little later he was sent for and was assigned the land he applied for, not at 3½ cents and $50,000 bonus, but at 3 cents flat per cubic thousand feet.

They cut his bid. They called his bluff. They would not take any $50,000 bonus; they declined the bonus and spurned the extra half cent raise in the price for gas.

The oil-land leases are sold on a plan or system by which this land is leased to the person who will pay one-fifth or one-sixth royalty or percentage of the production of the property, and in addition to that pay the highest premium for the privilege of operating it. But it must be cash. That naturally eliminates any one who has not the cash. It also eliminates the man who is not thoroughly familiar with the amount of flow which comes from each well, and places the majority of the people of the country at a disadvantage if they desire to operate oil wells.

But this was insisted upon. I wanted to have a method adopted whereby the lands would be leased upon a percentage of production of the land in the way of oil and rating it along as the value of the wells rose and fell. A well which flows a certain number of barrels a day six months from now will depreciate, perhaps. The simple royalty plan would follow equitably; it would provide for the small well of 3 or 4 barrels per day, and the gusher, if you please, the well which produced a thousand barrels a day. I took that up with the department through the committee. They answered me very politely by saying I was not informed on the subject and that I spoke without authority, but the plan would take care equitably of the owners of the property and the lessees of the property as well. That was not, however, adopted. The old bonus plan was followed, and now I have before me a statement from a gentleman who bid 52½ per cent royalty on a property which was rated by the Indian Bureau as yielding 109 barrels a day, and which he stated he found afterwards really yielded 165 barrels a day. That well and that property sold for $50,000 bonus and one-fifth royalty.

The bonus will be repaid in less than a year if the land continues to yield as it now does. One well is now flowing 165 barrels a day, I am informed, and the $50,000 bonus covers all other wells to be drilled on that property.

The Indians will lose heavily, if that statement is true, by having had to accept a $50,000 bonus and a one-fifth royalty in place of the 52½ per cent tendered royalty on the flow of the entire tract. No man knows how many hundred thousands of dollars will come out of the Indians by that deal.

So the Indians' property is handled, and I do not see how anyone could oppose a measure to remedy it.

The council meetings where such sales were agreed upon were held in secret at the Indian Bureau. One-half the Indians who composed the council were ignorant Indians who did not read or write or speak or understand the English language, and were placed under oath not to impart to their fellow tribesmen whom they represented what kind of a bargain they were making in the sale of their lands on such terms, and it is not pleasant to contemplate such proceedings.

A short time ago, or within a couple of years, there came a complaint from the Indians in Wisconsin or Michigan—I have forgotten which State—that under the terms of their contract with a large lumber company the company was confined to a certain territory in logging off timber, but the lumber company went over the line and cut other of the Indians' timber. These men were accused by the bureau of having "trespassed" upon that land in the cutting of thousands and thousands of feet of timber belonging to the Indians. What did the department do? I am relating this to you to show you why I have protested in so many instances against this sort of management of Indian affairs. Out in our country, if you go over the line and cut another man's timber and haul it off and use it for your own use, he does not like it; he resents it. He does not call it a trespass. He calls it stealing, and it is brought to the attention of the sheriff and the grand jury. But in this case it was called a "trespass," and the bureau sent a man out to count the stumps from which the "trespasser" had cut off the trees and removed the timber.

As I said, in the West if a man steals your timber you do not go out and count the stumps and hold a conference with him to see whether he will pay for it or not, but here the Indian Bureau sent out an inspector into Wisconsin or Michigan to count the stumps, to see how many trees, how much timber this company had taken, and then settled with them—compromised it. Such a compromise in our country would be called compounding a felony. I have not much confidence in that kind of method of handling affairs of a people who are without voice and are helpless wards. It is without prejudice that I wish to put a stop to such work. If it did not result so disastrously and were not so pitiable in its results, if it did not lead to poverty and hunger, even to death and to the ruination of a race of people who under proper handling and with proper treatment and encouragement might become one of the strongest factors in the civilization of this country, I would not care so much about it.

There was presented to me a day or two ago a plea addressed to the Senate as a judicial body for justice to the Indians, setting forth some of the conditions as they relate to the affairs of the Osages. I wish to present it as a part of my remarks. It throws a side light upon the subject.

The Committee on Indian Affairs personally can not know all about the management of the affairs of the Indians without full data. It is impossible for them to do so. Pressed upon one hand and another by differing duties, with confusion in the committee in regard to facts which are not presented to it in full, it will never be possible, in my opinion, to secure good, honest, and wholesome management, or even an intelligent management of Indian affairs unless the present system is radically changed or abolished, and the sooner we change it or abolish it the better.

I present this communication to be printed, if there is no objection, as a part of my remarks.

The PRESIDING OFFICER (Mr. KERN in the chair). Without objection, it will be printed.

The communication referred to is as follows:

WILL THE COURT (THE CONGRESS OF THE UNITED STATES) APPROVE OF THE REPORT OF ITS GUARDIAN (THE DEPARTMENT OF THE INTERIOR) IN HANDLING THE PROPERTY OF ITS WARDS (THE OSAGE TRIBE)?

The Supreme Court of the United States has repeatedly held that the relation between the Government and the American Indian is that of guardian and ward. By analogy the Congress of the United States, which created the Department of the Interior, is the court, and the Secretary of the Interior is the guardian, while the Indian is the ward, being controlled and supervised by the Congress or court through its guardian, the Secretary of the Interior, and the Commissioner of Indian Affairs.

Considerable time was spent by the Senate Committee on Indian Affairs during the early part of January and all of February, 1916, in learning something of the oil and gas leases which terminated on March 16, 1916, and which leasing matter has been before the Department of the Interior for two or three years past. These hearings were printed and are entitled "Oil Lands in Osage Reservation. Hearings before the Committee on Indian Affairs, United States Senate, Sixty-fourth Congress, first session, on Senate concurrent resolution 4, relating to the disposition of units of lands of the Osage Reservation in the State of Oklahoma. Printed for the use of the Committee on Indian Affairs (second print)."

It is my object to take the printed record of said hearings, along with my knowledge of the facts, and abstract same with my own comments thereon, to the end that those Members of Congress who are interested in the American Indian and a fair deal may learn the truth concerning the vast oil and gas deal which is about to be consummated, and wherein the Standard Oil Co. is being greatly benefited and enriched at the expense of the tribe of Indians, and the relationship of the guardian to this transaction. (This may assist Members of Congress and the public in solving one phase of the high cost of gasoline.)

The Osage Reservation was purchased by the Osage Indians from the Cherokee Indians in 1872, and title taken in the name of the United States. The reservation comprises approximately 1,400,000 acres, the surface of which was allotted to the individual members of the tribe by act of June 28, 1906 (34 Stat., 539), but all the minerals are yet held in common by the tribe.

In 1896 the entire reservation was leased for oil and gas to Edwin Foster, and this lease was renewed in 1906 for a period of 10 years, but only on 680,000 acres. The lease was assigned and transferred to the Indian Territory Illuminating Oil & Gas Co., which has sublet the greater part of the lease for the development of oil only.

The act of June 28, 1906, supra, allotting the Osages, created the Osage Tribal Council, and in section 4 of said act gave the council the right to lease the oil and gas lands, subject to the approval of the Secretary of the Interior.

This council is elected by a vote of the Osages, as provided by law, and take an oath of office.

The present council is composed of a chief, who is a full-blood, blanket, non-English-speaking Indian; an assistant chief, who is a full-blood Indian, speaking English brokenly; eight members of the tribal council, five of whom are full bloods and three of whom are mixed-blood Osages. The chief presides at the council meetings, only the eight tribal councilmen being permitted to vote and participate in council proceedings, unless a tie vote is cast, when the chief, as presiding officer, casts his vote.

After departmental officials had the matter of re-leasing these Osage oil and gas lands under consideration for about two years the Osage Tribal Council were called to Washington in June, 1915, by the Secretary of the Interior for the purpose of devising plans for the re-leasing of these lands after March 16, 1916. At this time many offers and plans for leasing these lands were on file in the Department of the Interior, but had never been submitted to the Osage Tribal Council, nor had men or companies who wanted to negotiate for these lands been permitted by the department to in any way whatever negotiate with the tribal council, and up until June, 1915, none of these plans or proposals had been submitted or considered by the tribal council.

On Monday, June 7, 1915, the council was called to meet Franklin K. Lane, Secretary of the Interior, proceedings of which meeting are reported on page 96 of the hearings before the Senate committee, supra, which will be spoken of hereafter as the record. At the close of his speech, which had probably gained the confidence of the tribal council, the Secretary requested the members of the council, Commissioner Sells, Supt. Wright, and Mr. Williams to stand, raise their right hands, and take the following oath:

"I promise to be honest, to be loyal to my tribe, to do the right thing by all of my people, and to be a good sentinel for the tribe, and to talk to no one about this except those who are in this room now, and may God help us to come to a right decision." (Record, p. 97.)

The members of the Osage Tribal Council had taken an oath of office when they entered upon their duties as councilmen, and why it was that Commissioner Sells and Supt. Wright took this new oath along with the council I can not understand, unless it was for the purpose of impressing the members of the council, especially the full bloods, because of great formality. Certainly it would not be necessary for the Secretary to swear Commissioner Sells and Supt. Wright to secrecy had he desired that nothing be said as to the transactions of the council meetings yet to follow.

The council then spent several days with Commissioner Sells, Supt. Wright, and Mr. Williams, of the Bureau of Mines, in devising the plan of leasing which was afterwards adopted.

The members of the Osage Tribe had by subscription sent Mr. Edward Simpkins, an intermarried citizen, and Mr. Anthony Carlton, a member of the tribe, along with the Osage council to advise with the council, to the end that the Osages might secure the best results. These two gentlemen were not permitted to attend the council meetings, and, because of the oath of secrecy heretofore mentioned, the council were not permitted to advise with these gentlemen as to their best interests. (The record, pp. 88, 155.)

"Our negotiations were opened by a speech made by Commissioner Sells, which greatly impressed members of the Osage Tribal Council with the commissioner's great sincerity and desire to help the council in the re-leasing of these mineral lands. There was sent by the Osage people to advise and assist the Osage Tribal Council Mr. Anthony Carlton, a member of the tribe, and Mr. Edward Simpkins, a white man having a large Osage family. For some reason the Commissioner of Indian Affairs, or some one other than the Osage Tribal Council, would not permit these gentlemen to attend the meetings of the tribal council or advise with the members thereof" (p. 88).

Page 155:

"PAWHUSKA, OKLA., *January 22, 1916.*

"GEORGE ALBERTY,

"*Care National Hotel, Washington, D. C.:*

"If you think necessary an investigation, you can have George Pettit, Anthony Carlton, and myself subpœnaed as witnesses before the Senate committee, as we know how you were treated.

"E. H. SIMPKINS."

For some reason no stenographic notes were taken of the hearings where the real work was done, but only of the hearings before the Secretary.

The chief of the Osages at the first meeting of the council with Commissioner Sells, Supt. Wright, and Mr. Williams, at which meeting the active work of the council, which terminated in the June 17 resolution, commenced:

"Expressed the confidence of the council and himself in the Secretary and commissioner and desired their aid and counsel as to the best action to be taken, suggesting the advisability of the tribe's having an attorney to be present. The commissioner stated that he himself was an attorney, that the Secretary was one of the ablest attorneys in the country, and that both were their friends; and that as it was a business and not a legal proposition to consider, he did not believe the presence of an attorney necessary, to which the chief agreed." (Record, p. 107.)

During this session of the council and all other sessions of the council, in a room in the Bureau of Indian Affairs, an outer guard was kept at the door for the purpose of assisting the tribal council, Commissioner Sells, etc., in living up to their oath of secrecy.

Among the several offers or proposals that had been submitted for a lease was one from a committee appointed by the National Petroleum Association, representing independent refiners and independent oil producers. This offer was $500 per barrel for the production and one-sixth royalty to the tribe, or $400 per barrel for the production and a one-fifth royalty to the tribe. (Record, pp. 248, 249, 251, 252, 253, 297, 298, 299, 301, 302.)

When a member of the Osage Tribal Council called the attention of the Senate Committee on Indian Affairs to this offer of the National Petroleum Association and to the fact that if considered at all by the council it was not properly considered, the Secretary of the Interior by letter to the Senate committee called attention to the fact that—

"This proposal was known as that of the National Refiners' Association, and you will find on page 107 of the hearings before the Senate Committee on Indian Affairs, dated January 17, 1916, the memorandum of the meeting of the Government officials with the Osage Tribal Council, Mr. Alberty being present at that time. We sought no evidence of the responsibility of the bidder." (Record, 252.)

The memorandum mentioned by the Secretary, found on pages 106, 107, 108, 109, of the record and signed by A-she-gah-hre, principal chief, and G. R. Pettit, secretary Osage National Council, was not drawn by the secretary of the national council, as would be the usual practice, but these council minutes were made up by one of the Government officials and submitted to the chief and secretary at the close of their session in Washington for their signature, and were signed by them without the secretary of the council having read the same. A close reading of these minutes as to the National Refiners' Association proposal would lead one to believe that the compiler of the minutes had suspected that at some time in the future some question might be raised by the National Refiners' Association, or by some member of the Osage Tribal Council, and the minutes make frequent reference to this proposal and the fact that it had been duly considered by the council. (See statement of Councilman Alberty in the record, pp. 248, 249.)

The guardian says that his wards considered this offer, which on its face is several millions of dollars better than what they are to receive under the June 17 resolution, and that the wards of the Government in their great wisdom decided to take the lesser offer. Conceding that Councilman Alberty and several other members of the council are mistaken and that the offer of the National Refiners' Association was duly, sufficiently, and properly considered by the council—the wards—and that the Secretary of the Interior and Supt. Wright, or whoever compiled the minutes of the Osage Tribal Council, are correct, was it not the duty of the guardian to insist on the acceptance by the wards of that proposition which would bring to the Osage Tribe of Indians the greater return? And is the guardian justified in referring to a record made up by himself for the purpose of shifting all responsibility to the ward, and that the council shall make leases on these lands which will bring a less return to the Government's wards—the Osage Indians?

The resolution of June 17, 1915, on which the new leases are to be founded was not drawn by the Osage Tribal Council, but after the council and the Government officials had been in session for something like 10 days the resolution was drawn by some one other than the Osage council, about one day's time being consumed in the drafting of this resolution. The resolution was presented to the council at almost midday, was read once and interpreted to the non-English-speaking councilmen, and without any further consideration the council were taken from the commissioner's office to the office of the Secretary of the Interior, having been told by Government officials that it was necessary to hurry and get the resolution signed, to the end that they might accompany the Secretary of the Interior to meet the President of the United States. (See record, pp. 88 and 104.) Ordinarily, to consider a resolution of the length and character of the June 17th resolution, even if its terms had been discussed and agreed upon—then after said resolution was placed in writing the Osage Tribal Council would have taken from 10 days to two weeks in the consideration of the resolution before adopting same. It is absolutely impossible for a council of Osage Indians, partly composed of full-blood, non-English-speaking members, to get any appreciable understanding of the June 17 resolution in one reading and one interpretation.

The June 17 resolution provides in section 11 thereof that the present sublessees shall have oil leases made to them in the aggregate area of about 70,000 acres of producing territory and approximately 160,000 acres of nonproducing territory. The resolution makes 160 acres the unit for the purpose of leasing. Each 160-acre unit having thereon one oil well is considered a producing unit, and aside from the producing units given to the sublesses, "without competition and without compensation," it is provided that 165,000 acres in nonproducing or undeveloped units should be given the same sublessees "without competition and without compensation." (Record, pp. 105, 106.)

On January 1, 1915, there were 2,666 producing oil wells in the Foster lease, aside from the dry holes and producing gas wells. The producing units and the nonproducing units, which are to be leased under the June 17 resolution, are intermingled, much of the undeveloped territory being adjacent to the developed units. These 2,666 producing wells are so arranged and scattered throughout a large part of the territory, being leased under the June 17 resolution, that they practically prove the undeveloped units which will be received by the former sub-lessees. (Record, 305.)

Section 9 of the June 17 resolution (Record, p. 105), which deals with the gas, absolutely closed the doors to the world and gave this gas territory to the gas companies who had been for years getting this gas at $100 per well. The public was arbitrarily kept from making application for gas territory by this resolution after the date on which the resolution was adopted, to wit, June 17, 1915. On pages 76 and 77 of the record we find the following:

"Senator OWEN. What is the authority under the resolutions that were passed by the Osage council concerning the leasing of gas? I understand everyone was excluded except those who had previously made an application or something of that sort.

"Commissioner SELLS. The resolutions as passed by the tribal council June 17, 1915, paragraph 9, provides that—

"'Gas leases shall be made by the tribal council to the present gas lessees, covering all or part of their present holdings, and for such periods as the Secretary of the Interior may determine: *Provided*, That applications made prior to this date for leases of gas may be granted in the discretion of the Secretary of the Interior.'

"Senator OWEN. What is the purpose of excluding future bidders?

"Commissioner SELLS. I am not able to say. So far as I know, the bidders in sight at the time these resolutions were passed were the present lessees and two or three others.

"Senator OWEN. I understood that. Of course, you read that in section 9 that only those who were at present there holding gas leases would be permitted to have any gas in the Osage country, and I want to know the reason for that.

"Commissioner SELLS. I am unable to give you the reason. That had not been discussed at the time.

"Senator OWEN. Then it is the present policy of the Government to prohibit anybody except those at present holding?

"Commissioner SELLS. Those things are being considered by the department at this time and the probabilities are they will be determined soon." (See pp. 88 and 89.)

The maximum price paid for gas by the pipe-line companies to the developer at the time of the above questioning of Commissioner Sells by Senator OWEN was 3¼ cents per thousand cubic feet, and at the time of the above questioning, the Osage council being present in Washington, the Department of the Interior had been insisting to the Osage council for nearly two weeks that the June 17 resolution as to gas was binding and as sacred as the Bible, even though the council had been offered an increase of 400 per cent more for their gas than they were to receive under the departmental plan embodied in that June 17 resolution, and the departmental officials kept on with their insistence as to the binding effect of the June 17 resolution as to gas until a member of the Osage Tribal Council called the matter to the attention of the Senate Committee on Indian Affairs and, through the press of this country, to the public generally, after which the Secretary of the Interior sent out notices to the gas men throughout the country that he would hold a public gas hearing. Such hearing was held for two days, and the Osages are to receive 3 cents per thousand cubic feet for their gas instead of one-half cent per thousand cubic feet, as provided for in the departmental plan set forth in the June 17 resolution.

The so-called Foster lease on the 680,000 acres of Osage oil and gas lands, which terminated March 16, 1916, was unlike the ordinary oil and gas lease, which reads for a certain period and as long thereafter as oil and gas are found in paying quantities, in that the Foster lease read for a fixed period, with the right of renewal for 10 years, which renewal terminated March 16, 1916 (see record, pp. 3, 4, 5, and 6), and the above is the construction placed on this lease by the lessees and by the Secretary of the Interior. On page 22 of the record, in a letter from Secretary Lane to the Senate Committee on Indian Affairs, we find:

"The lease rights of the sublessees will expire March 16, 1916, and they do not base their requests for new leases on legal rights. They assert equitable rights by reason of the investments made and the development work performed. The resolution of the tribal council provided for a renewal of the lease in 1906, but no such provision is contained in either the resolution of the tribe or the act of Congress for a renewal of the present lease, which expires in 1916.

"They knew that their leases would expire on March 16, 1916, and it must be assumed that the investments were made with full knowledge of the possibility of not being able to obtain renewals or new leases. However, I realize that large sums of money have been invested in the development of the Osage lands, and in the drafting of the regulations hereafter referred to I have endeavored to recognize the conditions as they exist, without sacrificing the rights and interests of the Indians."

Again, on page 304 of the record, the Secretary, in a letter to the Senate Indian Committee, says:

"These oil and gas properties belong to the Osage Tribe, and in the leasing of the lands our primary duty is to do the best we can for the Indians and see that they receive the highest revenue. The process of

leasing oil lands on a fixed royalty and cash bonus is generally in vogue and is nearly as old as the industry itself."

Notwithstanding the fact that these leases terminated and became again the property of the Osage Tribe of Indians, 70,000 acres of producing territory, having thereon at the time 2,800 wells, and 160,000 acres of nonproducing but proven territory is being given to these same sublessees, with no increase whatever in royalty over what the sublessees had been paying to the Indian Territory Illuminating Oil Co., to wit, 16⅔ per cent.

Mr. Barnsdall, who is one of the best known oil developers in the United States, testified before the Senate Indian Committee that when an oil lease terminated the lessee would have to make new terms with the lessor, and that they would frequently have to pay the lessor an additional sum. (Record, p. 73.) Under the departmental plan, as contained in the June 17 resolution, the Osages are precluded from offering this 70,000 acres of developed territory to the oil-producing fraternity and were precluded from dealing with the oil fraternity, including even the present sublessees. The whole thing was managed by the department and the Indians were not permitted to negotiate or attempt to receive a greater sum for their oil from their former tenants.

On page 26 of the record, in his letter to the Senate Committee on Indian Affairs, Secretary Lane said:

"I consider that the Osage Tribe is fully entitled to what it may be able to realize from the sale of the producing units to be released at the expiration of the Foster lease.

"I am opposed to granting special concessions such as the Oliver resolution would involve. The Barnsdall Oil Co. should be held to our regulations the same as any other sublessee.

"The apparent purpose of this resolution is that the Barnsdall Oil Co. may secure valuable property belonging to the Osage Tribe in excess of the acreage permitted under the tribal resolution and the regulations of this department without competition and without compensation."

Why, in view of the Secretary's attitude and his opposition to granting special concessions, does he allow the sublessees to have 160,000 acres of undeveloped, proven territory, upon which they have no improvements whatever, and for which the Osages could receive millions of dollars as a bonus aside from a one-sixth royalty on the oil therefor? Conceding the claim of the sublessees as to equities, should not the Secretary of the Interior have regarded the equities of the Osage Tribe of Indians, and was it necessary to give away in undeveloped acreage property that would bring a return of many millions of dollars? And was it necessary to this end to again bring the Osage Tribal Council to Washington, where they arrived Sunday, April 9, 1916, for the purpose of executing leases on this undeveloped, as well as on the developed, territory; refusing to receive and read a telegram from a mass meeting of Osages protesting against the council executing these leases at this time. And when the council finally authorized the chief to execute these leases, the three mixed-blood members of the council, who are practically white men, refused to authorized the execution threof; the four full-blood members, who believe that the Secretary of the Interior and the Commissioner of Indian Affairs constitute the Government of the United States, living in daily fear of them, voted and authorized the chief to execute said leases.

The Boston pool, which is a part of the old Foster lease, but on a stray section several miles from the body of the lease, made it desirable that the territory adjacent to this section be put up at auction, and the Osages received bids on some of this territory in excess of $500 per acre, and at a royalty of one-sixth of the oil produced. There was one 40-acre tract which looked good to the oil fraternity upon which the Minnehoma Oil Co. bid $1,566 per acre.

On pages 74 and 75 of the record, we find:

"Commissioner SELLS. The law simply empowers the President to fix the royalty.

"Senator WALSH. And there is a chance for competition in the matter of the bonus?

"Commissioner SELLS. Yes, sir.

"Senator WALSH. And that bonus runs very high, sometimes?

"Commissioner SELLS. Very high.

"Senator WALSH. About how high?

"Commissioner SELLS. As high as $1,000 an acre.

"Senator OWEN. Did you not have a letting on that basis of a bonus two or three years ago?

"Commissioner SELLS. Yes, sir; in what is known as the Boston pool, adjoining the Boston pool in the Cleveland district."

Then why, in view of the above, should your guardian, the Secretary of the Interior, insist on the council making leases, or permit them to make leases, on thousands of acres of undeveloped, proven territory, worth millions of dollars to the Osages?

An investigation of a map showing the wells of the so-called Foster lease will disclose the fact that many, many thousands of acres of this undeveloped territory, which is being given to the oil developer "without competition and without compensation" is proven territory, adjacent in many instances to the developed territory, and if this adjacent territory was first sold at auction and developed, or partially developed, then the remaining territory, it would mean untold millions to the Osage Tribe. Why should "special concessions" on this undeveloped territory be given to the concerns who have been developing in that field, thereby cutting out the oil fraternity generally, leaving this crude oil where it must be turned over to the Standard Oil Co.?

In the Kansas City Journal, Wednesday, March 29, 1916, page 3, we find:

"WICHITA, KANS., *March 28.*

"Oil men are in a flurry here to-day over the report that the fifth well on the E. C. Varner lease, 5 miles southeast of Augusta, is flowing 1,000 barrels a day, with the drill but a foot in the sand. A 5-inch pipe is not large enough to carry away the oil.

"This is within 600 feet of the Ed Varner 'gusher,' which sent the price of leases in the field as low as $25 an acre to as high as $1,000. The oil men assert that the Varner No. 5 will be the biggest well in Kansas. The sand was found at 2,475 feet."

In the same paper, on the same page, we find:

"GUTHRIE, OKLA., *March 28.*

"The rush for oil leases in this county continues, more than 100 being filed for record to-day.

"Every abstract firm here is working a day and night force. The Prairie Oil & Gas Co. is securing abstracts on many leases which they will file at once.

"The estimate for the recording fees is close to $1,500. As much as $5 an acre is being paid for many leases. A few were sold at $10."

Guthrie is not in an oil county, has not been considered or thought of until recently as a possible oil field. And yet the demand for oil territory is such that the developer will take a chance. The Augusta field is practically a new one, while the Osage field has been under development for years, contains hundreds and hundreds of wells, and the undeveloped territory is practically proven.

With oil at present prices, and there being no question but that if rightly handled the 160,000 acres of undeveloped units, which is being given away "without competition and without compensation," would bring a minimum of $100 per acre, or $16,000,000. Is this too small a sum to be called a "special concession"?

During the month of June, 1915, the oil run from the Osage Reservation amounted to 721,408.96 barrels; the price being at a low ebb, the run was light. Of the above amount there was run to the Prairie Oil & Gas Co. (admittedly the Standard Oil) 481,582.33 barrels, leaving 239,826.63 barrels to all other pipe-line companies, some of which may be Standard under another name, the Prairie Oil & Gas Co. having received more than twice as much of the oil as received by all other concerns. (Record, p. 138.) No "evidence as to responsibility of bidder" was sought for.

Why should the Osage Tribal Council be prevented by the Department of the Interior from having an attorney to advise them in this matter wherein millions of dollars are involved, when they had had an attorney advising them generally up until April 9, 1914, and in view of the fact that the pipe-line companies, as well as the oil and gas companies interested in this matter, had employed many of the most eminent lawyers, men of national reputation, to be found in this country, including ex-Congressman A. Mitchell Palmer, of Pennsylvania; Samuel Untermyer, of New York City; Judge C. B. Ames, of Oklahoma City, Okla.; and dozens of others.

In view of the undertaking of Congress to look after and protect the American Indian and his landed estates, will Congress permit the undeveloped oil lands of this dependent people to be sacrificed to the oil monopoly and against the interests of the American people generally?

Respectfully submitted.

PRESTON A. SHINN.

Mr. OWEN. Mr. President, I notice that amendment No. 2 to the Indian appropriation bill proposed by me and agreed to by the Senate in the following words:

The provisions of sections 2140 and 2141 of the Revised Statutes of the United States shall also apply to beer and other intoxicating liquors named in the act of January 30, 1897 (29 Stat. L., p. 506), and the possession by a person of intoxicating liquors in the country where the introduction is prohibited shall be prima facie evidence of unlawful introduction—

was amended by the conferees by inserting the word "Indian" in lieu of the word "the" before the word "country" and striking out the word "the" before the word "introduction" and inserting in lieu thereof the word "such."

My object in presenting this amendment was to apply the rule of stolen property to intoxicating liquors found in the possession of any person in the country where its introduction is prohibited by Federal law, which would include all that portion of Oklahoma formerly known as Indian Territory.

The United States Circuit Court of Appeals for the Eighth Circuit held in the case of Evans against Victor et al. that all that portion of the Indian Territory title to which had passed from the Indian tribes was not Indian country, which portion includes all towns and cities as well as all allotments of unrestricted allottees.

The effect, therefore, of the amendment agreed to by the conferees is practically to annul the provision so far as it relates to Oklahoma, and ordinarily, in view of this action by the conferees, I would oppose the approval of the conference report by the Senate and endeavor to have the Senate insist that the amendment as adopted by the Senate be incorporated in the bill.

This appropriation bill, however, contains a provision for a per capita payment of $300 to the Choctaws and $200 to the Chickasaws. These Indians to whom this payment is to be made are in dire need of it, and its payment I have earnestly urged both at this session and at prior sessions of Congress. I would not feel justified in taking any action which would have the effect of delaying this payment for even an hour, and as much as I would like to have seen this amendment which I had proposed adopted I will not oppose the approval of the conference report, but urge that it be immediately adopted in order that this per capita payment may be made at the earliest practicable date and that the other appropriations may be carried out as promptly as possible.

When this matter came before the conference the suggestion, as I said, was made by some of the Minnesota Members and was presented by Members representing the House as conferees. When my attention was called to it after the report was first made I inquired of the Indian Office and of the Department of Justice as to whether or not this change would leave the eastern part of Oklahoma, where the United States pledged itself to maintain prohibition, so that this language would no longer apply to eastern Oklahoma, and I understood from them that they thought the use of the words "Indian country" would not preclude this amendment from applying to eastern Oklahoma. Therefore, when I was so advised by the Department of Justice I advised the chairman of the conferees on the part of the Senate that I was content with that amendment. But upon a close inquiry I found the case of Evans versus Victor, in the circuit court of appeals for the eighth circuit, in

which it was shown that the change would exclude a very large part of eastern Oklahoma from the application of this language, unless the court should hold that the broad act of Congress admitting the State of Oklahoma still reserved all this country as Indian country for the purpose of the application of the law with regard to the introduction of intoxicating liquors.

Mr. ASHURST. Mr. President, the Senator from Oklahoma is entitled to thanks for his frank statement of the situation. Speaking for myself, I would have gladly adhered to the form of the amendment in which the Senate adopted it, but as the Senator from Oklahoma frankly and truthfully says, the last word almost that he said to me before I went to conference was that he was content to have it in that form, and requested that it be left in that form; and knowing, of course, that ROBERT L. OWEN knows more about Indian affairs than HENRY F. ASHURST, I followed cheerfully the suggestion of the Senator from Oklahoma.

Mr. CURTIS. I should like to ask the Senator in this final report what is done with amendment 156?

Mr. SMOOT. One hundred and fifty-seven?

Mr. CURTIS. I want to ask about 156, and then I will ask about 157.

Mr. ASHURST. The conference report about a week ago, as it was printed in the RECORD, sets out the action of the conferees, in which the House receded with an amendment. I will ask the Secretary to read amendment 156.

Mr. CURTIS. The Secretary need not read it. It is the same that is in the report; it has not been changed at all.

Mr. ASHURST. There has been no change whatever in amendment numbered 156.

Mr. CURTIS. I should like to have amendment 157 as agreed to read.

Mr. ASHURST. If the Senator will pardon me, I will do that. The Senator will recall that amendment 157 was in the following language as it passed the Senate and from which the Senate conferees receded:

(157) SEC. 28. On or before the 31st day of December, 1916, the Bureau of Efficiency shall prepare and submit to the Secretary of the Interior a system of accounting for the Bureau of Indian Affairs that will meet the requirements of section 26 of the Indian appropriation act approved June 30, 1913 (38 Stat. L., p. 103).

It was obvious to all that the action of the conferees in receding from that Senate amendment was not satisfactory, whereupon the conferees on the disagreeing votes of the two Houses met last Friday or Saturday and the House conferees receded with an amendment which I shall read. If the Senator will turn to page 8539 of the CONGRESSIONAL RECORD of the proceedings of May 6, left-hand column, about the middle of the page, just above the signatures, he will see that it reads:

SEC. 28. That on or before the 31st day of December, 1916, the Bureau of Efficiency shall prepare and submit to the Secretary of the Interior a system of bookkeeping and accounting for the Bureau of Indian Affairs that will enable the said Secretary, on or before July 1, 1917, to meet the requirements of section 26 of the Indian appropriation act approved June 30, 1913 (38 Stat. L., p. 103).

The Senator will observe that there is a slight change, but it was necessary in order to make it mean what the Senate intended it to mean. The conferees called before them the distinguished Senator from Oregon [Mr. LANE], the father of the amendment, and submitted it to him, and he said it was in the form in which he thought it ought to be.

Mr. CURTIS. I wish to ask another question right along that line. I notice in the conference report that you amend section 26 of the act of 1913.

Mr. ASHURST. I did not catch the question.

Mr. CURTIS. Section 27 of this bill, on page 107, amends section 26 of the Indian appropriation act of 1913. I want to know if the amendment made changes materially section 26 of that act.

Mr. ASHURST. If the Senator will pardon me, are you certain that section 27 of this bill amends section 26 of the act of 1913? I think not. I will read section 27; that is, amendment 156:

SEC. 27. On the first Monday in December, 1917, and annually thereafter, the Secretary of the Treasury shall transmit to the Speaker of the House of Representatives estimates of the amounts of the receipts to, and expenditures which the Secretary of the Interior recommends to be made for the benefit of the Indians from, all tribal funds of Indians for the ensuing fiscal year; and such statement shall show (first) the total amounts estimated to be received from any and all sources whatsoever, which will be placed to the credit of each tribe of Indians, in trust or otherwise, at the close of the ensuing fiscal year, (second) an analysis showing the amounts which the Federal Government is directed and required by treaty stipulations and agreements to expend from each of said funds or from the Federal Treasury, giving references to the existing treaty or agreement or statute, (third) the amounts which the Secretary of the Interior recommends to be spent from each of the tribal funds held in trust or otherwise, and the purpose for which said amounts are to be expended, and said statement shall show the amounts which he recommends to be disbursed (a) for per capita payments in money to the Indians, (b) for salaries or compensation of officers and employees, (c) for compensation of counsel and attorney fees, and (d) for support and civilization: *Provided*, That hereafter no money shall be expended from Indian tribal funds without specific appropriation by Congress except as follows: Equalization of allotments, education of Indian children in accordance with existing law, per capita and other payments, all of which are hereby continued in full force and effect: *Provided further*, That this shall not change existing law with reference to the Five Civilized Tribes.

I do not believe that that amends or contemplates any amendment to section 26.

Mr. CURTIS. The Senator will recall that section 27, page 107 of the bill, reads:

SEC. 27. That section 26 of the Indian appropriation act approved June 30, 1913 (38 Stat. L., p. 103), is hereby amended so as to read as follows:

Mr. ASHURST. The Senator is reading from the bill. I am reading from the conference report.

Mr. CURTIS. As I understand it, the conferees substitute section 27 as it appears in the report for section 26 and section 27 of the original bill.

Mr. ASHURST. The Senator is correct about that.

Mr. JOHNSON of South Dakota. Mr. President, I should like to ask the Senator from Arizona whether it is the intention to vote on the adoption of this conference report to-night?

Mr. ASHURST. The report was made about a week or 10 days ago, and was laid upon the table. The distinguished Senator from North Dakota [Mr. GRONNA] submitted the report for me. It lay on the table six or seven days. The Senate considered it and rejected it. The matter went back to the conference committee, and was again reported on last Saturday. Of course, my duty requires me to ask for a vote upon the report as soon as every Senator shall have finished speaking upon it. I have been, not exactly censured; but I, at least, have been complained of because I have not sooner urged the consideration of the report. So I undoubtedly think the vote should be taken this afternoon on the report.

Mr. CLAPP. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Minnesota?

Mr. JOHNSON of South Dakota. I will yield for a question; yes.

Mr. CLAPP. I do not desire the Senator to yield for that purpose. I was going to address my question to the chairman of the committee.

Mr. JOHNSON of South Dakota. Mr. President, I am opposed to this conference report. I was notified last week that I should have the opportunity of appearing before the conference committee on next Tuesday to state in a brief way my objection. I was not notified again, and I naturally presumed that I should have that privilege. On Saturday last the chairman of the committee brought the matter up in the Senate, and advised me that they had got in a hurry. I did not ask him who he meant, for I thought I knew. However, the matter has drifted along until to-day, and I thought we had again reached an agreement that it would not be taken up until Wednesday next. Of course, I supposed when the good-roads bill was out of the way the conference report was the matter next in order. So I shall not offer any criticism on its coming up at this time, further than to say that I left the Chamber, and when I returned the matter was under discussion.

Mr. President, I should like to have an opportunity to fully discuss my objections to this conference report. If the report is considered to-night, I shall not have that privilege, because I am not prepared to do so, understanding, as I did, that I should have until Wednesday of this week to make my preparations. I shall vote against the adoption of the conference report, if the matter reaches a vote to-night.

I only wish at this time to make these few brief explanations as to my position in the matter.

Mr. CLAPP. Mr. President, I want to call the attention of the chairman of the Committee on Indian Affairs to the second amendment in the bill. I was not in the committee at the time the amendment was agreed to, and being a part of the general legislation, assuming that it was recommended by the department——

Mr. ASHURST. It was.

Mr. CLAPP. I did not give it very careful attention. I will ask the chairman of the committee what is the effect of the amendment?

Mr. ASHURST. Amendment No. 2, as it passed the Senate, read in this way:

The provisions of sections 2140 and 2141 of the Revised Statutes of the United States shall also apply to beer and other intoxicating liquors named in the act of January 30, 1897 (29 Stat. L., 506).

I think that amendment was adopted upon the suggestion of the distinguished Senator from North Dakota [Mr. GRONNA]. I am very much in favor of it. The other part of the amend-

ment—and it was consolidated into one amendment—was proposed by the Senator from Oklahoma [Mr. OWEN], and read in this way:

And the possession by a person of intoxicating liquors in the country where the introduction is prohibited shall be prima facie evidence of unlawful introduction.

The conferees, acting upon the suggestion of a Member of the House of Representatives from the State of Minnesota, in line 7, struck out the word "the," and inserted "Indian"; and, in line 8, struck out the word "the" and inserted the word "such." When the conference committee made its report the Senator from Oklahoma called my attention to the matter, and said that that amendment was not agreeable to him. Later on, just before the conferees held their last session, the Senator from Oklahoma stated to me that the amendment was satisfactory to him. Inasmuch as it related to his State, and believing, and, indeed, knowing, that the Senator from Oklahoma knows more about his own State than do I, I cheerfully, as I do in many other matters, followed his suggestion.

Mr. CLAPP. The last act, which is amended by chapter 109 of the laws of 1897, referred to in the amendment as the act of January 30, 1897 (29 Stat. L.), provided:

And any person who shall introduce or attempt to introduce any malt, spirituous, or vinous liquor, including beer, ale, and wine, or any ardent or intoxicating liquor of any kind whatsoever into the Indian country, which term shall include any Indian allotment while the title to the same shall be held in trust by the Government, or while the same shall remain inalienable by the allottee without the consent of the United States, shall be punished—

And so forth.

This amendment reads:

The provisions of sections 2140 and 2141——

Mr. CURTIS. Mr. President, it is impossible to hear the Senator from Minnesota. I wish he would speak loudly enough for us to hear him.

Mr. CLAPP. The act that is referred to in the amendment, chapter 109 of the laws of 1897, prohibited the introduction of any malt, spirituous, or vinous liquors, including beer, ale, and wine. The amendment provides that the original sections of the law, being sections 2140 and 2141 of the Revised Statutes, shall also apply to beer and other intoxicating liquors which had already been enumerated in the act of 1897. This amendment provides:

And the possession by a person of intoxicating liquors in the country where the introduction is prohibited shall be prima facie evidence of unlawful introduction.

The amendment that had been offered in the Senate did not contain the words "Indian country," but read "in the country where the introduction is prohibited." What occurs to me is that there is territory in some of the States, notably in the State of Minnesota, in which the sale of liquor was prohibited in the cession of the land to the General Government until Congress might remove the prohibition. It might perhaps be urged that the land ceded but to which the prohibition attached was not Indian country. I am not fully satisfied about putting the word "Indian" into the bill, for I do not want any legislation to pass here, unless Congress deliberately seeks to pass it, that will subject the territory covered by the treaty to a repeal as to the provisions of the treaty.

Mr. ASHURST. Will the Senator yield to me for a moment?

Mr. CLAPP. Yes; with pleasure.

Mr. ASHURST. I take the same position as does the Senator. I agree with him exactly. The Senator twice signed the conference report, and it is the same now as it was when he twice signed it. We must either adopt the report or reject it. The valuable amendment suggested by my friend the Senator from North Dakota was agreed to. The remainder of the amendment was adopted upon motion of the distinguished Senator from Oklahoma [Mr. OWEN] who proposed it and told the conferees that it was agreeable to him. If now Senators change their minds and want to send the bill back for another conference, very well; I have no objection, but I protest——

Mr. WALSH. Will the Senator pardon me for an interruption?

Mr. ASHURST. Yes.

Mr. WALSH. Let me suggest to the Senator from Minnesota [Mr. CLAPP] that the worst that can happen with respect to this is simply that the presumption of all unlawful holdings will not apply within that territory. All laws applicable to that territory remain, of course. I sympathize with the Senator from Minnesota in his desire to extend this further presumption to that territory, but it will be in no worse situation than it now is in any case. You simply will not get the benefit of this additional legislation.

My own impression about the matter is that the Senator need not have any fear that the statute would be considered as applicable to that territory as well as to the territory actually occupied by the Indians, namely, the reservations. In any case, however, if it were otherwise, the only loss you would sustain would be that you would not have the benefit of this new legislation in that territory, making the actual possession evidence of unlawful possession.

Mr. CLAPP. Mr. President, first replying to the chairman of the committee, I will say it is true that I signed this conference report. The report is a very lengthy one, and the presumption is that one who signs it is entirely familiar with it, although as to the insertion of the word "Indian" my attention was not called to the matter until this afternoon. The Senator from Oklahoma has suggested that his information was that the insertion of the word "Indian" was at the request of the Minnesota delegation.

Mr. OWEN. I understood it was inserted at the suggestion of a member of the Minnesota delegation in the other House.

Mr. CLAPP. Yes.

Mr. OWEN. I did not say the Minnesota delegation in the Senate.

Mr. CLAPP. No; the Senator from Oklahoma said the Minnesota delegation of the other House. I should like to have this matter held until I can investigate it, for, whatever may be said of the merits of the controversy in that section of country, these treaties have been upheld by the Supreme Court of the United States; and if Congress sought to modify the terms of the treaties, and the matter came before Congress, and a majority of Congress favored the modification, that would be one thing. But I do not want the situation there further complicated by anything which may be done at this time. It is sufficiently complicated now.

While the Senator from Montana [Mr. WALSH] is correct that the word "Indian" could only limit to the Indian country the presumption which this section bases upon the possession of liquors, it would complicate the situation. At least, I should like an opportunity to look into the matter. I regret very much asking for delay——

Mr. NELSON. Mr. President, to what provision of the bill does the Senator from Minnesota refer?

Mr. CLAPP. I refer to the provision on page 3 of the bill containing the amendments which are numbered. Has the Senator from Minnesota a copy of that bill with the amendments numbered?

Mr. NELSON. Yes. From what line is the Senator reading?

Mr. CLAPP. Line 22. As introduced and adopted by the Senate, it reads as follows:

The provisions of sections 2140 and 2141 of the Revised Statutes shall also apply to beer and other intoxicating liquors—

That was not at all important, because in 1897 Congress passed an act—chapter 109—which included beer, ale, wine, or other ardent and intoxicating liquors. Then it went on—

and other intoxicating liquors named in the act of January 30, 1897 (29 Stat. L., p. 506).

That was the reenactment of the existing law. Then, there was added in the Senate this provision:

And the possession by a person of intoxicating liquors in the country where the introduction is prohibited shall be prima facie evidence of unlawful introduction.

In conference the word "Indian," in line 4, page 4, was inserted in place of the word "the," so that, as reported by the conferees it reads:

And the possession by a person of intoxicating liquors in Indian country.

Then, on page 4, line 4, where the word "the" occurs the second time, it was stricken out and the word "such" was inserted.

Mr. NELSON. Will the Senator please read the whole paragraph as it appears with the changes made?

Mr. CLAPP. Yes. It reads as follows:

The provisions of sections 2140 and 2141 of the Revised Statutes of the United States shall also apply to beer and other intoxicating liquors named in the act of January 30, 1897 (29 Stat. L., p. 506), and the possession by a person of intoxicating liquors in Indian country where such introduction is prohibited shall be prima facie evidence of unlawful introduction.

Now, I desire to call my colleague's attention to this thought: In our State there is territory where the sale of liquor is prohibited by virtue of treaties. My colleague, of course, is thoroughly familiar with that. The question that occurred to me was whether striking out the word "the" and inserting the word "Indian," so as to read "in Indian country where such introduction is prohibited," might not be claimed to exclude from that territory in the State covered by these treaties, but which is not now inhabited by Indians, this presumption flowing from possession.

Mr. NELSON. Mr. President, it would undoubtedly have that effect; and it would be a great mistake to allow the provision to stand as it is.

Mr. CLAPP. Yes; I think so. I therefore move that the report be disagreed to; that the Senate ask for a further conference on the disagreeing votes of the two Houses; and that the conferees be appointed by the Chair.

Mr. NELSON. I trust that motion will be agreed to, because a correction should be made. It is a very serious matter.

Mr. CLAPP. I do not know how it came about.

Mr. ASHURST. Mr. President, I am very pleased that my friend from Minnesota, after having worked for a month or so on the committee and signing the report a couple of times, concludes that he has not got the matter right, and I cheerfully join with him in the motion. I should like to make the observation, however, that, although it has been some five or six years since I looked the matter up, I think it will be found from the Federal Statutes Annotated that the country where intoxicating liquors are prohibited is "Indian country." I only practiced at the bar 14 or 15 years, but it does not require any abstruse reasoning or close investigation to see that the country from which liquors are excluded for the protection of the Indians is Indian country. I am unable, because, as I have said, it has been five or six years since I looked at the Federal Statutes Annotated, to speak with absolute certainty; but I think there is no doubt about that being the construction. However, I cheerfully join in the motion, and hope the report will be disagreed to. I feel as if an apology is due to the Senate, and I hereby tender it for myself, because of the trouble occasioned by disagreements which the conferees have seen fit to pour out upon the Senate. I think it is very wise that the conferees should first agree before asking the Senate to agree.

Mr. CLAPP. Well, Mr. President, "a soft answer turneth away wrath," and I will not reply to the Senator's criticism.

The PRESIDING OFFICER (Mr. HOLLIS in the chair). The Chair will state that the question before the Senate is on agreeing to the conference report. That is the only question before the Senate, and it is the one that must be voted upon. Unless the Senate overrules the Chair, he will take that position.

Mr. CLAPP. Then I ask the Senate to vote against agreeing to the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was not agreed to.

Mr. CLAPP. Now, I move that the Senate ask for a further conference on the disagreeing votes of the two Houses, and that the Chair appoint the conferees on the part of the Senate.

Mr. ASHURST. Mr. President, I have a few rights here, and I should like that motion to go over for a few days. Let us not consider it now.

The PRESIDING OFFICER. Does the Senator from Minnesota withdraw the motion?

Mr. ASHURST. Let us not be precipitate; let us be sure of what we are doing; let us be very certain that we want a conference upon it. I ask in all courtesy, Why can not the motion be withheld?

Mr. CLAPP. Mr. President, most certainly I am willing that it shall be withheld. There is no occasion for any feeling or friction about this matter. My own judgment is that somehow, inadvertently, a mistake has been made, which I think ought to be corrected.

### PENSION FOR SURVIVORS OF INDIAN WARS.

Mr. JOHNSON of Maine. Mr. President——

The PRESIDING OFFICER. The Chair recognizes the Senator from Maine.

Mr. JOHNSON of Maine. I move that the Senate proceed to the consideration of the bill (H. R. 655) to pension the survivors of certain Indian wars, from January 1, 1859, to January, 1891, inclusive, and for other purposes.

The PRESIDING OFFICER. The question is on the motion of the Senator from Maine.

The motion was agreed to; and the Senate resumed the consideration of the bill (H. R. 655) to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes.

The PRESIDING OFFICER. The bill is in the Senate and open to amendment.

Mr. SMITH of Georgia. Mr. President, the bill has not been considered as in Committee of the Whole.

The PRESIDING OFFICER. It was considered as in Committee of the Whole April 22, 1916.

Mr. SMITH of Georgia. The bill did not pass out of the Committee of the Whole.

The PRESIDING OFFICER. It was amended and reported to the Senate on April 22, and was objected to in the Senate by the Senator from Georgia.

Mr. SMITH of Georgia. Then I desire a copy of the bill. I do not think it was objected to only after it reached the Senate; I think I objected to it earlier than that.

The PRESIDING OFFICER. The record shows that the bill reached the Senate——

Mr. SMITH of Georgia. Of course, I am bound by the record.

The PRESIDING OFFICER. On April 22, and was objected to by the Senator from Georgia.

Mr. SMITH of Georgia. I should like to have the bill read in the Senate.

Mr. WILLIAMS. What is the bill?

Mr. SMITH of Georgia. A bill to pension Indian war survivors.

The VICE PRESIDENT. If there is doubt about it, the Chair will consult the record. The indorsement on the bill shows that it is in the Senate and open to amendment. Does the Senator from Georgia think the record is incorrect?

Mr. SMITH of Georgia. I was under the impression that the bill had not passed from the Committee of the Whole; but I can not undertake to correct the record, because if the report was made to that effect the next day, without a motion to correct it, it stands as the action of the Senate.

The VICE PRESIDENT. The stenographers' notes will show what was done.

Mr. SMITH of Georgia. I have no doubt that I am mistaken. Does the Chair hold——

The VICE PRESIDENT. No; the Chair wants first to see what the CONGRESSIONAL RECORD shows. The Chair is trying to get that.

Mr. SMOOT. I will say to the Senator from Georgia that the bill was reported to the Senate, and then the Senator from Georgia objected to its further consideration, as the RECORD shows.

The VICE PRESIDENT. Here is what the RECORD shows:

> The VICE PRESIDENT. The bill is before the Senate as in Committee of the Whole, and open to amendment. If there are no further amendments, the bill will be reported to the Senate.
>
> The bill was reported to the Senate as amended.
>
> The VICE PRESIDENT. The question is on concurring in the amendments made as in Committee of the Whole.
>
> The amendments were concurred in.
>
> The VICE PRESIDENT. If there are no further amendments, the amendments concurred in will be ordered engrossed——
>
> Mr. SMITH of Georgia. Mr. President, I should like to have a little more information about the extension of the benefits of this bill to men other than those who enlisted in the Federal service. The limitation provided seems to be a very indefinite one.

Finally the bill went over.

Mr. SMITH of Georgia. Mr. President, now I desire a ruling from the Chair as to whether my request that the bill shall be read in the Senate is in order.

The VICE PRESIDENT. If it is insisted upon, the bill will be read the third time.

Mr. SMITH of Georgia. I should like to have the entire bill read.

The VICE PRESIDENT. The bill will be engrossed and read a third time.

Mr. SMITH of Georgia. That will exclude amendments.

The VICE PRESIDENT. The Chair can not help that.

Mr. SMITH of Georgia. Then, I desire to proceed to read it myself to the Senate.

In the first place I will say that I had no idea that this bill would come up to-day, and I have not had the opportunity to consider it which I would wish. The bill, together with the amendments reported by the committee, involves an expenditure of over a million dollars a year in pensions. It grants pensions to men who served for only 30 days. We do not know whom it will pension. There is not any report as to whom it will pension. It is not limited to men who have been reported to the War Department as connected with any Indian service. I do not think there is any substantial limitation as to the way in which the rolls shall have been kept. It is just a broad gathering in of anybody, without any knowledge on our part as to whom it will reach, who can show 30 days' service in an Indian war; pensions such persons and provides, I think, for pensions for their widows. That is the kind of bill we are about to pass, putting a charge estimated at a million dollars a year upon the Treasury, and nobody knows how much more.

I shall have to be a little tedious in looking into the bill and reading it as I go along. Of course, the Senate can pass it. I suppose it will pass it. It is asked for, and it simply comes out of the Treasury, and we have no other use for the money. We have not any special calls from the Treasury now for any

money. We do not have anything for which to use the surplus money, so we will throw away a million dollars without knowing where it is going.

Mr. ASHURST. Mr. President, will the Senator yield to me right there?

Mr. SMITH of Georgia. Yes; I yield.

Mr. ASHURST. I admire the bravery and frankness with which the Senator from Georgia always speaks; but I want to tell the Senator that the earliest, the most vivid recollection I have is when the white settlers were banded together in a fort, trying in their way to oppose the most bloodthirsty band of savages that ever raided any country; and not only were the men armed, but the women and children who were old enough were armed to protect their lives. This bill simply provides that those old soldiers, those old pioneers—and there are not 20 of them in Arizona—shall receive pensions; and I believe they are entitled to them.

I have read this report. It is an eloquent report; it is a faithful report, in my opinion; and if the Senator could visualize and bring before him——

Mr. SMITH of Georgia. Mr. President, one moment. I do not yield to the Senator to lose my place. I understand that under the ruling of the Chair I can not yield except for a question; and, while I would be glad to yield to the Senator, I do not wish to lose my position upon the floor.

Mr. ASHURST. I certainly have no disposition to have the Senator lose his place on the floor.

Mr. SMITH of Georgia. No; I know the Senator has not; and I just wish an understanding as to what is to be done with me if I yield.

The VICE PRESIDENT. The Senator has had one speech, and now he is entitled to another.

Mr. SMITH of Georgia. Then I can not yield to the Senator.

Mr. ASHURST. I ask unanimous consent to be allowed to finish my short sentence. That ought to be granted.

Mr. SMITH of Georgia. The Chair has already held that I forfeited the right of one speech by allowing the interruption of the Senator from Arizona.

Mr. President, the Senator from Arizona says there are 20 men in Arizona who are splendidly entitled to pensions. If we knew who they were, if a list of them had been prepared, if we had a record to show that they were the proper character of men and that it was the proper character of service, we would have something substantial to act upon. But this bill does not limit its provisions to the men he has described.

Just let me show you, Senators, the breadth of language contained in this bill:

That the provisions, limitations, and benefits of an act entitled "An act granting pensions to survivors of the Indian wars of 1832 to 1842, inclusive, known as the Black Hawk War, Creek War, Cherokee disturbances, and the Seminole War," * * * be, and the same are hereby, extended * * * to the surviving officers and enlisted men of the Texas volunteers who served in defense of the frontier of that State * * * and to the surviving officers and enlisted men, including militia and volunteers of the military service of the United States, who have reached the age of 62 years, and who served for 30 days in the campaign in southern Oregon and Idaho and northern parts of California and Nevada from 1865 to 1868, inclusive; the campaign against the Sioux in Minnesota and the Dakotas, * * * and the campaigns against the Sioux in Wyoming, * * * the campaign against the Cheyennes, Arapahoes, Kiowas, and Comanches in Kansas, Colorado, and Indian Territory, * * * the Modoc War of 1872 and 1873, and many others I will not stop to read.

Now, mark you, this applies to those who served 30 days, Mr. President. The House had it "90 days." The Senate has amended this bill, and says that 30 days' service is long enough.

Mr. SMOOT. Mr. President, will the Senator yield for a question?

Mr. SMITH of Georgia. Well——

Mr. SMOOT. Just for a question.

Mr. SMITH of Georgia. Only for a question that the Chair holds is a question, Mr. President. I do not want to lose my place on the floor.

Mr. SMOOT. I would not think of causing the Senator to lose the floor. I simply wanted to ask the Senator this question: Is it not true that every Indian-war pension bill that has passed Congress requires a service of only 30 days?

Mr. SMITH of Georgia. I think the fact that there have been so many bad pension bills passed is no reason for another. If they had said "10 days" before, I do not think 30 days' service would be enough for a pension.

The bill provides:

The campaign against the Apaches of Arizona * * *; the campaign against the Kiowas, Comanches, and Cheyennes in Kansas, Colorado, Texas, Indian Territory, and New Mexico * * *; the campaign against the Northern Cheyennes and Sioux * * *; the Nez Perce War * * *; the Bannock War * * *; the campaign against the Northern Cheyennes * * *; the campaigns in the Black Hawk Indian War in Utah * * *; the campaign against the Ute Indians in Colorado and Utah; * * *; the campaign against the Apache Indians in Arizona * * *; and the campaign against the Sioux Indians in South Dakota * * *; and also to include the surviving widows of said officers and enlisted men who shall have married said survivor prior to the passage of this act: *Provided*, That such widows have not remarried: *Provided further*, That this act shall extend also to the surviving officers and enlisted men of the organization known as Tyler's Rangers, recruited at Black Hawk, Colo., in 1864, for services against the Indians: *Provided further*, That if any certain one of the said campaigns did not cover a period of 30 days, the provisions of this act shall apply to those who served during the entire period of said campaign.

Just listen, Mr. President, and Senators! If they have served 30 days, they get a full pension; and if any campaign did not happen to be that long, they get a full pension the balance of their lives, anyhow!

*Provided further*, That where there is no record of enlistment or muster into the service of the United States in any of the wars mentioned in this act, the record of pay by the United States shall be accepted as full and satisfactory proof of such enlistment and service: *And provided further*, That all contracts heretofore made between the beneficiaries under this act and pension attorneys and claim agents are hereby declared null and void.

That is the only real good thing I see in the bill so far. That, I like.

That the period of service performed by beneficiaries under this act shall be determined by reports from the records of the War Department, where there is such a record, and by the reports from the records of the Treasury Department showing payment by the United States where there is no record of regular enlistment or muster into the United States military service: *Provided*, That when there is no record of service or payment for same in the War Department or Treasury Department, the applicant may establish the service by satisfactory evidence from the muster rolls on file in the several State or Territorial archives: *And provided further*, That the want of a certificate of discharge shall not deprive any applicant of the benefits of this act.

Why, Mr. President, it needs only one more thing to make it perfect:

*Provided*, That if he can not show service at all, that fact shall be no bar to his pension.

That would make it a bill that would commend itself to its advocates. He need never have occupied the attitude of serving the United States Government. He need never have been on the pay roll of the Government. He need never have served in a war lasting 30 days. None of that is necessary; but he must get a pension the balance of his life, and so must his widow, if he is 62 years of age.

Mr. President, I suggest the absence of a quorum, without losing my place on the floor. I do not understand that the suggestion of the absence of a quorum forfeits my place on the floor.

Mr. SMOOT. That is what has always been held.

The VICE PRESIDENT. The Senator from Georgia suggests the absence of a quorum.

Mr. SMITH of Georgia. All right; I suggest the absence of a quorum. I will take care of myself.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Hitchcock | Nelson | Sterling |
| Bankhead | Hollis | Norris | Swanson |
| Beckham | Johnson, Me. | Oliver | Thomas |
| Broussard | Johnson, S. Dak. | Owen | Underwood |
| Catron | Jones | Page | Vardaman |
| Chamberlain | Kern | Ransdell | Wadsworth |
| Curtis | La Follette | Shafroth | Warren |
| Fletcher | Lane | Sheppard | Williams |
| Gallinger | Martin, Va. | Sherman | |
| Gronna | Martine, N. J. | Smith, Ga. | |
| Harding | Myers | Smoot | |

The VICE PRESIDENT. Forty-one Senators have answered to the roll call. There is not a quorum present.

Mr. PITTMAN, Mr. BRANDEGEE, Mr. LIPPITT, Mr. WALSH, and Mr. TOWNSEND entered the Chamber and answered to their names.

The VICE PRESIDENT. Forty-six Senators have answered to the roll call. There is not a quorum present. The Secretary will call the names of absent Senators.

The Secretary called the names of absent Senators, and Mr. SUTHERLAND answered to his name when called.

Mr. CHILTON entered the Chamber and answered to his name.

The VICE PRESIDENT. Forty-eight Senators have answered to the roll call. There is not a quorum present.

Mr. SIMMONS, Mr. LEA of Tennessee, and Mr. OVERMAN entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty-one Senators have answered to the roll call. There is a quorum present.

Mr. SMITH of Georgia. Mr. President, I move to reconsider the action of the Senate in amending the bill, on page 2, by striking out, in line 9, the word "ninety" and inserting the word "thirty."

Mr. SMOOT. Mr. President, is the Senator going to speak on his amendment?

Mr. SMITH of Georgia. Yes.

Mr. WALSH. Mr. President, a point of order. I inquire of the Chair if amendments to the bill are at this time in order?

The VICE PRESIDENT. Amendments to the bill are in order. The bill is in the Senate and open to amendment.

Mr. WALSH. I inquire, then, whether a motion to reconsider a vote taken as in Committee of the Whole is in order?

The VICE PRESIDENT. The Chair does not believe it is in order, but the amendment can be reached in the same way.

Mr. WALSH. I raise the point of order that the motion of the Senator is out of order.

The VICE PRESIDENT. The bill was amended as in Committee of the Whole. It was reported to the Senate. The Senate agreed to the amendments made as in Committee of the Whole. This was not reserved as a separate question, and so the Chair is compelled to sustain the point of order. A motion to reconsider this particular amendment would not be in order.

Mr. SMITH of Georgia. Then I ask, Mr. President, if a motion to substitute "three months" for "30 days" would be in order? Frankly, if the Senate has acted on the 90 and the 30, and we are not at liberty to move to reconsider it, my own opinion would be that it was so disposed of that I could not move to substitute something for the 30. I do not see why a motion to reconsider would not be in order. The Senate has approved an amendment. While the bill is before the Senate, would I not have a right to ask to reconsider what the Senate has done?

The VICE PRESIDENT. The Senator from Georgia can move to reconsider the vote whereby the Senate concurred in the amendments.

Mr. SMITH of Georgia. That was my motion.

The VICE PRESIDENT. No; *the* amendment. There was more than one, and there was no reservation in the Committee of the Whole for a separate vote on this amendment; so all the amendments together were voted on in the Senate. Consequently, a motion to reconsider must be of all the amendments, not one.

Mr. SMITH of Georgia. Then I move to reconsider all the amendments that were adopted in the Senate; and upon that I desire to be heard.

Mr. President, let us see what some of those amendments were. This is an Indian pension bill. The House provided that there should be 90 days' service in Indian wars to entitle men to receive these pensions for the balance of their lives. The House estimated that it would cost a million dollars a year to pay the pensions if the service was limited to 90 days' service. Now the Senate proposes to amend by providing, as a substitute for the 90 days' service, 30 days' service. We have not any estimate at all as to how much that will cost. The estimate of the House was based upon a bill giving the pensions for 90 days' service. This first amendment reduces the service to 30 days.

Now, let me go further and call to your attention some of the other amendments that we put on in the Senate.

The Senate has amended the bill so as to provide that—

When there is no record of service or payment for same in the War Department or Treasury Department, the applicant may establish the service by satisfactory evidence from the muster rolls on file in the several State or Territorial archives.

I do hope the Senators will listen to this for a moment. You do not know how much you are voting out of the Treasury. Your only estimate is based upon the House bill, and you have amended it in the Senate, making it infinitely worse. It was bad enough as the House sent it to us—$1,000,000. You change the length of service from 90 days to 30 days. Then you change the provision and declare that though there is no record of any service for the Government, though there is no record of the payment of a dollar to any of these men by the Government, you will go somewhere else and find another roll and make it up of a 30-day service; and you do not know how much you are increasing your appropriation beyond the million dollars a year.

*Provided*, That when there is no record of service or payment for same in the War Department or Treasury Department, the applicant may establish the service by satisfactory evidence from the muster rolls on file in the several State or Territorial archives.

You abandon any idea of service to the National Government. It was a million dollars if you held to the national-roll rule. It was a million if you held to 90 days. You cut it down from 90 to 30. It was a million if you limited it to those whose service was shown in the War Department, and you changed it by omitting any requirement of evidence of service in the War Department. This amendment proposes to change it.

Mr. TOWNSEND. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER (Mr. WALSH in the chair). Does the Senator from Georgia yield to the Senator from Michigan?

Mr. SMITH of Georgia. For a question.

Mr. TOWNSEND. This bill proposes to give to the Indian war veterans pensions for less service than that for which men were given pensions in the case of the Civil War, does it not?

Mr. SMITH of Georgia. Yes.

Mr. TOWNSEND. In the one case it is 90 days.

Mr. SMITH of Georgia. In this case it is 30 days. Not only that, but the Civil War pensioners were employed by the National Government, were enrolled as soldiers of the National Government; and this amendment proposes to put these men on the roll of pensions without their ever having been enrolled in the service of the National Government.

Mr. CLAPP. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Minnesota?

Mr. SMITH of Georgia. For a question.

Mr. CLAPP. Well, then——

Mr. SMITH of Georgia. I can not do more than yield for a question, because there are Senators who are willing to take me off my feet.

Mr. CLAPP. The Senator knows I would not do that.

Mr. SMITH of Georgia. I know that, of course; but under the rules I would be taken off. I do not complain.

Mr. SMOOT. Mr. President, did the Senator look at me when he said that?

Mr. SMITH of Georgia. I did not mean the Senator from Utah. I heard over here from several of my close friends that I have used my privilege of two speeches and could not occupy the floor again.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMITH of Georgia. For a question only.

Mr. SMOOT. Mr. President, a point of order.

Mr. SMITH of Georgia. I have to yield to that.

Mr. SMOOT. Of course.

The PRESIDING OFFICER. The Senator from Utah will state his point of order.

Mr. SMOOT. I do not want to enforce the rule, but I want, just for the RECORD, to state that the Senator had no right to make the motion that he did, and I call the Senator's attention to the rule. I do not want to stop the Senator from talking, and I only want to make this statement for the RECORD.

Rule XIII says, on page 14 of the Manual:

When a question has been decided by the Senate any Senator voting with the prevailing side may, on the same day or on either of the next two days of actual session thereafter, move a reconsideration.

Mr. President, more than two days have passed, but I do not want to take the Senator off his feet. I make this statement for the RECORD; and I want the Senator to have all the time he wants to have to speak upon the bill.

Mr. SMITH of Georgia. Mr. President, I go on. The Presiding Officer held my motion in order. There was no appeal from the decision of the Chair, and the motion is pending under a ruling of the Chair that it was in order.

Now, let us see what these amendments do.

The PRESIDING OFFICER. Will the Senator pardon the Presiding Officer for a moment? His recollection of the matter is not as stated by the Senator from Georgia. The Chair wants to get the RECORD straight. If the reporter has the record of this matter here, the Chair requests that it be read.

Mr. SMITH of Georgia. I will state to the Chair what happened. I first moved to reconsider a single amendment, and the Chair held that that was not in order, because the Chair held that all of the amendments were adopted by the Senate in a single amendment, I thereupon moved to reconsider the action of the Senate which adopted them all, and the Chair held that it was in order.

The PRESIDING OFFICER. That is the recollection of the Chair. The question of whether the pending motion is in order or not has never been submitted to the Chair.

Mr. SMITH of Georgia. Certainly it was submitted, and the Chair held that it was in order, and I proceeded under the ruling of the Chair.

The PRESIDING OFFICER. The Senator from Georgia has not so stated in his statement of the facts. His statement of the facts is in accordance with the recollection of the present occupant of the Chair—that he made his motion and the motion was entertained by the Chair. The question of order, as to whether the motion was in order or not has never been submitted to the Chair.

Mr. SMITH of Georgia. I think that is true—that the Chair advised me that it would be in order, and thereupon I made the motion. My recollection agrees with the view of the Chair in

that respect; but I wish to go further and call the attention of the Senate to this additional provision now, as suggested by the Senator from Michigan:

You require 90 days' service for a soldier during the Civil War as an enlisted soldier of the Government. This bill reduces the time of service to 30 days for these soldiers of Indian wars and then goes further, and you have amended the House bill by providing:

That when there is no record of service or payment for same in the War Department or Treasury Department, the applicant may establish the service by satisfactory evidence from the muster rolls on file in the several State or Territorial archives.

Just think about it, gentlemen. Do you mean to do that? Do you mean to put on the permanent pension roll men who never enlisted in the service of the Government but who may be found on some State muster roll; who never had any record to support their national service, to ask for any compensation from the Government for the service; who never had any proof to show their service to the Government, but who can show a muster roll in some State?

*And provided further,* That the want of a certificate of discharge shall not deprive any applicant of the benefits of this act.

Do you put upon the pension rolls soldiers of the war unless they were honorably discharged? Or honorably mustered out? The truth of this is that they were neither mustered in nor mustered out. Then why is it so broadly stated? They have never been mustered into the service of the Nation and therefore they were never mustered out, and if they ever got on any list in the State they can take a pension for the balance of their lives, though they were never mustered in or out.

Why, it is no more to me than to any of the balance of you. Perhaps it is more to some of the balance of you. It may be good politics for the gentlemen in Northwestern States or some of the States where the boys will get their hands in the Treasury, and they or their widows draw pensions for the balance of their lives. If there are some of these men who are really entitled to a pension let us have a bill that takes them up intelligently and bases it on something.

Mr. CLAPP. Will the Senator permit a question?

Mr. SMITH of Georgia. Yes, a question; but not anything that will take me off the floor.

Mr. CLAPP. Does not the Senator feel that when it comes to a matter of reaching into the Federal Treasury the injunction issued many years ago, "Let him who is without sin among you cast the first stone," ought to apply with force and effect?

Mr. SMITH of Georgia. Certainly I do. Therefore I am casting stones. I have preserved my status to cast stones by declining to help the Spanish War veterans, some of whom live in my own State, from getting pensions without just claims. I have held up wherever I could the Spanish War veterans, although my own State had as many in proportion to its population, as any State, and there would have been more if they had been permitted, as they wished to enter the service.

Mr. CLAPP. May I ask the Senator another question?

Mr. SMITH of Georgia. Yes.

Mr. CLAPP. Does the Senator limit his concept of this unholy act of grasping from the Federal Treasury only to those who reach for it in the form of a pension?

Mr. SMITH of Georgia. Not at all.

Mr. CLAPP. With that broader concept, will the Senator still say he can cast a stone as one without offense?

Mr. SMITH of Georgia. The Senator is still prepared to defend any vote he has ever cast for an appropriation, and he is ready to cast stones when he thinks they ought to be cast.

Mr. CLAPP. If the Senator will permit as an interruption a suggestion——

Mr. SMITH of Georgia. I can not permit a suggestion. I will permit a question. I really think this bill is a proposition to pass pensions that we know nothing about. Just let us see the change since the House sent it to us. The House said that in 90 days, and with the record of the Government to show the service, it would be a million dollars a year. You would fasten it, probably, for 15 or 20 years on the country.

Now, your amendment cuts from 90 days to 30 days, and how many more do you bring in? How many more do you bring in under the Senate amendment? Then your amendment cuts out the requirements that there shall be a register here in Washington showing that there was service at all. You turn them loose. You relieve them from being mustered in and from being mustered out. How many millions will it take? What will it cover? There is not a Senator who knows anything about it.

If there ought to be some pensions to some of these men, let us be reasonable about it. Let us enact a bill that in some sense is justifiable. Do not just throw down every barrier at once and abandon every restraint and give a pension to everybody applying without regard to what he has done. Those are the two main Senate amendments. There is one other to which I wish to call attention.

Mr. FLETCHER. May I interrupt the Senator?

Mr. SMITH of Georgia. For a question.

Mr. FLETCHER. I ask the Senator the meaning of the amendment at page 4, line 25, where it provides further "that the want of a certificate of discharge shall not deprive any applicant of the benefits of this act."

Mr. SMITH of Georgia. He is not to be mustered out or mustered in. He does not under this amendment have to be on the roll here at Washington. He does not have in any way to manifest his service to the Government. He does not have to show that he had a certificate that he was mustered out. I do not think that is the kind of Indian war pensions that you gentlemen really want to pass. It goes too far if you are going to pass any at all.

Mr. President, with reference to the suggestion that my motion to reconsider was later than the time provided, this bill got into the Senate, and the Senate without objection concurred in the committee amendments. It has never been before the Senate since then. I suppose I could have filed a motion between then and now. I do not understand that the formal point of order has been made on my motion. I submit to the Senate my criticism upon these amendments. I do not see how we can justify them.

Mr. THOMAS. Mr. President, I have read this bill once or twice and have noted the significance of some of the provisions that have just been criticized by the Senator from Georgia [Mr. SMITH]. The bill seems to be one of those which originally was designed to subserve a particularly good purpose by providing pensions for veterans of the Indian wars, to which no Senator could properly object in view of the liberal nature of our pension system. Such a bill would be meritorious, as I personally know, if applied to those who have done actual Indian service for an appreciable period of time. But to secure pensions for these deserving veterans it has evidently been necessary to make other provisions for other classes, so that it embraces every individual seemingly indentified with any of those Indian and border outbreaks, giving him equal opportunity for a pension from the Government with him who has borne the heat and the burden.

In other words, in order to secure the benefit of this bill for those who are deserving, it seems to have been necessary to include some classes who may not deserve it. The House bill, liberal as it was, has been so extended by the Senate amendments that it may be possible for any man who enlisted in some of the campaigns and afterwards changed his mind before doing actual service to obtain a pension.

Now, I know that any criticism of a pension bill, however meritorious or well-deserved, inevitably subjects one to misunderstanding, censure, and reprobation. The pension policy has long ago reached a stage where the average legislator does not dare to question the merits of any application, so they go, as a matter of course, to all who seek them. The Military Committee is required to consider a great many bills filed here to remove the disabilities of soldiers who have been dishonorably discharged to enable them, after the removal of such disability, to apply for and receive admission to the pension roll. The committee to-day has a very considerable number of such bills. In many instances the applicant asserts his ignorance of the nature of his own record, until some one called his attention to it, or until the application for a pension under the general laws is denied. Then Congress is appealed to, and, of course, after all human testimony to substantiate the records of the War Department has passed away.

We have removed these disabilities in a good many cases, for some of the applications have been meritorious, unquestionably so. The greater proportion can only appeal to our discretion, and that, too, is sometimes favorably exercised. But the practice emphasizes the fact that the pension roll is no longer a roll of honor. It now embraces within its rolls all sorts of public service, good, bad, and indifferent, or no service at all. He who served his country and served it well receives the same consideration in his old age as and no more than he who served his country not at all or served it grudgingly. Each and all are treated alike. Here and there is an exception. In these days an application for a pension will go as a matter of course. I can not perceive what incentive the soldier of to-day has for giving his country the best that is in him when the soldier who shirked or deserted receives a like reward from a generous Nation.

Mr. President, the Senator from Georgia said that the estimates of the House based upon the bill which it passed and sent

to the Senate mean an increase in our actual fixed expenditures of upward of a million dollars per annum. Of course, in these days in Congress a million is a mere bagatelle. We speak of millions and we appropriate them as flippantly as though they were copper pennies. A hundred million dollars has ceased to be a startling amount in a congressional appropriation, and the time is rapidly approaching when billions will be disposed of quite as unconcernedly as hundreds of millions are now appropriated.

A great many Senators upon the other side of the Chamber have reminded us with painful iteration of that celebrated plank in the Baltimore platform which denounced the profligate extravagance of the Republican Party during its administration of public affairs and pledged Democracy to strict economy of expenditures. They have taunted us with our disregard of that pledge and with the fact that we have seen the Republican extravagance and gone away beyond it.

I have more than once rejoined that I have seen no evidences of a desire upon the other side of the Chamber, with here and there an exception, any more than upon this side to give much heed to that pledge or independently of it to exercise here and there some measure of frugality in our appropriations.

Mr. President, these reminders of Senators upon the other side and these suggestions of mine have availed nothing. We go on our spendthrift way and the people approve. They have almost without exception come to regard the Public Treasury as a vast and exhaustless reservoir of money created for their benefit, and each and all of them strive to secure every dollar from it that they can for themselves. The West, the South, the North, and the East are actuated by a common sentiment when it comes to raids upon the Treasury. The constituents of the Senator from Minnesota, the constituents of the Senator from Georgia, the constituents of the Senator from Maine, and my own constituents are alike in this particular. Each section denounces the extravagances of the Government while insisting that its own demands are entirely reasonable and urgently necessary. Hence it should be excepted from the common rule. The result is obvious. It finds expression in omnibus bills like this, designed to cover the claims of different sections and sometimes of different interests in order to secure a sufficient number of votes to enact the measure as an entirety, and by a system of lumping and logrolling a great many appropriations are secured which but for this method never would be enacted into law.

Now, this has grown to be a practice, Mr. President, honored not in the breach but always in the observance. It is getting worse and worse, and it will continue to do so until public men exhibit the courage to resist the demands of their own constituencies and thus effectually resist the constantly increasing avalanche of demands from every direction upon the Public Treasury.

These continued and ever-increasing appropriations are wiping out the States, which are becoming provinces distinguishable from each other merely by geographical boundaries. State rights used to be a subject of living and important concern. Representatives and Senators were jealous of those rights and defended and safeguarded them here and at the other end of the Capitol. But that was years ago. To-day we are ready to surrender any right of any State, to abandon any prerogative of any Commonwealth and surrender them to the Federal Government, provided we can secure appropriations large enough to justify the policy. When we rise from our seats, as we sometimes do, and denounce the activities of the Government, the extension of its jurisdiction and consequent absorption of many of the reserved rights and powers of the States, we should remember that we are ourselves largely responsible for the evil, and that the people have seemingly ceased to trouble themselves about the fact so long as we can bring home the lion's share of the national plunder.

We have passed a number of bills designed to obtain and disburse money in all the States of the Union in certain proportions duly provided for, and we are going, I presume, to pass others, notwithstanding the fact that there is a day of settlement soon to come. It will come when we turn our attention to the method of raising revenues instead of appropriating them.

In all of the schemes of preparedness with which I have been deluged during the last three months, I have received hardly a suggestion as to the manner in which we should raise the money necessary to meet our increased appropriations for that purpose. Here and there it has been intimated that a return to the good old Aldrich tariff would be necessitated by these conditions, and that an issue of interest-bearing bonds saddling still more of our obligations upon posterity is an easy solution of the problem. Let our children struggle as best they may with the problem after we are dead and gone; meanwhile, we consider preparedness. Let me hope that we shall do neither, but pay as we go.

But we must raise more money, and of course by taxation. And because we must raise more money we should expend at present only what is essential Why, then, should we at the present time increase our pension list by $1,000,000 a year, as provided for in this House bill? And why increase that million by the enactment of a measure, the amount of appropriations to meet which we do not know, and can only imagine? Oh, I know some one will say, "It is only a million dollars; and what is a million dollars to the Treasury of the United States?" It does not count. I am reminded of the Chicago packer who saw a boy in West Virginia driving some hogs along the road one day. On inquiry the boy said he was driving them to a pasture. The Chicago man asked why. "Oh," he said, "so that they can get fat." He was then asked how long it would take them to get fat in that way. The boy said, "About six months." "Well," the Chicago man said, "That is not the way we do in Chicago and around in that section of the country. We take the hogs, my son, and we put them in pens, we feed them corn, and we fatten them in 30 days." "Oh, well," the boy said, "what in thunder is time to a hog?" [Laughter.]

What is a million dollars to us? It is a mere bagatelle. We toss them off with the easy nonchalance of jugglers. And yet we know, Mr. President, that a little million here and a little million there and a couple of millions yonder and some more millions next week amount to many millions in the end. Their distribution will enable the statisticians of the Republican campaign committee to make a pretty respectable showing about the first of next July; and those Senators and Representatives who always vote with us for such appropriations will be the loudest in their denunciation of our extravagance before the people. This will serve us right, because there is this modicum of justice about it, that we are in power, and we could if we would make our denunciation of Republican extravagance most effective by repudiating it in our own practice.

It may be said, Mr. President, that all this has comparatively little to do with this bill, but I am speaking to this question simply because the bill is one of a series. "They come and go as comes and goes the sea;" sometimes one per day, sometimes two, sometimes more.

I said the other day—I think on the 10th of April—that the bills then upon the Senate Calendar, outside of general appropriation bills, if enacted into law, would require $121,000,000 to provide the sums necessary to make them effective. I presume the amount is much larger now, because a good many other bills have since come out of committees. I think it is safe to say that 75 per cent of the bills introduced into this Congress, and perhaps also in the last Congress and in a number of previous Congresses, call for appropriations—small appropriations or large appropriations—in the aggregate collossal appropriations.

Mr. President, I should perhaps keep silence if this bill were to be enacted as it came over from the other House, since, in any event, my words will have but little, if any, influence upon the final vote. But there are opportunities in the House bill for a considerable increase of the amount estimated to be necessary to carry its provisions into effect. For instance, I read from page 4, where it is provided:

That if any certain one of the said campaigns did not cover a period of 30 days—

"Ninety days," as the bill came from the House—

the provisions of this act shall apply to those who served during the entire period of said campaign.

In other words, if any one campaign lasted but 1 day or 10 days or 15 days or 25 days the provisions of the act will apply as completely to those engaged in such brief campaigns as they will to a campaign running a year or more. Those of us in the West who have lived there as long as I have can recall some Indian outbreaks, although perhaps not covered by the recitals of the bill, which were over in less than 20 or 25 days. They were extremely brief; they were limited in area and in importance; yet those who rushed to their own defense or to the defense of others, where, perhaps, no gun was fired or no life lost or no wounds inflicted, are treated with the same generosity in this bill as is the hardened, old, war-seasoned pioneer veteran of the plains whose business in life was fighting Indians, and who fought them at all times and fought them well; one of the most splendid set of men which any country ever produced; men who faced every peril of weather, of wilderness, and of savage, fought out their own destiny, conquered all obstacles, and made possible the subsequent settlement of the great States of the West. All honor to them. They deserve well of the Republic.

That sort of man in old age should be liberally provided for, but under the provision to which I have just called attention,

these heroes line up with men of 10 days' service in any capacity—men with no mustering-in and no mustering-out, with no record of service, State or Federal. Mr. President, I ask you what limitation, except the conscience of men, will circumscribe the operation of this bill in actual practice? I can not determine; but I do know when an opportunity to get money from the Treasury of the United States through the provisions of any measure comes along the temptation to avail oneself of that opportunity is well-nigh irresistible. So it seems to me, Mr. President, that this bill as amended is altogether too comprehensive. I do not believe it would have been so amended, but for the apprehension that without them a majority could not be obtained to carry the bill.

Mr. President, I have said more than I intended to say. I do not believe that we should legislate in this loose manner when our legislation means appropriations out of the Treasury of the United States. I believe that we should treat this great fund in the treasury as we would treat trust funds committed to our keeping and calling for our private administration, with due regard, of course, to the public needs and the public demands.

In a book of aphorisms the other day I saw this one: "Public money is like holy water; everyone helps himself." And I could not but think that it was a most appropriate description of the public money of the United States, in view of the careers of the Sixtieth, Sixty-first, Sixty-second, Sixty-third, and doubtless of the Sixty-fourth Congresses.

Senators on this side of the Chamber, I want to venture the prediction that, independently of increased appropriations for so-called preparedness, our annual expenditures will probably aggregate one and a half billion dollars for the next fiscal year, unless we call a halt and in some degree economize. If there ever was a time, Mr. President, demanding economy in legislation this is the time, for it is self-evident that in some degree, either large or small, this Nation, through the stress of foreign war and activities of the Sixty-fourth Congress, is going to enter into a new era of nationality.

It was once said that no nation entering a war and emerging from it is ever the same, and in the presence of this world-wide war, affecting, directly or indirectly, every people upon the face of the earth, and bringing those of our own country face to face with a survey of the consequences of a sudden conflict without some cautionary prevision, we shall consider public sentiment by making some increase of our Army and Navy. This increases, of course, the taxes already pressing heavily upon the people, and particularly upon the consumptive energies of the Nation. This is our task; the task of the majority. It is our burden, and we must assume it, with the certainty of incurring sullen resentments where taxation presses unduly, as it will. Let us make the load as light as we can by saving where we can. The gravest indictment that posterity will return against this Congress may be that at such a time it not only forgot the pledges of Democracy, but increased the extravagances which it denounced in previous administrations, and thus swelled the burdens of the people. Let us prevent this. We can do so if we will.

Mr. JOHNSON of Maine. Mr. President, I quite agree with the Senator from Colorado [Mr. THOMAS], who has just taken his seat, that human nature is apt to be human nature in any party and to manifest itself; but I want to call attention to some provisions in this bill which prompt me to support it as an act of justice to those who were engaged in and who performed a most hazardous national duty and national service.

The Senator from Georgia [Mr. SMITH] has criticized the amendment of the Senate committee because we have shortened the term of service which the House provided. They fixed it at 90 days, and we have made it 30 days. We so amended the bill because in all previous Indian-war pension bills which have been passed by Congress only 30 days' service was required.

The very first bill of this character was passed in 1892. In that measure the survivors of only four Indian wars were included, and under its provisions a service of only 30 days was required. Again, in 1902, 10 years later, the Congress of the United States extended the provisions of the act of 1892 to the survivors of a dozen more Indian wars, so that we had then some 16 Indian wars in all included, and only a 30-days' service was required of those who took part in those wars. Again, in 1908, the provisions of the act of 1892 were further extended to the Texas Rangers and others in Texas who had defended the homes of the people of the then frontier State against Mexican marauders and Indian invaders, and only 30 days' service was required.

The Senator has also criticized the bill because of the provision that no certificate of discharge shall be required. A similar provision was in all the previous Indian-war pension acts which have been passed. It does not preclude or do away with the necessity of showing that the soldier was discharged or mustered out, but he may show that fact in other ways than by a certificate of discharge. That was the provision in the preceding bills.

Having in mind all the Senator from Colorado has said about the duty, which rests upon me as heavily as it does upon him, to guard the Treasury of the United States, it seems to me that we should be just to those who at the particular time when homes of settlers were in danger and we were extending the frontier in the great and growing West hazarded their lives to make sure and safe the pathway of civilization there.

Just think of the great men who served in those Indian wars, men illustrious in the history of your country—such men as Sheridan, Sherman, Custer, and Howard. You have not made provision in any of the Indian-war bills heretofore for the survivors of the Custer campaign and of many other of the bloody wars in which the soldiers of the country took part.

Now, we have come to a point, it seems to me, when justice shall be done. I do not care what it costs, if it is an act of justice to those who sacrificed their possessions, who hazarded life itself, and who saved at times the last cartridge for themselves, knowing that no mercy would be shown if they were taken. I care not about a little cost; we can not reckon it in the money of any realm. When we are asking now for volunteers to come forward and enlist and prepare themselves for the service of this country and we find there are some holding back, I do not want men to point to the Congress of this country as being illiberal, picayunish, and mean with the soldier who volunteered his services for his country.

This surely was a service which called for courage; it called for sacrifice. I do not know what this bill will cost. The House thought perhaps it might cost a million dollars a year, but they had no information upon the subject; and speaking for the Committee on Pensions of the Senate, I have been unable to obtain any information at the War Department as to just what the cost will be. Mr. C. R. Houser, who is the secretary of the Indian War Veterans' Association of the West, thought it would be much less. He stated that for three years he had been attempting to make up a roll of all those who had survived, and he had only been successful in finding some 1,200 or 1,300. There are few, and they will not be affected, in my State.

Mr. SMITH of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maine yield to the Senator from Georgia?

Mr. JOHNSON of Maine. I do.

Mr. SMITH of Georgia. May I ask the Senator whether that roll would conform to the rules which are prescribed in these amendments or to the rules that the House prescribes?

Mr. JOHNSON of Maine. It was entirely a roll of the survivors. This applies only to those who have reached the age of 62 years.

If the survivors of the earlier Indian wars deserved liberal consideration by the Congress of the United States, I see no reason why those who served in these later wars should not be treated in the same way. If you will count those for whom provision has been made in the acts of 1892 and 1902 and 1908, you will find that you have about 20 Indian campaigns, and that the survivors of those 20 Indian campaigns now draw pensions for a service of 30 days, and with no certificate of discharge, if the certificate of discharge is lost, and they show their service by other evidence outside of that record.

We have followed that provision; and if we had not inserted here, as the Senate committee did, that if the certificate of discharge was lost it should not deprive the applicant of the benefits of the act, and had simply extended the provisions of the earlier acts to the applicants under this, it would have been sufficient without calling attention to this, and they would have been covered by it.

I do not know, as I say, what this would cost, and I think it is not entirely a question of cost. It is a question of justice in dealing with these survivors of the later wars as Congress has dealt with those who served in the Seminole War, the Black Hawk War, the Modoc War, and other wars for the survivors of which you have made provisions for pension.

Mr. SHAFROTH. Mr. President, in reference to the statement which was made by the Senator from Maine [Mr. JOHNSON] in relation to Mr. Houser, whose headquarters are at Denver, Colo., I will state that in his communication he says that the National Indian War Veterans' Association of the United States numbers at present 485 members; that there were advertisements inserted in newspapers for all persons who served in Indian wars to become members of that organization, and he states that the number can not be large; he does not

pretend to say exactly how many, but it falls far short of the number of 5,000 suggested.

I want to say this, however, that the campaigns waged in the western portion of the United States in defense of the homes of the settlers were campaigns where there were greater hardships, and which were more exacting upon the health and even upon the physical endurance of the individuals, than those of many of the battles of the Civil War. There is one man who states:

I saw more fighting at Beecher Island than during all the four years I served with the Army of the Potomac.

When we consider that we have men who have endured these hardships, and we know that they have not had, to any appreciable extent, aid from the States, and that these men are as much entitled to pensions as the men who served in the Civil War, it does seem to me that in order to be just and fair we ought to grant them pensions.

Whether this bill is a little too liberal or not, I am not prepared to say. The bill, as it came from the House, provided for pension upon 90 days' service in these campaigns; but when we find that the exact provisions that are contained in this bill were also in the 16 other Indian war acts passed years ago I can not see how we can well discriminate against the Indian war veterans in this measure.

But the bill is not a law yet. It has to go to the House for consideration. A conference, no doubt, will be had upon it; and if there is a proper showing that there are in it harsh provisions as against the Government, or too liberal provisions for the individuals, it may be that there will be a change. But it seems to me that when we take into consideration the fact, as the chairman of the committee said, that these identical provisions are in the pension legislation of every other Indian war—the veterans of which are being pensioned or have been pensioned by the United States Government, I do not see how, in fairness, that committee could have refused to incorporate in this bill the same provisions.

It seems to me that it is not fair to say that only those persons who were in the Civil War are entitled to pensions, when these men have performed service as valuable to the Government, and they include Regular soldiers of the United States Army. The men who fought with Custer when he was massacred all come within the provisions of this act, unless they draw a pension from some other act of Congress of the United States, and then they would not be entitled to the pension under this bill.

We have a liberal pension policy, it is true—a pension policy more liberal than that of any other Government on the face of the globe—and I am satisfied that that is one of the things which the soldier, when he volunteers at the call of the Nation, considers as one of the protections which may accrue to him or to his widow in the event that he meets with injury or death on the field of battle. It must be remembered that these veterans are old men, and for many years have received no recognition from the Government. The veteran receives no benefit until he is 62 years old, and the majority of them are past that age. The average life of the veterans under this bill will not extend over eight years, and hence the allowance will not be perpetual. In order to make the objections to this bill tenable we should either reconstruct the whole pension laws and cut them down or give pensions to these men, these people in the West, who have fought just as hard and endured just as great hardships as those who are drawing pensions by reason of service in the Civil War. For these reasons, I submit the bill should be enacted.

Mr. CURTIS. Mr. President, I have no desire to take up the time of the Senate in the discussion of this matter. I have a report of the House of Representatives that shows the service of the Eighteenth and Nineteenth Kansas Volunteer Regiments—the Eighteenth some four months and the Nineteenth some six months. I ask to have the report printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

[Report to accompany H. R. 8631, 53d Cong., 3d sess.]

The Committee on Pensions, to whom was referred the bill (H. R. 8631) extending the provisions of an act granting pensions to soldiers and sailors, approved June 27, 1890, to the Eighteenth and Nineteenth Regiments of Kansas Cavalry Volunteers, have considered the same and respectfully report as follows:

A report from the officer in charge of the Record and Pension Office, War Department, shows that a battalion of the Eighteenth Kansas Cavalry Volunteers, organized under a circular of June 21, 1867, from headquarters Military Division of Missouri, was mustered into the military service of the United States from July 13 to 15, 1867, at Fort Harker, Kans., to serve for a period of four months, and that it was mustered out of service at the same place November 15, 1867.

It also appears from the records that the Nineteenth Regiment Kansas Cavalry Volunteers, organized under authority contained in a telegram from the Secretary of War to Lieut. Gen. Sherman, dated October 6, 1868, was mustered into the United States service by companies from October 20 to 29, 1868, at Tokepa, Kans., to serve for a period of six months, and that the regiment was mustered out of service April 18, 1869, at Fort Hays, Kans.

The official report shows that these organizations were called out to aid in the suppression of Indian hostilities, and the records further show that the battalion of the Eighteenth Kansas Cavalry, above referred to, and the Nineteenth Regiment of Kansas Cavalry are the only two volunteer organizations mustered into the military service of the United States since the War of the Rebellion.

At the time the Eighteenth Kansas was mustered in at Fort Hooker a severe epidemic of cholera prevailed at that place, and it is shown by the records of the War Department that 20 deaths occurred in the battalion from that disease.

On the 21st and 22d of August, 1867, companies B and C of this battalion were in an engagement with the Cheyenne Indians on Prairie Dog Creek in Kansas, with a loss of 14 officers and men killed and wounded, and Maj. Armes, of the Tenth United States Cavalry, commends in the highest terms the officers and men of the Eighteenth who took part in this engagement in saving the State of Kansas from further depredations from the Indians.

In his report the governor of Kansas says:

"On the 30th of August Maj. Moore, with the Eighteenth Kansas, struck a portion of the Indians who had engaged Maj. Armes on the 21st and 22d, and after an engagement of several hours gained a decisive victory. About the same time Maj. Elliott, with a detachment of the Seventh United States Cavalry, attacked another band and drove them in a westerly direction toward the headwaters of the Republican. After these several engagements the Indians retired to their winter haunts and left the frontier settlements of Kansas comparatively at peace."

In Gen. Sheridan's report, dated Chicago, Ill., November 1, 1869, speaking of the depredations of the Indians on the plains during the previous summer and winter, he says:

"So boldly had this system of murder and robbery been carried on that not less than 800 people had been murdered since June, 1862—men, women, and children."

It had been the custom of the Indians to raid the frontier settlements during the summer and then seek security by retiring into the mountains during the winter. Gen. Sheridan continues:

"To disabuse the minds of the savages of their confident security and to strike them at the period when they were the most, if not entirely, helpless became a necessity, and the general in chief then in command of this division authorized a winter campaign."

The Nineteenth Kansas Cavalry was mustered into the United States service in the last days of October for the purpose of prosecuting the campaign at this season of the year. On the 5th of November the regiment moved from Topeka, Kans., and, crossing the Arkansas River at Wichita, moved in a southwest direction to join the Seventh United States Cavalry, near the junction of Beaver Creek with the North Canadian, 112 miles south of Fort Dodge, at a cantonment called Camp Supply.

On the march the command was caught in a severe snowstorm, and, becoming entangled in the canyons of the Cimarron, did not reach Camp Supply until the 30th of November. Of this incident in the history of the regiment Gen. Sheridan says:

"The regiment lost its way, and, becoming entangled up in the canyons of the Cimarron and in the deep snow, it could not make its way out and was in a bad fix. * * * It had been subsisting on buffalo for eight or nine days. * * * Officers and men behaved admirably in the trying condition in which they were placed, but the poor horses suffered greatly, and a number of them were lost."

Of the march down the Washita Gen. Sheridan says:

"The snow was still on the ground and the weather very cold, but the officers and men were very cheerful, although the men had only shelter tents. We moved due south until we struck the Washita, near Custer's fight of November 27, having crossed the main Canadian, with the thermometer about 18° below zero. On the next day we started down the Washita, following the Indian trail; but finding so many deep ravines and canyons, I thought we would move out on the divide, but a blinding snowstorm coming on and fearing to get lost with a large command and trains of wagons on a treeless prairie without water, we were forced back to the banks of the Washita, where we at least could get wood and water. * * *

"This was continued until the evening of the 16th of December, when we came to the vicinity of the Indians, principally Kiowas. They did not dream that any soldiers could operate in such cold and inclement weather, and we marched down on them before they knew of our presence in the country."

The result of this campaign was that Santanta and Lone Wolf, chiefs of the Kiowas, were taken prisoners, and by a threat of execution that tribe was forced to report at Fort Cobb, together with the Comanches and Apaches, and finally induced to go on their reservation.

From Fort Cobb the command marched to the base of the Washita Mountains and established Fort Sill, near Medicine Bluff. On the 2d of March following the Nineteenth Kansas Cavalry and the Seventh United States Cavalry, under the command of Gen. Custer, went in pursuit of the Cheyennes. The course pursued was via Camp Radiminski, mouth of Elk Creek, to a point on North Fork of Red River, a few miles above the mouth of Salt Fork.

The Cheyenne trail was struck on Salt Fork on the 6th of March, 1869, and followed to the north along the eastern edge of the Llano Estacado until the 20th of March, when the Cheyennes were caught camped on Sweetwater Creek, about 10 miles west of the eastern line of Texas. This march was made practically without transportation or adequate supplies, and for the last few days the men subsisted on mule meat without bread or salt.

In Gen. Custer's official report of this campaign he uses the following language:

"The point at which we found the Cheyenne village was in Texas, on the Sweetwater, about 10 miles west of the State line. Before closing my report I desire to call the attention of the major general commanding to the unvarying good conduct of this command since it undertook the march. We started with all the rations and forage that could be obtained, neither sufficient for the time for which we have already been out. First it became necessary to reduce the amount of rations; afterwards a still greater reduction was necessary, and to-night most of my men made their suppers from the flesh of mules that have died on the march to-day from starvation. When called upon to move in light marching order, they abandoned tents and blankets without a murmur, although much of the march has been made during the severest winter weather I have experienced in this latitude.

"The horses and mules of this command have subsisted day after day upon nothing but green cottonwood bark. During all these privations the officers and men maintained a most cheerful spirit, and I know not which I admire most, their gallantry in battle or the patient, but unwavering, perseverance and energy with which they have withstood the many disagreeable ordeals of this campaign.

"As the term of service of the Ninteenth Kansas Cavalry is approaching its termination, and I may not again have the satisfaction of commanding them during active operations, I desire to commend them—officers and men—to the favorable notice of the commanding general. Serving on foot, they have marched in a manner and at a rate that would put some of the regular regiments of Infantry to the blush. Instead of crying out for empty wagons to transport them, each morning every man marched with his troop, and—what might be taken as an example by some of the line officers of the Regular Infantry—company officers marched regularly on foot at the head of their respective companies; and now, when approaching the termination of a march of over 300 miles, on greatly deficient rations, I have yet to see the first straggler.

"In obtaining the release of the captive white women, and that, too, without ransom or the loss of a single man, the men of my command, and particularly those of the Nineteenth Kansas, who were called into service owing to the murders and depredations of which the capture of these women formed a part, feel more fully repaid for the hardships they have endured than if they had survived an overwhelming victory over the Indians."

Your committee is further advised by Hon. H. L. Moore, Member of Congress, who was the major commanding the Eighteenth Kansas during the whole term of its service, that this battalion, as well as the Nineteenth Kansas, was composed largely of men whose homes had been devastated and families murdered by the Indians during their raids on the frontier settlements. The Eighteenth suffered a loss of some 10 per cent from cholera and the casualties of battle. Its service was constant and arduous during the whole term of its enlistment.

The Nineteenth Kansas, of which Mr. Moore was lieutenant colonel, and which he commanded during the latter half of its term of service, prosecuted this campaign during the most inclement weather, and, as the official report shows, much of the time without adequate food or camp equipage. The result of the campaign was to clear the Plains of the Indians of the Southwest by forcing them onto their reservations, where they have remained ever since.

Upon full and careful consideration of this bill your committee are unanimously agreed that it is one of exceptional merit. The service rendered by these two organizations was of a very exceptional character, and the results of the same have been widespread and beneficent.

No dangerous precedent will be established by the enactment of this bill into law, as it will be remembered these are the only volunteer organizations which have been mustered into the United States service since the Civil War.

Mr. SMOOT obtained the floor.

Mr. STONE. Mr. President, does the Senator think he can dispose of this bill to-night?

Mr. JOHNSON of Maine. Does the Senator from Missouri address his inquiry to me?

Mr. STONE. I do.

Mr. JOHNSON of Maine. Of course, I have no knowledge as to how much time the Senator who is to speak desires to take.

Mr. SMITH of Georgia. Certainly it will occupy until 6 o'clock.

Mr. SMOOT. Then let the bill go over, if an executive session is desired.

Mr. STONE. I desire a very short executive session. I do not care to inconvenience other Senators.

Mr. SMOOT. I suggest that we lay the bill aside temporarily.

Mr. CLAPP. Mr. President, will the Senator from Missouri withhold his motion for a moment?

Mr. STONE. I will.

Mr. CLAPP. I move that the Senate still further insist upon its amendments to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917, and request a further conference with the House on the disagreeing votes of the two Houses thereon, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to, and the Presiding Officer appointed Mr. ASHURST, Mr. MYERS, and Mr. CLAPP conferees at the further conference on the part of the Senate.

Mr. SMOOT. I understand that the Senator from Maine requested that the bill be temporarily laid aside.

Mr. JOHNSON of Maine. I have not made that request, but I wish to do so now.

Mr. SMOOT. It is not necessary, anyhow.

Mr. JOHNSON of Maine. I ask that the pending bill be temporarily laid aside.

The PRESIDING OFFICER. The Senator from Maine asks unanimous consent that the pending bill may be temporarily laid aside. Is there objection? The Chair hears none, and it is so ordered.

## PETITIONS AND MEMORIALS.

Mr. SUTHERLAND. I present a resolution adopted by the Woman's Republican Club of Salt Lake City, Utah, in regular meeting assembled on the 1st day of May, 1916, which I ask may be printed in the RECORD.

There being no objection, the resolution was ordered to lie on the table and to be printed in the RECORD, as follows:

*Resolved*, That the Woman's Republican Club of Salt Lake City, Utah, in regular meeting assembled on the 1st day of May, 1916, protest against the action of the House Judiciary Committee in suppressing the Susan B. Anthony amendment, and respectfully demand that said amendment be reported out of the Judiciary Committee at once; be it further

*Resolved*, That a copy of this resolution be sent to President Woodrow Wilson; Representative EDWIN WEBB, chairman of the Judiciary Committee; Representative ANDREW J. VOLSTEAD, minority leader of the same committee; Representative J. R. MANN, minority leader of the House; Senator J. H. GALLINGER, minority leader of the Senate; and to Senator GEORGE SUTHERLAND and Representative JOSEPH HOWELL, of Utah, with instructions to the two latter to read it into the CONGRESSIONAL RECORD.

Mrs. JUSTIN R. DAVIS, *President*.

Mr. CHAMBERLAIN presented a petition of sundry citizens of Portland, Oreg., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

Mr. McLEAN presented a memorial of the German-American Alliance, of New Haven, Conn., remonstrating against the refusal of the British Government to permit shipment of Red Cross supplies to Germany, which was referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of Hartford, Conn., praying that the United States remain at peace, which was referred to the Committee on Foreign Relations.

He also presented a memorial of Mount Livermore Grange, Patrons of Husbandry, of Holderness, N. H., remonstrating against any change being made in the parcels-post law, which was referred to the Committee on Post Offices and Post Roads.

He also presented petitions of James G. Blaine Council, Junior Order United American Mechanics; of Aerie No. 579, Fraternal Order of Eagles; of Leeds Council, No. 16, Order United American Mechanics; of Rippowam Lodge, No. 24, International Order of Odd Fellows; of Local Union No. 192, Brotherhood of Painters, Decorators, and Paperhangers; and of St. Peter's Council, Knights of Columbus, all of Stamford, in the State of Connecticut, praying for the enactment of legislation to grant pensions to employees of the Postal Service, which were referred to the Committee on Post Offices and Post Roads.

He also presented memorials of the Trades Council, of New Haven; of District Council, United Brotherhood of Carpenters and Joiners; of Local Union No. 90, Brotherhood of Painters, Decorators, and Paperhangers; of Local Union No. 40, International Union of United Brewery Workmen; of Local Union No. 282, Cigarmakers' International Union; of the Wood, Wire, and Metal Lathers' International Union; of Local Union No. 114, Sheet Metal Workers' International Alliance; and of Local Union No. 488, International Brotherhood of Electrical Workers, all of Bridgeport, in the State of Connecticut, remonstrating against any change being made in the salaries of employees in the Canal Zone, which were referred to the Committee on Interoceanic Canals.

He also presented petitions of Lady Trumbull Council, No. 5, Sons and Daughters of Liberty, of Waterbury; of Volunteer Council, No. 59, Sons and Daughters of Liberty, of Warehouse Point; of Winthrop Council, No. 7, Sons and Daughters of Liberty, of New Britain; of Lady Hale Council, No. 60, Sons and Daughters of Liberty, of Hartford; and of Lady Buckingham Council, No. 10, Sons and Daughters of Liberty, of Hartford, all in the State of Connecticut, praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

He also presented a petition of the Board of Education of New Haven, Conn., praying for the enactment of legislation to provide Federal aid for vocational education, which was ordered to lie on the table.

He also presented petitions of Colonel F. W. Cheney Camp, No. 14, Sons of Veterans, of South Manchester, and of G. A. Stedman Camp, Sons of Veterans, of Hartford, both in the State of Connecticut, praying for an increase in armaments, which were ordered to lie on the table.

He also presented a petition of the Congressional Union for Woman Suffrage, of Milford, Conn., praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which was ordered to lie on the table.

He also presented petitions of sundry citizens of Connecticut, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. BRADY presented a petition of sundry citizens of Clarksfork, Idaho, praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. KERN presented a petition of sundry citizens of Rockville, Ind., praying for the enactment of legislation to prohibit

the exportation of intoxicating liquor to Africa, which was referred to the Committee on the Judiciary.

He also presented a petition of Local Union No. 934, United Mine Workers of America, of Carbonado, Wash., praying for the enactment of legislation to provide Federal aid in the prevention of tuberculosis, which was referred to the Committee on Public Health and National Quarantine.

Mr. PHELAN presented a petition of the McKinley School Mothers' Club, of Berkeley, Cal., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

He also presented a memorial of Lincoln Grange, No. 318, Patrons of Husbandry, of Cupertino, Cal., and the memorial of Dr. A. J. Hutching and sundry other citizens of Berkeley, Cal., remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

He also presented memorials of sundry citizens of Colton and Santa Rosa, in the State of California, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

### RIVER AND HARBOR APPROPRIATIONS.

Mr. KENYON. I submit the views of the minority (Rept. No. 420, pt. 2) on the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The VICE PRESIDENT. The report will be received and printed.

### PENSIONS AND INCREASE OF PENSIONS.

Mr. JOHNSON of Maine, from the Committee on Pensions, submitted a report (No. 421) to accompany the bill (S. 5911) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, which was read twice by its title, the bill being a substitute for the following Senate bills heretofore referred to that committee:

S. 13. Nellie M. Leonard.
S. 149. Bowman C. McEwen.

### DEPOSITS OF GOLD BULLION.

Mr. OWEN, from the Committee on Banking and Currency, to which was referred the bill (H. R. 13474) to amend section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act of March 2, 1911, reported it without amendment and submitted a report (No. 422) thereon.

### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MYERS:

A bill (S. 5899) to punish persons who make false representations to settlers and others pertaining to the public lands of the United States; to the Committee on Public Lands.

By Mr. JONES:

A bill (S. 5900) providing for the disposal of certain lands in block 69, in the city of Port Angeles, State of Washington; to the Committee on Public Lands.

By Mr. OLIVER (for Mr. PENROSE):

A bill (S. 5901) to provide for the removal of the body of the late Maj. Gen. Winfield Scott Hancock from Norristown, Pa., to the National Cemetery, Arlington, Va., and for other purposes; to the Committee on Appropriations.

A bill (S. 5902) granting a pension to Harry Lunger; to the Committee on Pensions.

By Mr. NELSON:

A bill (S. 5903) granting an increase of pension to Henry H. Thomas; and

A bill (S. 5904) granting a pension to Levi A. Cooley; to the Committee on Pensions.

By Mr. TAGGART:

A bill (S. 5905) granting an increase of pension to John C. Hughes;

A bill (S. 5906) granting an increase of pension to John F. Cartwright; and

A bill (S. 5907) granting an increase of pension to Daniel H. McAbee; to the Committee on Pensions.

By McLEAN:

A bill (S. 5908) granting an increase of pension to Martha E. Fowler (with accompanying papers); and

A bill (S. 5909) granting an increase of pension to Cornelia F. Botsford (with accompanying papers); to the Committee on Pensions.

By Mr. LODGE:

A bill (S. 5910) authorizing the sale of the lighthouse reservation at Scituate, Mass.; to the Committee on Commerce.

By Mr. WALSH:

A bill (S. 5912) to authorize the Secretary of the Interior to acquire certain Indian lands necessary for reservoir purposes in connection with the Blackfeet Indian Reclamation projects; to the Committee on Indian Affairs.

By Mr. PHELAN:

A bill (S. 5913) to set apart a tract of land in the State of California as a public park, such lands, together with those set aside by the act of September 25, 1890, to be known as the Sequoia National Park; to the Committee on Public Lands.

### HARBOR IMPROVEMENTS.

Mr. BRANDEGEE submitted the following resolution (S. Res. 184), which was referred to the Committee on Military Affairs:

*Resolved*, That the Secretary of War be, and he hereby is, authorized and directed to report to Congress at the earliest practicable date, not later than December 4, 1916:

First. Specific plans for improvement of the harbors and connecting channels which, in his judgment, after consultation had with the Secretary of the Navy, will best provide adequate facilities for operations

of the fleet for defense of the harbors of Portland, Me.; Boston, Mass.; Providence, R. I.; New London, New Haven, and Bridgeport, Conn.; New York, N. Y.; Norfolk, Va.; Savannah and Brunswick, Ga.; Charleston, S. C.; New Orleans, La.; Galveston, Tex.; San Diego and San Francisco, Cal.; and Seattle, Wash.

Second. The feasible extensions requisite to make existing approved projects for improvement of the aforementioned harbors available for the purposes stated in the foregoing paragraph.

Third. The cost of each such several improvements calculated upon the basis of completion thereof under contract within five years.

Fourth. The percentage not exceeding 30 per cent of the cost of each such improvement which, in the judgment of the Secretary of War, should be contributed by the several cities or State Governments in consideration of the completion within five years of the improvement recommended by the Secretary of War.

Fifth. The replies of the local authorities and State governments to the propositions to them submitted by the Secretary of War to contribute to the carrying out and the cost of such several improvements.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had approved and signed the following acts and joint resolution:

On May 4, 1916:

S. 3769. An act to amend section 3 of an act entitled "An act to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon," approved March 4, 1907; and

S. 4876. An act to provide for an increase in the number of cadets at the United States Military Academy.

On May 8, 1916:

S. 2290. An act authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late Elise McCaulley from Glenwood Cemetery, District of Columbia, to Philadelphia, Pa.; and

S. J. Res. 63. Joint resolution authorizing the erection on the public grounds in the city of Washington, D. C., of a memorial fountain to Alfred Noble.

EXECUTIVE SESSION.

Mr. STONE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 5 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 54 minutes p. m., Monday, May 8, 1916) the Senate adjourned until to-morrow, Tuesday, May 9, 1916, at 12 o'clock meridian.

## NOMINATIONS.

*Executive nominations received by the Senate May 8 (legislative day of May 5), 1916.*

PHILIPPINE COMMISSION.

Eugene E. Reed, of New Hampshire, to be a member of the Philippine Commission, and secretary of commerce and police, vice Clinton L. Riggs, resigned.

APPOINTMENTS IN THE ARMY.

MEDICAL RESERVE CORPS.

*To be first lieutenants, with rank from March 13, 1916.*

Zabdiel Boylston Adams, of Massachusetts.

Herbert Merton Greene, of Oregon.

NOTE.—Drs. Adams and Greene were nominated to the Senate March 20, 1916, for appointment as first lieutenants in the Medical Reserve Corps, by name Zabdiel Boylston Adams and Herbert Newton Greene, respectively, and their nominations were confirmed under date of March 28, 1916. This message is submitted for the purpose of correcting an error in the name of each of the nominees.

PROMOTIONS IN THE NAVY.

Lieut. (Junior Grade) Albert M. Cohen to be a lieutenant in the Navy from the 7th day of September, 1915.

Lieut. (Junior Grade) Emil A. Lichtenstein to be a lieutenant in the Navy from the 17th day of August, 1915.

ALASKA.

John J. Walsh to be postmaster at Nome, Alaska, in place of Severin J. Bakke. Incumbent's commission expires August 16, 1916.

ARKANSAS.

E. J. Cook to be postmaster at Marmaduke, Ark., in place of A. M. Hall. Incumbent's commission expires May 10, 1916.

CALIFORNIA.

Sarah B. Anthony, to be postmaster at Williams, Cal., in place of Sarah B. Anthony. Incumbent's commission expired December 14, 1915.

John B. Barnard to be postmaster at Niles, Cal., in place of M. E. Chalmers. Incumbent's commission expires May 17, 1916.

Joseph Charles Beard to be postmaster at Burlingame, Cal., in place of Joseph Charles Beard. Incumbent's commission expired April 5, 1916.

John F. Conkey to be postmaster at Santa Maria, Cal., in place of E. T. Ketcham. Incumbent's commission expired March 21, 1916.

Daniel McSweeney to be postmaster at South San Francisco, Cal., in place of E. E. Cunningham. Incumbent's commission expired February 8, 1916.

Isidore J. Proulx to be postmaster at Willows (late Willow), Cal., in place of Isidore J. Proulx (to change name of office).

COLORADO.

J. O. Miller to be postmaster at Boulder, Colo., in place of James L. Moorhead. Incumbent's commission expired April 15, 1916.

CONNECTICUT.

Clarence V. Reid to be postmaster at Central Village, Conn., in place of Jeremiah E. Elliott, removed.

GEORGIA.

Frank Flynt to be postmaster at Griffin, Ga., in place of R. L. Williams. Incumbent's commission expires May 27, 1916.

Dan A. McMillan to be postmaster at Bartow, Ga., in place of G. P. Whigham. Incumbent's commission expired April 11, 1916.

Mattie N. Riley to be postmaster at Butler, Ga., in place of James W. Riley. Incumbent's commission expired April 11, 1916.

IDAHO.

Christopher O. Dice to be postmaster at Glenns Ferry, Idaho, in place of Christopher O. Dice. Incumbent's commission expired January 29, 1916.

INDIANA.

Guy C. Hart to be postmaster at Kendallville, Ind., in place of Joseph T. Stahl, deceased.

Elmer Ritter to be postmaster at Fremont, Ind., in place of George H. Griffith. Incumbent's commission expires May 10, 1916.

J. Ross Robertson to be postmaster at Brownstown, Ind., in place of Charles T. Benton. Incumbent's commission expires May 23, 1916.

ILLINOIS.

Thomas P. McCann to be postmaster at Oglesby, Ill., in place of Frank Allen, removed.

Eli Preston Sanders to be postmaster at Pawnee, Ill., in place of Frank Morrell. Incumbent's commission expired December 20, 1915.

James E. Simpson, to be postmaster at Collinsville, Ill., in place of Frank Nickerl. Incumbent's commission expired March 1, 1916.

IOWA.

Charles V. Dautremont to be postmaster at Riverside, Iowa, in place of Alma G. Ott. Incumbent's commission expires May 17, 1916.

Charles E. Dawson to be postmaster at Rockford, Iowa, in place of H. E. Wyatt. Incumbent's commission expired February 1, 1916.

Mary E. O'Connor to be postmaster at Rockwell, Iowa, in place of W. A. Grummon. Incumbent's commission expired April 5, 1916.

KENTUCKY.

Nannie E. Butler to be postmaster at Elkton, Ky., in place of Wallace R. Wood. Incumbent's commission expires May 17, 1916.

J. B. Stears to be postmaster at Nicholasville, Ky., in place of W. B. Buford. Incumbent's commission expired May 1, 1916.

John R. White to be postmaster at Irvine, Ky., in place of Lewis C. Wilson, resigned.

LOUISIANA.

George H. Thoede, to be postmaster at Gretna, La., in place of E. F. Crawford. Incumbent's commission expires May 31, 1916.

MICHIGAN.

C. C. Hopkins to be postmaster at Breckenridge, Mich., in place of B. S. Watson. Incumbent's commission expires May 8, 1916.

G. D. Mason to be postmaster at Montague, Mich., in place of M. W. Ripley. Incumbent's commission expires June 5, 1916.

Sidney Reynolds to be postmaster at Howard City, Mich., in place of James B. Haskins. Incumbent's commission expires May 23, 1916.

MINNESOTA.

C. F. Callahan to be postmaster at Foley, Minn., in place of C. H. Latterell. Incumbent's commission expired December 21, 1915.

Peter H. McNally to be postmaster at Chokio, Minn., in place of Charles E. McAllen, resigned.

N. P. Seivert to be postmaster at Mazeppa, Minn., in place of M. J. Rucker. Incumbent's commission expired April 17, 1916.

John Svedberg to be postmaster at Aitken, Minn., in place of A. L. Hamilton. Incumbent's commission expires May 10, 1916.

MISSISSIPPI.

Harry L. Callicott to be postmaster at Coldwater, Miss., in place of Maze H. Daily. Incumbent's commission expired April 17, 1916.

Malcolm S. Graham to be postmaster at Forest, Miss., in place of Malcolm S. Graham. Incumbent's commission expires May 28, 1916.

Bennett A. Truly to be postmaster at Fayette, Miss., in place of B. A. Truly. Incumbent's commission expired April 17, 1916.

Martha Ann Womack to be postmaster at Bogue Chitto, Miss., in place of J. M. Tyler. Incumbent's commission expires May 28, 1916.

MISSOURI.

Oliver P. Gentry to be potmaster at Liberty, Mo., in place of Robert E. Ward, resigned.

Sadocia B. Herndon to be postmaster at Fulton, Mo., in place of B. B. Kimbrell. Incumbent's commission expires May 8, 1916.

James S. Herrington to be postmaster at Valley Park, Mo., in place of Louis Haeffner. Incumbent's commission expires May 27, 1916.

NEBRASKA.

Calvin L. Demarest to be postmaster at Bethany, Nebr., in place of W. J. Brunell. Incumbent's commission expired January 18, 1916.

George McCawley to be postmaster at Seneca, Nebr. Office became presidential January 1, 1916.

William L. Ulrich to be postmaster at Stuart, Nebr., in place of R. E. Chittick. Incumbent's commission expired April 5, 1916.

NEW JERSEY.

S. L. Boone to be postmaster at Penns Grove, N. J., in place of T. E. Hunt. Incumbent's commission expired March 13, 1916.

NEW YORK.

Thomas Havey to be postmaster at Orangeburg, N. Y., in place of Matthew McManus. Incumbent's commission expired July 23, 1913.

Thomas McMahon to be postmaster at Poland, N. Y., in place of J. B. Read. Office became presidential January 1, 1915.

Mary L. McRoberts to be postmaster at Tompkinsville, N. Y., in place of Mary L. McRoberts. Incumbent's commission expired January 10, 1915.

Henry J. Neumann to be postmaster at Tuxedo Park, N. Y., in place of S. T. Dusenberry. Incumbent's commission expired February 23, 1915.

Ray S. Sherman to be postmaster at South Glens Falls, N. Y., in place of Ernest H. Palmer. Incumbent's commission expired December 18, 1915.

NORTH CAROLINA.

Bettie Belle Pearson to be postmaster at Moravian Falls, N. C. Office became presidential July 1, 1915.

NORTH DAKOTA.

F. O. Hunger to be postmaster at Hankinson, N. Dak., in place of W. C. Foreman, jr. Incumbent's commission expired April 11, 1916.

Della C. Tolan to be postmaster at Mayville, N. Dak., in place of Iver O. Fosse. Incumbent's commission expires June 5, 1916.

OHIO.

Frank G. Henry to be postmaster at Marietta, Ohio, in place of Charles A. Ward, resigned.

John L. Norris to be postmaster at New Matamoras, Ohio, in place of Lewis Nikolaus. Incumbent's commission expires June 7, 1916.

PENNSYLVANIA.

F. G. Ackley to be postmaster at Wyalusing, Pa., in place of J. W. Chamberlain. Incumbent's commission expired April 23, 1916.

William Alexander to be postmaster at Chambersburg, Pa., in place of C. A. Suesserott. Incumbent's commission expires May 24, 1916.

William H. Denlinger, sr., to be postmaster at Patton, Pa., in place of Albert E. Rumberger, deceased.

J. Willis Freed to be postmaster at Mount Joy, Pa., in place of J. F. Fenstermacher. Incumbent's commission expires May 28, 1916.

SOUTH DAKOTA.

Tom Larson to be postmaster at Colton, S. Dak. Office became presidential January 1, 1916.

Kate A. Schnacke to be postmaster at Bigstone City, S. Dak., in place of Kate A. Schnacke. Incumbent's commission expired February 14, 1916.

J. A. Zink to be postmaster at Wessington Springs, S. Dak., in place of Fred N. Dunham. Incumbent's commission expires May 24, 1916.

VIRGINIA.

Joseph H. Nave to be postmaster at Broadway, Va., in place of P. W. Pugh, resigned.

WISCONSIN.

C. E. Reichenbach to be postmaster at Merrillan, Wis., in place of Anna M. Merrill. Incumbent's commission expired February 20, 1916.

## HOUSE OF REPRESENTATIVES.

### MONDAY, *May 8, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Infinite and eternal Spirit, in whom we live and breathe and dwell, we bless Thee for that spark of divinity which glows within us, and which makes us Thy children, and is ever urging us upward and onward to nobler life. Encourage, we beseech Thee, every high and holy aspiration, and discourage every evil intent; that, unfettered by sin, we may grow day by day into the likeness of our Maker; for Thine is the kingdom and the power and the glory forever. Amen.

The Journal of the proceedings of Saturday, May 6, was read and approved.

#### MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, who informed the House of Representatives that the President had approved and signed bills and joint resolutions of the following titles:

May 1, 1916:

H. R. 6442. An act to provide for the exchange of the present Federal building site in Newark, Del.; and

H. R. 7239. An act for the relief of Philip H. Heberer.

May 3, 1916:

H. J. Res. 79. Joint resolution authorizing the Secretary of Labor to permit the South Carolina Naval Militia to use the Charleston immigration station and dock connected therewith;

H. R. 2235. An act for the relief of the widow and heirs at law of Patrick J. Fitzgerald, deceased; and

H. R. 4746. An act granting to the city of Portland, Oreg., the right to purchase certain lands for public-park purposes.

May 4, 1916:

S. 3769. An act to amend section 3 of an act entitled "An act to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon," approved March 4, 1907;

S. 4876. An act to provide for an increase in the number of cadets at the United States Military Academy; and

H. R. 4881. An act to reimburse the postmaster at Kegg, Pa., for money and stamps taken by burglars.

May 8, 1916:

H. R. 28. An act to amend an act entitled "An act granting to the city of Durango, in the State of Colorado, certain lands therein described for water reservoirs," approved March 1, 1907;

H. R. 177. An act authorizing the Secretary of the Interior to accept the relinquishment of the State of Wyoming to certain lands heretofore certified to said State, and the State of Wyoming to select other lands in lieu of the lands thus reliquished;

H. R. 384. An act to amend the act of June 23, 1910, entitled "An act providing that entrymen for homesteads within the reclamation projects may assign their entries upon satisfactory proof of residence, improvement, and cultivation for five years, the same as though said entry had been made under the original homestead act";

S. J. Res. 63. Joint resolution authorizing the erection on the public grounds in the city of Washington, D. C., of a memorial fountain to Alfred Noble; and

S. 2290. An act authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late Elise McCaulley from Glenwood Cemetery, District of Columbia, to Philadelphia, Pa.

#### THE MILITARY ESTABLISHMENT.

Mr. HAY. Mr. Speaker, I call up the conference report on the Army reorganization bill, H. R. 12766.

Mr. JOHNSON of Kentucky. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of District of Columbia legislation.

The SPEAKER. A conference report takes precedence of everything else. The gentleman from Virginia calls up the conference report on the Army reorganization bill.

Mr. HAY. And in that connection I ask that the unanimous-consent agreement entered into on Friday be put into effect first before we vote on the conference report.

Mr. MANN. The conference report is to disagree to the Senate amendment?

Mr. HAY. Yes.

Mr. MANN. We should first agree to the conference report.

Mr. HAY. We ought to provide that the conference report be considered as pending while the other debate is going on.

Mr. MANN. No——

Mr. HAY. That a motion to disagree to the Senate amendment shall be considered as pending.

Mr. MANN. We should agree to the conference report first. That is a very simple matter.

The SPEAKER. There is a conference report, is there not?

Mr. HAY. Yes; there is a conference report.

Mr. MANN. Merely that they disagree; that is all.

Mr. HAY. The conference report was printed in Friday's RECORD, and that report was that we could not agree.

The SPEAKER. The question is on agreeing to the conference report. Without objection, it is agreed to.

There was no objection.

Mr. HAY. Now, I suggest that the Clerk read the unanimous-consent agreement.

The SPEAKER. The Clerk will read it.

The Clerk read as follows:

It is ordered that on Monday next the bill H. R. 12766, with the Senate amendments, shall be considered in the House, with a motion considered as pending that the House further insists upon its disagreement to the Senate amendments; that during the pendency of said motion it shall be in order to move that it is the sense of the House that sections 2 and 56 of the Senate amendment to the text of the bill ought to be agreed to, which motion shall be put separately to a vote upon each of said sections; that it shall further be in order to move that it is the sense of the House that section 122 of the Senate amendment to the text of the bill ought to be agreed to, and, pending that motion, it shall be in order to offer amendments to said section to be voted upon for the purpose of expressing the sense of the House; that upon each of said two main motions to express the sense of the House, one as to sections 2 and 56 and one as to section 122 in the Senate amendment, there shall be not more than 80 minutes' debate, one-half to be controlled by Mr. HAY and one-half by Mr. KAHN.

Mr. MANN. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Illinois makes the point of order that there is no quorum present. Evidently there is not.

Mr. KITCHIN. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk proceeded to call the roll, when the following Members failed to answer to their names:

| | | | |
|---|---|---|---|
| Adair | Fordney | Kreider | Schall |
| Allen | Foss | Lafean | Scott, Pa. |
| Bacharach | Gallivan | Langley | Scully |
| Barchfeld | Gard | Lee | Sears |
| Brumbaugh | Gardner | Lehlbach | Shackleford |
| Buchanan, Ill. | Glass | Lesher | Slemp |
| Burnett | Godwin, N. C. | Liebel | Small |
| Bryns, Tenn. | Graham | Lindbergh | Smith, Idaho |
| Caldwell | Gray, N. J. | Littlepage | Smith, Minn. |
| Cantrill | Greene, Vt. | Loft | Sparkman |
| Carlin | Griest | Longworth | Steenerson |
| Casey | Hamill | Maher | Stephens, Miss. |
| Church | Hamilton, N. Y. | Martin | Sutherland |
| Clark, Fla. | Hart | Mooney | Switzer |
| Coleman | Heaton | Morin | Tague |
| Conry | Helm | Murray | Thomas |
| Costello | Hilliard | Nelson | Tinkham |
| Crosser | Hinds | Nicholls, S. C. | Vare |
| Darrow | Howard | Nichols, Mich. | Ward |
| Dooling | Huddleston | North | Watkins |
| Driscoll | Hutchinson | Norton | Watson, Pa. |
| Drukker | Jacoway | Peters | Webb |
| Eagan | James | Pou | Williams, Thos. S. |
| Eagle | Jones | Price | Williams, Ohio |
| Estopinal | Keister | Rainey | Wilson, Fla. |
| Fairchild | Key, Ohio | Riordan | |
| Flynn | Kiess, Pa. | Rowland | |

The SPEAKER. On this roll call 328 Members have answered to their names—a quorum.

Mr. KITCHIN. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

Mr. KAHN. Mr. Speaker, under the agreement that was entered into last Friday the motion now in order is this; and I move that it is the sense of the House that sections 2 and 56 of the Senate amendment to the text of the preparedness bill ought to be agreed to.

The SPEAKER. On this amendment there are 80 minutes' debate, one-half to be controlled by the gentleman from Virginia [Mr. HAY] and one-half by the gentleman from California [Mr. KAHN].

Mr. OGLESBY rose.

The SPEAKER. For what purpose does the gentleman from New York rise?

Mr. OGLESBY. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. OGLESBY. The motion of the gentleman from California, as I understand it, includes two propositions.

Mr. HAY. I will state to the gentleman that the agreement provides for a separate vote. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio [Mr. GORDON].

Mr. GORDON. Mr. Speaker, both section 2 and section 56 of the Senate amendments are disgraceful and outrageous renunciations of the rights of the American Congress upon the subject of the Army. Upon a roll call in this House we rejected an amendment to the House bill proposing to make a standing army of 220,000 men and fixed it at 140,000; and that vote was taken upon careful consideration, upon due deliberation, and, in my judgment, upon the best possible reasons that could be presented. *We have the report of The Adjutant General of the United States Army to the effect that the highest possible number of men that can be raised in this country by voluntary enlistment is 140,000, and it was that number at which this House fixed the maximum number of the standing army.*

Is this House prepared to go on record in favor of compulsory military service? If it is not, it must vote down this section 2 or convict itself of duplicity before the American people. [Applause.]

On the day that the American Congress begins the building of a large standing Army in time of peace by harnessing the dynamic energies of the American youth with conscription and places the reins in the hands of these Regular Army officers, that moment you have started this Nation on a career of military conquest and aggrandizement which leads straight toward the bottomless abyss of oblivion, over which every free nation which preceded ours disappeared.

Now, it may be that the American people are in the mood to exchange the school-teacher for the drill sergeant and to attempt by act of Congress to change the free swinging gait of the American citizen to the goose step of the conscript. I do not believe it. [Applause.] It may be that the mothers of American boys are looking forward with joyful anticipation to the day when their sons will be manacled and led away by a provost marshal to perform for a term of years, in time of peace, the menial duties of a military camp—currying the horses and blacking the boots of our Regular Army officers—but I do not believe it. So much for section 2.

"Why doth the heathen rage, and the people imagine a vain thing?" Why are the Army officers, who are and who have been the motive power behind this section 56 and kindred legislation, so persistent in their efforts to prove their contempt for the letter and spirit of the means for national defense provided in the Federal Constitution, which they have all sworn to support?

It is the same motive which inspired Demetrius, the silversmith, to defend the sanctity of the temple for which he made shrines. The great apostle Paul was preaching the new gospel of the Man of Nazareth "not alone at Ephesus, but throughout Asia," with all his accustomed fiery eloquence, and was seriously interfering with the business of Demetrius, which was to manufacture and sell silver shrines for the temple of Diana.

Demetrius called his agents and employees together in a great assembly and said to them, "This Paul hath persuaded and turned away much people, saying that they be no gods, which are made with hands: so that not only this our craft is in danger to be set at nought; but also that the temple of the great goddess Diana should be despised, and her magnificence should be destroyed, whom all Asia and the world worshippeth"; and we are told in Holy Writ that with great unanimity and in a loud voice they all cried out: "Great is Diana of the Ephesians!" [Laughter and applause.]

The very name "volunteer" is a fraudulent misnomer, designed to sugar coat with a euphonious title what is in practical effect an effort to increase to two and one-half times its present size our Regular Standing Army in time of peace.

There is no military force under the control of the United States, either of officers or men, known to the Constitution and the laws that is not made up exclusively of volunteers. Our Army officers, some of whom appear to spend more of their time in plotting and planning to promote their own private interests than they do in performing the public duties, for which they were educated at public expense and draw pay out of the public Treasury, are determined to force, by this indirect means, an increase in our standing military force which they know Congress would not dare to vote directly for the purpose of compelling a proportionate increase in the number of officers, and thereby bring about their own promotions and the increased pay and allowances resulting to them. This is the whole story, and explains why they have labored so persistently to discredit and destroy the National Guard, for which they are not permitted to supply the officers. [Applause.]

Those who are interested in learning the motives of those behind this section 56 and the "continental army" scheme, its defunct predecessor, will find a very illuminating history published in the RECORD of April 14, 1916, at pages 6952, 6953, and 6954, inserted by Senator REED of Missouri, and I commend this RECORD to your thoughtful consideration.

The only difference between this proposed "volunteer" force and the Regular Standing Army is that the consent of Congress is required to call it out for "field service" more than 30 days in any one year.

William E. Gladstone declared that "the Constitution of the United States is the greatest instrument ever struck off at a given time by the brain and purpose of man," and I believe that he referred to the means provided for national defense more directly than to any other provisions of that magnificent bulwark of our liberties.

In closing a great address upon "The Importance of the Militia," delivered on June 6, 1836, Edward Everett said:

"Times are now changed. We have grown up into a great people. A sum of human interests and blessings of untold amount, an incalculable moral and social treasure, is committed to our charge. With the advantages of a powerful State we have its duties and its exposures. We are subject to insults from abroad and disorders at home. The cloud of foreign war has just rolled away. Had it burst, how would it have found this great and rich metropolis? Without one gun mounted for its defense. I suppose it is pretty generally admitted that a foreign enemy, even so polite a one as France, would pay but little respect to the white staff of our sheriff, though he should go with all his constables and read the riot act in their hearing.

"Whether these same peaceful emblems are adequate to sustain the majesty of the law when threatened in moments of popular convulsion we can all judge. Then, sir, there are two resources for protection and safety in the first outbreaking of war and in times of civil commotion. One is a well-organized, patriotic militia, ever present, rarely seen, quartered among us, not in camps and forts, but at the fireside, in the counting room, the workshop, the place of business. This is one. The other resource is a standing army, encamped on Boston Common or stationed on Castle Island. One or the other we must have. And the man who sets himself to ridicule the militia, to exaggerate the defects of the system, to embarrass its administration, to bring it into discredit, wishes one of two things—he either wishes the country to be wholly exposed to insult from abroad, and a prey at home to anarchy, to mob law, club law, and a general scramble, or he wishes to see a flagstaff planted in front of the State House, a couple of cannon pointing down State Street, to hear the morning gun at daybreak, and to hold the exercise of his daily rights as a citizen at the discretion of a military commander.

"In a free country this is a pretty serious alternative. I have, sir, for the last six months thought much and deeply upon it. It has been my duty to do so, and I have come to the conclusion that if we intend to hand down unimpaired to our children the inheritance of republican liberty, which we have received from our fathers, if we mean that the civil shall control the military arm alike in peace and in war, in prosperous and adverse times, the militia must again receive the respect of the community.

"I give you, sir, as a toast:

"*A well-organized, efficient, and patriotic militia—in time of peace, the bulwark of the law; in war, the basis of defense: may it be restored to the public favor.*"

Everett might have added to his eloquent description of the concomitants of a large standing army the necessary incidents of compulsory military service: Enrollment, registering, passports, military espionage, an Army officer interrogating you every time you leave home or board a railroad train, and all the other petty and repressive interferences with the personal rights of the citizen.

There recently appeared in the public press the following eloquent and timely appeal for the preservation of the National Guard from the hands of the spoilers, entitled "The Constitution," by Archibald Hopkins, which was read at the first annual dinner of the National Association for Constitutional Government:

With wisdom and with patient skill,
Wide learning and profoundest thought,
With zealous and unselfish will
Our patriotic fathers wrought.

They laid foundations deep and wide,
They made their own immortal plan,
And reared on lines before untried,
A home for freedom and for man.

They fortified each sacred right,
They shielded all from fraud or wrong,
They curbed the power of selfish might,
And armed the weak against the strong.

Upon themselves they put restraint
Lest hasty passion given range,
Should silence reason with complaint,
And bring some heedless harmful change.

Through storm and stress, through many fears,
Through war and fierce domestic strife,
Down through the lapse of changing years
They guarded well the Nation's life.

The Constitution, still it stands,
August, majestic, lofty, lone;
No fabric wrought by human hands
Such strength and symmetry has shown.

The Constitution, there it stands
A beacon in a storm-tossed world;
And peace will reign in other lands
When they its banner have unfurled.

In these late days come buzzing gnats,
To tell us 'tis a thing accurst,
Devised by scheming plutocrats,
Whose cunning work must be reversed.

George Washington and Franklin, too,
James Madison and Hamilton,
Were leaders of the greedy crew
By whom the people were undone.

How light in character and brains
Our Constitution makers seem,
When some great modern statesman deigns,
To take them for an evening theme.

We love the men who gave it birth,
We venerate its every clause;
Benign protector of the hearth,
Stern guardian of the country's laws.

To us belongs the pious task
To ward from it all threatening foes,
Both those who lurk 'neath friendship's mask
And those who deal it hostile blows.

To rouse the people of the land
To know the treasure they possess,
And smite each sacrilegious hand
That's raised to harm or make it less.

That one of the main objects of this so-called "volunteer" force in the minds of the Army officers who are pushing it is to ruin and destroy the National Guard is not open to doubt in my mind. By a system of sapping and mining they hope to draw away from the National Guard enough of the officers and men to disorganize and disrupt it by inducing them to join this new organization, and then they will be in a position to claim that the people of this country are solely dependent upon the standing Army for defense, and will attempt to coerce Congress into voting all the men and money they ask for, together with a conscription law in time of peace to enable them to get the men. Where do they propose to get these "volunteers" without conscription, and where will they train them if the men could be obtained?

If the people of the United States must engage in a hand-to-hand conflict with the Regular Army officers' lobby to save from destruction the means of defense provided by the Constitution during every period of military excitement, such as we are now passing through, then the wise thing for the people of this country to do is to abolish entirely their standing Army by an amendment to the Constitution, as the people of Switzerland did. [Applause.] Every war we have ever been engaged in was fought and won by volunteers, including the War for Independence. A persistent effort has been made by Regular Army officers in recent times to belie history and to discredit the citizen soldier. The Battle of Saratoga, recorded by the great historian, Sir Edward Creasy, as one of the 15 decisive battles in the world's history, was won by volunteers exclusively, and more than 5,000 British regulars were made prisoners as a result of that great battle, which determined in advance the outcome of the Revolutionary War.

They would have us forget Saratoga, Yorktown, New Orleans, and Chapultepec, the great battles of the Civil War, all fought and won by citizen soldiers, in their efforts to discredit the ability of the citizens of this country to defend it by the means afforded and suggested by the Constitution.

The bill originally passed by the House, H. R. 12766, actually authorized two regiments of Field Artillery in addition to the increases asked for by the President in our regular military establishment, and also provided for the citizen soldiers suggested by the President by providing for arming, equipping, organizing, and disciplining the men requested in the Organized Militia or National Guard.

These men will be subject to instant call by Congress and the President to suppress insurrection, repel invasion, or to execute the laws of the United States, and when trained and disciplined in the manner provided will be subject to draft in time of actual war into the service of the United States.

There will soon be built up a reserve of the National Guard, which will afford ample means of national defense to meet any emergency that may arise, and which will not endanger the liberties of the country.

When we recall in our own history the many successful attempts to subordinate the civil authority to the military power, and consider the many recent examples of the imposition of the death penalty by the arbitrary orders of military tribunals in Mexico and Europe upon men and women in civil life, we ought to scrutinize with great care any attempt in this country to build up a military power, the use of which is not subject to the restraints of our written Constitution. [Applause.]

Mr. KAHN. I suggest that the gentleman from Virginia use some more of his time as there will probably be but two or three speeches at the most on this side.

Mr. HAY. Mr. Speaker, I yield 5 minutes to the gentleman from Kansas [Mr. ANTHONY].

Mr. ANTHONY. Mr. Speaker, I see no reason at this time why the House should change the position it has previously taken on section 2 of the Senate bill referring to the size of the Army. As a matter of fact, there has been no logical reason advanced why the maximum of 250,000 should have been fixed by the Senate in their bill. Personally I favored the bill reported from the Senate committee—the bill which provided for increasing the number of regimental organizations and officers as well as men, which raised the Infantry regiments from 30 to 64, which raised the number of Artillery regiments from 7 to 21, which raised the Cavalry regiments from 15 to 25 and the Coast Artillery from about 18,000 to 35,000 men. That would have made a Regular Army of 188,000 men, which, in my judgment, was properly balanced and about the size we expect ultimately to have. But I can see no reason why the Senate should have arbitrarily tacked onto it an amendment further fixing the Regular Army at a maximum of 250,000 men. That simply would mean that you would have had to double the peace strength of the regimental organization in order to carry the total up to 250,000 men. So that I think it is proper at this time that the House should refuse to indorse section 2 of the Senate bill, believing, as I do, that ultimately there will come before the House from the conference committee an increase of about the size reported originally by the Senate bill of about double the number of organizations we now have, providing a standing Army of from 188,000 to 200,000 men, which I think would be proper and better proportioned than the present provision in section 2.

As to the so-called volunteer or "continental" army, in my opinion in time of peace that is absolutely absurd and impractical. It is something to which no man who has given study to military affairs can afford to give his approval. In my opinion this House should lend its every encouragement to the building up and the federalization of the National Guard of this country. [Applause.] Under the policy which will be put in force because of the legislation which the House Committee on Military Affairs has placed before you, I believe that through these provisions and the federalization of the National Guard we will ultimately build up a second line of military defense which will serve the country adequately and well in time of war.

Mr. KAHN. Mr. Speaker, section 2 of the Senate bill provides for an Army of 250,000 men. It is an authorization for an Army of that size. If they are not needed, the President will not enlist them. If they are needed, he should have the authority to enlist them. [Applause.] And in the final analysis, Congress holds the purse strings. No President can enlist them unless he is assured that Congress is willing to foot the bill. That is all there is to it. Gen. Upton in his remarkable book on the Military Policy of the United States says in effect that if such an authority had been given the President of the United States at the time of the Mexican War that war would have been concluded in a much shorter period. But as we have nearly always done in our military legislation, we did not authorize the President in those days to do the very thing that we are trying to have done to-day. In consequence, that war was unnecessarily protracted. The expense to the Government was enormously increased. We want to avoid blunders of the past. We want to write upon the statute book a law which will enable the Government of the United States to defend itself in time of need against any possible aggressor. [Applause.] Patriotism, loyalty, devotion to the country ought to prompt every man in this House to vote for that section. Oh, they will tell you that it is going to cost a lot of money. It will not cost a dollar more than what is absolutely needed, for, as I said a moment ago, if the men are not required the President will not enlist them. They tell you that you can not enlist such a large number of men. I have

more faith than that in the power of the Government to get the required number of men. Our enlistment laws, and especially the regulations, are somewhat rigid. No man can be enlisted at the present time in the Army of the United States unless he be 5 feet 4 inches tall. A man 5 feet tall under modern conditions can fight just as well as a man 5 feet 4 inches tall. Enlistments in the Army are limited to men 21 years and over. The Navy enlists young men at 18.

Under the very terms of this bill the National Guard will enlist young men at 18, and the Army of the United States ought to permit enlistments at the age of 18, especially so if the provision providing for vocational training is incorporated in the legislation; and I understand that there is a good prospect of writing into the law such a provision. There is another thing about recruiting for the Army of the United States. Go into the large cities of the country, look for your recruiting stations, and where do you find them? In many instances near the tenderloin district of the city. We seem to be looking for the derelicts, for the flotsam and jetsam of our national life, for the Army. I do not approve of that. I do not think the country approves it; and the wonder is that we get such good material as we do under the conditions. I believe an earnest effort should be made to bring into the Army hundreds of desirable young men who are willing to take the required training, who are willing and ready to defend their country when defense shall become necessary. I believe that if some reforms be made in the matter of enlistments we will have no difficulty whatever in securing the required number of men in the Regular Army to properly defend the people of the United States in the event of war.

Mr. DYER. Mr. Speaker, will the gentleman yield?

Mr. KAHN. Yes.

Mr. DYER. Will the gentleman state what reforms he advocates to encourage enlistments?

Mr. KAHN. I have just stated that the enlistment period should be lowered, that the minimum age limit should be lowered, that the regulations are too rigid in some particulars, and that they should be so amended that a man 5 feet tall can be permitted to enlist just as well as a man 5 feet 4 inches tall. I feel that enlisting parties ought to be sent periodically into the smaller communities. I believe many men could be secured in that way.

Mr. DYER rose.

Mr. KAHN. I regret I can not yield any further. I have a great deal of ground to cover. Mr. Speaker, the people of the United States since the Spanish-American War have taken on many new and grave responsibilities. The acquisition of the Philippines, of Hawaii, of Porto Rico, the acquisition of the island of Tutuila in the southern Pacific, all brought with them burdens and obligations to the people of the United States. But in addition we have practically established a protectorate over Cuba, over the Republic of Panama, over Haiti, over Santo Domingo, over Nicaragua. Those countries have to look to us in many matters before they can perform certain functions of sovereignty. These new duties, these new obligations, require us to be ever vigilant and ready to protect the rights of Americans in these countries, as well as to protect those peoples of these American Republics who are looking to us for guidance and support. All of these powerful considerations ought to make the Members of this House realize that the authorization should be given to the President to enlist the requisite number of men in case we should become involved with any foreign power. I can readily see situations in which it would be absolutely imperative that the President should have such a power.

Mr. KELLEY. Mr. Speaker, will the gentleman yield?

Mr. KAHN. I can not yield at present. Take the case of Congress adjourning on the 4th of March. Unless Congress should be convened in extraordinary session there is no Congress in session until the following December, a long interim. Under such circumstances the President could not appeal to Congress for aid if he desired to do so. He might not deem it advisable to call an extra session. Mr. Speaker, I can see conditions that might make it imperative on the part of the President to enlist men, so that if diplomatic channels should fail he would at least be in a position to enlist and equip a proper army to defend the rights of the people of the United States. That is all that this legislation does.

Mr. SUMNERS. Mr. Speaker, will the gentleman yield?

Mr. KAHN. I can not yield to the gentleman. I am sorry, but I have only limited time, and I want to explain these things.

The SPEAKER. The gentleman from California desires not to be interrupted further——

Mr. KAHN (interrupting). At the present time, at any rate. Mr. Speaker, I can see conditions that would make it absolutely necessary that the President should have this right, and that is all we are asking; that is all that the legislation attempts to do. It is simply an authorization.

I want to say, also, in connection with the Army, that the Monroe doctrine places upon our shoulders great responsibilities and great obligations. Take the situation in Mexico to-day. We have not protected the property or the lives of our own nationals in that distracted Republic. We have not protected the lives or the property of the nationals of other countries.

No one can tell what will happen when this war in Europe is over. No one can tell what demands will be made upon us for indemnities for the murder of the nationals of foreign countries, for indemnities for their properties destroyed by the Mexicans. Oh, they will not look to Mexico for indemnity. That at present is a poor, impoverished country. Mr. Speaker, they will look to us for proper indemnification for the loss of the lives and property of their nationals in Mexico. We must be ready to meet any of these problems. And we ought to have learned that the only way our demands will be listened to will be when we have a proper military force behind us. [Applause.] We ought to have learned in recent months that unless we are ready to put force behind our proposals that such proposals are not apt to meet with the prompt respect and approval of the great military powers that the American citizen insists they ought to receive.

Now, Mr. Speaker, a few more words as to section 56. That section creates a volunteer army. I have nothing to say in derogation of the splendid work that the National Guard of the country has heretofore performed, and that I am positive it will again perform if it should be called into the service of the Republic. But what does the Hay bill provide? It provides for a minimum force of 800 National Guardsmen from every congressional district and 800 for every Senator in every State of the Union. Do you think that it is possible to create such a force? The people of the United States have been told that our National Guard provision will provide an army of 425,000 men——

Mr. BUTLER. Mr. Speaker——

Mr. KAHN. When the preparedness bill was discussed on the floor of the House recently, I said that, in my judgment, there could not be over 200,000 people enlisted under that law. The more I study the situation the more firmly convinced I am that I was absolutely right in the matter. Eight hundred men from every congressional district and 1,600 from every State at large, the minimum under the bill, would compel the State of Nevada to raise 2,400 men in the National Guard; the State of Arizona likewise would have to raise 2,400 men in the National Guard; the State of Wyoming, 2,400 men in the National Guard; the State of Utah, 3,200 men in the National Guard; the State of Idaho, 3,200 men in the National Guard; the State of Montana would have to raise 3,200 men for the National Guard. Oregon, North Dakota, and South Dakota would have to raise 4,000 men each for the National Guard. Why, it is ridiculous to think of it. You can not get them. Let us not fool the American people into a sense of security when the security is not there. [Applause on the Republican side.] And right here let me present another phase of the proposition. In the State of Alabama, according to the census of 1910, of the total number of males of the age of 21 years and upward who are capable of being enlisted in the National Guard, 41.7 per cent are negroes; in Arkansas, 28.1 per cent are negroes; in Virginia, 30.5 per cent; in Florida, 41.9 per cent are negroes; in Georgia, 43 per cent; in Louisiana, 42 per cent; in Mississippi, 54.7 per cent; in North Carolina, 29 per cent; in South Carolina, 50.5 per cent are negroes. Are you going to get any National Guardsmen from that source in those sections of the country?

Mr. MADDEN. Yes.

Mr. DYER. Why not?

Mr. KAHN. Are there any colored National Guardsmen in any of the Southern States? I have never heard of any, and yet the bill proposes 800 men from every congressional district in this country. Why, anyone who will study the matter thoroughly must see and must admit that such a force is impossible in the National Guard under the provisions of the Hay bill. Nor will the volunteer-army provision raise the 260,000 men that its proponents feel they can enlist under it. The section provides for 600 officers and men in every congressional district. I give it as my opinion that we never can get that number in every congressional district, but we can get 200 or 250 men from each congressional district and that would give us a volunteer army of fully 100,000 splendid men; men who in most instances can not join the National Guard; men who are in the professions or in such occupations that they can not go to the weekly drills required by the National Guard

provisions of this legislation, but who have a month's vacation in the summer time that they are willing to devote to the service of their country by taking the required intensive training in order that they may become qualified if the need should come to respond to the colors of the Union and help fight the battles of the Republic. [Applause.]

Mr. HULBERT. Will the gentleman yield for a question?

Mr. KAHN. Mr. Speaker, how much time have I consumed?

The SPEAKER. Nineteen and one-half minutes.

Mr. KAHN. I yield to the gentleman for a question.

Mr. HULBERT. If I understand the matter correctly, both sections 2 and 56 are permissive and vest a certain discretion in the President?

Mr. KAHN. Absolutely.

Mr. HULBERT. Is it not the purpose of those two provisions to so clothe the President with authority that in the event of imminent danger he might then have the power to do that which he could not otherwise do without calling a special session of Congress if that imminent danger should occur after Congress has adjourned?

Mr. KAHN. That is exactly the purpose of those two provisions.

Mr. BUTLER. Mr. Speaker, will the gentleman yield for a question?

Mr. KAHN. I will yield to my friend for a question.

Mr. BUTLER. I am much obliged to the gentleman. How much appropriation do we provide this year?

Mr. KAHN. In the estimates which were submitted by the department it is the purpose to provide for an army of 105,000 men this year.

Mr. BUTLER. And then the President will simply be authorized to enlist the balance of the 250,000 and we would not appropriate for them this year?

Mr. KAHN. We will not appropriate for them this year and we may never appropriate for them. The existing law, the law now on the statute books, that has been in force since 1901, authorizes the President of the United States to enlist up to a full number of 100,000 men. Until a few weeks ago no President of the United States since 1901 ever enlisted that number of men. Until recently we have never had 100,000 men, although the law has been in existence for 15 years; because the President will never call a single man unless the needs of the country require it.

Mr. SUMNERS. Will the gentleman yield for just a question?

Mr. KAHN. Yes.

Mr. SUMNERS. If Congress controls this in the first instance through appropriation, how could the President increase the Army in the event of emergency without authorization of Congress?

Mr. KAHN. The Presidents on a number of occasions have increased the Army under existing law without the existence of any emergency, simply because he had authority, and he felt certain that when his reasons were explained to Congress or the committees of Congress, Congress would vote the money for them. And Congress always did vote the money, being satisfied with the President's reasons.

Mr. GORDON. Will the gentleman yield?

Mr. KAHN. I will yield to the gentleman.

Mr. GORDON. Is not the very argument you have just made equally applicable to the authorizing of increase in the standing Army?

Mr. KAHN. Oh, if the President would have to come to Congress to authorize an increase whenever he found the situation warranted an increase it might result in a loss of so much time in a crisis that our troops, those that we happened to have, would be whipped to a frazzle before we could get sufficient troops through legislative enactment. [Applause.] That condition would be simply emphasized if the President needed them, and Congress should happen to be in vacation. The authorization should be there. It costs not a dollar. It does not add a single dime to the expense of the Army. It is simply an authorization, and the authorization ought to be given.

Now, so far as the National Guard is concerned, I believe that the legislation that will be agreed to by the conferees will go, as far as it is possible to go, toward the federalization of the National Guard.

I repeat, the militia section of the present bill goes as far toward Federal control as is possible while the troops remain as State militia, but it leaves many defects that should be removed.

We may lay aside all the constitutional questions over which there is a serious difference of opinion among constitutional lawyers and admit that the militia sections of the bill are constitutional, yet these defects still remain and will continue to remain and can only be remedied by complete Federal control. They are:

First. Transfer of men and property at outbreak of war.

In the chaos and confusion incident to the outbreak of war and when the necessity for speed, smoothness, and celerity is vital, officers and men must be transferred from the status of State troops to that of United States troops, with all the waste of time and energy of making out new papers, books, records, and so forth. And further, the necessity of transferring the property of the United States held by the States back to the custody of the United States. The experience of the Spanish-American War demonstrated the delay these actions caused at that time, a delay that might be fatal to our cause, and under any circumstances should not be tolerated when it so easily may be prevented.

Second. The obligation of strike duty.

Rightly or wrongly, this duty has interfered, does now, and will continue to interfere with recruiting in the National Guard. More so in some States than in others, and usually aggravated whenever strike duty is performed by the State troops. In this duty there is always present the possibility of permanent serious injury to the recruiting of the guard through the rash actions of some young and inexperienced officer.

Again, it is wrong also from the economic aspect; soldiers are not policemen and are not trained as such; one experienced policeman is worth five disciplined soldiers.

And in that very connection of strike duty the State of Pennsylvania felt it had found an ideal system. It created a State constabulary. In discussing the National Guard almost every member of the Committee on Military Affairs of this House referred at some time or other to the Pennsylvania State constabulary. Last week there was a great strike in western Pennsylvania. The State constabulary was not able to cope with the situation. Gov. Brumbaugh only a few days ago called out the National Guard of that State for strike duty. Is that going to aid enlistments in the National Guard of the State of Pennsylvania, the State that has been held up as the one State of the Union that had an ideal National Guard system? Why, everyone knows that the act of the governor in calling out the National Guard has seriously interfered with recruiting in the National Guard. So I say that in addition to the 200,000 men that we will be able to secure for defense through the National Guard, we ought also to provide the volunteer army. Under the provisions of section 56 of the Senate bill they can be called out for only 30 days' training in any year. They are willing to give their vacation period, their summer vacation, for intensive training, at such camps as the Government may establish, in order that they may be taught the art of defending their country whenever defense shall become necessary.

Mr. Speaker, I desire to state a few additional points in which I believe the National Guard provisions will fall short of meeting the hopes of the most ardent enthusiasts for the militia organizations. They are:

Third. Necessity for State appropriations.

The United States should not place its trust for a sound military system upon the false foundations of a reliance for its success upon the voluntary financial assistance of the different States. If a State should refuse assistance there is no penalty under the bill other than the withdrawal of Federal support. Lack of Federal support means that in such States there will be no longer organizations for national defense, yet leaving the United States itself powerless to go into that State and organize a national force directly, notwithstanding the fact that in the State there may be thousands of men who not only desire but are anxious to be part of our national defense. That such an occurrence is possible, it is only necessary to cite even in recent years the example of the great States of New York and New Jersey, which refused to appropriate the necessary money to enable their troops to perform field duty.

Fourth. Lack of sufficient penalty if States fail to carry out certain provisions of the act.

Certain actions are prescribed in the bill which must be taken by the States but which may not be lived up to.

(a) The qualification of the officers who are commissioned.

(b) The organization of particular units of certain branches of the service.

(c) The method of training.

(d) The numerical strength required in each State.

(e) Prohibiting the disbandment of organizations, but accomplishing the same result by allowing the officers to resign.

(f) The replacing or making good of lost United States property.

(g) Physical examination of the enlisted men.

If a State fails to comply with any of the above regulations the only penalty is withdrawal of Federal support, and the argument used in the preceding paragraph would apply with equal force in any of these cases.

Fifth. Control by the President in time of peace.

Any argument in favor of this seems unnecessary. The very fact that the bill itself gives control to the President in time of war and that this control has been advocated by every military man of whatever opinion, should prove that this was where the control should always be. If it is right in time of war, why is it not right in time of peace? This is the position taken by every unprejudiced student of military affairs who believes in a military system at all.

Mr. Speaker, the summer camps that were held at Plattsburg last year and in other sections of the country were a marked success. Some national guardsmen affect to see a danger to the National Guard by the incorporation of this section in the preparedness legislation. I believe that it will strengthen the National Guard. I believe that it will provide a force that we can not get into that organization. I believe that conditions in the United States to-day are such that we must have at first hand, if we become embroiled with any great military power, at least 500,000 trained men. [Applause.] And unless you give us this provision in the Senate bill for any Army authorization of 250,000 men, unless you give us the federalized National Guard, unless you give us section 56, we will not have anything like that number in the hour of our need.

My experience has been such, and from having read frequently the history of my country I have become convinced, that if this Congress shall fail to provide an adequate force for the protection of the Union, the Members of the Congress will be denounced by the American people for failure in the performance of a patriotic duty. [Applause.]

Mr. DIES. Mr. Speaker, will the gentleman yield for a question?

The SPEAKER. Does the gentleman from California yield to the gentleman from Texas?

Mr. TILSON. Mr. Speaker, will the gentleman yield at that point?

Mr. KAHN. Yes.

Mr. TILSON. The gentleman speaks of some part of the National Guard opposing this. That does not refer to the entire National Guard?

Mr. KAHN. Oh, no; far from it. I have had adjutants general of some of the States tell me that they welcome this addition to the defensive force of the Union. The trouble is, with respect to Army legislation, men will come to Congress at times actuated solely by selfish purposes.

Mr. DIES. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman yield?

Mr. KAHN. In other words, men who hold fat political jobs are afraid they might lose them. To me patriotism stands above the dollar. [Applause.] I believe that a man ought to sink his personal ambitions for the general welfare. The fear of losing a Government salary ought never to stand in the way of legislation necessary for the proper defense of the country. [Applause.]

Mr. DIES. Mr. Speaker, will the gentleman yield there?

The SPEAKER. Does the gentleman yield?

Mr. KAHN. No; I can not yield just now.

The SPEAKER. The gentleman declines to yield.

Mr. KAHN. This is an important question. How much time have I consumed, Mr. Speaker?

The SPEAKER. Twenty-five minutes.

Mr. TILSON. I would like to have the gentleman state, if he will, in regard to some of the States, like Connecticut and Massachusetts and New York, that have actually favored this proposition.

Mr. KAHN. Yes; not only have some of the adjutants general favored this proposition, but I understand that one distinguished labor leader of this country wrote a letter to the gentleman from Massachusetts [Mr. OLNEY] saying, in effect, that he believed training of this kind would lead toward true Democracy in these United States. [Applause.]

The SPEAKER. The Chair was mistaken. The gentleman has used 33 minutes.

Mr. KAHN. I reserve the balance of my time, Mr. Speaker. [Loud applause.]

Mr. HAY. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. CRAGO].

The SPEAKER. The gentleman from Pennsylvania [Mr. CRAGO] is recognized.

Mr. CRAGO. Mr. Speaker, in the short time allotted to me I want to explain my position as best I can. In the first place, I want to be considered as being always in favor of any plan of rational preparedness on the part of my country. I shall vote for the larger Army provided by this bill for two reasons: First, because I want the chairman of the conference committee to feel that he has this House back of him in whatever limit he may see proper to go in regard to the Regular Army, and, second, I shall vote for and support it because I believe the people of the United States would be glad to know that they had an Army of 250,000 men to-day on the Mexican border. [Applause.]

I want also, however, to resent in the short time I have allotted me an unjust attack which has been made on an organization in this country whose only offense, as I take it, has been the fact that they have kept up an organization; that they have prepared for military service to the best of their ability and to the best of their knowledge, and have answered the call of their States and their country on every occasion, namely, the National Guard. [Applause.] The National Guard a year ago was lauded by Maj. Gen. Leonard Wood and welcomed as a part of the first line of the Army. These men were told that they were preparing themselves as a part of the first line and that they would be sure to give a good account of themselves.

Only a few months ago, in an address delivered before the National Guard Association, a former Assistant Secretary of War alluded to the members of the National Guard as follows:

I desire to give expression to the profound sentiment of appreciation of the service of the men of the National Guard during the last 15 years in the efforts they have made in behalf of the national defense. It is relatively easy now to engage in the movement that is sweeping the country in behalf of adequate and reasonable military preparedness, but 16 months ago it was not easy. Our people—apathetic, ignorant, or heedless of the past military history of ourselves or others—not seeing the awful potentialities for swiftly incurred strife and destruction still inherent in civilization, paid little or no attention to the military needs of the Nation, to the dangers still confronting in the world the best and most pacific intentioned of peoples, and did little or nothing to strengthen the protection required for the safeguarding of the great spiritual and material heritages of the Nation. But ever since the Spanish War there has been a group of men—unselfish, persistent, energetic—that in season and out of season and always without any great favor have dinned into the ears of the American public the now apparent need for expansion and improvement of the land forces of the Nation. These were the men who know that every teaching of history demonstrates that however broad oceans may be, nevertheless wars which commence upon the oceans always end upon the land; that the final resources of nations in conflict can not be brought to bear upon the water, but only can be brought to bear upon the land; that definite and final conclusion of such conflict can only be had by striking at the territory and treasure of an enemy which is situated upon the land; that however great may have been the influence of sea power on history and however essential such sea power might be, nevertheless that the mightiest sea powers of the world could not accomplish their military objects without appropriate and correlative land power; and, furthermore, that the only lasting defense against predominant sea power must be adequate land defenses. These are the principles that the patriotic members of the National Guard have impressed without ceasing upon the public and private minds of the country. To-day as a National Guardsman I proclaim the credit that is due to the guard for nursing and keeping alive in this country an essential and reasonable military spirit and appreciation of the truths of military history when they were most needed. In another capacity, as a representative in some sort of the regular Military Establishment, I wish now to bear testimony to the splendid and effective support that has been given by the National Guard to each and every expansion and improvement of the regular military service. There were no more loyal supporters of the reorganization of the Army in 1901 than the National Guard, and each and every improvement in the size or condition of the Regular Army had its hearty support.

And yet this is the same gentleman who, in season and out of season, has been casting reflections upon the efficiency and the possibilities of this organization which, if it has been weak in anything, has been weak solely because of the failure of the National Government to properly arm, equip, and discipline it.

Attention has been called in public addresses to the fact that a lot of property had been recovered from the National Guard and that much of it had been wasted. Let me call your attention to the fact that officers of the War Department have told us that this loss of property, so called, covers a period of 18 years—since 1898—the time of the Spanish-American War, and that every dollar's worth of that property has been properly expended according to law.

Mention has also been made of a lack of marksmanship on the part of the members of the National Guard. I want to say to you that the organization with which I am familiar does not keep in its ranks a single officer or enlisted man who does not go out every year and qualify as a marksman. In every one of our organizations every man who retains his position and standing in the organization must be a first-class marksman.

I will go as far as any one of you in prepardeness for any emergency. I believe that with proper attention and instruction our people will come to realize that universal military instruction and service is the truest democracy. This must necessarily come, however, through education and through a demand for it on the part of the people if it is to be effective. Mere legislative enactment will not bring this about. If you will

spend in educating the people, so that they will understand the necessity for this service, the time you are now spending on these different propagandas, they will soon demand of Congress such legislation as will be necessary. And so in voting against such a volunteer army as has been proposed I do so because I believe, if ever it is built up in time of excitement, it will be done at the expense of the National Guard, and when the National Guard is weakened as a result of this, and when in time to come we do not fear any great emergency, this so-called army will disappear, and you will have nothing; and so instead of giving the country a real program of preparedness you will have destroyed what little force we already have. [Applause.]

In this connection I want to quote you the following taken from a paper delivered by Maj. Gen. John F. O'Ryan, of the National Guard of the State of New York, at the meeting of the National Guard Association of the United States at San Francisco, Cal., a few months ago:

Those who do not believe in the practicability of the War Department plan, further point out that the National Guard of the country is not a plan, it is a force in being, a force which has steadily and in later years rapidly progressed toward a high standard of efficiency, and that this tangible force, with its substantial number of trained personnel, as well as its material plant—valued at approximately $100,000,000, should be substituted as a part of the first line in preference to a plan to create an army—a plan which may not prove practicable. That it might result after a few years in the Government finding itself without any substantial and effective force whatsoever, except the Regular Army.

As a part of Pennsylvania's answer to the abuse heaped upon the guard within the past few weeks, I submit herewith an editorial from the Pittsburgh Dispatch of Monday, April 17, 1916, as follows:

BORAH'S INSULT TO THE GUARD.

Senator BORAH'S attack on the National Guard during the Army bill debate in the Senate, reported in Sunday's Dispatch, is rightly regarded here in Pennsylvania as an insult to every man in the guard, and particularly to the officers. But it opened opportunity for one good result. When a United States Senator arises in his place and deliberately charges that the $8,000,000 now appropriated by the Government for the National Guard has been "shamefully wasted" and some of it "embezzled," he can be held responsible for his utterances and compelled to produce his proofs, if he has any, or to confess by his silence that he is a reckless slanderer.

During the discussion of the Army bill less responsible persons have indulged in general charges of lobbying and grafting against the National Guard organization, but they have been careful to confine themselves to insinuations and inuendos for which they could not be brought to book. The Idaho Senator can not get away with any such evasion. He has made a specific accusation of the deliberate theft of Government funds, reiterated it, too, "without any qualification," and the protection of the Public Treasury, no less than the good name of the National Guard demands that he be not allowed to dodge responsibility. If he can prove embezzlement let him submit his evidence to the proper authority and have the offenders punished. If, on the contrary, he has been indulging in a mere oratorical figure of speech, he owes an immediate apology to the organization he has so foully aspersed.

Senator CUMMINS, expressing his indignant disbelief, suggested that consideration of the Army bill be suspended while the Senate ascertains whether officers of the guard are guilty of such charges, but BORAH failed to accept the offer, which was plainly incumbent upon him, if he believed his own accusation. He can not say that he knows Government money is being embezzled and refuse to do anything about it. Nor can he utter such a charge, if baseless and cruelly slanderous, against men who have proved their patriotism by unselfish service extending over many years, without provoking the strongest condemnation for a course so contemptible. The Senate should at once adopt the suggestion of Senator CUMMINS, and demand that the Senator from Idaho place his information on record or be branded as an irresponsible calumniator of better men.

Adjt. Gen. Stewart and the adjutants general of other States should proceed at once to Washington and demand investigation of these reckless charges, and BORAH, failing to prove his assertions, should be pilloried before the country as a deliberate falsifier. It is clearly up to the responsible heads of the National Guard to insist upon a determination of the truth or falsity of accusations directly accusing their organization of the embezzlement of Government funds and they have every right to make such a demand upon the Senate as an act of simple justice to the guard and of common honesty to the country.

Also an editorial from the Gazette-Times, of Pittsburgh, Pa., on Tuesday, April 16, 1916, showing what that great State is doing for the National Guard:

NEW ARMORY BEGUN, GOOD!

Altogether in keeping with the current American spirit was the breaking of ground yesterday for an addition to the Emerson Street Armory of the First Regiment Pennsylvania Field Artillery. It is a step in that preparedness for defense of the Nation which is demanded by practically all of our people. It makes a fitting answer to such gatherings as that one in a downtown theater on Sunday under the auspices of the "American Union against militarism." The American people are as much against militarism, in the opprobrious sense in which the leaders of the Sunday gathering employ it, as are the most ardent pacifists. But they know the value of military force when rightly employed, and they are determined that this country shall be put in condition to make good its just claims before the world. The work is proceeding rather slowly in Congress, though time presses and the urgency of the situation is apparent to all but such as the gentlemen who led the theater gathering; so it is especially good to witness enhancement of the effectiveness of the National Guard of Pennsylvania.

The antimilitarists ridiculed our Army in Mexico, according to the accounts of the meeting. Why? Simply because it has been impossible, on account of our unpreparedness, to perform the duty thrust upon us with the dispatch that ought to characterize such undertakings. We could not get a good start. We were not ready with the means to support the regiments sent into Mexico and at the same time protect the border. When our boys got a few hundred miles from the international boundary there was difficulty in keeping communications open. We did not have enough men. If we are going to have more trouble, the Army must be reenforced. The first call must be made upon the National Guard, the citizen soldiers of the States. That being well understood, it is the part of wisdom to provide them with proper quarters and drill halls. Pennsylvania is doing that, as is evidenced by the provision making for the new regiment of artillery. It were better to applaud such efforts and help them along than to spend time in ridiculing preparedness and accusing of selfishness men who are promoting a proper spirit for national safety.

I also submit herewith a short statement by Maj. Edward Martin, of Waynesburg, Pa., regarding the mobilization of one of the battalions of the Tenth Regiment when called a few days ago for duty:

At 12.45 a. m. Wednesday morning Col. Coulter called me by telephone and stated that the regiment had been ordered to assemble in its armories in contemplation of strike duty in the vicinity of Pittsburgh. He stated that five companies had been ordered to mobilize at Greensburg and the other companies in their company armories. He directed me to notify "K" of Waynesburg, "A" of Monongahela, "B" of New Brighton, and "H" of Washington, and all of the field and staff in the territories of the Second Battalion

I immediately placed a call for the following officers, and got in communication with them at the time indicated: Capt. Montgomery, 12.50 a. m.; Lieut. Yohe, Monongahela, 1.10 a. m.; Capt. Hartland, 1.15 a. m.; Lieut. Craft, 1.30 a. m.; Lieut. Harris, 1.50 a. m.; Capt. Aiken, 2.10 a. m.; Capt. Fish, 3.05 a. m.; Maj. Thompson, 3.40 a. m. Maj. Thompson was not reached sooner owing to the fact that he was away from home.

Capt. Hartland called me at 3 a. m., stating that he was in touch with all of his men in the State, and that they were all on the road to the armory.

Company A, with all their men accounted for except two, took breakfast in the armory and were ready to leave for the zone of the strike, with full force, except the two, accounted for at 6.30 o'clock in the morning.

Capt. Aiken had 50 men and 3 officers in the armory ready to move at 7 o'clock in the morning.

Capt. Montgomery had 30 men and 2 officers ready to move at 7 o'clock in the morning, and at 11 o'clock had 50 men ready to move. Capt. Montgomery was delayed owing to the fact that he was unable to reach the boys in the country districts until after 7 o'clock, as the switchboards of the telephones were closed until that time. Capt. Montgomery and Lieut. Ross were both using the phone as soon as they were accessible, and several men came a distance of 10 miles and more and were ready to take the train leaving Waynesburg at 11.15 o'clock in the morning.

Capt. Fish had 45 men and 3 officers in the armory ready to move at 7 o'clock in the morning.

I could have had three companies of my battalion in Pittsburgh very easily at 9 o'clock in the morning by myself taking our 6.25 train, and could have had the whole battalion there by the time our regular 11.15 train arrives in Pittsburgh, which is 1.30.

Immediately after getting in touch with the company commanders I arranged with the superintendent of our local railroad for a special train if it was necessary for us to leave promptly.

The men have been living entirely in the armory since the call was made, and the other companies are in just as good shape as the companies of this battalion. They have been conducting drills, having rifle practice, and making general improvements and repairs about the various armories.

Do not understand from my remarks that the members of the National Guard from the different States are opposing any of this preparedness legislation. They do, however, question whether both the volunteer army, so called, and the National Guard purposed as a Federal force can both exist for any great length of time.

They claim that the men needed to fill the ranks of the National Guard are the same class of men who may, for a short time, be attracted to the new plan, but that in the years to come, when the excitement of the present is over, the volunteer army will gradually disappear, and the National Guard having been made to feel that it is not a part of the first line of defense, but regarded as a State force only, will necessarily lose much of its enthusiasm for service and will have degenerated into the weaker organizations of former years.

If Congress in its wisdom, however, should decide on organizing this additional force, I believe I speak for the membership of the National Guard when I say that these men as loyal, patriotic citizens, recognizing the need of a greater armed force in this country, will give this new organization their united support and encouragement. They know that patriotism is best expressed in service.

The SPEAKER. The time of the gentleman from Pennsylvania has expired.

Mr. CRAGO. I ask unanimous consent to extend my remarks by inserting two editorials from newspapers.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

Mr. HAY. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MCKENZIE].

The SPEAKER. The gentleman from Illinois [Mr. MCKENZIE] is recognized for five minutes.

Mr. MCKENZIE. I dislike very much to differ from my distinguished colleague [Mr. KAHN], the ranking member of the

Military Affairs Committee on our side of the House; but when I have followed him in that committee along certain paths in which he had aided me and when he has helped instruct me to stand for certain propositions, then, when he changes his mind and turns back on those points, I refuse to follow him. [Applause.]

Mr. KAHN. Will the gentleman inform the House when I went back on my paths?

Mr. McKENZIE. I refer particularly to the volunteer continental army scheme.

Mr. KAHN. This is not the continental army scheme. This is another matter, a different matter altogether.

Mr. McKENZIE. I hope the gentleman will not take my time. Now, Mr. Speaker, I take it that we are all in favor of national defense, but we differ somewhat as to the methods of achieving what we call adequate national defense.

In the Committee on Military Affairs of the House, after long hearings and listening to the officers of the Army, we decided to report a bill fixing the number in the Army at such a figure as could be filled up by enlistments without compulsory military service. When we got the bill into the House it was amended by a proposition which we thought perhaps would encourage enlistments to a certain extent. The Senate Committee on Military Affairs reported the bill providing for 178,000 men. The amendment we are now considering was tacked on in the Senate, and when I heard that the conferees had agreed that the Army should consist of 175,000 men of the line, I felt that that was a wise agreement; that perhaps under the amendment adopted in the House we could get 175,000 men and do what we pretend we are going to do—give the people such an Army as we provide for in this law.

The amendment we are now considering provides that at no time in peace shall the Army, exclusive of the Quartermaster Corps, Hospital Corps, and Philippine Scouts, exceed 250,000 men. Now, what does that mean to the layman? What does that mean to the different associations over this country that are sending us copies of the resolutions passed by them? What does that mean in the editorials of the great newspapers of this country? It means that they understand that we propose to give them an army of 250,000 men. My fellow Members of this House, we can not afford to be other than honest with ourselves. The gentleman from California [Mr. KAHN] appears before you this morning and attempts to make you believe that it does not mean an army of 250,000 men, that it means only such an army as the President may see fit to enlist. Well, we might get a pacifist President, like the great William J. Bryan, who would not enlist any army at all, and then where would we be? Let us be honest. If it means 250,000, put the teeth in it, my good friend from California, and provide for getting those men. When you talk about men enlisting because we have changed the form of enlistment in the way we did in this House, it is nonsense. There might be the possibility that a psychological condition of mind would overcome the young men of this country, and they would enlist in the Army for $15 a month when they can get $40 a month on the farm; but I want to say to you Members of this House that I do not believe they will do it. Therefore let us be honest with the people and give them an Army that we can fill up with men and say to them, "This is the best we can do *without compulsory* military service or increasing the pay of the soldiers. If that satisfies you, all well and good." But do not let us perpetrate a fraud on the people of America. [Applause.] We can not afford to do it, and that is what this amendment means. It means deception. It means an Army of 250,000, only in so far as officers are concerned, but not men.

Now, just a moment. In the committee we fought out the question of the volunteer army, and we decided that, in our judgment, the National Guard of this country was a preferable and a more dependable force than such a volunteer army, and therefore we reported that to the House. From the testimony before us we realized that these two bodies could not exist in the same place. One or the other must go down; and believing that, we decided that the guard was the more dependable body, and gave it our support; and when a man stands on this floor saying that he is a friend of the National Guard and at the same time prepares this dagger to stick into the back of the National Guard I feel that he is inconsistent. [Applause.]

Mr. HAY. I yield five minutes to the gentleman from Kansas [Mr. CAMPBELL].

Mr. CAMPBELL. Mr. Speaker, every citizen of the Republic, from the President to the humblest citizen of the land, ought to do everything within his power, consistent with the honor, the integrity, and the security of the Nation, to prevent the first step that leads to war by the United States now or at any time in the future. [Applause.] The gentleman from California [Mr. KAHN] says that the President should be given authority to increase the Army of the United States during the recess of Congress when he deems the danger to the Republic imminent. The Constitution of the United States wisely provides that the Congress of the United States shall declare and make preparation for war. [Applause.] It would be inconsistent with the Constitution and with the principles of the Republic for the President, in control of diplomatic negotiations, to have in his control at the same time the power to increase the Army of the United States in connection with his diplomatic negotiations. [Applause.] It would be placing the war-making power in the hands of the Executive; because every jingo in the country, when Congress was convened, would say, "Are you going to stand by the President?" when the President had already, in effect, declared war or taken steps from which there would have to be a backdown—or go on to war. Gentlemen, are you going to leave it to the Representatives of the people who do the fighting to declare war, under the Constitution, or are you going to give the President the war-making power in violation of the Constitution?

The gentleman from California says we need 250,000 men to-day on the Mexican border. If so, let Congress ask for that number of men for that purpose, not for a permanent standing army of that number in the United States. [Applause.] If we ask for 250,000 men to defend the Republic, we will have them by Saturday night. [Applause.] If we ask for 500,000 men, or any number that is needed for that purpose, we will have them by Saturday night. Two hundred and fifty thousand men would not feed the present man-destroying implements of war for 10 days. If we are in imminent danger, if we need an army for the Nation's defense to-day, 250,000 men are not enough. Inventive genius has provided implements of destruction in war that to-day eat men up by the tens of thousands and by the hundreds of thousands. Men are no longer slain by the sword alone. They are slain by thousands, eaten up by liquid fire, destroyed by deadly gases, and mowed down by every implement of death. The wars of the future will be fought with greater fury than the wars of to-day, if wars are not prevented altogether.

Statesmanship of the highest order can and should keep the nations out of war. [Applause.] The first step that leads to war should not be taken, and the last step that leads to war should be taken only when every possible effort has been used to prevent it. Mr. Speaker, ever since I have been in Congress, now near 14 years, there has been a war scare every time Army and Navy appropriations have been under consideration. I have favored, and shall favor, a strong Navy and an Army large enough for a frame to which to build if an invading army comes. It would be insane to try in this country to keep a standing army in time of peace to serve us in case of war, the way wars are fought to-day. If we ever have war with any first-class power, we will have to have millions, not thousands, of men. So I say wise statesmanship should take us away from rather than in the direction of war or the first step that leads to war. At this time when men are being swept off the earth by hundreds of thousands in an indefensible war, it is no time for a peaceful Republic enjoying peace with all the world, except that it is chasing bandits in Mexico, to place the power of making war in the hands of the President of the United States, as section 2 of this bill does in effect. [Applause.]

Mr. HAY. Mr. Speaker, I yield five minutes to the gentleman from Tennessee [Mr. HOUSTON].

Mr. HOUSTON. Mr. Speaker, when we come to consider the question of agreeing to the provisions of the Senate amendments or adhering to those in the House bill I shall stand by the House bill. I do not favor a standing army in times of peace of 250,000 men. I am content to rely upon the number provided for in the House bill. If we should become involved in real war, neither would answer our needs. Then we would have to raise a volunteer army, as we always have. But the provisions of the House bill will supply the necessary officers and means of training to organize and instruct the army then called into existence.

I am convinced that it is our duty at this time to make greater preparation than we have to protect and defend ourselves, because after serious consideration of the conditions that now envelop so much of the civilized world I am unwilling to imperil my country by not making preparation to ward off and repel dangers that might come to us. I hope and pray that no war may come and that no enemy may approach our shores, but when we consider the war now raging across the ocean and the complications arising we can but realize possible dangers.

Now, having said this much, I want to say that we should have no war with any nation abroad—and I trust our troubles with Mexico may be tided over without a conflict between the

two nations. I do not think we should go to war with Mexico to protect the private fortunes of those who have gone there to embark in doubtful enterprises and make money out of advantages they have obtained in that country. I have no sympathy with those who have gone there to thus make money and want this Government to furnish a standing army to protect them in their exploitations. Let all such take the consequences of their own adventure rather than involve this Nation in a war that would cost the taxpayers millions of dollars and forfeit the lives of thousands of our young men. [Applause.]

But while I do not believe this country should be involved in a war to protect private rights of questionable virtue, yet I realize the time may come when patience shall cease to be a virtue and this Nation can not properly permit anarchy to reign in Mexico, with the constant infringement of the real rights of our citizens and the all too-frequent destruction of the lives of innocent Americans. No man can view the situation on our border without feeling that this country must be prepared to protect our people and compel obedience to the rights of the United States.

I sincerely trust and believe that by moderation and patience we may keep at peace with all nations, and we have cause to rejoice to-day that the prospects are more encouraging for the peaceful settlement of existing troubles. With courage and wisdom, President Wilson has met the gravest issues and solved questions new and more difficult than have confronted any of his predecessors.

I trust we may do nothing to provoke war or to develop a warlike spirit. I consider the jingo and the militarist enemies to the common good. Nothing is more revolting to the real patriot than the expressions we hear and read that the action of our Government in the complications arising between us and other nations is "weak," "timid," and "vacillating." The man who would attempt to excite passion and take the hazard of rushing our Nation into war merely to play the rôle of the braggart and bully, or who would excite prejudice against the administration for partisan advantage, deserves the condemnation of every patriotic citizen. [Applause.] In times like these patriotism should rise superior to partisanship. No real American ever needed prodding to fire his courage or stir his patriotism. If the hour shall come when the liberties or the honor of the United States shall need defense, there will be no lack of response to such a call. And I believe the hitherto invincible American will be invincible still.

But, Mr. Speaker, with a full sense of the responsibility resting upon us, we must face conditions as they exist, and do what our sober judgment tells us is necessary to enable the patriotism and bravery of our people to find adequate means to protect the country.

I do not believe it is practicable or desirable to create a large standing army in time of peace. We have no desire to imitate the example of the militaristic nations of Europe; but it is essential that we shall create such organization as shall be capable of quick expansion in time of need. This, I believe, we have successfully done in the legislation that has been so ably carried through this House by the distinguished chairman of the Committee on Military Affairs. I have gladly supported him in this regard, and propose to do so to-day.

And, Mr. Speaker, I trust that this House, while safeguarding the water power of America from the grasp of monopoly, will provide for such development of that power as will enable us to cheaply manufacture nitrate, thus freeing us from dependence on Chile and giving us the ability to manufacture in any quantity powder. And it is not the less gratifying to me that in thus making provision for a great national military need we may at the same time as an incident to such work provide a larger and cheaper supply of fertilizer for the benefit of the farmers of our country.

I believe we should increase our naval strength and proceed in the work of making additions to and perfecting our coast defenses. We can make no mistake in equipping our country in the material necessary in time of war, that the bravery and patriotism of our people may not needlessly be called upon when the test shall come.

Mr. Speaker, I desire to speak no word in a spirit of alarm. I trust we may remain at peace with all the world, and my reason tells me there is now no just cause to carry us into war; but I believe we should take these steps for security.

I have heretofore opposed creating a large Navy. Least of all do I favor a large standing army in times of peace. I deplore that spirit for war or thirst for glory that is created by "the roll of the stirring drum." We should know no glory but our country's good. I believe that the House bill provides a nucleus around which to formulate an Army and furnish the instruction necessary to understand the arts and methods of modern warfare.

A large standing army in time of peace is not only a burden to our people but a menace to our free institutions. I shall be the last man, by any action of mine, to invite or provoke war. It is barbarous, and usually may be avoided.

Our Government has blazed the way for human liberty and furnished the pattern for free institutions to all the world, and now let us hope to carry the light of peace to warring nations and aid in ending the greatest and bloodiest struggle in all history. [Applause.]

But if any other nation shall force us into a war of self-defense, then when the hour of necessity comes we must be prepared to defend our altars and our fires. And acting upon this principle I for one am in favor of heeding the warning given us by our great President, the watchman upon the tower, who must know better than we when dangers are imminent or perils are gathering near. I believe in him. I have unswerving faith in his patriotism, and I trust his wisdom. [Applause.]

Mr. KAHN. Mr. Speaker, I yield to the gentleman from Kentucky [Mr. FIELDS].

[Mr. FIELDS addressed the House. See Appendix.]

Mr. KAHN. Does the gentleman from Virginia intend to close with one speech?

Mr. HAY. No; I have one more speech, and I yield five minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, I do not think the time has arrived, I hope the time never will arrive, in our country when the strength and the fervor of a man's patriotism will be judged or determined by the size of the military establishment for which he stands. [Applause.] If that were a proper test of patriotism, the good patriot would not be the honest man who believes in a standing army of 150,000 men, or even 250,000, but the demagogue who, taking advantage of the momentary public excitement, would insist on a standing army of 500,000 men. [Applause.]

It has been demonstrated as thoroughly as a matter of that kind can be demonstrated that we can not in this country, under volunteer enlistments, secure an army of over about 150,000 men. Therefore any increase of the Regular Army above that size is an act of foolishness and futility.

But what is proposed in the Senate amendment is more than that. The gentleman from California [Mr. KAHN] says, "Very well, if the men do not volunteer or if the President does not enlist them, we will not have them to pay for." But in the Senate amendment we give the President authority to provide for all the organizations, not only the specific organizations provided for in the amendment, but general authority to organize regiments and companies not to exceed 250,000 enlisted men on a peace strength.

I have faith in the patriotism of the President, but I know and we all know the pressure that would come upon him immediately the Senate provision became a law to organize all these units and organizations that would give half of the officers now in the Regular Army field rank and the other half, including those who have just graduated from the Military Academy, the rank of captain and upward. [Applause.] So, whether we add another enlisted man or not, by the Senate provision we would have an enormous top-heavy, expensive military organization. If the President organized these forces we would, of course, pay for them. It is not conceivable that Congress will at any time have so lost faith in the President that it will not provide for the men and units of the Regular Establishment which he had organized. So that whether we secure more enlistments or not, we are certain, under the Senate provision, to have a largely increased number of units, a largely increased number of officers, and therefore not only an expensive but a top-heavy and altogether inadequate Military Establishment.

The second proposition is the old continental army, discredited and disapproved everywhere, with no friends anywhere in the country, except among the friends of conscription. It comes to us under a new title and revamped form, and yet the idea is the same old discredited volunteer army. If you can not fill up the Regular Organization under enlistment, how are you going to get a volunteer army under volunteer enlistment? And if you do get a volunteer army, what is to become of your National Guard? [Applause.]

Back of the continental army and this Federal volunteer army is the shadow of conscription and universal compulsory military service. The House provision will, in fact, provide as large a Regular Army as we can get under volunteer enlistments. About 150,000 men, as many, in fact, as we need in time of peace, and in time of war we must in any event depend on volun-

teers. The Senate provision which would give us 250,000 in time of peace if the men would enlist, would, in fact, give us no more men than the House provision, because the men would not enlist in time of peace. It would, however, give us a large number of officers and organizations, great expense, and little to show for it.

Mr. HAY. Mr. Speaker, I have but one more speech, I will say to the gentleman from California.

Mr. KAHN. Mr. Speaker, I yield the balance of my time to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, I repeat I am against war and in favor of preparation against the possibility of war. [Applause.] I hope that we will keep out of war, but I believe it is wiser to spend some money and effort in being prepared if war comes than to waste treasure and blood in getting preparation after war has begun. There will be two votes on this motion, one on section 2, which authorizes the President practically to increase the Regular Army to 250,000 men, and the other on section 56, authorizing a volunteer army. There is a limitation in the House bill of 140,000; it is a limitation. Section 2 of the Senate bill makes a limitation of 250,000.

The principal argument we have heard to-day against the Army of 250,000 is that we can not raise them. How childish an argument! If we can not raise them, there can be no objection to that limitation. The question is whether we may need them—and we may need them.

Gentlemen say that section 56 is the continental army over again, and my colleague says that those who favor it have reversed themselves. Section 56, which apparently these gentlemen who have spoken against it have never read, only authorizes the President to carry into effect an act which we passed on April 25, 1914, two years ago—reported unanimously from the Committee on Military Affairs and passed unanimously in the House, in contemplation of raising a volunteer army when emergency arose.

Those who think there is no emergency in the world, who think that there are no cloud either in the sky or upon the horizon, who are satisfied that peace reigns throughout the world, ought not to carry into effect this act which two years ago we passed in contemplation of the possibilities which might arise, and no one then contemplated, even in his imagination, the terrors which have since arisen and which cause the emergency. Why did we pass the act at that time if it were not, under conditions like these, to authorize the President to carry them into effect? Did the Committee on Military Affairs two years ago by this act then provide for a volunteer army which they now denounce? This is not the continental army over again. It is to authorize the President now to provide a needed army in order that they may be trained, and which, when the emergency has passed, may be disbanded and sent back to their peaceful pursuits. We ought to have trained men. We need the National Guard for the training which it gives, and we need the volunteer army in order that we may train them under governmental supervision. We need the increase in the Regular Army that we may have the first line of defense prepared for war. Having provided these, we will have shown that we have some common sense, and then, if we have common sense, to go further and keep out of war, we will show that we are capable of self-government [applause]; but if we fail to provide against the possibilities of war in these days when war is hovering over the world, when danger lurks in every corner, when trouble may come from every side, we write ourselves down as incapable of managing the affairs of a great people. [Applause].

Mr. HAY. Mr. Speaker, the President of the United States has so far been able to keep this country out of war, and, looking to what is now taking place in Europe, we may expect that the country will still be kept out of war. [Applause on the Democratic side.] I am sorry that the gentleman from California [Mr. KAHN], in his desire to impress upon the House the importance of an army of 250,000 men, invited the countries of Europe to come here and make war upon us to obtain in this war an indemnity for their loss. He must have been very much perturbed, he must have wanted much to make an impression upon the House, or he would never have extended such an invitation. But we may rest assured that the countries of Europe are not coming across the water to exact from us any indemnity. We may rest assured that this country, having preserved the peace thus long during this great crisis in the world's history, has the respect of the world, and that we will have no war to meet, and, therefore, that it is unnecessary to place upon the citizens of this country for all time the burden of a standing army of 250,000 men. The gentleman from Illinois [Mr. MANN] says if you can not raise the men what harm is there in it. Why, my friends, the people who are behind this movement for an army of 250,000 men are telling us every day that you can not raise them except through compulsory military service. They want you to make the experiment under the present system so that they will be able to come back here and tell you that you must have compulsory service or you can not get the men necessary to defend the country. That is their purpose in advocating this army of 250,000 men. It is their purpose in advocating the volunteer army of 261,000 men. Trained men! Why, if this is put into effect, if you adopt section 56, what sort of trained men will you have? Men who only train 30 days in a year, and you want to put that against the National Guard, because you can not have both. You must choose to-day whether you will have the volunteer army or the National Guard. I for one do not propose to vote to put upon this country both the National Guard and the volunteer army. The expense of one is enough without having another burden of that sort placed upon the people for no reason at all, and if the House to-day votes in favor of the volunteer army I shall consider it as an instruction not to insist upon a provision in the bill for the National Guard.

Mr. Speaker, this subject has been talked over and talked over, and I want to appeal to the common sense of this House not to vote for provisions in order to fool the people of this country. The men who are telling us to vote for an Army of 250,000 men are doing it for the purpose of going to the country and saying, we have got 250,000, and everybody knows that we can not get them—and what is more, in time of peace we ought not to have them. [Applause.] Suppose these measures which these gentlemen advocate go into law and are effective. Suppose you can get 250,000 men in the Regular Army. What does that cost? Two hundred and fifty million dollars a year. Suppose you can get 261,000 men in the volunteer army, what does that cost under the provisions of this section? Under the provisions of this section the President, while he can train them in field service for only 30 days, can train them at home every day in the year, and under the provisions of the bill they receive the same pay as men and officers of the Regular Army, and that means $261,000,000 a year—a half billion dollars that you propose to vote upon the taxpayers of this country in addition to what the National Guard will cost. That is what you are opening up an avenue to do, and I appeal to you as men of sense, as men who have the best interest of the country at heart, to let the conferees do what they ought to do with the Regular Army, and not to vote up this volunteer army, but let the country have a sane and sensible and reasonable preparation and not place upon the people of the country an enormous burden of taxation. [Applause.]

The SPEAKER. Under the special agreement the first vote is on agreeing to section 2 of the Senate bill. The Chair thinks the Clerk had better read it.

The Clerk read as follows:

Page 105 of the printed bill:

SEC. 2. Composition of the Regular Army: The Regular Army of the United States, including the existing organizations, shall consist of 64 regiments of Infantry, 25 regiments of Cavalry, 21 regiments of Field Artillery, a Coast Artillery Corps, the brigade, division, corps, and Army headquarters, with their detachments and troops.

Mr. HAY. Mr. Speaker, the House understands they are voting on an Army of 250,000 men.

The SPEAKER. Then there is no use in the Clerk reading any further. The question is on a Regular Army of 250,000 men——

Mr. HAY. Mr. Speaker, I ask for the yeas and nays.

The SPEAKER. The gentleman from Virginia demands the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 141, nays 222, answered "present" 1, not voting 69, as follows:

YEAS—141.

| Flynn | Kreider | Pou | |
| Fordney | Lafean | Riordan | |
| Gallivan | Langley | Rowland | |

So the motion of Mr. KAHN as to section 2 was rejected.

The Clerk announced the following pairs:

For this vote:

Mr. PETERS (for section 2) with Mr. HILLIARD (against).

Mr. FAIRCHILD (for section 2) with Mr. LEE (against).

Mr. SCULLY (for section 2) with Mr. LITTLEPAGE (against).

Mr. BACHARACH (for section 2) with Mr. SHACKLEFORD (against).

Mr. DRUKKER (for section 2) with Mr. BURNETT (against).

Mr. GRAY of New Jersey (for section 2) with Mr. SEARS (against).

Mr. LONGWORTH (for section 2) with Mr. POU (against).

Mr. HAMILTON of New York (for section 2) with Mr. HUDDLESTON (against).

Until further notice:

Mr. LESHER with Mr. SWITZER.

Mr. WATKINS with Mr. NORTH.

Mr. CALDWELL with Mr. FORDNEY.

Mr. CONRY with Mr. LAFEAN.

Mr. BRUMBAUGH with Mr. MOONEY.

Mr. CASEY with Mr. HINDS.

Mr. MAHER with Mr. COLEMAN.

Mr. FLYNN with Mr. DARROW.

Mr. DRISCOLL with Mr. COSTELLO.

Mr. GODWIN of North Carolina with Mr. KIESS of Pennsylvania.

Mr. HART with Mr. SCOTT of Pennsylvania.

Mr. RIORDAN with Mr. WARD.

Mr. ALLEN with Mr. NORTON.

Mr. CANTRILL with Mr. LANGLEY.

Mr. GALLIVAN with Mr. HEATON.

Mr. HAMILL with Mr. GRIEST.

Mr. TAGUE with Mr. GRAHAM.

Mr. EGAN with Mr. KEISTER.

Mr. SPARKMAN with Mr. BARCHFELD.

For this session:

Mr. LIEBEL with Mr. ROWLAND.

The result of the vote was announced as above recorded.

The SPEAKER. The vote will now be taken on agreeing to section 56 of the Senate bill.

Mr. KAHN. Mr. Speaker, may I ask that that section be read?

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

SEC. 56. The volunteer army: The President is hereby authorized, at any time, to organize, maintain, and train, under the provisions of sections 3 to 12, both inclusive, of an act entitled "An act to provide for raising the volunteer forces of the United States in time of actual or threatened war," approved April 25, 1914, volunteer forces, not exceeding an average of 600 officers and enlisted men for each congressional district. The term of enlistment, which shall in no event be greater than that of the Regular Army, the period of service with the colors and with the reserve, and the period of training shall be as the President may prescribe, those passing to the reserve to have the status and obligations prescribed for reserves of the Regular Army: *Provided*, That as reserves no compensation shall be paid except for actual services. Officers and enlisted men of the volunteer forces raised under the provisions of this section shall be entitled to the pay and allowances of officers and enlisted men of corresponding grades in the Regular Army during periods of training only: *Provided further*, That without the consent of Congress such volunteer forces shall not be called out for field service for more than a total period exceeding 30 days in any one year.

Temporary appointments and promotions of officers of the Regular Army arising from the operation of this section may be terminated at the discretion of the President.

Officers of the Regular Army who receive commissions in the volunteer army herein authorized shall in time of peace receive the pay and allowances of their respective grades in the Regular Army, and no more.

The SPEAKER. The question is on agreeing to the amendment.

Mr. MANN. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 109, nays 251, answered "present" 2, not voting 71, as follows:

YEAS—109.

So the motion of Mr. KAHN as to section 56 was rejected.

The Clerk announced the following additional pairs:

On this vote:

Mr. LONGWORTH (for section 56) with Mr. LITTLEPAGE (against).

Mr. BORLAND (for section 56) with Mr. GOOD (against).

Mr. SCULLY (for section 56) with Mr. WILSON of Florida (against).

Mr. PETERS (for section 56) with Mr. HILLIARD (against).

Mr. HAMILTON of New York (for section 56) with Mr. HUDDLESTON (against).

Mr. FAIRCHILD (for section 56) with Mr. GOOD (against).

Until further notice:

Mr. CASEY with Mr. WILLIAMS of Ohio.

Mr. EAGAN with Mr. SUTHERLAND.

Mr. TAGUE with Mr. MORIN.

Mr. WHALEY with Mr. LEHLBACH.

Mr. LEWIS with Mr. KREIDER.

Mr. SEARS with Mr. HUTCHINSON.

Mr. ESTOPINAL with Mr. NICHOLS of Michigan.

Mr. FLYNN with Mr. MOONEY.

Mr. HART with Mr. JAMES.

Mr. GALLIVAN with Mr. SMITH of Minnesota.

Mr. HAMILL with Mr. GRAY of New Jersey.

Mr. KETTNER with Mr. BACHARACH.

Mr. BURNETT with Mr. DRUKKER.

Mr. SHACKLEFORD with Mr. VARE.

The result of the vote was announced as above recorded.

LEAVE OF ABSENCE.

By unanimous consent leave of absence was granted as follows:

To Mr. SHACKLEFORD, indefinitely, on account of illness.

To Mr. EAGAN, for three days, on account of illness in his family.

To Mr. STINESS, for one week, on account of important business.

REMOVAL OF BOTANIC GARDEN.

Mr. CLARK of Florida. Mr. Speaker, I desire to ask unanimous consent to file a minority report on H. R. 15313, a bill to remove the Botanic Garden to Rock Creek Park. (H. Rept. 641, pt. 2.)

The SPEAKER. The gentleman from Florida asks unanimous consent to file a minority report on the bill H. R. 15313.

Mr. MANN. What is the request?

Mr. CLARK of Florida. To file a minority report on the bill (H. R. 15313) to remove the Botanic Garden to Rock Creek Park.

The SPEAKER. Is there objection?

There was no objection.

THE MILITARY ESTABLISHMENT.

The SPEAKER. The next question is on section 122, and there has been provided 80 minutes' debate on it.

Mr. HAY. Do the gentlemen desire to have it read?

The SPEAKER. If the gentleman will state in a word what it is, there will be no use in reading it.

Mr. MANN. It is the nitrate proposition.

Mr. HAY. Do you want it read?

Mr. MANN. No.

Mr. HAY. I offer a substitute.

The SPEAKER. The gentleman from Virginia [Mr. HAY] offers a substitute.

Mr. MANN. Just a moment. Under the agreement it is in order to move that it is the sense of the House that the amendment ought to be agreed to.

Mr. HAY. I will make that motion.

Mr. MANN. I think that some one ought to make the motion and have it pending.

Mr. HAY. I will make that as a formal motion, that it be agreed to with the following substitute.

Mr. MANN. First that it be agreed to, and then you offer your substitute.

The SPEAKER. The gentleman makes the formal motion that section 122 be agreed to, and then he offers a substitute for it, which the Clerk will report.

The Clerk read as follows:

Amend Senate amendment to H. R. 12766 by striking out all of section 122 and inserting in lieu thereof the following:

"SEC. 122. That the President of the United States is hereby authorized and empowered to make or cause to be made such investigation as in his judgment is necessary to determine the best, cheapest, and most available means for the production of nitrates and other products for munitions of war and useful in the manufacture of fertilizers and other useful products by water power or any other power as in his judgment is the best and cheapest to use, and is also hereby authorized and empowered to designate for the exclusive use of the United States, if in his judgment such means is best and cheapest, such site or sites upon any navigable river or rivers or upon the public lands as, in his opinion, will be necessary for carrying out the purposes of this act, and is further authorized to construct, maintain, and operate, at or on any site or sites so designated, dams, locks, improvements to navigation, power houses, and other plants and equipment or other means than water power if in his judgment is best and cheapest, necessary or convenient for the generation of electrical or other power and for the production of nitrates or other products needed for munitions of war and useful in the manufacture of fertilizers and other useful products.

"That the President is authorized to lease, purchase, or acquire by condemnation, gift, grant, or devise such lands and rights of way as may be necessary for the construction and operation of such plants and to take from any lands of the United States, or to purchase or acquire by condemnation materials, minerals, and processes, patented or otherwise, necessary for the construction and operation of such plants and for the manufacture of such products.

"That the products of such plants shall be used by the President for military or naval purposes, and any surplus of either products or power not necessary for governmental purposes may be sold and disposed of under such regulations as he may prescribe: *Provided*, The surplus power so sold and disposed of shall be used in the manufacture of fertilizer and other useful products.

"That the President is hereby authorized and empowered to employ such officers, agents, or agencies as may, in his discretion, be necessary to enable him to carry out the purposes herein specified and to authorize and require such officers, agents, or agencies to perform any and all of the duties imposed upon him by the provisions hereof.

"That the sum of $20,000,000 is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, available until expended, to enable the President of the United States to carry out the purposes herein provided for.

"That the plant or plants provided for under this act shall be constructed and operated solely by the Government and not in conjunction with any other industry or enterprise carried on by private capital.

"That in order to raise the money appropriated by this act and necessary to carry its provisions into effect, the Secretary of the Treasury, upon the request of the President of the United States, may issue and sell or use for such purpose or construction hereinabove authorized any of the bonds of the United States now available in the Treasury of the

United States under the act of August 5, 1909, the act of February 4, 1910, and the act of March 2, 1911, relating to the issue of bonds for the construction of the Panama Canal, to a total amount not to exceed $20,000,000: *Provided*, That any Panama Canal bonds issued and sold or used under the provisions of this section may be made payable at such time after issue as the Secretary of the Treasury, in his discretion, may deem advisable, and fix instead of 50 years after date of issue, as in said act of August 5, 1909, not exceeding 50 years."

Mr. LENROOT and Mr. FOSTER rose.

Mr. FOSTER. Mr. Speaker, I offer an amendment.

The SPEAKER. The gentleman from Illinois [Mr. FOSTER] offers an amendment.

Mr. MANN. Mr. Speaker, I submit that this side of the House is entitled to recognition.

The SPEAKER. I think that is correct. The gentleman from Wisconsin [Mr LENROOT] is recognized.

Mr. LENROOT. Mr. Speaker, I offer an amendment to the original section.

Mr. FOSTER. Being, recognized, Mr. Speaker, I think I have the right to offer an amendment.

The SPEAKER. The Chair can not hear what the gentleman says.

Mr. FOSTER. I said I thought I had the right to offer an amendment to this amendment.

Mr. MANN. You will have that right.

Mr. HAY. I suggest, Mr. Speaker, that all gentlemen who desire to offer amendments may be permitted to do so, so that all phases of this matter may be voted upon.

Mr. MANN. There is no difficulty about it at all. The gentleman from Wisconsin [Mr. LENROOT] is offering an amendment.

Mr. FOSTER. The gentleman from Wisconsin is no more entitled than I am. It seems to me I ought to have the right.

The SPEAKER. The Clerk will report the amendment offered by the gentleman from Illinois [Mr. FOSTER] and then the other.

The Clerk read as follows:

Amendment offered by Mr. FOSTER: Strike out all of the third paragraph of the amendment and insert the following:

"That the products of such plant shall be used by the President for military and naval purposes, to the extent that he may deem necessary, and any surplus which he shall determine is not required shall be sold and disposed of by him under such regulations as he may prescribe."

The SPEAKER. Now the Clerk will report the amendment offered by the gentleman from Wisconsin [Mr. LENROOT].

The Clerk read as follows:

Amendment offered by Mr. LENROOT: Amend Senate amendment to H. R. 12766 by striking out of said amendment lines 14 to 25, inclusive, on page 206, and lines 1 and 2, on page 207, and inserting in lieu thereof the following:

"That the Secretary of War is authorized and directed to investigate and to recommend for designation or withdrawal such dam sites and water-power sites as in his opinion will be necessary for carrying out the purposes of this act.

"That the Secretary of War, the Secretary of the Interior, and the Secretary of Agriculture are constituted a commission whose duty it shall be to ascertain the most practicable means and comparative costs of producing within the United States nitrogen compounds by the fixation of atmospheric nitrogen or otherwise needed for munitions of war and useful in the manufacture of fertilizers and other useful products. In making such investigation the commission may utilize the various agencies of the Government and may cooperate with States or other agencies in the performance of its duties.

"It shall as early as practicable, not later than December 1, 1916, report the facts ascertained together with its recommendations to the President, which recommendations shall include the designation of a site or sites for the construction of a plant or plants for the purposes aforesaid.

"If the commission shall recommend the production of such nitrogen compounds through the utilization of water-power sites, then the Secretary of War is hereby authorized to construct, maintain, and operate at or on any water-power site designated or withdrawn by the President and recommended by the commission as herein provided dams, locks, power houses, and other plants and equipment necessary or convenient for the generation of electrical or other power and for the production of nitrates or other products needed for munitions of war and nitrogen compounds useful as or in the manufacture of fertilizers.

"If such commission shall recommend the production of such nitrogen compounds by means other than the utilization of water-power sites, the Secretary of War is likewise authorized to construct, maintain, and operate at any point recommended by such commission as aforesaid plants and equipment of such character as may have been recommended by such commission as herein provided: *Provided*, That no expenditure shall be made or contracts entered into by the Secretary of War requiring an expenditure for the construction of said plant or plants of a greater amount than the appropriation hereinafter made: *Provided further*, That no expenditure shall be made or contracts entered into for the construction of any dam or plant herein authorized until such processes, patented or otherwise, necessary for the operation of such plants and for the manufacture of such products are first secured."

Further amend by striking out lines 11 to 15, inclusive, on page 207, and insert in lieu thereof the following:

"That the products of such plants shall be used by the Secretary of War and Secretary of the Navy for military and naval purposes to the extent that they may deem necessary, and any surplus which they shall determine is not so required shall be sold and disposed of by the Secretary of Agriculture under such regulations as he may prescribe."

The SPEAKER. The gentleman from Virginia [Mr. HAY] is entitled to 40 minutes and the gentleman from California [Mr. KAHN] to 40 minutes.

Mr. HAY. Mr. Speaker, I will ask if anybody else wants to offer any further propositions. Does the gentleman from South Carolina [Mr. LEVER] want to offer an amendment?

Mr. LEVER. No.

Mr. HAY. I want to say, Mr. Speaker, that if anybody wants to offer an amendment, he ought to do it now. It ought to be pending. There will be no five-minute debate after the general debate is ended.

Mr. LEVER. Mr. Speaker, with that statement, I offer the following amendment to the amendment offered by the gentleman from Wisconsin [Mr. LENROOT]. I offer it to the second amendment.

The SPEAKER. The Clerk will report it.

Mr. MANN. Let that be offered by unanimous consent. Let us see what the status would be.

The Clerk read as follows:

Mr. LEVER offers the following as a substitute for the amendment offered by Mr. LENROOT: "That the Secretary of War, the Secretary of the Navy, the Secretary of the Interior, and the Secretary of Agriculture are constituted a commission whose duty it shall be to ascertain the praticability and best means of producing within the United States nitrogen compounds by the fixation of atmospheric nitrogen or otherwise and of obtaining potash from kelp, alunite, feldspar, or any other material for use in the manufacture of munitions of war and fertilizers.

"The commission may utilize the various agencies of the Government and may cooperate with States and with private persons or agencies in carrying out its purposes, and shall report to Congress as early as practicable, not later than the first day of the next regular session of this Congress, the facts ascertained, together with recommendations for action by Congress and the draft of a bill to carry out such recommendations.

"The commission may elect a chairman, and the funds appropriated for its use shall be paid out on warrants signed by him, or by an acting chairman designated by him, drawn on the Secretary of the Treasury.

"There is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, available until expended, the sum of $50,000, to enable the commission to carry out its purposes, including the hire of experts, clerks, and other employees, and payment of rent, traveling and other expenses, within and outside of the District of Columbia.

"To provide an adequate supply of nitrogen compounds produced by the fixation of atmospheric nitrogen or otherwise, and to provide an adequate supply of potash for the military and agricultural needs of the United States, the appropriation hereafter of such sum or sums as may be necessary is hereby authorized."

Mr. LENROOT. Mr. Speaker, reserving a point of order upon it, this is a substitute for the entire section. My amendment amends only certain portions of the section. Therefore I shall have to make a point of order. I do not think there will be any difficulty in securing a separate vote upon this proposition.

Mr. HAY. I ask unanimous consent, Mr. Speaker, that all these propositions may be voted upon.

Mr. LEVER. That is satisfactory to me.

The SPEAKER. The gentleman from Virginia [Mr. HAY] asks unanimous consent that all these amendments and substitutes, and so forth, be voted for by the House. Is there objection?

There was no objection.

Mr. SMALL. Mr. Speaker, I offer an amendment.

The SPEAKER. To what?

Mr. SMALL. To the amendment offered by the gentleman from Virginia [Mr. HAY].

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

Amendment offered by Mr. SMALL to the substitute offered by Mr. HAY: After the word "other," in line 7, strike out the word "power" and insert the word "method."

Mr. LENROOT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LENROOT. As the amendments now stand, would I not be entitled to a vote upon my amendment in advance of the other propositions that have been made, mine being an amendment to the original section?

Mr. HAY. The vote on the substitute comes first.

The SPEAKER. This unanimous consent to offer all these things knocks the rule endwise.

Mr. MANN. There has not been any unanimous consent to offer them all, has there been?

The SPEAKER. Yes. The gentleman is mistaken. It has not been two minutes since the gentleman from Virginia [Mr. HAY] asked unanimous consent.

Mr. MANN. We did not understand it that way.

The SPEAKER. The Chair can not help that.

Mr. MANN. I think the Chair should help.

The SPEAKER. The Chair put the question, as he always does, and nobody objected.

Mr. MANN. The Chair did not state the question. I understood it only related to the Lever amendment. I have no objection, though.

Mr. HAY. I asked unanimous consent that all gentlemen should have the right to offer these amendments and that they

should be voted upon at some time during these proceedings. As I understood, the Chair put the question.

The SPEAKER. The Chair did put the question.

Mr. MANN. What the Chair stated was, "Is there objection."

The SPEAKER. And nobody objected.

Mr. MANN. That is true; but hereafter when the Chair states that, I shall object unless the Chair states the question. We understood that it related only to the Lever amendment. I want everybody to have a chance to offer amendments, but it is important to know in advance the order of voting.

Mr. HAY. I know, and that is a thing that the Speaker must decide.

Mr. MANN. We ought to have it decided in advance, then; and, as I understand——

The SPEAKER. The Chair carried out the technical rule exactly. The Official Reporter's notes show that the Chair said that the gentleman from Virginia asked unanimous consent that all of the amendments and substitutes be voted on, and the Chair asked if there was any objection, and nobody objected. That is what the Official Reporter's notes show.

Mr. MANN. I have no doubt that is what the Official Reporter's notes show, but that is not the question.

The SPEAKER. What is the question?

Mr. MANN. As the Chair just stated, it was that all those amendments should be voted upon.

The SPEAKER. That is all the Chair could state.

Mr. MANN. But it was not in order to offer them.

The SPEAKER. The Chair knows that technically under the rule you can have one amendment, an amendment to the amendment, a substitute for that, and one amendment to the substitute. That is the rule, and when the gentleman from Virginia [Mr. HAY] got unanimous consent that these amendments should be voted on, as the Chair stated a while ago, that knocked the rule in the head temporarily.

Mr. SLAYDEN. Knocked it endwise, the Speaker said.

Mr. HAY. I will say to the gentleman from Illinois——

Mr. MANN. I have no objection to the amendments being offered, but we would like to know what the order is as to voting before we give consent.

Mr. HAY. There is no trouble about that.

The SPEAKER. There will be no trouble about that.

Mr. MANN. That remains to be seen.

The SPEAKER. The vote is first on the amendment to the substitute. That is Dr. FOSTER's amendment.

Mr. HAY. As a matter of fact, Mr. Speaker, neither one of these propositions is a substitute. They are both amendments to the section.

The SPEAKER. The gentleman offered his substitute. Then the gentleman from Illinois [Mr. FOSTER] offered an amendment to that. The gentleman from Wisconsin [Mr. LENROOT] offered an amendment, or a paper that from the hasty reading of it seemed to the Chair to be a substitute.

Mr. MANN. No; to the original text.

Mr. LENROOT. To the original text, not to strike out all.

The SPEAKER. Then in the fourth place the gentleman from South Carolina [Mr. LEVER] offered a substitute. Then the gentleman from North Carolina [Mr. SMALL] offered an amendment to the substitute. Now, the Chair thinks that the proper order of voting would be that the amendment of the gentleman from Illinois [Mr. FOSTER] be voted on first, and the amendment of the gentleman from Wisconsin [Mr. LENROOT] be voted on second; then, that the substitute of the gentleman from Virginia [Mr. HAY] be voted on, and if that is agreed to that is the end of it.

Mr. SHERLEY. If the Chair please, the motion made by the gentleman from Virginia [Mr. HAY] does not differ in its character from that made by the gentleman from Wisconsin [Mr. LENROOT]. At the instance of the gentleman from Illinois [Mr. MANN] it was suggested that a motion ought to be made by someone to agree to this amendment of the Senate, and then these other amendments would come in; whereupon the gentleman from Virginia [Mr. HAY] made that motion, and with it the amendment which he sent to the desk and which was read. Now the gentleman from Wisconsin [Mr. LENROOT] offered in lieu of that an amendment to section 122, and that is exactly what the gentleman from Virginia [Mr. HAY] has done. He has offered an amendment to section 122.

Mr. LENROOT. Will the gentleman yield?

Mr. SHERLEY. Yes.

Mr. LENROOT. The gentleman from Virginia has offered a substitute for section 122. I have offered a simple amendment.

Mr. SHERLEY. The gentleman is mistaken in fact, because what happened was this: The gentleman from Virginia moved that section 122 be agreed to, and he did it at the suggestion of the gentleman from Illinois, and then immediately followed it with an amendment. In other words, if the motion be agreed to——

Mr. LENROOT. The gentleman is mistaken about what took place.

Mr. SHERLEY. The record will show.

Mr. LENROOT. We know what took place, but the gentleman is mistaken as to the——

The SPEAKER. The gentleman from Virginia [Mr. HAY] made two motions, and they have nothing in the world to do with each other.

Mr. MANN. Mr. Speaker, the gentleman from Virginia [Mr. HAY] offered a motion that it be the sense of the House that section 122 of the Senate amendment be agreed to, because that was necessary, under the rule that was adopted, to get in another amendment.

The SPEAKER. Yes; that is correct.

Mr. MANN. Then the gentleman from Virginia offered a substitute for section 122. We had figured the matter out. The gentleman from Virginia could offer an amendment to section 122, to strike out all after the first word, and if he had we should have offered a substitute for it, to make it six of one and half a dozen of the other. Then the gentleman from Illinois, my colleague, Dr. FOSTER, offered an amendment to the substitute. Then the gentleman from Wisconsin, Mr. LENROOT, offered an amendment to the original text. So far, that is easy, and that is as far as you could go under the ordinary rule.

The SPEAKER. Yes.

Mr. MANN. And under that the first vote in order would be upon perfecting the original text of the bill and then on perfecting the text of the substitute, and then on the substitute.

Mr. HAY. That is the Hay substitute.

Mr. MANN. Yes. Then the gentleman from South Carolina, Mr. SMALL offered what he called a substitute, though, of course, he could not offer a substitute except by unanimous consent, to the motion of the gentleman from Wisconsin [Mr. LENROOT] and several others. Now, of course, you can not vote on the substitute of the gentleman from Virginia first, because if it is agreed to that ends everything. We do not care how we vote, so that we understand. Having got beyond the parliamentary stages of amendment, we must have an understanding and agreement as to how the vote is to be taken.

Mr. LEVER. Will the gentleman yield for a question?

Mr. MANN. Certainly.

Mr. LEVER. As I understood it the gentleman from Virginia [Mr. HAY] in his first motion moved that the sense of the House is not to agree to the Senate amendment.

Mr. MANN. No; to agree. That is the form of the motion. That motion had to be made.

Mr. LEVER. To agree to the Senate amendment; yes.

The question I wish to ask is, Will that be a straight vote unencumbered by amendments to the substitute?

Mr. MANN. Undoubtedly there will be a straight vote on that.

Mr. HAY. It seems to me that I having offered a substitute and the gentleman from Illinois [Mr. FOSTER] having offered an amendment to that substitute, the first vote is on his amendment to the substitute.

The SPEAKER. No question about that.

Mr. HAY. Very well; when the substitute is perfected then the vote comes, I take it, on the amendment of the gentleman from Wisconsin [Mr. LENROOT] who desires to perfect the text.

The SPEAKER. Yes.

Mr. HAY. Then it comes on the substitute offered by the gentleman from South Carolina [Mr. LEVER] if that is still where it can be gotten up. Then some other gentleman over on that side seemed to want to offer some amendments.

Mr. MANN. That is all we want to get at, to know the order of voting.

Mr. FERRIS. Mr. Speaker, irrespective of, and way beyond the offering of amendments, the gentleman from Virginia [Mr. HAY] asked unanimous consent that a separate vote be had on each proposition in the order that they were offered. The Speaker of the House put the motion and there was no objection heard. The gentleman from Illinois now comes in and wants to change that because he says he did not understand it. I submit that if there was a bona fide misunderstanding——

The SPEAKER. Here is what the gentleman from Oklahoma gets wrong. The reporter's notes do not show, and I do not think it ever happened, that the gentleman from Virginia made any request that they be voted on as they were offered.

Mr. HAY. No; the request I made was that everybody who wanted to offer an amendment be allowed now to offer it. That was all.

The SPEAKER. The only question bothering anybody now is to get at the order in which the various propositions that are contrary to the rule shall be voted on.

Mr. FERRIS. I submit that the chairman of the committee, who offered the original proposition under a tacit consent, should have his proposition voted on first.

Mr. SHERLEY. Mr. Speaker, if the Chair will permit, I think the matter can be arrived at by unanimous agreement. As long as consent is being given that a vote be had on every amendment, it must follow that we shall arrange not to have a vote come on an amendment at a stage at which it can not properly have any effect. I suggest that it ought to be this, that the amendment offered by the gentleman from Virginia——

Mr. MANN. To perfect the text of the substitute.

Mr. SHERLEY. First to perfect the text of the substitute offered by the gentleman from Virginia; then there should be a vote on the amendment to the one offered by the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. There is none pending.

Mr. SHERLEY. I understood the gentleman from South Carolina [Mr. LEVER] offered one.

Mr. LENROOT. I made a point of order, and he withdrew it.

Mr. SHERLEY. Then let the vote come on the amendment of the gentleman from Wisconsin; and if that carries there will then come a vote on the motion of the gentleman from Illinois. If it is voted down, then there comes a vote on the motion of the gentleman from Virginia——

Mr. MANN. That is all right; that is perfectly agreeable. Let us see if we understand it. As I understand the gentleman's proposition, it is that the final vote shall be taken on the first motion that we agree to the Senate amendment 122; that the vote before the final vote shall be had on perfecting the substitute of the gentleman from Virginia.

Mr. HAY. I did not understand that; I understood the Speaker to say that the first vote was on the amendment of the gentleman from Illinois [Mr. FOSTER].

Mr. MANN. I have not got to that yet.

Mr. FITZGERALD. Why does not the gentleman from Illinois state it in the reverse order?

Mr. MANN. The first vote should be on the amendment, either in the order or reverse order, as the gentleman from Kentucky said, but he did not say which, to the Hay substitute.

Mr. SHERLEY. I do not think it matters. What you have to do is to perfect the Hay substitute.

Mr. MANN. The order in which they are offered or the reverse order—it is immaterial to me.

Mr. SHERLEY. I do not care.

Mr. LENROOT. I would like to inquire whether as a matter of parliamentary law we are not entitled to perfect the original section before any amendment is voted upon to a substitute?

Mr. HAY. This is not an original section; this is a part of an amendment of the Senate.

Mr. LENROOT. For this purpose it is considered a separate section.

Mr. HAY. It is not; it does not come within the usual parliamentary procedure. We are considering a proposition contained in one section of the Senate amendment, and the proposition is, I offer a substitute for that section and the gentleman from Illinois [Mr. FOSTER] offers an amendment to the substitute and the gentleman from Wisconsin offers an amendment to the section. I thought it was understood that we should first perfect the substitute I offered and then vote on the amendment offered by the gentleman from Wisconsin and then vote on the substitute.

The SPEAKER. That is easy enough down to where you strike the amendment of the gentleman from North Carolina. What becomes of him?

Mr. HAY. If the proposition of the gentleman from Wisconsin is voted down, then we can vote on the amendment offered by the gentleman from North Carolina.

Mr. LEVER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LEVER. There are a number of us here who desire a straight vote on the Senate proposition.

It seems to me, as the parliamentary situation stands, there can be no direct vote on the proposition, and it looks to me as if it would expedite matters if we could have a separate vote on the Senate proposition. If that is voted down, then these other propositions would logically follow.

Mr. MANN. That can not be done.

Mr. LEVER. We are taking up a lot of time here the other way in not getting a separate vote.

Mr. MANN. Mr. Speaker, I am going to make a request for unanimous consent, after I call the attention of the Chair to the rules.

The SPEAKER. This whole matter is entirely out of the usual rule, and the only thing to do is to get a unanimous-consent agreement as to how to vote on these various propositions. If we do not get an agreement, the Chair will exercise the best sense he has as to which amendment shall be voted on first.

Mr. MANN. The Chair I suppose will observe the rules as far as they apply.

The SPEAKER. The Chair will observe the rules as far as they apply.

Mr. MANN. Under the agreement section 122 of the Senate amendment is before the House, with the right to offer amendments to it. The rule—Rule XIX—provides:

> When a motion or proposition is under consideration, a motion to amend and a motion to amend that amendment shall be in order, and it shall also be in order to offer a further amendment by way of substitute, to which one amendment may be offered, but which shall not be voted on until the original matter is perfected.

That clearly states whether you shall vote on the amendment to the original text or on the substitute first, and states that while all of these amendments or motions may be pending at one time the vote is first taken on the motion to perfect the text. I ask unanimous consent that the vote may first be taken on the amendments to perfect the text of section 122.

The SPEAKER. Is that the Lenroot amendment?

Mr. MANN. And the Lever amendment in the order in which they are offered, and that then the votes may be taken on the amendments to perfect the substitute in the order in which they are offered.

Mr. LEVER. Why would not the gentleman give us a separate vote on the Senate proposition first and then these other matters will work out easily? There are a number of us who would like to have a separate vote on it.

Mr. MANN. Suppose on a separate vote the House should determine, with nothing else before it, that it was the sense of the House that section 122 be agreed to. Then there would be nothing else left.

Mr. LEVER. That is what we would like to have done.

Mr. MANN. I know, but the gentleman wants to prevent us voting on any other proposition, and we will not consent to that.

Mr. HAY. Mr. Speaker, for the purpose of leaving the whole matter with the Speaker, I object.

Mr. MILLER of Pennsylvania. That is right, and that ought to have been done half an hour ago.

The SPEAKER. If the whole thing is left with the Speaker, this is the order in which the vote will be taken. The first vote will be taken on the Lenroot amendment. That goes to perfecting the text. Then the vote will be on the Foster amendment to perfect the substitute of the gentleman from Virginia [Mr. HAY]. Then the vote will be taken on the Small amendment to perfect this extraordinary substitute of the gentleman from South Carolina [Mr. LEVER].

Mr. HAY. But, Mr. Speaker, the gentleman from North Carolina [Mr. SMALL] offered an amendment to the substitute which I offered.

The SPEAKER. Then that is to be voted on after the Foster amendment. Then the vote will be on the Lever amendment as a substitute for the substitute.

Mr. STERLING. Mr. Speaker, I have an amendment which I desire to offer to the original text.

The SPEAKER. The gentleman will send it up, and the Clerk will report.

The Clerk read as follows:

> Amendment by Mr. STERLING: Page 207, strike out lines 20 to 23, inclusive.

Mr. ANTHONY. Mr. Speaker, I have an amendment that I would like to offer.

The SPEAKER. What is it to?

Mr. ANTHONY. Section 122.

The SPEAKER. To perfect the text?

Mr. ANTHONY. It is a substitute for the section.

The SPEAKER. We have two substitutes now.

Mr. ANTHONY. But it has been the understanding that section 122 was open to amendment and that all amendments would be pending, so I desire to offer it.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. On the amendments offered as substitutes for the original text, I take it that the first vote would be on the Hay substitute.

The SPEAKER. Yes.

Mr. MANN. If that should be agreed to, would there be anything else left of the other substitutes offered? I do not see how there could be myself.

The SPEAKER. The Chair will state it over again. The first vote will be taken on the Lenroot amendment. The second vote will be on the Sterling amendment because it is an amendment to perfect the text. The third vote will then be taken on the Foster amendment to the Hay substitute. The fourth vote will be on the Small amendment to the Hay substitute.

Mr. LEVER. Mr. Speaker, I think probably I can help cut the Gordian knot by asking unanimous consent to withdraw my amendment.

The SPEAKER. The Chair is much obliged to the gentleman. [Laughter and applause.] The gentleman from South Carolina withdraws his amendment. Then the vote will be taken on the Hay substitute as perfected.

Mr. ADAMSON. Mr. Speaker——

The SPEAKER. Then on the Hay substitute as perfected.

Mr. ADAMSON. Mr. Speaker, I would like to propound a parliamentary inquiry to the Speaker. There is pending here on the calendar a substitute for the Shields bill, reported by the Committee on Interstate and Foreign Commerce, that if passed would guarantee the use of private capital for all these desired projects. I want to know whether if it would be in order anywhere in connection with all this complicated situation to offer that bill as a solution?

The SPEAKER. The Chair does not think it would be germane. The gentleman from Virginia is recognized for 40 minutes.

Mr. MANN. What becomes of the Anthony substitute?

The SPEAKER. Is the paper sent up by the gentleman from Kansas an amendment or a substitute?

Mr. ANTHONY. I sent up a substitute.

The SPEAKER. Is it a substitute or an amendment?

Mr. ANTHONY. It is offered as a substitute.

The SPEAKER. For what?

Mr. ANTHONY. For section 122.

The SPEAKER. The Chair knows, but the gentleman from Virginia has offered a substitute.

Mr. ANTHONY. I ask that my substitute be considered after that of the gentleman from Virginia is considered.

The SPEAKER. All right. The gentleman from Virginia is recognized for 40 minutes.

Mr. FITZGERALD. If this substitute is offered, I am going to make a point of order against it. Mr. Speaker, I make the point of order that no other substitute is in order.

The SPEAKER. The Clerk will report the Anthony substitute.

Mr. HAY. There was unanimous consent asked to offer the substitute.

The SPEAKER. Yes; and the Chair has ordered the Clerk to read it.

The Clerk read as follows:

That a commission of three officers of Engineers shall be designated by the Secretary of War to investigate and report at the earliest date practicable on the most desirable site for the location for the establishment of hydroelectric power for the purpose of the location of a plant for the manufacture of atmospheric nitrogen, and that the President is hereby authorized to select the most desirable location, and the construction of dams, power houses, and the installation of suitable machinery is hereby authorized: *Provided further*, That the President is also authorized to approve, should he deem it advisable, a contract with such responsible manufacturers of atmospheric nitrogen as will pay the United States not less than 3 per cent per annum on the value of site, dam, and power plant, and reserving to the Secretary of War the right to use such manufacturing plant exclusively if necessary for the purposes of the Government in time of war, and to equitably regulate the prices at which these products shall be sold in time of peace.

Mr. HAY. Mr. Speaker, I desire to be recognized for five minutes—that is, I want the time called at the end of five minutes. Mr. Speaker, if there is any one proposition that makes for preparedness in this bill it is the proposition to establish a nitrate plant through which the Government can manufacture powder enough to supply its needs in time of war. At present the Government and every other powder manufacturer in this country has to rely upon the Chilean nitrate beds for the nitrates which are necessary to manufacture powder. I am opposed to the proposition of the gentleman from Wisconsin [Mr. LENROOT] because it provides for a commission and postpones the preparation which we ought to make at once. I am opposed to the proposition of the gentleman from South Carolina [Mr. LEVER] for the same reason. I want to see the House authorize a nitrate plant and appropriate the money to put it up and have that done as soon as possible. [Applause.] I know nothing about this question of water power that seems to enter into this proposition. All I want is to give the Government the power to do this and to do it at once, and all these questions of water power I leave for other gentlemen to settle, and ask the House in the final analysis to vote for a plant and to vote for the money to build it. I reserve the balance of my time. [Applause.]

The SPEAKER. The gentleman has used three minutes.

Mr. KAHN. Mr. Speaker, I yield 20 minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Speaker, the gentleman from Virginia [Mr. HAY] has just stated that he knew nothing about the water-power proposition in connection with this question, and that ignorance upon his part, and that alone, excuses the gentleman from Virginia for offering a substitute in the form in which he has offered it. Mr. Speaker, I have in times past expressed a fear that this water-power lobby, which has been so active and so pernicious about this Capitol, would get that which it desired from the conference committee upon this bill, and, Mr. Speaker, if the substitute of the gentleman from Virginia, as proposed, is adopted, this water-power lobby gets exactly what it wants. This water-power lobby then gets what it has been before the Committee on Rivers and Harbors trying to get, before the various committees of the House trying to get. The Muscle Shoals Water Power——

Mr. GORDON. Will the gentleman yield?

Mr. LENROOT. I can not yield now—selling to this company the surplus that is not needed for the governmental uses provided for in this bill to this American Cyanamide Co. something over 150,000 horsepower for $3 per year, whereas they are now paying, this same company, at Niagara Falls, $10.50 per year. That is the proposition. I am sorry, indeed, that the gentleman from Virginia has been led into it. The amendment that he has proposed is deceptive in itself. He has one provision that provides that there shall be no private cooperation in this business and he has another proposition absolutely inconsistent and in conflict with it that requires the sale of this surplus power to corporations, for what?

The manufacture of fertilizer means either the American Cyanamide Co. or the Du Pont Powder Co., for they have the only two processes known in the United States for the manufacture of fertilizer through fixed nitrogen.

Now, Mr. Speaker, the amendment I have proposed ought to appeal to every Member of this House. It provides that this entire matter be investigated by a commission consisting of the Secretary of Agriculture, the Secretary of War, and the Secretary of the Interior, with instructions to investigate the methods of obtaining fixed nitrogen and nitrogen compounds, with power to designate the site upon which a plant shall be constructed, and to make their recommendations to the President as soon as may be, but not later than December 1 next. If they find that the cheapest and best method is the extraction of this nitrogen from coal and peat and products of that kind, they may so recommend, and such a plant will be constructed. If they find that water power is the best means, they will recommend that. But until this investigation is made, until they make the report to the President, the Secretary of War is not authorized by my amendment to expend a single dollar, and he ought not to be.

Why, Mr. Speaker, it is unthinkable, almost, the way this situation comes before Congress. We have a proposition here upon which no committee of the House has ever taken any testimony or attempted to secure any information, except from Frank Washburn, the president of the American Cyanamide Co., and the corporations that he represents. Who is Frank Washburn? He is chairman of the board of directors of the Alabama Water Power Co., which is the Muscle Shoals proposition. He is president of the American Cyanamide Co., which has a plant at Niagara Falls. His associate is J. W. Worthington, director of the Alabama Water Power Co.; and, Mr. Speaker, inasmuch as the gentleman from Virginia [Mr. HAY] has offered this amendment and asked you upon the Democratic side of the House to follow him, I want to read into this RECORD a telegram from this same J. W. Worthington to N. C. Elting, Florence, Ala., dated March 7, right after the Army bill was reported, and which, as you know, contained an authorization for this kind of a plant. He says:

Will you please extend my thanks and hearty feeling of congratulations and encouragement to the courageous, upstanding, constructive people of Florence, and tell them that the bill introduced in the House by the Military Committee authorizing the development of water power and construction of atmospheric nitrogen nitric-acid plants, and Chairman HAY, in his report on the bill, in part says:

"The committee consider this question of the first importance in the consideration of preparedness for national security."

Mark what follows, with reference to this water-power lobby:

Our efforts, supported by the lead of Florence, secured the authorization for the proposed development, and if Florence will stand pat, put up, and see us through, we will get these plants. The total development with fertilizer plants established to cost $50,000,000.

He boasts of the fact that it was this lobby that secured in this Army bill, reported by the gentleman from Virginia, the nitrate plant which this House voted out by a very large majority when it was originally before the House. And, Mr. Speaker, in connection with the efforts of some of these gentlemen, I want to submit to the House a very interesting matter. The Smithsonian Institution has been making some investigations of the different methods of securing nitric acid. They sent to the newspapers of the country a communication, to be published or released on May 6, which was last Saturday. It is as follows:

NATIONAL MUSEUM SHOWS SOURCE OF WAR NITRATES.

WASHINGTON, D. C.

One of the prime essentials in the manufacture of explosives is nitrogen. To-day this country's supply of nitrates is drawn solely from Chilean sources, which would become either unavailable or insufficient to meet the demands in case of war. In view of the importance of nitrogen as nitric acid for military purposes, therefore, it is worth while to know the available sources within the United States, and to this end the United States National Museum has just assembled an exhibit covering the situation.

As indicated in the exhibit, there are three sources of nitrogen, namely, mineral deposits of nitrogen in ores, nitrogen in the air, and nitrogen in coal, together with its present-day analogue, peat. Of the three, the first-named source is at present confined entirely in Chile, and it is doubtful whether any significant deposits will ever be uncovered in this country. The air is composed approximately of four-fifths nitrogen, and accordingly affords an absolutely unlimited source of nitrogen, if feasible means for its extraction were known. Much has been said recently about the discovery of a process of extracting it by means of electricity. It is a fact that, in passing through an electric arc, the oxygen and nitrogen of the air combine to form nitric oxide—a fact which accounts for the odor which is so often noticeable in the immediate vicinity of a flash of lightning.

Many attempts have been made to put this scientific fact on a practical basis, but thus far the only successful efforts in this direction have been made in Norway, where an enormous amount of water power is available for electric generation, and where at the same time, owing to limited manufacturing industries, relatively little of this hydroelectric power is needed commercially. In this country, however, all electric power developed finds a ready market for manufacturing purposes at prices which have thus far rendered its use in the fixation of nitrogen impractical.

There is one other method of recovering nitrogen from the air, known as the cyanamide process, but this, like the direct electrical method, is based fundamentally on the development of water power, and accordingly is open to much the same restrictions as the other process, although this country has one company, located at Niagara Falls, which is actively engaged in the manufacture of nitrogen by the cyanamide process.

The third source, that of nitrogen in coal, is of more practical nature, as is evidenced by the fact that Germany has been able to supply from this one source alone all of the vast requirements in connection with her present state of war. To do this, according to the most authentic statistics available, she has an annual yield of between 250,000 and 300,000 tons of ammonium sulphate from her by-product coking operations. Our own country to-day, according to the latest Geological Survey reports, is producing ammonium sulphate at the rate of 212,000 tons per year, or five-sixths of the total now available to Germany in her present extreme crisis. Moreover, with the wastefulness characteristic of this country's methods, sufficient additional coal is coked by old-fashioned methods to swell the total sulphate production, if saved, to 730,000 tons, or more than twice that of Germany. It is thus seen that without the least extension our present sources can more than care for any emergency, even while supplying all agricultural and other chemical needs.

The nitrogen liberated from coal, it is true, is in the form of ammonia, but its conversion to nitric acid is an extremely simple matter. Some years ago the famous German chemist Ostwald discovered that ammonia gas mixed with air and heated to a moderate temperature in the presence of a platinum wire was oxidized to nitric acid. Accordingly all that is necessary is to pass a correctly proportioned mixture of air and ammonia through a pipe supplied with a platinum wire and let the resultant gas exhaust into a vat of water. The reason why this simple procedure has not long since been put in practice by American manufacturers is that our by-product coke industry is really just in its infancy. The number of our by-products plants now in operation and saving the essentials of nitric acid as well as other valuable coal products is over 40, but the number is constantly increasing at the expense of the wasteful beehive type of oven, which only a few years ago reigned supreme in this country. This gradual elimination of the beehive type of oven in favor of the by-product oven is bound to continue, even if unhastened by any awakening to a real sense of our wastefulness. They are located characteristically at industrial centers, removed from the dangers of the seacoast, and, for the most part, constitute portions of the very type of works which would be called upon to furnish munitions supplies. In the event of war, therefore, an adequate nitrate supply should be among the simplest problems confronting this country.

On May 1 this communication went to the newspapers of the country, reading as follows:

SMITHSONIAN INSTITUTION,
*May 1, 1916.*

Kill article "National Museum shows source of war nitrates," released for May 6, and return in inclosed franked envelope for insertion of additional data and later publication.

H. W. DORSEY,
*Chief Clerk Smithsonian Institution.*

Mr. BUTLER. What does that mean?

Mr. LENROOT. I think this House surmises what that means. It means that this communication went to the newspapers of the country and some of the newspapers that were interested with this water-power monopoly communicated the fact, and the lobby here in Washington, through some influence, secured the killing of that article by the Smithsonian Institution.

Mr. SHERLEY. Will the gentleman yield?

Mr. LENROOT. Yes.

Mr. SHERLEY. What is there in the Senate provision 122 that would in any way, if it was adopted in its present form, help any water-power company?

Mr. LENROOT. Only one.

Mr. SHERLEY. Put your finger on the language.

Mr. LENROOT. Only one; but nobody proposes, let me say to the gentleman——

Mr. SHERLEY. I propose.

Mr. LENROOT. The gentleman from Virginia does not propose to accept the Senate proposition.

Mr. SHERLEY. I do.

Mr. LENROOT. I will be very frank with the gentleman. There is a very serious question whether we can condemn patented processes so far as the manufacture of fertilizer is concerned, and the gentleman recognizes that is a question there; and my proposition proposes that before we expend money upon a proposition involving $15,000,000 or $20,000,000 that that question shall be first determined so that we may know, after we spend our $15,000,000 or $20,000,000, that we are going to be able then to get nitric acid and nitric-acid compounds.

Mr. RAGSDALE. Mr. Speaker, will the gentleman permit an interruption?

The SPEAKER. Does the gentleman yield?

Mr. LENROOT. No; I can not yield.

The SPEAKER. The gentleman declines to yield.

Mr. LENROOT. That is what the situation is, Mr. Speaker. This water-power lobby, infesting every nook and corner of this Capital, is boasting of the fact that it has secured the incorporation of what it desires in the Army bill, as reported to the House. Now it is fair to say that that same interest secured the killing of a communication sent out by the Smithsonian Institution of this city, because they knew that that information, if promulgated, would be detrimental to their proposition.

Now, the gentleman from Kentucky [Mr. SHERLEY] asked me a moment ago what there was in the Senate proposition that would be of interest or benefit to the water-power lobby. I will tell him further that the Senate amendment limits these plants to water powers. Both processes are controlled by a monopoly to-day. Let me read what Mr. Washburn, of the American Cyanamide Co., said in his statement before the Committee on Agriculture. I read:

The CHAIRMAN. Are their processes available to the general public, or are they controlled by one set of men in this country?

Mr. WASHBURN. They are controlled by one concern under patents. We have about 100 patents.

Mr. RUBEY then asked him this question:

Then the next year and the next year you would have additional patents, so that it never would come?

Mr. Washburn interrupted and said:

We propose that no time shall ever come when anybody can compete with us if it is within our power to prevent it.

Now, Mr. Speaker, if this House would act as a business man should act, it would adopt the proposition I have pending, which calls for a full and free investigation by three members of the Cabinet; to investigate the entire question; investigate the methods and cost and determine the sites. Then my proposition permits them to go ahead. There is no delay.

The substitute offered by the gentleman from Virginia [Mr. HAY] looks very fair upon its face. He proposes to put this matter into the hands of the President. I say it looks fair on its face, outside of the proposition that provides for the sale of all surplus power for the purpose of manufacturing fertilizer. But he puts it in the hands of the President. What does that mean? I am not criticizing the President; but it means that the President will turn it over to the Secretary of War, just as the President turned, and very properly turned, the Alaskan Railroad over to the Secretary of the Interior. The Secretary of War very naturally will turn the matter over to the Army engineers, and when we reach the Army engineers we reach Muscle Shoals and this same water-power monopoly.

Mr. GORDON. Mr. Speaker, will the gentleman yield?

The SPEAKER pro tempore (Mr. FITZGERALD). Does the gentleman yield?

Mr. LENROOT. Yes.

Mr. GORDON. Do you claim the engineers of the Army are controlled by any water-power trust?

Mr. LENROOT. I claim this, and it is not a claim of mine, because it is in black and white——

Mr. GORDON. Let us have your authority for it.

Mr. LENROOT. The Army engineers have recommended to Congress practically the proposition that these gentleman are trying to get.

Mr. GORDON. Is that proof of corruption, or proof that they are controlled by somebody?

Mr. LENROOT. I am not charging them with being corrupt or with being controlled. I am stating the facts, and the result of the matter, sir, is just as injurious if a man honestly recommends giving away a public right as if he does so corruptly. [Applause.]

Mr. MOORE of Pennsylvania. Mr. Speaker, will the gentleman yield?

The SPEAKER pro tempore. Does the gentleman from Wisconsin yield to the gentleman from Pennsylvania?

Mr. LENROOT. Yes.

Mr. MOORE of Pennsylvania. The Senate amendment, as I recall it, calls for an appropriation of $15,000,000. The Hay substitute calls for an appropriation of $20,000,000. Can the gentleman explain why the additional $5,000,000 is needed now?

Mr. LENROOT. From the best information I can get I will say this: On streams, other than Muscle Shoals, $15,000,000 would undoubtedly be sufficient, but on Muscle Shoals it will require $20,000,000.

Mr. MOORE of Pennsylvania. Then there must have been some additional information.

Mr. LENROOT. I have no doubt of it.

Mr. SHERLEY. Mr. Speaker, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. SHERLEY. The gentleman wants to be fair, I know.

Mr. LENROOT. Certainly.

Mr. SHERLEY. But there is this difference between the Senate provision and that of the gentleman from Virginia: The Senate provision provides for making nitrates for war purposes, whereas the amendment of the gentleman from Virginia provides for making nitrates also for agricultural purposes.

Mr. LENROOT. The gentleman is mistaken. The Senate amendment does provide exactly what the amendment of the gentleman from Virginia provides for.

Mr. SHERLEY. Very well; all right; but I would rather trust my eyes than your memory.

Mr. LENROOT. It is patent to any Member of the House. There is this difference, that the Senate amendment provides that none of this power shall be disposed of, and that there shall be no private cooperation with plants in connection with the Government plant, while the amendment of the gentleman from Virginia provides that there may be that private cooperation, and that this same American Cyanamide Co., after this expenditure of $20,000,000, may get the benefit of that $20,000,000, except so much of the nitric acid as may be used for Government purposes.

Mr. MOORE of Pennsylvania. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman yield?

Mr. LENROOT. Yes.

Mr. MOORE of Pennsylvania. The gentleman from Virginia said he knew very little about water-power sites. His substitute, however, appropriates $5,000,000 more than the amendment of the Senate. Can the gentleman give the reason for thus increasing the appropriation by one-fourth?

Mr. LENROOT. I am going to do the gentleman from Virginia the justice to say that I believe he is very ignorant about this question. If he had not been, it can not be possible that he would have offered the amendment that he did.

Mr. COOPER of Wisconsin. Mr. Speaker, will the gentleman yield for one question?

The SPEAKER pro tempore. Does the gentleman yield?

Mr. COOPER of Wisconsin. To see if I understand the gentleman from Wisconsin correctly.

Mr. LENROOT. Yes.

Mr. COOPER of Wisconsin. Did I understand the gentleman to say that the only testimony ever taken by the Committee on Military Affairs or by the Committee on Rivers and Harbors or any other committee was the testimony of Mr. Washburn, an officer of this corporation, and his associates?

Mr. LENROOT. So far as this nitrate plant is concerned, yes—except that there was some testimony from Gen. Crozier and another Army engineer.

Mr. GORDON. Will the gentleman yield for a question?

Mr. LENROOT. I can not yield. I want to answer this question; but I want to say that while this particular proposition was before the committee there were only two witnesses before the committee. One was Frank S. Washburn, whom I have referred to, and the other one was Maj. Burgess, the engineer in charge of the Muscle Shoals district, and when he was asked by the committee what he knew about the nitrate proposition he said he did not know anything about it.

Mr. HAY. I yield five minutes to the gentleman from Illinois [Mr. FOSTER], and I understand the gentleman from California will also yield him five minutes.

Mr. KAHN. I yield him five minutes.

Th CHAIRMAN. The gentleman from Virginia yields 5 minutes and the gentleman from California yields 5 minutes, and the gentleman from Illinois is recognized for 10 minutes.

Mr. FOSTER. Mr. Speaker, I hope that I am as good a conservationist on water power as is the gentleman who has just taken his seat [Mr. LENROOT]. The gentleman has done good service for the people in this regard, and I have been pleased to be associated with him in this valuable work. I can remember a time only a few years ago upon this floor when there were a number of bills upon the Unanimous Consent Calendar granting franchises for water-power sites, and that I raised my voice here each unanimous-consent day until permission was denied. So I do not think the gentleman from Wisconsin can take to himself all the credit of saving to this Government and to its people all the rights of this valuable asset of the Government.

The gentleman from Wisconsin [Mr. LENROOT] has told you that this means a water-power grab by some great water-power company. I want to call your attention to the fact that in the amendment offered by the gentleman from Virginia [Mr. HAY] the first paragraph provides not only that three Cabinet officers shall investigate this matter and report to the President, but it provides that the President shall make or cause to be made an investigation of the best means and the cheapest way to provide nitrogen for war purposes if necessary. He has the right to call on the Cabinet officers for assistance, and also any other person he sees fit, and then to take what steps in his judgment which are necessary to establish that plant by water power or by other means. It does not necessarily mean he will select water power for this work. Then the amendment which I have offered to the amendment of the gentleman from Virginia [Mr. HAY] provides that the Government shall not go in partnership with anybody, and that whatever surplus power is developed shall be used to make fertilizers and sold to the people. It preserves to the Government the exclusive control of this plant, so that it shall not go into the hands of any monopoly. Can you have a better provision than that? The gentleman from Wisconsin [Mr. LENROOT] failed to tell you these things.

Again, he reads to you a letter from the Smithsonian Institution, a letter that was recalled, as he told you. That letter, I understand, was gotten out in the absence of the curator, and when he returned to the Smithsonian Institution he saw what had been done and he took the proper steps to recall the letter.

Mr. SIMS. Will the gentleman state why he did that?

Mr. FOSTER. I will tell you why in my judgment he did it, because he found it was not correct, and in that case he properly withdrew the letter. Let me say this first: The gentleman speaks about Germany manufacturing such a large amount of nitrogen through its coke ovens. It is true, it has manufactured nitric acid from every conceivable source that was possible. When the war broke out they had in Germany, as I understand, a six weeks' supply of nitric acid on hand. They thought the war would be short. Then after they had gotten into Antwerp they found there a supply of nitric acid. They confiscated that and used it. Then they prohibited the burning of a pound of coal in the German Empire. They made it into coke, and in that way secured the products from the coal, and they manufactured nitric acid and explosives in that way. They used not only the cyanamide process, but they used the arc process and they used every process that it was possible for them to use, because they not only supplied nitric acid for their own country but they supplied very large amounts of nitric acid for Austria for the manufacture of munitions of war. Then it is necessary for Germany to use large quantities of fertilizer if they are to produce food products. Now, these are the facts, and when the gentleman from Wisconsin [Mr. LENROOT] talks about the use of coke ovens, let me say to my friend that it is true that they do develop a great deal of sulphate of ammonia from the coke ovens of the country. It used to be that all the coke was made in what is called the beehive oven, in which the volatile by-products escaped and were wasted; but in the last few years these by-products have been saved so they have been making large quantities of ammonia sulphate. I can give gentlemen the figures to show just what this amounts to. The production of ammonium sulphate and ammonia reduced to sulphate equivalents was 29,279 tons in 1901. It has increased each year from that time to the present. In 1915 there was produced a total of 212,000 tons. Now,

that looks like a large amount and it is increasing very largely, but let me say that with this large increase there was imported into this country in 1915, 67,434 tons of ammonium sulphate, so with what we made and imported there was consumed a total of 279,434 tons.

You must remember that more than one-half of all the products of the coke ovens goes now into the refrigerating business and into the chemical industries of the country. The other 50 per cent goes largely into the manufacture of fertilizer and not into munitions of war. Let me give you some more facts in reference to this matter: There is the cyanamide process of manufacturing nitric acid; there is the arc process; there is the Haber process; the manufacture from nitrate salts imported from Chile; and there is the product of the coke ovens, which is another process. Now, let us see what is the cost of these various processes. I do not know in the proposed plants what process would be used, but the cost of the cyanamide process is 20 per cent less than that produced by the Haber process and over 25 per cent less than that produced by the arc process, assuming that a reasonable power can be secured for the cyanamide per year. It may be assumed that the Haber process will find its place in the highly developed industrial communities, where the necessary skilled labor is available, although the power cost is slightly higher than the above figures because of location. So with this calculation it may reasonably be assumed that the cyanamide process is about $50 or $55 per ton for nitric acid; the Haber process at $65 a ton, if made from Chilean nitrate, and cost about $80 per ton, and from the by-products which come from the coke ovens, which is more expensive than either of the others, would cost about $90 per ton for nitric acid, counting the cost of power at about $8 per horsepower. I do not know what process the President would adopt, but the figures show that the cheapest way to manufacture nitric acid is by the cyanamide process, if a reasonable priced power can be secured. This plant, if established, would require possibly 20,000 or 25,000 horsepower—not to exceed that—to manufacture the 10,000 or 12,000 tons of nitric acid necessary for the use of the Army and Navy in time of peace. It would require at least 100,000 horsepower additional to produce the additional 180,000 tons of nitric acid in time of war. If they develop more than necessary in time of peace, shall we let that power go to waste? It seems to me we ought not to do that, but that we ought to apply the power for some good and useful purpose, which may be used in time of peace and will help the people of this country. What is it? In my judgment, we can not do better than to manufacture fertilizer, that will be sold to the farmers at a reasonable price in this country, and thereby increase the products of the soil.

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. FOSTER. Yes.

Mr. HUMPHREY of Washington. If the statement made in the letter read by the gentleman from Wisconsin is true, will it be advisable from the standpoint of cost, as a matter of necessity in case of war, to manufacture it from air?

Mr. FOSTER. Yes; I think it would, but we do a great many things in war that we do not do in peace as cost is not then counted. We talk about manufacturing this product from coke ovens. Let me say that if the letter which the gentleman from Wisconsin read is true, what would be the result if you increase the supply of ammonia from coke ovens? There is no doubt that the products from the coke ovens will increase very materially in the next few years, may go beyond the consumption so that we will have an available supply for converting into nitric acid, in case war should come, a process much more expensive than by either of the other means of securing it as known at the present time.

It is very essential, in my judgment, that we should encourage the production of ammonium sulphate by the coke-oven process and not permit this valuable product to go to waste as it has been in the past. There was a time when the steel industry of the country had a prejudice against coke made from any other process than by the beehive oven, but now that prejudice is gone and manufacturers of iron rather prefer the new process in which all of these products are saved.

There is imported into this country each year 500,000 tons of nitrate of sodium salts of which 200,000 tons equivalent of 152,000 tons ammonia sulphate is used as fertilizer. The amount of nitrate fertilizer used in 1915 amounted to about 260,000 tons. No data are at hand to show what proportion of the amount of ammonia produced in this country is used as fertilizer, but it is probably not less than 50 per cent. The development of conserving by the completion of by-product ovens ought to continue until every part of the coke is made in all of the by-product ovens, and it is to be hoped the use of coke as a domestic fuel for heating and power may be increased so as to increase the production of the by-product of coal. In some of the great cities the amount of coke used for domestic purposes is already very largely increased. In each of the cities of Detroit and Chicago the consumption of coke amounts to 200,000 tons per year. It is not at all improbable that in the near future large quantities of coke from by-product ovens will be used for other than metallurgical purposes, and if this should prove to be the case, the possible growth of the by-product industry and the consequent increase of the production of ammonia will be very large, and then the production of the ammonia sulphate from this process will also secure large amounts of toluol and benzol, which are used in the manufacture of explosives. The great difficulty in converting the by-product of the coke ovens to nitric acid is much more expensive than any other process.

The Secretary of Agriculture in the Reclamation Record of February, 1916, says, "In 1913 when conditions were normal about $125,280,000 worth of commercial fertilizer was used in the United States; of this amount the farmer paid $48,830,000 for nitrogenous substances, $56,000,000 for phosphates, and $20,450,000 for potash salts. Practically all of the potash salts were imported from Germany and the entire quantity of nitrate from Chile. Ammonia sulphate to the value of $3,730,000 was received from abroad, mainly from England. The remainder of the fertilizer materials was derived from domestic sources," so to the farmers of this country the production of cheap fertilizer is a very important thing. Germany has largely increased the production of her soil by the use of large quantities of fertilizer and her production in comparison per acre to this country is very much larger. With whatever process it may be decided to secure this necessary amount of nitric acid in times of peace and in the emergency in times of war, we should look to the importance of some plan that will enable us to secure for our people an ample and cheap supply of fertilizer. You have to find a market for all the by-products of the coke oven, and that means the coke and all the by-products that come out of it. You have to dispose of them. I am with Members of this House in the fight to keep these valuable properties the Government now owns from falling into the hands of any monopoly. This House has always voted to conserve these valuable resources. It does not seem to me, however, we should sit still and refuse to do anything. Let us properly safeguard these franchises and have them used for the benefit of the whole people. With the amendment I have proposed to the substitute of the chairman of the Committee on Military Affairs there can come no harm to the people, for all this power will be reserved to the Government for the use of all the people. No monopoly can secure control of any water power under this amendment I have offered, and if the plant is built it must be owned and operated by the Government. I hope that my amendment will be adopted.

Mr. HAY. Mr. Speaker, I yield five minutes to the gentleman from Kentucky, Mr. SHERLEY.

Mr. SHERLEY. Mr. Speaker, the gentleman from Wisconsin [Mr. LENROOT] is not alone in his zeal to protect the country from the grasp of water power or other monopolies. I fought with him to prevent legislation that I thought was vicious touching the water power of America, and I am prepared to fight with him again when necessary. But I asked him the express question as to what there was in the Senate amendment which would give the water-power people any sort of advantage, and he was unable to say.

Now, there is nothing in the Hay amendment, if amended as proposed by the gentleman from Illinois, which would give them any possible advantage. There is now in the Hay amendment three words that, if they were stricken out, would eliminate all this talk about monopoly. There are words which permit the sale of the surplus product or power. Strike out the words "other" and "or power," and leave it to sell the surplus product and then the water-power companies are in no sense concerned because they could not buy any of the power. All they could do would be to buy the product and that would be nitrates, and they are not interested in that proposition.

So we are faced with the proposition that those of you who believe the time has arrived when this country should take a position to be independent touching the nitrate supply for reasons of public safety, will vote for the Senate amendment or vote for the Hay amendment as proposed to be amended by the gentleman from Illinois. Those who want further to consider the matter, and postpone a year or more action, are at liberty to vote with the gentleman from Wisconsin, Mr. LENROOT.

What is the fact? We have 50,000,000 pounds of nitrate now as a reserve, and it takes 2½ pounds to make 1 pound of powder. So if we used every bit of the nitrate we have today we would be able to make a little over 21,000,000 pounds

of powder. That is not a condition that speaks for the safety of America. I believe that we can well afford to develop the water power that we own in the manufacture for Government use of nitrate that is necessary in making ammunition.

Mr. LENROOT. Will the gentleman yield?

Mr. SHERLEY. I will.

Mr. LENROOT. The gentleman stated that my amendment would postpone it for a year. Is the gentleman aware that the only difference between my amendment and the Hay amendment is that my amendment provides for a commission of three Cabinet officers——

Mr. SHERLEY. No; there is more difference than that, if I caught the gentleman's amendment right. I asked the gentleman if the Hay amendment was amended as proposed by the gentleman from Illinois what there would be that the water-power people would be interested in. He answered the question, and said "certain patent rights." They have the patent rights, and neither you nor I, by legislation, can change their actual rights. We provide for the purchase or condemnation of all processes that may be necessary. I assume that a Government agency is going to have ordinary common sense; that it is not going to undertake to make a great investment of many millions of dollars in building a nitrate plant without having arranged for the proper processes to do the work. I do not think you need a commission of three Cabinet officers. The gentleman talks about the President relegating the authority down to some Army officer. Will the power he proposes to confer on these members of the Cabinet be exercised personally by them? Not at all. It will be delegated also, and even if not, I would rather have Gen. Crozier's opinion touching the manufacture of nitrates that all the Cabinet put together.

Mr. LENROOT. The gentleman knows that the Army engineers are committed to one proposition?

Mr. SHERLEY. I do not know anything of the kind. I have talked with Gen. Crozier many times, and I know that if this provision is put in there it does not necessarily mean Muscle Shoals, but it does mean a development without a dollar of private interest or advantage to any private concern on earth.

I may not know how to manufacture nitrate, but I can read law, and I do know the effect of a statute, and when you cut out the right to sell power and leave in the right to sell the product, I defy the gentleman to point wherein any power-development company is going to be helped or benefited.

Now, it is up to this House to determine whether it wants to further postpone this matter or whether it wants action. I am a man who would a good deal rather talk less about preparedness and do more of it than what has been the habit around this Hall these many years past, and the important thing is to create a supply of nitrate for the Government. I hope that the House will adopt the amendment offered by the gentleman from Illinois, and failing that—I do not know but what preferentially—I hope they will adopt the Senate amendment. [Applause.]

The Senate amendment has no provision in it for the sale of surplus power. It has a provision for the sale only of products, and it differs from the Hay amendment as it would be amended——

The SPEAKER pro tempore. The time of the gentleman from Kentucky has expired.

Mr. SHERLEY. Mr. Speaker, can the gentleman from Virginia give me one more minute?

Mr. HAY. I can not do it.

Mr. SHERLEY. Can the gentleman from California?

Mr. KAHN. I am sorry to say that I can not do it.

Mr. HAY. Mr. Speaker, I yield to the gentleman from Georgia [Mr. TRIBBLE].

Mr. TRIBBLE. Mr. Speaker, I hope it is not unfortunate for this good project that the best water power is located in the South, and I hope it is not unfortunate for this worthy project that the farmers are to get some benefit from it. The fact that Muscle Shoals has been frequently mentioned upon the floor of this House is because everybody knows that Muscle Shoals is the best water power in the United States for this plant, and it is located right in the center of the territory where 60 per cent of the surplus nitrates would be used. It is a matter of fact that there is too much selfishness in this preparedness propaganda that we hear all over this country. The selfishness of the Armor Trust is to keep the money flowing into its pockets, and the selfishness of the Powder Trust is to keep the money flowing into its pockets and to prevent the Government from establishing manufactories and producing these articles of necessity cheaper than they produce them, thereby destroying the trust. [Applause.]

Mr. Speaker, I admit some personal selfishness in this nitrate-plant proposition, and that selfishness is a desire to serve my people not only in securing munition nitrates, but to furnish fertilizers more cheaply to the farmers of the country. So, Mr. Speaker, my selfishness is not like that of the Armor Trust and the Powder Trust, who wish to make enormous profits out of the Government, but my selfishness is a desire to serve the patriotic farmer, that he may be supplied with fertilizer to aid him in his efforts to prosper. On his prosperity the success of our country depends. In time of war the farm furnishes the great bulk of brave men who shoulder their arms and lead on to victory. When the farmer prospers the merchant, banker, manufacturer, and every enterprise are thrilled with prosperity.

There is no war in this country, and yet we have a fertilizer famine. Nitrates are selling at $85 per ton. This is twice as much as the cost of nitrates before the European war. As a matter of truth, 40 per cent of the fertilizers used in this country is nitrogen. We have nothing to do but reach out into the space above our heads and gather it by chemical process. Our farms are unprofitable in many places for lack of proper fertilization, and yet with all this nitrogen in the atmosphere above us there is not one plant in this country producing nitrogen. Nitrogen is produced in many foreign countries from the atmosphere at one-half the cost we are forced to pay for Chilean nitrates in time of peace. The farmers of Germany use about four times as much nitrogen and phosphates as the farmers of this country, and while their land is by no means as fertile as the farms of this country the yield in Germany is twice as much per acre as in the United States. It is proposed to produce at this plant nitrogen products used as munitions for war and fertilizer. This bill provides for an appropriation of $20,000,000 to produce these products. Compare that outlay with $75,000,000 spent in 1914 in the United States for farm nitrates. The Government can reduce the price of fertilizers more than one-half, thereby enabling the farmer to use more fertilizer to the acre, producing greater yield at less cost. I mean to say nitrates extracted from the air should cost not more than one-half the price of Chilean nitrates before the war. The price before the war was $42 a ton; now it is $85.

The reduction in price of munition nitrates for Army and Navy would save the Treasury many millions annually, in addition to furnishing fertilizers to the farmer. When the war began in Europe, and Germany was blockaded, she was ready for the emergency. The Government was producing nitrates and phosphates sufficient for munitions of war and also to fertilize farms at reasonable price. The farmer in Germany continues to produce his abundant yield because the Government furnishes him cheap fertilizer, and consequently the farms continue to feed the people and the army. If Germany had not prepared for this emergency, the ring of the cavalry horse's hoofs of the French Army would have been heard on the streets of Berlin before this day. Nitrogen is absolutely necessary in time of war. I use Germany as an illustration because of the blockade forcing that country to rely on her own resources. The Government provides fertilizer and the farmer by his abundant yield with cheap nitrates feeds the most powerful army ever organized in the history of the world.

Mr. Speaker, this is a serious proposition, both for war purposes and farm advancement. Chilean mines lie south of the Panama Canal, and should we be cut off from that source the plight of this great and wealthy country would be serious beyond conjecture.

Mr. Speaker, let us construct the plant with Government money, supply the Army and Navy, and furnish our farmers cheap fertilizers. If the farmers can secure cheap fertilizers from the atmosphere above our heads, the South especially will blossom and prosper as no country on earth prospers in agricultural resources.

This is a Government function, and I can not understand this opposition on the ground of "Government ownership." The Government controls the water power and also controls the atmosphere above us. The material is abundant; in fact, unlimited. The Government can make it available for the wants of mankind. Without Government action, I fear it will lie dormant.

My honest opinion is that the Government can furnish all the nitrogen required for munitions and for farm use for one-half the price charged before the European war. Frequently I hear the appeal, "Back to the farm, young man." Mr. Speaker, the reply to that appeal is, make the farm more profitable. We have it in our power right now to do the farmer a great service, and I appeal to you to respond to the promises many of you have made to help the farmer to become more prosperous.

We have the same air above our heads as the Germans have, and yet not one plant in all the United States producing nitrates. The supply is inexhaustible. The atmospheric nitrogen above

1 square mile of land, amounting to 20,000,000 tons, is equivalent to what the world would require in the next 50 years. Atmosphere consists chiefly of nitrogen—78 per cent volume. The leading European countries are producing nitrogen. Shall we as a Government stand in the way of development and let the scare of Government ownership retard progress?

We have the same opportunities of producing potash that Germany has. The kelp beds on the Pacific Ocean would produce an inexhaustible supply of phosphate, and yet no effort is made to utilize them.

Mr. Speaker, I trust that this famine of fertilizers and necessary ingredients for munitions of war will hasten action on the part of our Government to supply these demands. I am opposed to further delay pending investigation. In ordinary times the German farmer pays one-half as much for nitrogen (commonly called ammonia) as the American farmer pays. This is because of the fact that nitrogen is extracted from the air in European countries. There is one small nitrogen plant in Canada.

It is proposed to establish one plant and spend $20,000,000, and men marvel at the amount. Since the outbreak of the war Germany has spent $100,000,000 on the nitrogen industry.

We have lessons before us, and why allow our preconceived idea of Government ownership stand in the way of contributing real and substantial aid to the farmer? If I can help relieve the hardships of the farm and add some little assistance to the prosperity and happiness of the farming people, among whom I was reared and who trusted me to make their laws, I shall feel that my life has not been entirely wasted. We have all kinds of Government manufactories and are establishing more. This is the most-needed Government plant in the entire list of Government-owned manufactories, because it will not only supply the needs of Army and Navy but will add to the peace, prosperity, and happiness of the entire country by making farming more profitable and attractive. [Applause.]

Mr. KAHN. Mr. Speaker, I yield three minutes to the gentleman from Oklahoma [Mr. FERRIS].

Mr. HAY. Mr. Speaker, I yield five minutes to him.

The SPEAKER pro tempore. The gentleman from Oklahoma is recognized for eight minutes.

Mr. FERRIS. Mr. Speaker, the gentleman from Wisconsin [Mr. LENROOT] has rendered no small patriotic service toward the adoption of efficient, well-poised, well-arranged water-power policy in this country. As chairman of the Committee on the Public Lands, I willingly acknowledge my debt of gratitude to him for the help and patriotic service he has given, but at the same time the gentleman from Wisconsin is suffering to-day from one or two things. He is suffering from too much pride in his own opinion and his own words. His amendment is not greatly at variance with the amendment offered by the gentleman from Virginia [Mr. HAY], except in one particular, and that particular is remedied by the amendment of the gentleman from Illinois [Mr. FOSTER]. The language in the amendment offered by the gentleman from Virginia [Mr. HAY] provides that surplus power may be sold, and that is followed with a proviso that it must be sold for cyanamide or fertilizer purposes. Those two provisions of the Hay amendment are clearly mistakes. Those provisions if agreed to, I want to say to you gentlemen who are so solicitous for the farmers, will mean that they will buy their fertilizers from the cyanamide companies and not direct from the Government; but if you want to do your farmers some real service vote, first, for the Hay substitue plus the Dr. Foster amendment, and you will have then, first, nitrates made by the Government for war purposes, and, second, cyanamide made by the Government of the United States for farming purposes, and there is no mistake about it. There will be no middlemen. There will be no entangling alliances with water-power men. It will be a straight Government proposition and there will be nothing to have doubts and fears about. [Applause.] I take it the great majority of this House would, if they could, first vote for a clean, square, fair proposition for a Government-owned munition plant, because it is my firm belief that the belief is prevalent in this House that the Du Pont Powder Co. and the other ammunition companies are meddling too much to-day in national affairs. [Applause.]

If you believe that, vote for the Hay substitute, and you will have a Government-owned munition plant, and no man can gainsay it. If you believe that the Government ought to make cyanamide and ought to sell fertilizer for the impoverished soil of this country, vote for the Foster amendment, which perfects the Hay amendment, and does all that the majority of this House would hope to do to-day, if they could properly understand it.

What does the amendment of the gentleman from Wisconsin [Mr. LENROOT] do? Largely the same thing, but cumbering it, making it more ponderous, by providing for a long circuitous investigation before anything is done. It is not the wish of the great majority of this House, if they understand this proposition, to vote for any circuitous investigation. It is not kind words, it is not kisses and caresses that they want, but they want a provision that will and does deliver the goods. Will you adopt a meandering, circuitous, ponderous, cumbersome proposition like that of the gentleman from Wisconsin, or will you really go about the task of doing the thing the majority of the House wants to do? [Applause.] What are the facts? The facts are plain and our duty is plain. If you ask me if this is a comprehensive water-power plan I say no, it does not even squint at it. If you ask me if we have any chance to get a comprehensive water-power bill through Congress this year I answer I do not know. The House wants one. The House has twice passed one, each time it was allowed to die at the other end of the Capitol. This one may die, too, but I do not want the blood of delay to be on our hands; I do not want us to be charged with failing in our duty. Nearly always I am in accord with the gentleman from Wisconsin. He is a clear-headed, good lawyer, a far-seeing man, but to-day he is tinged a little too much with pride of opinion, and he is wandering into details rather than going to the substance, and we ought not to follow him when he leaves the beaten path.

Mr. HARDY. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. HARDY. What difference is there between the Hay amendment as amended by the Foster amendment and the Senate amendment as sent to us?

Mr. FERRIS. The Senate amendment, if I understand it, and I may be in error about it, provides—and I will read it so that I do not make any mistake—how much time have I, Mr. Speaker?

The SPEAKER pro tempore. The gentleman has two minutes and a half.

Mr. HARDY. Do not read it; just tell us what it is, in brief.

Mr. FERRIS. The Senate amendment provides this, without reading—I only wish I could. It provides this plant shall be created for two things only, for Army and Navy purposes. Now, there is a direct limitation. You will find at page 207, in the last paragraph on the page—read it yourself—it provides that it can only be used for Army and Navy purposes. This excludes any Government-made fertilizer for the farmers. This is not what you want. You farmers and farmers' friends think you are going to get fertilizers out of that? You are mistaken. You will not, but all the surplus power under that amendment will necessarily have to be sold to the American Cyanamide Co., and they, in turn, will sell to the farmer for their own sweet price. Such procedure is not aiding the farmer; such a provision will prove wanting in all that is expected of it.

Mr. SHERLEY. If the gentleman will permit, there is no provision to sell the surplus power; only surplus products.

Mr. FERRIS. That is right, but there is no power in the Government or the President or the Secretary of War to make cyanamide. They can only make products strictly for Government use, and of course cyanamide manufacture is not a Government function. There is where the danger lies.

Mr. SHERLEY. I agree with the gentleman in that.

Mr. GALLAGHER. Will the gentleman tell the House where this plant is to go when established?

Mr. FERRIS. I have not the slightest idea. I rather think it will be established at Muscle Shoals, on the Tennessee River, in Alabama. I am not blinking at that, because I think it is the best location in the United States to-day. There is nothing about Muscle Shoals to frighten me if we have a proper provision and proper safeguards.

Mr. GALLAGHER. Where could they get the land to locate that plant?

Mr. SHERLEY. What is the gentleman's objection to the Foster amendment, which would prevent the sale of power but would permit them to make fertilizers as well as nitrates?

Mr. FERRIS. I am very earnestly in favor of the Foster amendment, and counseled with him in reference to it. I am heartily in favor of it. It is precisely what the House ought to adopt. In fact, I was there when it was born. It is precisely what the House desires to do, if they can understand it properly.

Mr. SHERLEY. Then I have no quarrel with the gentleman.

Mr. FERRIS. The great bulk of the House will not be able to-day to understand fully the hydroelectric proposition, and I

do not expect them to. It is a study for an ardent student that would cover years to accomplish. I do not pretend to know but little about it myself, although I have studied it ardently for the past four years. It is a great subject; in my judgment, the greatest economic subject of the day and hour. If the farmers want cyanamide to improve their impoverished farms, I ask you to vote for the Foster amendment to the Hay substitute, and then adopt the Hay substitute, and you will get the thing you are after. If you believe that a Government munition plant is justified, as distinct from the Du Pont and other privately owned munition plants, you will vote for the Hay substitute, and you will not be mistaken in doing so. I am getting letters—so are you—from the Du Pont Co. and other munition people, urging us not to adopt a Government-owned plant. As the gentleman from Wisconsin says, the power people are here. So they are, and they have been here for two or three years; but, on the other side, so are the Du Pont and munition people here, too, by letter, if not in person. The thing to do when there is such a stress of circumstances, when three-fourths of the world's map is at war, is to build our own munition plant and thereby legislate the profit out of war and war material. We can do it under this substitute amendment and at the same time and by the same plant furnish cyanamide to American farmers at cost. [Applause.] I yield back the balance of my time.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. FOSTER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. HAY. Mr. Speaker, I yield three minutes to the gentleman from South Carolina [Mr. RAGSDALE].

[Mr. RAGSDALE addressed the House. See Appendix.]

Mr. KAHN. Mr. Speaker, I yield three minutes to the gentleman from Kansas [Mr. ANTHONY].

Mr. ANTHONY. Mr. Speaker, the present method in which the House is considering this very important amendment is really a reflection upon our way of doing business. This House is now considering whether or not it shall appropriate fully $20,000,000 through substitutes and amendments that have not even been printed, and doubtless not one-tenth of the membership of the House really know what they are going to vote upon—that is, the language of the amendments and the substitutes.

Now, I am not afraid of this talk about lobbies; I am not afraid of any graft in this nitrate proposition. I believe we need a nitrate plant in this country. Furthermore, I believe that any one of these amendments, any one of these substitutes, which puts power into the hands of the President or the Secretary of War to carry out the purposes of the amendment will be fulfilled in a manner satisfactory to the American people. I do not care whether it is a Democratic President or a Republican President; any such authorization can be safely intrusted in his hands.

Now, I have prepared a substitute which I believe embodies some business principles that have not been put in the other amendments or the other substitutes. In brief, the substitute I have offered provides for the appointment of a commission of three Engineer officers, who shall report to the President of the United States upon the feasibility of this proposition. Authority is then conferred upon the President, if he deem advisable, for the construction of a water-power plant. Then further authority is conferred upon the President to make such a contract as he may deem advisable with some private corporation for the manufacture of nitrates and fertilizers, with the proviso that the corporation shall pay not less than 3 per cent to the Government on the value of such water power and moneys as are invested by the Government. And, furthermore, that the Government reserves the right to regulate the price at which the products of such a plant shall be sold. I hope that some practical proposition of this kind shall be adopted by the House. [Applause.]

Mr. KAHN. I yield four minutes to the gentleman from Delaware [Mr. MILLER].

Mr. MILLER of Delaware. Mr. Speaker, I intend to support the Lenroot amendment, because, in my opinion, the United States Government will have its interests looked after in the best manner, with respect to this proposed nitrate plant, if it is adopted.

As a preface to what I intend to say in the few minutes of my time, I beg to state that I favor a Government nitrate plant if Uncle Sam is going to come out ahead on it; I favor a Government powder factory if Uncle Sam comes out ahead on it; I favor a Government armor-plate factory if Uncle Sam comes out ahead on it. That is plain English; it can not be misunderstood, and I mean it. With all due respect to my friend from Oklahoma [Mr. FERRIS] he did an unfair thing, in my opinion, when he brought up the bugbear of the Du Pont Powder Co., stating that they were opposing and fighting this nitrate proposition. He put them up as a straw man and knocked them down in order to get votes for his proposition.

Now, I know whereof I speak, because I have taken the trouble to acquaint myself with the truth and facts, in view of the attacks and accusations made against this company, when the nitrate proposition was considered in the Senate. The Hay bill went through the House with section 82—the nitrate proposition—voted out of it by a vote of 224 to 179.

One hundred and eighty Republican Members voted against it, as did 44 Democrats, while 174 Democrats and 5 Republicans voted to retain it. When it was taken up in the other body a very distinguished Senator, a man whom I look up to as possessing marked ability and integrity, saw fit to look after the interests of a certain water-power company in his particular locality, and in doing this he made similar accusations, namely, that the Du Pont Co. was fighting the nitrate proposition. In the few minutes that I have I can not bring out all the points in the controversy that ensued between this company and the distinguished Senator, but if gentlemen will read what was said in answer to the remarks that he made on the floor you will see a complete refutation of the statements made by my friend from Oklahoma [Mr. FERRIS] and other gentlemen on the floor to-day.

It was stated a few minutes ago that the Du Ponts were writing letters, I presume to Members of Congress and other officials, in opposition to this nitrate plant. On March 28, 1916, a letter was addressed by the president of the Du Pont company to the Secretary of War. This letter can be found in the CONGRESSIONAL RECORD of March 30, which was the first time I was aware of it. There is nothing in that letter that smacks of opposition to this nitrate amendment. On the other hand, it offers to put up, free of charge, a plant and to deliver to the United States for military or naval purposes all or any part of the output of nitric acid at a price which shall include such profit as the Secretary of War shall determine to be reasonable. The only other letters of which I am aware is the correspondence between Senator UNDERWOOD and various officers and employees of the company which the Senator so graciously inserted in the CONGRESSIONAL RECORD, and which were an answer to the charges he had made against them. These letters which, as I have said, are part of the CONGRESSIONAL RECORD and therefore accessible to anyone, show that there is absolutely no basis to the charge that the powder company was fighting and opposing this proposition. Coming from Delaware, it is probable that my remarks will not be taken with the weight that they would if I came from another part of the country. I want to say to you that there is not a pound of smokeless powder, not a pound of war munitions made within the State of Delaware by these people. They are made down in the district of the gentleman from Virginia [Mr. WATSON] and in the State of the gentleman from New Jersey [Mr. BROWNING], and, as the Speaker aptly said one day, some are made in his district. I just heard a voice ask where the money goes. The money goes into the hands of the workmen who vote in those districts referred to. This company work their men on eight-hour shifts and they are paid 20 per cent for a bonus besides their wages.

Mr. Speaker, I am not controlled or sent down here by anyone. I make this statement because some gentlemen have seen fit to make that reference on the floor of the House before. If they were familiar with conditions in my district they could not and would not make that charge. But I am down here to see that the fair thing is done, and especially when anything in my State is concerned. With all due respect to my friend from Oklahoma [Mr. FERRIS], and anyone else—I dare say there are a good many of you who have that idea in your minds—this does not in any way control or form my action in the House.

Mr. FERRIS. Will the gentleman yield?

Mr. MILLER of Delaware. I can not yield.

Mr. FERRIS. The gentleman misquoted me.

Mr. MILLER of Delaware. I will not yield. If you want to break up my time, keep it up.

My reference to the gentleman from Oklahoma relates to his charge that the powder company was fighting this proposition.

The distinguished gentleman in the other body to whom I have referred quoted as his authority one R. B. Carter, whom, it was alleged, was an employee of the powder company. It was stated that this man went to dinner with certain officials and employees of the powder company and gained the impres-

sion that the company was fighting this proposition; you will read what was said in the CONGRESSIONAL RECORD. I purposely, of my own free will, went to find out who he was. I found that he was a former labor foreman at their Hopewell, Va., plant and later on a guard. He was fired for passing worthless checks on some of his friends at Hopewell, and warrants are now out against him. Needless to say, the story he told was a fabrication, and I say, with all due respect to the distinguished Senator, that he was imposed upon at that time, and later he inserted in the CONGRESSIONAL RECORD in the other body statements that absolutely refute and knock out the bugbear brought up here to-day by certain Members. [Applause.]

Mr. MONDELL. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. MONDELL. Mr. Speaker, some of the real friends of the people and of the Public Treasury have been in hopes that there would be an opportunity to vote on an amendment in the form of a substitute providing for an investigation by four of the heads of the departments of the Government and a report to Congress on this subject—this and nothing more.

Mr. HAY. Mr. Speaker, I make a point of order.

Mr. MONDELL. We hoped to have an opportunity to do that on the amendment offered by the gentleman from South Carolina [Mr. LEVER]. My parliamentary inquiry is, Is it in order to present such an amendment at this time?

The SPEAKER. It is not.

Mr. MONDELL. Then, Mr. Speaker, I ask unanimous consent to offer such an amendment, to be voted on at the proper time.

The SPEAKER. The gentleman from Wyoming asks unanimous consent to reoffer the substitute or amendment, or whatever it was, of the gentleman from South Carolina [Mr. LEVER].

Mr. MANN. Why is it not in order, if unanimous consent was given to offer amendments? Why is it not in order for him to offer it?

Mr. BUTLER. Without any further unanimous request?

The SPEAKER. The Chair guesses it is in order under that language. [Applause.]

Mr. HAY. Mr. Speaker, I yield three minutes to the gentleman from South Carolina [Mr. LEVER].

The SPEAKER. The gentleman from South Carolina [Mr. LEVER] is recognized for three minutes.

Mr. LEVER. Mr. Speaker, I shall vote for the Hay amendment as amended by the Foster amendment; and if these amendments are defeated, I shall vote for the amendment that has now been suggested by the gentleman from Wyoming [Mr. MONDELL]—my own amendment, which was offered by me in the first instance on the theory that possibly everything else would go out and this might be held in, and thus make better the situation for the final attainment of a Government nitrate plant.

Now, Mr. Speaker, the situation is this. We have an opportunity, in voting for the Hay amendment as amended by the Foster amendment, both to provide for a munition plant controlled and operated by the Government and at the same time to provide a source of fertilizer for the farmers of this country. Speaking for the agricultural interests, I wish to call the attention of gentlemen of the House to the fact that we are spending in this country $75,000,000 a year for nitrogen products. We are absolutely dependent for nitrates upon Chile, and nitrates go into the manufacture of nitric acid, which is necessary in the manufacture of munitions. I am more concerned, naturally, with the proposition of controlling nitrogen for fertilizer purposes in the interest of agriculture in this country. As it is now, the rates on fertilizer are absolutely controlled, in my judgment, by a few great concerns. The farmers are absolutely at the mercy of these great concerns, and if in the program of preparedness we can find some method of furnishing both nitric acid for munition purposes and at the same time nitrogen for fertilizer purposes, it seems to me we have accomplished two of the great purposes of preparedness in this country, because, gentlemen of the House, you must not forget that preparedness is more comprehensive than the mere matter of military preparedness. The Army and Navy of this country can not be any stronger than the economic forces which feed and clothe the Army and the Navy, and it is necessary for us in the promotion of agriculture to furnish to our farmers the cheapest possible ingredients that go into fertilizer.

I wish it were in order, I wish it were possible at this time that we might include potash in this proposition; but it is not, and therefore I shall vote for the Hay amendment plus the Foster amendment, and if they are beaten I shall vote for my proposition. [Applause.]

The SPEAKER. The time of the gentleman from South Carolina has expired.

Mr. HAY. Mr. Speaker, I yield such time as he needs to the gentleman from Mississippi [Mr. QUIN].

The SPEAKER. The gentleman from Mississippi [Mr. QUIN] is recognized.

Mr. QUIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Mississippi [Mr. QUIN] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HAY. Mr. Speaker, we have but one speech on this side.

Mr. KAHN. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. HULBERT].

The SPEAKER. The gentleman from New York [Mr. HULBERT] is recognized for five minutes.

Mr. HULBERT. Mr. Speaker, a great deal has been said to-day in the consideration of the conference report on the Army reorganization bill upon the subject of preparedness. I venture the prediction that the action of this House, if it adopts any one of the amendments which have already been offered and read to section 122 of the bill, will not square up before the people of the country with the previous action of this House on the two previous amendments authorizing the enlistment of 250,000 men and the organization of the volunteer army, respectively, which were rejected. Gentlemen have urged here this afternoon the importance and the necessity of the adoption of this amendment, either in the form proposed in the bill as it came back from the Senate or in the form of any one of the several amendments which have been proposed thereto this afternoon; and yet, while as one gentleman said a few moments ago, with three-fourths of the countries upon the map of the earth at war and evidencing the necessity that we should vote ourselves into a position where we would be prepared to produce and have at our disposal a sufficient quantity of nitrogen for the manufacture of ammunition, if my recollection serves me aright, that gentleman and a large number of the gentlemen who will vote for this amendment voted against that provision of the Chamberlain bill, the purpose of which was to provide the men to use the ammunition which you say is so essential. [Applause on the Republican side.]

Mr. Speaker, when I became a member of the Committee on Rivers and Harbors that committee had already paid its visit to Muscle Shoals, and in view of the adoption by the committee of the rule that there would be no new projects in the rivers and harbors bill I did not, as I intended to do at that time, take up the consideration of the testimony on the hearings held on that project. So far as I have been able to find since this matter came back from the Senate there is not another committee in this House which has given this matter consideration from the standpoint of military necessity, and even before the Committee on Military Affairs, both in the House and in the Senate, there were no hearings on that point, and the only testimony I have been able to find bearing directly on section 122 is contained in the hearings before the Committee on Agriculture and Forestry in the United States Senate in the present Congress and at the present session on the bill S. 4971, which is practically in the same phraseology as section 122 incorporated in this bill.

Now, I believe there is a necessity for a nitrate plant. I believe there is not only a necessity from the standpoint of preparedness, so far as the Army and Navy are concerned, but I believe there is also a necessity to promote and advance our agricultural interests. But I am one of those who believe that before this House acts upon a proposition in which there will be spent upward of $18,000,000 of the people's money it is a necessity in the discharge of our duty that we should conduct public hearings upon this point. [Applause on the Republican side.]

I hope, Mr. Speaker, that gentlemen of this House will act with wisdom in voting upon the amendments successively that we may have the opportunity to pass upon, and, I trust, adopt the amendment suggested by the gentleman from South Carolina [Mr. LEVER], and reoffered by the gentleman from Wyoming [Mr. MONDELL].

Mr. SMITH of Michigan. Mr. Speaker, will the gentleman yield for a question?

Mr. HULBERT. Yes; I yield for a question.

Mr. SMITH of Michigan. Are you sufficiently informed upon the subject, so that you can tell us whether or not the Government already owns enough water power to manufacture nitrates or anything else it wants to manufacture?

Mr. HULBERT. I am not; and therefore I say I can not conscientiously discharge my duty to the people who have sent me here until I have had an opportunity to inform myself, as I believe all you gentlemen ought and I trust the majority of you desire to have an opportunity to inform yourselves, upon this important subject.

The SPEAKER. The time of the gentleman from New York has expired.

Mr. HAY. Has the gentleman from California [Mr. KAHN] used all his time?

The SPEAKER. The gentleman has used all his time.

Mr. HAY. I yield the remainder of my time to the gentleman from Alabama [Mr. DENT].

The SPEAKER. The gentleman from Alabama [Mr. DENT] is recognized for 13 minutes.

Mr. DENT. Mr. Speaker, after listening to the debate on this proposition to-day, it seems to me that the House is thoroughly agreed upon the proposition that this Government at this time ought to take care of itself so far as may be necessary in providing a sufficient supply of nitrogen for its uses. The only question at issue is the method by which this should be done. I have heard gentlemen on the floor of this House talk about a lobby. I listened with a great deal of interest to the remarks of the gentleman from Wisconsin [Mr. LENROOT] in regard to a water-power lobby that had infested this House upon this proposition. Why, Mr. Speaker, there is no doubt, if you want to use the word "lobby" in an inoffensive sense, that there has been a lobby on both sides of this proposition. There is no doubt of the fact that the Du Pont powder people have interested themselves in opposition to a water-power proposition. There is no doubt of the fact that certain people having an interest in water-power sites have concerned themselves in talking to Members of Congress about this matter. There is no doubt also of the fact that the Farmers' Union and the National Grange have had their representatives here in Congress talking to the Members of Congress about this proposition. [Applause.] I do not understand, and I can not understand, therefore, why gentlemen will make an argument about a great big proposition simply on the ground that a lobby has been present on one side or the other of this question.

The question is, What is best for the Government of the United States to do in the matter of supplying itself with nitric acid and supplying itself with a sufficient amount of explosives for use in the event of war and for practical purposes in time of peace?

Mr. KELLEY. Will the gentleman yield?

Mr. DENT. I will yield for a question only.

Mr. KELLEY. What part of this $20,000,000 is intended to be used for the building of the dam?

Mr. DENT. Fifteen million dollars. Now, Mr. Speaker, the simple proposition is this: If you adopt the Lenroot amendment, you appoint a commission, which postpones the action of Congress upon the most important proposition in the matter of preparedness that has been presented to Congress. [Applause.]

Mr. LENROOT. Will the gentleman yield?

Mr. DENT. I will yield to the gentleman for a question.

Mr. LENROOT. I know that the gentleman does not want to misrepresent me. My amendment does not call for any further action of Congress.

Mr. DENT. The gentleman need not state that I do not wish to misrepresent him. Of course, I do not.

Mr. LENROOT. I want to ask the gentleman whether he understands that my amendment calls for any future action of Congress?

Mr. DENT. It does not call for any future action of Congress, as I understand it.

Mr. LENROOT. Certainly not.

Mr. DENT. But it calls for an investigation, which postpones the matter.

Mr. LENROOT. No; it calls for going ahead under this amendment to construct the plant.

Mr. DENT. Well, the effect of it will be to postpone it, as everybody knows. The effect of it will be to postpone it, as every other commission of that kind that has ever been appointed by Congress has done. [Applause.]

Mr. FERRIS. And is it not also true that this matter has been before Congress for the last 10 years, and that this House has twice, by unanimous consent, passed a water-power bill?

Mr. DENT. Why, certainly, that is true; and there is no necessity for any further investigation of the subject. Every committee of Congress charged with this proposition has been fully advised on the subject, and if we do not know now how to act, then the Lord only knows when we can act. [Applause.] I have discussed this matter with gentlemen who entertained all kinds of views upon the subject. My desire as a conferee on the part of the House is to get something that will give the Government a nitrogen plant and that will give the farmer a cheap fertilizer. [Applause.]

Mr. OGLESBY rose.

Mr. DENT. I can not yield to the gentleman now, because my time is limited. The only difference between the Hay proposition and the proposition of the gentleman from Illinois [Mr. FOSTER] is this: The Hay proposition proposes that the Government shall establish its own plant for the manufacture of its own munition supplies, so as to give the Government a sufficient supply of powder in time of peace or in time of war; and in time of peace, when this power is not necessary, the Hay amendment authorizes the President to dispose of the surplus power to some party or parties who will establish a plant of their own and not utilize the Government plant, but establish a plant of their own, and buy from the Government the use of the power that it has constructed under the provision to supply itself with munitions of war. And in doing this the President of the United States is absolutely authorized to fix the terms upon which any private concern that may establish this plant and agree to purchase this power shall pay for it to the Government of the United States; and it goes farther and authorizes the President of the United States to fix the price at which it shall sell its fertilizer products.

Now, what can be better for the farmers of the United States than a provision of that character? In simple words, then, the difference is this: Under the provisions of the proposition of the gentleman from Illinois [Mr. FOSTER] the sale of the products will have to be conducted by a multitude of agents appointed by the Government of the United States to sell the surplus products, whereas under the Hay provision the Government simply utilizes the plant for the purpose of manufacturing that which it uses only in its own business, and sells the surplus power under restrictions upon the purchaser as to what price the purchaser shall pay for the power and receive for the product thus manufactured. [Applause.] Now, Mr. Speaker, that is the simple proposition that is submitted to this House. This is the simple difference between the Hay amendment and the Foster amendment that is presented to the House. We all agree that the greatest question of preparedness to-day relates to furnishing powder with which men can shoot. You may build up an Army as big as that of Xerxes, you may have millions of men in your Infantry and Cavalry and Artillery and Cost Artillery, but unless you have the powder with which to shoot they are helpless. We are dependent to-day, absolutely dependent, upon the plains of Chile for nitrate to supply the Army and the Navy. Shall we omit this one opportunity, this one great advantage of bringing to this country a hydroelectric plant that will concentrate the production of nitrate in such quantities and in such amounts that it can never be exhausted? Shall we omit this one great opportunity when we are trying to prepare the people against war?

Mr. OGLESBY. Will the gentleman yield?

Mr. DENT. I will.

Mr. OGLESBY. The gentleman stated that a bill to establish a water power at Muscle Shoals had twice passed the House. Will the gentleman be kind enough to tell us what was the purpose——

Mr. DENT. Oh, the gentleman is mistaken; I did not make any such statement. I have not said anything about any bill relating to Muscle Shoals. The whole trouble about every proposition of this nature has been that it is attributed to Muscle Shoals. Muscle Shoals is in the State of Alabama, and has made a great showing, and I hope is not objectionable on that account. [Applause.]

Now, so far as I am concerned, I do not care where you establish the plant. I do not care what the plant may be. I have demonstrated this by yielding to a suggestion of the gentleman from Illinois to the effect that if there could be found any product, method, or process by which the Government of the United States could obtain a sufficient supply of nitrate without being dependent upon the plains of Chile I would support it, and that is the proposition I have advocated from the beginning to the end.

I ask this House to-day not to neglect its greatest opportunity that it has had on the subject of preparedness. I plead with this House, as a humble lieutenant of the greatly admired chairman of the Military Committee, Mr. HAY [applause] to give us the privilege of bringing in something that will be substantial. [Applause.]

The SPEAKER. All time has expired, and the Clerk will report the amendment.

Mr. HAY. Mr. Speaker, I understand the first vote will be on the amendment of the gentleman from Wisconsin, and that has been reported to the House.

Mr. MANN. But the amendment offered by the gentleman from Wyoming has not been reported.

The SPEAKER. The Clerk will report the amendment offered by the gentleman from Wyoming [Mr. MONDELL].

The Clerk read as follows:

Strike out all of section 122, after the word "That," on the first line of the section, and insert the following: "the Secretary of War, the Secretary of the Navy, the Secretary of the Interior, and the Secretary of Agriculture are constituted a commission whose duty

it shall be to ascertain the practicability and best means of producing within the United States nitrogen compounds by the fixation of atmospheric nitrogen or otherwise for use in the manufacture of munitions of war and fertilizers.

"The commission may utilize the various agencies of the Government and may cooperate with States and with private persons or agencies in carrying out its purposes and shall report to Congress as early as practicable, not later than the first day of the next regular session of this Congress, the facts ascertained, together with recommendations for action by Congress and the draft of a bill to carry out such recommendations.

"The commission may elect a chairman, and the funds appropriated for its use shall be paid out on warrants signed by him, or by an acting chairman designated by him, drawn on the Secretary of the Treasury.

"There is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, available until expended, the sum of $50,000, to enable the commission to carry out its purposes, including the hire of experts, clerks, and other employees, and payment of rent, traveling and other expenses within and outside the District of Columbia."

Mr. OGLESBY. Mr. Speaker, I rise to ask unanimous consent that the Lever-Mondell substitute be voted on first.

Mr. HAY. I object.

The SPEAKER. The gentleman from Virginia objects, and the first vote will be taken on the Lenroot amendment.

The question was taken; and on a division (demanded by Mr. LENROOT) there were 112 ayes and 132 noes.

Mr. LENROOT. Mr. Speaker, I demand the yeas and nays.

The question was taken, and 62 Members having arisen in favor thereof, the yeas and nays were ordered.

The question was taken; and there were—yeas 158, nays 194, answered "present" 5, not voting 76, as follows:

YEAS—158.

So the Lenroot amendment was rejected.

The Clerk announced the following additional pairs:

On the vote:

Mr. FREEMAN (for Lenroot amendment) with Mr. JONES (against).

Mr. GOOD (for Lenroot amendment) with Mr. BORLAND (against).

Mr. MCARTHUR (for Lenroot amendment) with Mr. HAYDEN (against).

Mr. FAIRCHILD (for Lenroot amendment) with Mr. LEE (against).

Mr. HAMILTON of New York (for Lenroot amendment) with Mr. HUDDLESTON (against).

Mr. PETERS (for Lenroot amendment) with Mr. HILLIARD (against).

Mr. LONGWORTH (for Lenroot amendment) with Mr. LITTLEPAGE (against).

Mr. BACHARACH (for Lenroot amendment) with Mr. SHACKLEFORD (against).

Mr. GRAY of New Jersey (for Lenroot amendment) with Mr. BURNETT (against).

Until further notice:

Mr. CLARK of Florida with Mr. FULLER.

Mr. PRICE with Mr. HEATON.

Mr. KETTNER with Mr. HOWELL.

Mr. OVERMYER with Mr. MILLER of Minnesota.

Mr. SCULLY with Mr. GRAHAM.

Mr. DOUGHTON with Mr. MOTT.

Mr. DIXON with Mr. PLATT.

Mr. BRUMBAUGH with Mr. WATSON of Pennsylvania.

Mr. WILSON of Florida with Mr. KEARNS.

Mr. OVERMYER. Mr. Speaker, I desire to vote "no."

The SPEAKER. Was the gentleman in the Hall listening when his name was called?

Mr. OVERMYER. Mr. Speaker, I was called to the telephone.

The SPEAKER. Was the gentleman in the Hall?

Mr. OVERMYER. I was at the telephone in the cloakroom.

The SPEAKER. The gentleman does not bring himself within the rule.

Mr. MCARTHUR. Mr. Speaker, I voted "aye" on this roll call, but I am paired with the gentleman from Arizona, Mr. HAYDEN, and I wish to withdraw that vote and answer "present."

The name of Mr. MCARTHUR was called, and he answered "Present."

Mr. MILLER of Minnesota. Mr. Speaker, I desire to vote "aye."

The SPEAKER. Was the gentleman in the Hall listening when his name was called?

Mr. MILLER of Minnesota. I was not in the Hall until just after my name had been passed. I was in the Hall after that.

The SPEAKER. The gentleman does not bring himself within the rule.

Mr. KEARNS. Mr. Speaker, I desire to vote "aye."

The SPEAKER. Was the gentleman in the Hall listening when his name should have been called?

Mr. KEARNS. I was not in the Hall. I came in just as the Clerk was concluding the call of the roll.

The SPEAKER. The gentleman does not bring himself within the rule.

The result of the vote was announced as above recorded.

The SPEAKER. The next vote will be taken on the Sterling amendment to perfect the text.

Mr. STERLING. Mr. Speaker, I ask unanimous consent that the Clerk read the portion to be stricken out of the bill under my amendment.

The SPEAKER. Without objection, the Clerk will read.

The Clerk read as follows:

On page 207, strike out lines 20 to 23, which are as follows:
"That the plant or plants provided for under this act shall be constructed and operated solely by the Government and not in conjunction with any other industry or enterprise carried on by private capital."

The SPEAKER. The question is on agreeing to the Sterling amendment.

The question was taken, and the amendment was rejected.

The SPEAKER. The next vote will be taken upon the Mondell amendment. The question is on agreeing to the Mondell amendment.

The question was taken; and on a division (demanded by Mr. MANN) there were—ayes 134, noes 145.

Mr. POWERS. Mr. Speaker, I demand the yeas and nays.

Mr. MANN. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 173, nays 176, answered "present" 6, not voting 79.

SENATE BILLS REFERRED.

YEAS—173.

So the Mondell amendment was rejected.

The Clerk announced the following additional pairs:

For this vote:

Mr. BACHARACH (for Mondell amendment) with Mr. SHACKLEFORD (against Mondell amendment).

Mr. LONGWORTH (for Mondell amendment) with Mr. LITTLEPAGE (against).

Mr. PETERS (for Mondell amendment) with Mr. HILLIARD (against).

Mr. HAMILTON of New York (for Mondell amendment) with Mr. HUDDLESTON (against).

Mr. FAIRCHILD (for Mondell amendment) with Mr. LEE (against).

Mr. GOOD (for Mondell amendment) with Mr. BORLAND (against).

Mr. GRAY of New Jersey (for Mondell amendment) with Mr. BURNETT (against).

Mr. FULLER (for Mondell amendment) with Mr. CLARK of Florida (against).

Mr. MCARTHUR (for Mondell amendment) with Mr. HAYDEN (against).

Mr. NELSON (for Mondell amendment) with Mr. DUPRÉ (against).

Mr. STEELE of Iowa (for Mondell amendment) with Mr. HOUSTON (against).

Mr. MUDD (for Mondell amendment) with Mr. MONTAGUE (against).

Until further notice:

Mr. PATTEN with Mr. CHANDLER of New York.

Mr. LLOYD with Mr. VARE.

Mr. COADY with Mr. MARTIN.

Mr. EAGLE with Mr. SMITH of Minnesota.

Mr. JONES with Mr. HOPWOOD.

Mr. GARD with Mr. NICHOLS of Michigan.

Mr. DOREMUS with Mr. MORIN.

Mr. WILSON of Florida with Mr. KREIDER.

Mr. HOUSTON. Mr. Speaker, I desire to be recorded "no."

The SPEAKER. Was the gentleman in the Hall listening?

Mr. HOUSTON. No, sir; I was not.

The SPEAKER. The gentleman does not bring himself within the rule.

Mr. MONTAGUE. Mr. Speaker, I voted "no." I am paired with the gentleman from Maryland [Mr. MUDD], and I desire to withdraw my vote and to be recorded "present."

The name of Mr. MONTAGUE was called, and he answered "Present."

Mr. MCARTHUR. Mr. Speaker, I voted "aye" on the first roll call. I am paired with the gentleman from Arizona [Mr. HAYDEN]. I desire to change my vote to "present." I desire to say I am paired with the gentleman from Arizona [Mr.

HAYDEN], and not the gentleman from New York [Mr. LONDON], as read by the Clerk.

Mr. DUPRÉ. Mr. Speaker, is the gentleman from Wisconsin [Mr. NELSON] recorded as voting?

The SPEAKER. He is not.

Mr. DUPRÉ. Then I desire to withdraw my vote of "no," being paired with the gentleman from Wisconsin, and to answer "Present."

The name of Mr. DUPRÉ was called, and he answered "Present."

The SPEAKER. The Clerk will call my name.

The name of Mr. CLARK of Missouri was called, and he answered "No."

The result of the vote was announced as above recorded.

Mr. HAY. Mr. Speaker, I accept the amendment of the gentleman from Illinois [Mr. FOSTER] and call for a vote on it.

The SPEAKER. The question is on the Foster amendment.

Mr. MANN. By unanimous consent, I suppose, that amendment is agreed to.

The SPEAKER. Without objection, the Foster amendment is agreed to. [After a pause.] The Chair hears none. The vote is on the Hay amendment.

Mr. HAY. Mr. Speaker, the gentleman from North Carolina [Mr. SMALL] offers an amendment to the text, which I also accept.

The SPEAKER. The Chair understood all the time—he may have been dead wrong—that the Small amendment was an amendment to the Hay substitute.

Mr. HAY. Yes, sir; that is correct. I ask the Clerk to report the amendment.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

Amendment offered by Mr. SMALL to the amendment offered by Mr. HAY: On line 7 of the amendment, after the word "other," strike out the word "power" and insert the word "method."

The SPEAKER. The question is on the amendment of the gentleman from North Carolina [Mr. SMALL].

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. FOSTER. Mr. Speaker, I ask for a division.

The SPEAKER. The gentleman from Illinois [Mr. FOSTER] asks for a division.

Mr. SMALL. Mr. Speaker, I ask unanimous consent to withdraw the amendment.

The SPEAKER. The gentleman does not have to have unanimous consent. The gentleman from North Carolina withdraws his amendment. The question is on the Hay substitute as amended by the Foster amendment.

The substitute as amended was agreed to.

Mr. HAY. Mr. Speaker, I ask that the Senate amendment be disagreed to.

The SPEAKER. Wait a moment. There is one more vote to be taken—a vote on the Anthony substitute.

Mr. ANTHONY. Mr. Speaker, I ask to withdraw it.

The SPEAKER. The gentleman from Kansas withdraws it.

Mr. HAY. Mr. Speaker, I move that the House further insists on its disagreement to the Senate amendment.

Mr. MANN. We have to vote now on the original motion. By unanimous consent that can be voted down.

The SPEAKER. There has to be a vote on the motion of the gentleman from Virginia [Mr. HAY] to concur.

Mr. MANN. The sense of the House——

The SPEAKER. The sense of the House is to concur in the amendment as modified by the Hay substitute.

Mr. MANN. To concur in the original amendment. It is only to express the sentiment of the House. The vote is upon the original motion.

Mr. HAY. The question is to take the sense of the House on section 122 of the Senate amendment as amended by the substitute which the House has just adopted.

The SPEAKER. That is just exactly what the Chair said five minutes ago.

Mr. MANN. That is not it.

Mr. HAY. What is it?

Mr. MANN. We have expressed the sense of the House on the Hay substitute, but now we are required to express the sense of the House on the original Senate amendment as it stands. It is an easy proposition.

Mr. HAY. As I understand it, the question is on section 122 of the Senate amendment.

The SPEAKER. As modified by the Hay substitute.

Mr. MANN. That is the original proposition.

Mr. SHERLEY. Mr. Speaker, if the Chair will permit, it was necessary under the terms of the agreement for the gentleman from Virginia [Mr. HAY] to move to concur in the Senate amendment No. 122. It was also in order to offer various amendments, which were offered. Now, the House having expressed by its vote a preference for an amendment, the thing in order is the motion of the gentleman to concur in No. 122, which ought to be voted down.

Mr. MANN. Certainly.

Mr. FITZGERALD. Mr. Speaker, if the gentleman will permit me, the House has substituted the Hay provision with the Foster amendment.

Mr. MANN. The House could not express its sense.

The SPEAKER. The question is on the Hay motion, that it is the sense of the House that section 122 of the Senate amendment be concurred in.

The question was taken, and the motion was rejected.

Mr. HAY. Mr. Speaker, I move that the House do further insist on its disagreement to the Senate amendment and ask for a conference.

The motion was agreed to.

The SPEAKER announced the following conferees: Mr. HAY, Mr. DENT and Mr. KAHN.

### HOUR OF MEETING TO-MORROW.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow. Is there objection? [After a pause.] The Chair hears none.

### MINORITY VIEWS ON SHIPPING BILL.

Mr. GREENE of Massachusetts. Mr. Speaker, I ask unanimous consent to have five legislative days in which to file minority views on the bill H. R. 10500, the shipping bill.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent for five legislative days in which to file minority views on the bill H. R. 10500, the shipping bill. Is there objection? [After a pause.] The Chair hears none.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

### SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 2517. An act for the relief of Edward W. Whitaker; to the Committee on Military Affairs; and

S. 4371. An act authorizing the Sioux Tribe of Indians to submit claims to the Court of Claims; to the Committee on Claims.

### EXTENSION OF REMARKS.

Mr. KAHN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from California asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. SMALL. Mr. Speaker, I make the same request.

The SPEAKER. Is there objection?

There was no objection.

Mr. LLOYD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. COADY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the stadium bill.

The SPEAKER. The gentleman from Maryland asks unanimous consent to extend his remarks in the RECORD on the stadium bill. Is there objection?

There was no objection.

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. GREENE of Massachusetts. Mr. Speaker, I understood that the bill to which I referred (H. R. 10500) had been reported to-day. The chairman tells me it has not been reported.

The SPEAKER. The gentleman can file his views within five legislative days, anyhow.

Mr. CARY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

Mr. BARNHART. Reserving the right to object, Mr. Speaker, I would like to inquire of the gentleman from Wisconsin what the nature of his remarks will be?

Mr. CARY. On the embargo resolution which I introduced.
Mr. BARNHART. Is it an original speech?
Mr. CARY. Yes, sir.
The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

JOSEPH GURNEY CANNON (H. DOC. NO. 1092).

Mr. MANN. Mr. Speaker, I ask unanimous consent that there may be printed as a House document the usual number of copies of the proceedings of last Saturday relating to former Speaker CANNON, including the prayer of the Chaplain.
The SPEAKER. The gentleman from Illinois asks unanimous consent to make a House document of the proceedings in honor of former Speaker CANNON last Saturday. The Chair will take the liberty of making this remark, that if that is done, he wants whoever edits it to edit out the "15 months" and make it "5 months," as I wrote it, in my reference to Senator Allison. Is there objection to the request of the gentleman from Illinois?
Mr. BARNHART. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from Illinois if this is not an unusual proceeding?
Mr. MANN. It is a very unusual proceeding for me to make such a request.
Mr. GARRETT. And it was a very unusual day.
Mr. KITCHIN. I hope no one will object.
Mr. MANN. I think it would be proper to print 10,000 copies of it. I have not asked for that, however.
Mr. BARNHART. I have no objection to that, but I think the gentleman from Illinois understands that it is an unusual proceeding, so that hereafter when he does object to a request he will remember that this was an extraordinary occasion and an extraordinary proceeding.
Mr. MANN. I will remember that; and I will modify my proposition by asking that 10,000 copies be printed, to be distributed through the folding room. I make that request, Mr. Speaker, that 10,000 copies be printed and distributed through the folding room.
The SPEAKER. The gentleman from Illinois modifies his request and asks that 10,000 copies be printed and distributed through the folding room. Is there objection to either one of these requests?
There was no objection.
Mr. MANN. I amend my request, Mr. Speaker, and ask that on this document the portrait of Mr. CANNON be printed.
The SPEAKER. The gentleman also asks that the portrait of former Speaker CANNON be printed on this document. Is there objection?
There was no objection.

EXTENSION OF REMARKS.

Mr. JOHNSON of Kentucky. Mr. Speaker, I ask unanimous consent to extend my remarks on the Army reorganization bill.
The SPEAKER. The gentleman from Kentucky asks unanimous consent to extend his remarks in the RECORD, as indicated. Is there objection?
There was no objection.
Mr. ABERCROMBIE. Mr. Speaker, I make the same request.
The SPEAKER. Is there objection to the request of the gentleman from Alabama?
There was no objection.
Mr. BARKLEY. I make the same request, Mr. Speaker.
The SPEAKER. Is there objection?
There was no objection.
Mr. DOUGHTON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a speech delivered at Durham, N. C., by R. F. Beasley, of Monroe, N. C., on the subject of taxation.
Mr. BARNHART. Reserving the right to object, was the gentleman a former Member of the House?
Mr. DOUGHTON. I think not.
Mr. BARNHART. Was he a former governor of the State?
Mr. DOUGHTON. Not that I know of.
Mr. BARNHART. Then I think I shall object to that, Mr. Speaker.
The SPEAKER. The gentleman from Indiana [Mr. BARNHART] objects.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I renew my motion to adjourn.
The motion was agreed to; accordingly (at 5 o'clock and 45 minutes p. m.) the House adjourned, pursuant to the order previously made, until to-morrow, Tuesday, May 9, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting estimate of an emergency appropriation for spring repairs to the road system in the Yellowstone National Park to be used prior to June 30, 1916, and to be deducted from the appropriation for maintenance and repair for the fiscal year ending June 30, 1917 (H. Doc. No. 1082); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of War, submitting a change in the wording of the estimate of appropriation to cover repair of roads within the arsenal grounds, West Troy, N. Y., so as to read "for the repair of roads within and of one public road running through the arsenal grounds, $20,000" (H. Doc. No. 1083); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of War, submitting draft of legislation to be inserted in the bill making appropriations for the service of the War Department under the heading, "Transportation of the Army and its supplies" (H. Doc. No. 1084); to the Committee on Military Affairs and ordered to be printed.

4. A letter from the Secretary of the Treasury, submitting a tentative draft of legislation relating to auditor's statement to the Secretary of the Treasury, of all checks issued which shall have then been outstanding and unpaid for three years or more (H. Doc. No. 1085); to the Committee on Expenditures in the Treasury Department and ordered to be printed.

5. A letter from the Secretary of War, submitting an addition to the estimates heretofore submitted under the heading "Panama Canal," subhead "Fortifications, Panama Canal" (H. Doc. No. 1086); to the Committee on Appropriations and ordered to be printed.

6. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Albert G. Lewis *v.* The United States (H. Doc. No. 1087); to the Committee on War Claims and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. WEBB, from the Committee on the Judiciary, to which was referred the bill (H. R. 15314) prohibiting threats against the President of the United States, reported the same without amendment, accompanied by a report (No. 652), which said bill and report were referred to the House Calendar.

Mr. DILL, from the Committee on Indian Affairs, to which was referred the bill (H. R. 12123) to appropriate money to build and maintain roads on the Spokane Indian Reservation, reported the same with amendment, accompanied by a report (No. 653), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HAYDEN, from the Committee on Irrigation of Arid Lands, to which was referred the bill (H. R. 10116) for the relief of certain settlers under reclamation projects, reported the same with amendment, accompanied by a report (No. 654), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. O'SHAUNESSY, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 204) to promote the efficiency of the Public Health Service, reported the same without amendment, accompanied by a report (No. 655), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STEPHENS of Texas, from the Committee on Indian Affairs, to which was referred the bill (H. R. 11958) to provide for the sale of certain Indian lands in Oklahoma, and for other purposes, reported the same with amendment, accompanied by a report (No. 656), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. GANDY, from the Committee on the Public Lands, to which was referred the bill (H. R. 12889) authorizing the Secretary of the Interior to convey certain land to the town of Newell, S. Dak., and for other purposes, reported the same with amendment, accompanied by a report (No. 657), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R.

15295) granting an increase of pension to Henry Borghardt, and the same was referred to the Committee on Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER: A bill (H. R. 15455) to establish a United States shipping board for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve and a merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries; to regulate carriers by water engaged in the foreign and interstate commerce of the United States; and for other purposes; to the Committee on the Merchant Marine and Fisheries.

By Mr. DYER: A bill (H. R. 15456) to amend section 1754 of the Revised Statutes of the United States; to the Committee on Reform in the Civil Service.

By Mr. GREGG: A bill (H. R. 15457) for a site and building for customs and other Government offices at Galveston, Tex.; to the Committee on Public Buildings and Grounds.

By Mr. MURRAY: A bill (H. R. 15458) to provide credit for farm-home societies; to the Committee on Banking and Currency.

Also, petition of citizens of St. Paul, Minn., and Ramsey, Minn., favoring national prohibition; to the Committee on the Judiciary.

## SENATE.

### TUESDAY, *May 9, 1916.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, all Thy blessings wait upon the changeless and eternal order of the divine mind. Thou hast spoken to us by all that Thou hast made. The earth about us and the heaven above us speak to us the same language, reveal to us the same God, whisper to our hearts the blessedness of hope and of good cheer.

We bless Thee that Thou dost lead us on. Thou hast put responsibility upon human life. May we think Thy thoughts after Thee. We pray that this day we may be enabled to go forward under the inspiration of Thy holy spirit. May the laws that are made in this Congress be a transcript of the divine will. May blessings come because we are following the divine order in all our national life. We ask for Christ's sake. Amen.

The Journal of the legislative day of Friday, May 5, 1916, was read and approved.

#### LAND IN THE DISTRICT OF COLUMBIA.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, relative to the acquisition by the Government of certain property in the city of Washington fronting on the Anacostia River, which was referred to the Committee on the District of Columbia.

#### YELLOWSTONE NATIONAL PARK (H. DOC. NO. 1082).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, requesting an emergency appropriation of $15,000 for spring repairs to the road system in the Yellowstone National Park, which was referred to the Committee on Appropriations and ordered to be printed.

#### LIST OF CLAIMS (S. DOC. NO. 435).

The VICE PRESIDENT laid before the Senate a communication from the chief clerk of the Court of Claims, transmitting, pursuant to the order of the court, a list of causes referred to the Court of Claims by the United States Senate and dismissed by that court, which, with the accompanying paper, was referred to the Committee on Claims and ordered to be printed.

#### CHARLES E. CURRIER V. UNITED STATES (S. DOC. NO. 436).

The VICE PRESIDENT laid before the Senate a communication from the chief clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion filed by the court in the cause of Charles E. Currier *v.* United States, which, with the accompanying paper, was referred to the Committee on Claims and ordered to be printed.

#### WILLIAM J. LAUCK ET AL. (S. DOC. NO. 434).

The VICE PRESIDENT laid before the Senate a communication from the chief clerk of the Court of Claims, transmitting a certified copy of the order of the court filed by the court in the cause of William J. Lauck et al., heirs of James F. Lauck, deceased, *v.* United States, which was referred to the Committee on Claims and ordered to be printed.

#### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the joint resolution (S. J. Res. 119) to permit the issuance of medical and other supplies to the American National Red Cross for a temporary period.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12766) to increase the efficiency of the Military Establishment of the United States, further insists upon its disagreement to the amendments of the Senate to the bill, asks a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. HAY, Mr. DENT, and Mr. KAHN managers at the further conference on the part of the House.

#### ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice President:

S. 4726. An act to permit issue by the supply departments of the Army to certain military schools and colleges;

S. 4603. An act to authorize the Jackson Highway Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Tombigbee River at Princes Lower Landing, near Jackson, Ala.;

S. 4432. An act to amend section 8 of an act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914; and

H. R. 3575. An act to amend section 5234 of the Revised Statutes of the United States so as to permit the Comptroller of the Currency to deposit upon interest the assets of insolvent national banks in other national banks of the same or of an adjacent city or town.

#### NATIONAL DEFENSE.

Mr. CHAMBERLAIN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12766) to increase the efficiency of the Military Estab-

lishment of the United States, having met, after full and free conference, have been unable to agree.

GEORGE E. CHAMBERLAIN,
J. C. W. BECKHAM,
F. E. WARREN,
*Managers on the part of the Senate.*
JAMES HAY,
S. H. DENT, Jr.,
JULIUS KAHN,
*Managers on the part of the House.*

The VICE PRESIDENT. The question is on the adoption of the conference report.

The report was agreed to.

Mr. CHAMBERLAIN. I ask the Chair to lay before the Senate the action of the House of Representatives on House bill 12766.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives agreeing to the report of the committee of conference on the disagreeing votes of the two Houses on the bill (H. R. 12766) to increase the efficiency of the Military Establishment of the United States, further insisting upon its disagreement to the amendments of the Senate to the bill, and requesting a further conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. CHAMBERLAIN. I move that the Senate still further insist upon its amendments, agree to the further conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to, and the Vice President appointed Mr. CHAMBERLAIN, Mr. BECKHAM, Mr. BROUSSARD, Mr. DU PONT, and Mr. WARREN conferees at the further conference on the part of the Senate.

## PETITIONS AND MEMORIALS.

The VICE PRESIDENT. The Chair lays before the Senate resolutions adopted at a mass meeting of citizens of Covington, Ky., urging the President and Congress to employ all honorable methods to preserve peace and refers the same to the Committee on Foreign Relations, not knowing whether it should be printed.

Mr. SMITH of Georgia. I ask to have printed in the RECORD resolutions passed by the Eastern Arts Association, assembled in convention at Springfield, Mass., approving the bill giving Federal aid to vocational education which is now pending in the Senate.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

The Eastern Arts Association, assembled in convention now being held in Springfield, Mass., approves the principles of the United States giving a Federal aid to vocational education. The association firmly believes that this aid will stimulate and assist the States of the Union in carrying on to greater success this important and very desirable form of educational activity.

The Eastern Arts Association resolves therefore to express its sincere hope that the Smith-Hughes bill will be passed by Congress during its present session.

The Eastern Arts Association believes that the work of carrying out the measures of the act is so important and of such a special character as to make most advisable the creation of a Federal board which will give its entire attention and capacity to the administration of the act.

The association resolves therefore to express its sincere hope that the members of the Federal board shall be really representative of the industrial, agricultural, educational, and labor interests which will be served by the act.

Respectfully submitted by the committee on resolutions.

Mr. W. B. ANTHONY.
Mr. L. H. CARRIS.
Miss JEAN KIMBER.

Mr. JOHNSON of South Dakota presented a petition of sundry citizens of Lennox, S. Dak., praying that the United States remain at peace, which was referred to the Committee on Foreign Relations.

Mr. GALLINGER presented petitions of Council No. 25, Sons and Daughters of Liberty, of Nashua; of Banner Council, No. 18, Sons and Daughters of Liberty, of Pittsfield; of Old Glory Council, No. 14, Sons and Daughters of Liberty, of Center Barnstead; of Columbia Council, No. 20, Sons and Daughters of Liberty, of Manchester; and of Hope Council, No. 3, Sons and Daughters of Liberty, of Milford, all in the State of New Hampshire, praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

He also presented the memorial of J. H. Hesser, of Manchester, N. H., remonstrating against an increase in armaments, which was ordered to lie on the table.

He also presented a memorial of the Protestant Churches Association of Greater New York, remonstrating against unfriendly relations between the United States and Germany, which was referred to the Committee on Foreign Relations.

He also presented a petition of the congregation of the Southwest Presbyterian Church, of Los Angeles, Cal., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. GRONNA. I have here a letter from Mr. C. N. Barnes, of Grand Forks, N. Dak. Mr. Barnes is a member of the executive committee of the National Retail Hardware Association and writes to me in connection with the bill introduced by the Senator from Texas [Mr. SHEPPARD] to establish the National Chamber of Agriculture of the United States. It is a short letter, and I ask that it be printed in the RECORD without reading.

The VICE PRESIDENT. Without objection it is so ordered.

The letter referred to is as follows:

THE NATIONAL RETAIL HARDWARE ASSOCIATION,
*Grand Forks, N. Dak., May 2, 1916.*

A. J. GRONNA,
*Washington, D. C.*

DEAR MR. GRONNA: My attention has been called to Senate bills 5687 and H. R. 14903, and I would appreciate very much receiving a dozen copies of each of these bills.

From what I am able to gather of the legislation contemplated, it seems to me that the Government is attempting to teach and encourage altogether too much mail-order buying, to the detriment of the merchants and small towns of the country. I hope I am mistaken in this, but it looks to me as though a great many of the Government activities were directed along such lines.

It is the feeling of a large class of merchants throughout the United States that legislation is not fairly divided; that there is entirely too much directed against the small dealer; but why, I have never been able to understand. From the interest taken in this contemplated legislation by officers of several of the large mail-order houses in the United States, it is evident that they are greatly interested in it, and it has been reported to me that President Thorn, of Montgomery-Ward & Co., has distributed over 1,000,000 copies of Senate document No. 240, but I have never happened to hear of a merchant receiving one through that source.

As I feel you are interested in the success of the small merchant and the small towns of the country, I ask you as a personal favor to investigate this contemplated legislation and write me as fully as you can when sending copies of the bills.

Assuring you of my appreciation for your cooperation in this matter, I am,

Yours, very truly,

C. N. BARNES.

Mr. PHELAN. I present resolutions adopted at a meeting of sundry men and women voters of San Francisco, Cal., and they submit a request that I ask, that the resolutions be printed in the RECORD. Therefore, I ask that the resolutions may be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The resolutions are as follows:

Resolutions passed by about 600 people, citizens of San Francisco.

*Be it resolved,* That this meeting of men and women voters of San Francisco, held at the Civic Auditorium April 25, 1916, protest against the unfair action of the Judiciary Committee of the House of Representatives in blocking the passage of the Susan B. Anthony Federal suffrage amendment, and demands that it take favorable action upon it, so that it may be voted upon during this session of Congress;

*Be it further resolved,* That we call upon the administration to put its strength behind the amendment that it may be passed on to the State legislatures without delay, so that all the women of the country may enjoy the blessings of political liberty now possessed by the women of California; and

*Be it further resolved,* That we call upon our Representatives in Congress to work and vote for this amendment; and

*Be it finally resolved,* That a copy of these resolutions be sent the administration leaders, the chairman and members of the House Judiciary Committee and the entire California congressional delegation, with the request that it be read into the CONGRESSIONAL RECORD by Senator PHELAN and by Congressman NOLAN and to John B. Sanford, national Democratic committeeman.

Resolutions unanimously passed at a luncheon given by Mrs. Phoebe A. Hearst to the envoys of the Congressional Union at the Hacienda del Pozode Verona, Pleasanton, Cal., April 24, 1916.

*Be it resolved,* That as voters we protest against the action of the Judiciary Committee of the House of Representatives in unjustly blocking the passage of the Susan B. Anthony Federal suffrage amendment and demand that it be given an immediate favorable report that it may be passed during this session of Congress;

*Be it further resolved,* That we urge Senator JAMES DUVAL PHELAN to work and vote for the passage of the bill in the Senate this session;

*Be it finally resolved,* That copies of this resolution be forwarded to the administration leaders, the chairman and members of the Judiciary Committee of the House of Representatives, and to the Members of the California congressional delegation, with the request that it be read into the CONGRESSIONAL RECORD; in the Senate by Senator PHELAN, and in the House by Congressman ELSTON.

(MRS.) PHOEBE A. HEARST,
*Chairman.*

Mr. PHELAN presented a petition of the California State Rural Letter Carriers' Association, praying for the enactment of legislation to improve the Rural Free Delivery Service, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of Local Grange, No. 342, Patrons of Husbandry, of Dinuba, Cal., remonstrating against any change being made in the parcels-post law, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of sundry citizens of Sacramento, Cal., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. THOMPSON. I present a communication from Mrs. Sophie L. W. Clark, superintendent of the Civic Housekeeping Department of the Woman's Christian Temperance Union, of western Washington, inclosing a memorial in favor of a bill I introduced relative to the naturalization of women. I should like to have printed in the RECORD the communication and the accompanying memorial passed by the society, and ask that they be referred to the Committee on the Judiciary.

There being no objection, the communication and memorial were referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

WOMAN'S CHRISTIAN TEMPERANCE UNION,
*Seattle, April 27, 1916.*

Senator WILLIAM HOWARD THOMPSON,
*Washington, D. C.*

DEAR SIR: Am sending a memorial, just received from Colby, Wash., on the question of a married woman's citizenship. The memorials presented by Senator POINDEXTER on February 28 were placed with Judiciary Committee. May I ask to have this memorial placed with others on same subject.

Have secured action through various organizations in favor of this measure, which I hope will aid in bringing measure out of committee. It is a very simple matter of justice and safety to all concerned. Surely while the war clouds are darkest is the psychological moment to put citizenship upon the basis of individual choice.

This question has been upon my heart for six years, so am anxious to know what further action Washington women must take before bill will be passed.

Cordially, yours,

Mrs. SOPHIE L. W. CLARK.

COLBY, WASH., *April, 1916.*

*To the Senate and House of Representatives of the United States of America:*

Whereas citizenship is automatically acquired by aliens through marriage; and

Whereas such procedure is neither sane, safe, nor expedient, especially now when our country is overshadowed by the great European war; and

Whereas American citizens are automatically deprived of their birthright through arbitrary acts of Congress solely on account of sex; and

Whereas such acts violate the principle, if not the letter, of section 1, Article XIV of the amendments to the Constitution of the United States of America, being unjust and un-American, tending to undervaluation of the possession of citizenship, which, in the interest of true patriotism, should depend solely on birth or deliberate intelligent choice:

Therefore we, citizens of the United States and of the State of Washington, do memorialize the Sixty-fourth Congress to repeal such acts, especially section 3 of expatriation act of 1907, and to amend the Constitution of our United States by forever forbidding the expatriation or naturalization of any citizen on account of marriage.

Mr. SHERMAN presented memorials of sundry citizens of Centralia, Bloomington, Nashville, Valmeyer, New Baden, and Breese, all in the State of Illinois, remonstrating against certain provisions of the so-called migratory game law, which were referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a petition of the Commercial Club of Elgin, Ill., praying that a permit be granted for the construction of the Illinois waterway between Lockport and Utica, which was referred to the Committee on Commerce.

He also presented a petition of the Local Branch, Sons of Veterans, of Batavia, Ill., praying for an increase in armaments, which was ordered to lie on the table.

Mr. LANE presented memorials of sundry citizens of Oregon, remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

He also presented petitions of sundry citizens of Oregon, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. WARREN presented memorials of sundry citizens of Cheyenne, Wyo., remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

Mr. OLIVER presented memorials of sundry citizens of Northampton County, Pa., remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

He also presented a petition of sundry citizens of Philadelphia, Pa., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

He also presented a petition of the Typothetæ of Reading, Pa., praying for the placing of an embargo on the export of manufactured papers and materials that enter into the manufacture of paper, which was referred to the Committee on Finance.

He also presented petitions of the congregations of the Sixth United Presbyterian Church and the Eighth Street Reformed Presbyterian Church, of Pittsburgh, Pa., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

He also presented a petition of the United Singers of Philadelphia, Pa., praying that the United States remain at peace, which was referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of Sewickley, Pa., praying for the enactment of legislation to found the Government on Christianity, which was referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Pennsylvania, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. COLT presented petitions of sundry citizens of Rhode Island, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of Washington County Pomona Grange, Patrons of Husbandry, of Westerly, R. I., praying for Government ownership of telegraph and telephone systems, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the Improvement Association of Bristol, R. I., praying for the establishment of a large naval base on Narragansett Bay, which was referred to the Committee on Naval Affairs.

Mr. KERN presented a petition of the Indiana State Industrial Teachers' Association, praying for Federal aid for vocational education, which was ordered to lie on the table.

He also presented petitions of sundry citizens of Hammond, Whiting, Muncie, and Gary, all in the State of Indiana, praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

He also presented a petition of sundry citizens of Greenwood, Ind., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. SHEPPARD presented a memorial of sundry citizens of Muldoon, Tex., remonstrating against section 11 of the so-called cotton-futures act, which was referred to the Committee on Agriculture and Forestry.

He also presented petitions of sundry citizens of Texas, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of the District of Columbia, praying for prohibition in the District of Columbia and the Hawaiian Islands, which was ordered to lie on the table.

He also presented a memorial of sundry citizens of Douglas, Tex., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. WORKS presented a memorial of sundry citizens of Los Angeles, Cal., remonstrating against the proposed creation of a juvenile court in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a memorial of sundry citizens of Los Angeles, Cal., remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

Mr. CURTIS presented petitions of sundry citizens of Spring Hill and Girard, in the State of Kansas, praying for the passage of the so-called Federal good-roads bill, which were ordered to lie on the table.

He also presented a petition of the guards at the United States Penitentiary at Leavenworth, Kans., praying for an increase in their salaries, which was referred to the Committee on Appropriations.

He also presented a petition of sundry citizens of Ornoque, Kans., praying for prohibition in the island of Porto Rico, which were referred to the Committee on Pacific Islands and Porto Rico.

He also presented a petition of the Utopian Club, of Gove City, Kans., praying for an investigation of conditions surrounding the marketing of dairy products, which was referred to the Committee on Agriculture and Forestry.

He also presented a memorial of sundry citizens of Parsons, Kans., remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of sundry citizens of Horton, Kans., remonstrating against any change being made in the parcel-post law, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of sundry citizens of Independence, Kans., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

He also presented a memorial of sundry citizens of Baul, Kans., remonstrating against the proposed creation of a juven-

ile court in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented memorials of sundry citizens of Kansas, New York, New Jersey, Maine, Texas, Pennsylvania, Iowa, California, Massachusetts, Virginia, Ohio, and the District of Columbia, remonstrating against the enactment of legislation to make October 12, Columbus Day, a legal holiday in the District of Columbia, which were referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Coffeyville, Kans., remonstrating against certain provisions of the so-called migratory bird law, which was referred to the Committee on Forest Reservations and the Protection of Game.

He also presented memorials of sundry citizens of Kansas, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

He also presented a memorial of sundry citizens of Topeka, Kans., remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

He also presented memorials of sundry citizens of Kansas, remonstrating against an increase in armaments, which were ordered to lie on the table.

He also presented petitions of sundry citizens of Lyon County and Wabaunsee County, Kans., praying for the enactment of legislation to found the Government on Christianity, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Kansas, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. JAMES. Mr. President, I have received a letter from William A. Byrne, of Covington, Ky., transmitting, in compliance with the request of a mass-meeting of citizens of Covington and Kenton Counties, Ky., held at the Library Auditorium in that city on the 1st instant, a certified copy of the call for the meeting, and also resolutions adopted at the meeting, which I ask may be printed in the RECORD and referred to the Committee on Foreign Relations.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

COVINGTON, KY., *May 4, 1916.*

Hon. OLLIE M. JAMES,
*United States Senator from Kentucky,*
*Washington, D. C.*

DEAR SENATOR: In compliance with the request of a mass meeting of citizens of Covington and Kenton County, Ky., held at the Library Auditorium in the city of Covington on May 1, 1916, I take the liberty of forwarding herewith a certified copy of the call for said meeting and of the resolutions there adopted, which are submitted for your consideration; also, under separate cover, a picture of the vote on said resolutions.

Very respectfully, yours, WM. A. BYRNE,
*Covington, Ky.*

The undersigned committee on resolutions respectfully recommend that the following declaration be adopted as representing the convictions and wishes of this meeting, to wit:

"The people of Covington and Kenton County, Ky., represented by 400 citizens and residents of the city and county, who, in the exercise of their constitutional rights as part of a free and sovereign people, on this, the evening of the 1st day of May, 1916, have come together at the Library Auditorium in the city of Covington for the purpose of taking mutual counsel upon the present international situation, and of submitting their convictions and wishes relative thereto, in just and proper manner, to the executive and legislative departments of the Federal Government, do hereby solemnly declare:

"In common with all other good and loyal citizens of our country we stand, now and at all times, for the honor, safety, and happiness of the United States of America.

"Our hearts go out to the President of the Nation in this his hour of unexampled responsibility for the weal or woe of 100,000,000 of American citizens intrusted by them to his keeping.

"Should it come to pass that the last word will have to be said, and nothing but the duty of action remain, we shall be ready and willing to make the utmost sacrifices of life and property upon the altar of our common country.

"We deem it, however, against the best and highest interests of the American people to let to-day's friction, due to a world in upheaval, result in the severance of friendly relations or in bringing on a state of war with Germany or any other country, unless our final decision be in completest harmony with the principle of the golden rule and the dictates of national common sense.

"Believing that the present crisis in international affairs does yet admit of fair, honorable, and humane alternatives which will enable our Government to spare this Nation the unutterable distress and horrors of war, we ask the President of the United States to continue his efforts at peaceable adjustment of our differences with the distracted nations of Europe, and we ask the Congress of the United States, and more especially our Senators from Kentucky, and our Representative from the sixth congressional district of Kentucky to use all honorable means toward the prevention of a state of war with Germany or any other nation in the event our President should deem it his duty to sever the friendly relations of a century or more.

"And this we ask in the name of God and the American people."

The chairman and secretary of this meeting are hereby authorized and directed to forward certified copies of this resolution, together with certified copies of the call of this meeting, to the President of the United States, the Vice President of the United States, the Speaker of the House of Representatives, to the Hon. OLLIE M. JAMES and the Hon. J. C. W. BECKHAM, United States Senators from Kentucky, and to the Hon. A. B. ROUSE, Congressman from the sixth congressional district of Kentucky.

The committee on resolutions: Robert J. Trimble, Charles W. Reynolds, M. D., Theo. Von Hoene, John J. Craig, H. W. Percival, H. C. Dickhaut, John B. Read, Theodore Kluemper, J. T. Earle, William Riedlin, sr., Joseph B. Theissen, R. J. Dibowski, Henry Feltman, Edward W. Pflueger, Frederick W. Schmitz (chairman).

STATEMENT.

We, the undersigned, chairman and secretary of above-mentioned mass meeting of citizens of Covington and Kenton County, Ky., do hereby certify that there were present at said meeting from 400 to 500 citizens and residents of Covington and Kenton County, Ky.; that the resolutions herein above set out were unanimously adopted, and that the foregoing is a true and correct copy of same.

WM. A. BYRNE, *Chairman.*
F. J. HERMES, *Secretary.*

CERTIFICATE.

STATE OF KENTUCKY, *County of Kenton:*

I, H. Tilden Reinke, a notary public in and for the county and State aforesaid, do hereby certify that the foregoing statement was sworn to and subscribed before me by William A. Byrne, chairman, and Ferdinand J. Hermes, secretary, on this the 4th day of May, 1916.

Given under my hand and seal of office this 4th day of May, 1916.

[SEAL.] H. TILDEN REINKE,
*Notary Public, Kenton County, Ky.*

My commission expires January 13, 1918.

TO OUR NEIGHBORS AND FELLOW CITIZENS:

We, the undersigned, citizens and residents of Covington and Kenton County, Ky., believing it to be against the best and highest interests of the American people to let anything but real danger or necessity admit of war with Germany, who has been the friend of the United States since the birth of the Nation, hereby call upon all of our fellow citizens of like mind to meet with us on Monday, May 1, 1916, 8 p. m., at the Library Auditorium, Robbins and Scott Streets, Covington, Ky., for the purpose of giving expression to our convictions upon this all-important issue and to make our wishes known to our President and Representatives at Washington before it is too late. Let us put aside or postpone for the few moments required all business or private engagements and give our best thoughts to the present and future welfare of our common country, the one remaining hope of a troubled world:

Charles A. J. Walker, Theodore Kluemper, Harry N. Percival, Rev. J. B. Reiter, H. F. Pauly, Chas. H. Wagner, John B. Read, Orlando P. Schmidt, J. H. Kruse, E. L. Pieck, Frederick W. Schmitz, Pat Murphy, Jos. H. Meese, George F. Frecking, R. T. Von Hoene, O. J. Harcourt, C. A. Schroetter, Geo. Lohre, William Macke, Thos. Bailey, Ben H. Brames, F. S. Gottschalk, Henry Olges, H. Von Lehman, A. B. Dailey, Al G. Zumberge, John N. Middendorf, Wm. F. Schild, H. Reinecke, Peter Dehlinger, George Wilken, A. J. Dehlinger, Ben Biedenharn, sr., Ed W. Pflueger, F. H. Hugenberg, R. J. Dibowski, George E. Engel, A. C. Heckman, Jos. Feltman, R. C. Dressman, Wm. A. Byrne, Stephens L. Blakely, George L. Hill, John H. Loebker, T. J. O'Brien, Chas. W. Reynolds, M. D., Orrin Lyle Reynolds, M. D., J. A. Averdick, M. D., Frank J. Heile, Daniel Fries, Jos. B. Wilkie, A. Dibowski, H. Tilden Reinke, John J. Craig, William Riedlin, Rev. Theophilus Beusen, Henry Feltman, C. B. Schoborg, John Schlarman, Rev. Gilbert Schmidt, B. Bramlage, J. T. Earle, Selmar Wachs, Wm. C. Rieger, Jos. B. Gronotte, Theo. Von Hoene, James A. Ryan, M. D., Frank Olberding, Jos. H. Dressman, F. D. Anthe, Jos. B. Theissen, Rev. J. C. Klingeberger, A. C. Wintermeyer, M. D., Rev. Henry W. Lenz, J. B. Linnemann, R. Scheper, Henry Jansen, Henry Depenbrock, Fred Dotchengall, Henry Meimann, Theo. C. Wolking, Ed C. Feuss, W. A. Shore, F. J. Hermes, John H. Schulte, Clarence Cobb, Arthur G. Muth, Jacob Gieswein, H. H. Beerman, H. A. Schroetter, Wm. A. Rabe, A. Schramm, Frank J. Huelefeld, H. G. Klostermann, Jos. L. Ruth, John Brinker, Fred J. Ruh, Chas. C. Schmidt, J. G. Debbeler, Rev. Henry Tappert, H. Frank Ostendarp, H. J. Grote, Frank Rowekamp, Anton Ruh.

STATEMENT.

We, the undersigned, chairman and secretary of above-mentioned mass meeting of citizens of Covington and Kenton County, Ky., do hereby certify that the foregoing is a true and correct copy of the call issued for said meeting, and published on April 29 and 30, 1916, in the newspapers circulating in Covington and Kenton County, Ky.

WM. A. BYRNE, *Chairman.*
F. J. HERMES, *Secretary.*

CERTIFICATE.

STATE OF KENTUCKY, *County of Kenton:*

I, H. Tilden Reinke, a notary public in and for the county and State aforesaid, do hereby certify that the foregoing statement was sworn to and subscribed before me, William A. Byrne, chairman, and Ferdinand J. Hermes, secretary, on this the 4th day of May, 1916.

Given under my hand and seal of office this 4th day of May, 1916.

[SEAL.] H. TILDEN REINKE,
*Notary Public, Kenton County, Ky.*

My commission expires January 13, 1918.

## REPORTS OF COMMITTEES.

Mr. MYERS, from the Committee on Public Lands, to which was referred the bill (H. R. 228) to amend the United States homestead law in its application to Alaska, and for other purposes, reported it with an amendment and submitted a report (No. 424) thereon.

Mr. RANSDELL, from the Committee on Public Health and National Quarantine, to which was referred the bill (S. 2215) to provide divisions of mental hygiene and rural sanitation in the United States Public Health Service, reported it without amendment and submitted a report (No. 425) thereon.

Mr. JOHNSON of Maine, from the Committee on Pensions, submitted a report (No. 423) accompanied by a bill (S. 5914) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to widows and dependent relatives of such soldiers and sailors, which was read by its title, the bill being a substitute for the following Senate bills heretofore referred to that committee:

S. 74. William Bell.
S. 408. Michael Lacey.

S. 5446. Helen A. Gibbs.
S. 5505. Thomas J. McBride.

Mr. LEA of Tennessee, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 114, authorizing the Committee on Public Health and National Quarantine or any subcommittee thereof to employ a stenographer and to send for persons, books, and papers, etc., reported it without amendment.

He also, from the same committee, to which was referred Senate resolution 176, extending the resolution of March 9, 1916, authorizing the Committee on the Census to employ an additional clerk, reported it with amendments.

He also, from the same committee, to which was referred Senate resolution 119, authorizing the Committee on Fisheries to employ a stenographer to report hearings held before the committee, reported it with an amendment.

He also, from the same committee, to which was referred Senate resolution 111, authorizing the Secretary of the Senate to pay to the heirs of Richard Shaw, late head waiter in the Senate restaurant, a sum equal to six months' salary at the rate he was receiving at the time of his death, etc., reported it without amendment.

### MISSISSIPPI RIVER BRIDGE AT MEMPHIS.

Mr. SHEPPARD. From the Committee on Commerce I report back favorably without amendment the bill (S. 5886) extending the time for the completion of the bridge across the Mississippi River at Memphis, Tenn., authorized by an act entitled "An act to amend an act approved July 20, 1912, entitled 'An act to authorize the Arkansas & Memphis Railway Bridge & Terminal Co. to construct, maintain, and operate a bridge across the Mississippi River,' approved August 23, 1912," and I ask for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

### NATIONAL ARCHIVES BUILDING.

Mr. POINDEXTER. From the Committee on Public Buildings and Grounds I report back favorably without amendment the bill (S. 5839) to repeal paragraph 4 of section 21 of the public-buildings act, approved March 4, 1913, providing for the construction of a national archives building, and I ask unanimous consent for its present consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. OWEN. What is the purpose of the bill?

Mr. POINDEXTER. The purpose of the bill is to relieve the Treasury Department of the duty of sending a commission to Europe for the purpose of making an inspection in Europe of the archives buildings there. In the first place, it is impracticable to go to Europe for that purpose at this time. In the second place, the Second Assistant Secretary of the Treasury, who has charge of this branch of the department work, advises the Committee on Public Buildings and Grounds that they can form as good an idea of the archives buildings from an examination of plans and designs that they have here as they could by going to Europe. It will save the Government some ten or fifteen thousand dollars and enable this work to go ahead in accordance with the terms of the law which was passed in 1913.

Mr. OWEN. Mr. President, I raise no further question.

There being no objection, the bill was considered as in Committee of the Whole. It provides that paragraph 4 of section 21 of the public-buildings act, approved March 4, 1913, which reads as follows: "That before the said designs and estimates are completed inspection shall be made under the direction of the Secretary of the Treasury of the best modern national archive buildings in Europe, and consultation shall be had with the best authorities in Europe on the construction and arrangement of archive buildings," be, and the same is hereby, repealed; and the acquisition of a site for a national archives building, and the construction of the building according to the terms of the act of March 4, 1913, is hereby authorized without such inspection and consultation in Europe.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

### COURTS IN CALIFORNIA.

Mr. WORKS. From the Committee on the Judiciary I report back favorably without amendment the bill (H. R. 6009) to amend section 72 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, and I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read as follows:

*Be it enacted, etc.*, That section 72 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, be, and the same is hereby, amended so as to read as follows:

"SEC. 72. The State of California is divided into two districts, to be known as the northern and southern districts of California. The south-

ern district shall include the territory embraced, on the 1st day of July, 1910, in the counties of Fresno, Inyo, Kern, Kings, Madera, Mariposa, Merced, and Tulare, which shall constitute the northern division of said district; also the territory embraced, on the date last mentioned, in the counties of Imperial, Los Angeles, Orange, Riverside, San Bernardino, San Diego, San Luis Obispo, Santa Barbara, and Ventura, which shall constitute the southern division of said district. Terms of the district court for the northern division shall be held at Fresno on the first Monday in May and the second Monday in November; and for the southern division, at Los Angeles on the second Monday in January and the second Monday in July, and at San Diego on the second Monday in March and September. The northern district shall include the territory embraced, on the 1st day of July, 1910, in the counties of Del Norte, Siskiyou, Modoc, Humboldt, Trinity, Shasta, Lassen, Tehama, Plumas, Mendocino, Lake, Colusa, Glenn, Butte, Sierra, Sutter, Yuba, Nevada, Sonoma, Napa, Yolo, Placer, Solano, Sacramento, Eldorado, San Joaquin, Amador, Calaveras, Stanislaus, Tuolumne, Alpine, and Mono, which shall constitute the northern division of said district; also the territory embraced, on the date last mentioned, in the counties of San Francisco, Marin, Contra Costa, Alameda, San Mateo, Santa Clara, Santa Cruz, Monterey, and San Benito, which shall constitute the southern division of said district. Terms of the district court for the northern division of the northern district shall be held at Sacramento on the second Monday in April and the first Monday in October, and at Eureka on the third Monday in July; and for the southern division of the northern district, at San Francisco on the first Monday in March, the second Monday in July, and the first Monday in November. The clerk of the district court for the northern district shall maintain an office at Sacramento, in charge of himself or a deputy, which shall be kept open at all times for the transaction of the business of the court."

The bill was reported to the Senate without amendment, ordered to a third reading, and read the third time.

The VICE PRESIDENT. The question is, Shall the bill pass?

Mr. THOMAS. Mr. President, I should like to inquire of the Senator from California as to the manner in which this bill affects the present provisions of the law?

Mr. WORKS. The only effect of the bill will be to provide that the district court shall sit twice a year in Sacramento, whereas it now sits only once.

The bill was passed.

LABOR CONDITIONS IN HAWAII (S. DOC. NO. 432).

Mr. SMOOT, from the Committee on Printing, reported the following resolution (S. Res. 188), which was considered by unanimous consent and agreed to:

*Resolved*, That the report transmitted by the Secretary of Labor on April 17, 1916, entitled "Fifth report of the Commissioner of Labor Statistics on labor conditions in the Territory of Hawaii," be printed as a Senate document, with illustrations.

GRAND ARMY OF THE REPUBLIC.

Mr. SMOOT, from the Committee on Printing, to which was referred House concurrent resolution 26, reported it favorably without amendment, and it was considered by unanimous consent and agreed to as follows:

*Resolved by the House of Representatives (the Senate concurring)*, That there shall be printed as a House document 1,500 copies of the journal of the fiftieth national encampment of the Grand Army of the Republic, for the year 1916, not to exceed $1,700 in cost, with illustrations, 1,000 copies of which shall be for the use of the House and 500 for the use of the Senate.

BANKRUPTCY LAWS.

Mr. FLETCHER. From the Committee on Printing I report back favorably without amendment House concurrent resolution 27, authorizing the printing of a revised edition of the bankruptcy laws as prepared by the Committee on Revision of the Laws of the House of Representatives, and I ask unanimous consent for its present consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

The concurrent resolution was considered by unanimous consent and agreed to as follows:

*Resolved by the House of Representatives (the Senate concurring)*, That there be printed 20,000 copies of the revised edition of United States bankruptcy laws as prepared by the Committee on Revision of the Laws of the House of Representatives, the said 20,000 copies to be distributed as follows: Three thousand copies to the Senate folding room, 3,000 copies for the Senate document room, 7,000 copies for the House folding room, and 7,000 copies for the House document room.

ANNA R. NIXON.

Mr. LEA of Tennessee. From the Committee to Audit and Control the Contingent Expenses of the Senate I report back favorably without amendment Senate resolution 135, to pay Anna R. Nixon, widow of Richard B. Nixon, late financial clerk of the Senate, a sum equal to one year's salary.

Mr. STONE. Mr. President, I would like to have that resolution considered at this time.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

The resolution was considered by unanimous consent and agreed to as follows:

*Resolved*, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay from the contingent fund of the Senate to Anna R. Nixon, widow of Richard B. Nixon, late financial clerk of the Senate, a sum equal to one year's salary at the rate he was receiving by law at the time of his demise, said sum to be considered as in lieu of funeral expenses and all other allowances.

COMMITTEE ON MANUFACTURES.

Mr. LEA of Tennessee. From the Committee to Audit and Control the Contingent Expenses of the Senate I report back favorably with an amendment Senate resolution 175, granting an additional clerk to the Committee on Manufactures until the beginning of the second session of the Sixty-fourth Congress, and I call the attention of the Senator from Missouri [Mr. REED] to the resolution.

Mr. REED. I ask unanimous consent for the present consideration of the resolution.

The Senate, by unanimous consent, proceeded to consider the resolution.

The amendment was, in line 3, after the word "until," to strike out "the beginning of the second session of the Sixty-fourth Congress" and insert "the end of the present session of the Sixty-fourth Congress," so as to make the resolution read:

*Resolved*, That the Committee on Manufactures be authorized to employ an additional clerk, at a salary of $100 per month, for a period lasting until the end of the present session of the Sixty-fourth Congress, the same to be paid out of the contingent fund of the Senate.

The amendment was agreed to.

The resolution as amended was agreed to.

Mr. LEA of Tennessee. From the Committee to Audit and Control the Contingent Expenses of the Senate I report back favorably without amendment Senate resolution 159, authorizing the Committee on Manufactures to employ a stenographer to report hearings, and so forth, and I call the attention of the Senator from Missouri [Mr. REED] to the resolution.

Mr. REED. I ask unanimous consent for the present consideration of the resolution.

The Senate, by unanimous consent, proceeded to consider the resolution, which was agreed to, as follows:

*Resolved*, That the Committee on Manufactures, or any subcommittee thereof, be, and hereby is, authorized, during the Sixty-fourth Congress to send for persons, books, and papers, to administer oaths, and to employ a stenographer, at cost not exceeding $1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before said committee, the expenses thereof to be paid out of the contingent fund of the Senate, and that the committee, or any subcommittee thereof, may sit during the sessions or recesses of the Senate.

MINERALS ON PUBLIC LANDS (S. DOC. NO. 430).

Mr. FLETCHER, from the Committee on Printing, reported the following resolution (S. Res. 185), which was considered by unanimous consent and agreed to:

*Resolved* That the manuscript submitted by the Senator from Colorado [Mr. SHAFROTH] on January 26, 1916, entitled "Government Control of Minerals on the Public Lands," by J. F. Callbreath, secretary of the American Mining Congress, be printed as a public document.

MAINTENANCE OF ROADS (S. DOC. NO. 429).

Mr. FLETCHER, from the Committee on Printing, reported the following resolution (S. Res. 186), which was considered by unanimous consent and agreed to:

*Resolved*, That the manuscript submitted by the Senator from Florida [Mr. FLETCHER] on March 4, 1916, entitled "Road Maintenance and its Significance," by E. W. James, chief of maintenance, Office of Public Roads, be printed as a Senate document.

WATER POWER (S. DOC. NO. 431).

Mr. FLETCHER, from the Committee on Printing, reported the following resolution (S. Res. 187), which was considered by unanimous consent and agreed to:

*Resolved*, That the manuscript submitted by the Senator from Colorado [Mr. SHAFROTH] on March 8, 1916, entitled "The Future of Water Power in the United States," by Charles W. Comstock, former State engineer of Colorado, be printed as a Senate document.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JOHNSON of South Dakota:

A bill (S. 5915) granting an increase of pension to John O'Hara (with accompanying papers); to the Committee on Pensions.

By Mr. LANE:

A bill (S. 5916) authorizing an investigation to determine the true north and west boundaries of the Warm Springs Reservation in Oregon; to the Committee on Indian Affairs.

By Mr. BORAH:

A bill (S. 5917) granting a pension to Elizabeth Sparks (with accompanying papers); to the Committee on Pensions.

By Mr. BECKHAM:

A bill (S. 5918) granting an increase of pension to Charles Robinson (with accompanying papers); to the Committee on Pensions.

By Mr. POINDEXTER:
A bill (S. 5919) granting an increase of pension to Sarah A. Higby (with accompanying papers); and
A bill (S. 5920) granting an increase of pension to Mary A. Williams (with accompanying papers); to the Committee on Pensions.
By Mr. POMERENE:
A bill (S. 5921) granting an increase of pension to Joshua M. Roller (with accompanying papers); to the Committee on Pensions.
By Mr. GALLINGER (for Mr. BURLEIGH):
A bill (S. 5922) granting a pension to Frank W. Trull; and
A bill (S. 5923) granting an increase of pension to Charles H. Skillings; to the Committee on Pensions.
By Mr. LEA of Tennessee:
A bill (S. 5924) for the relief of Henry Garfield Clemons; to the Committee on Pensions.
By Mr. DILLINGHAM:
A bill (S. 5925) granting a pension to Priscilla M. Lamphiere (with accompanying papers);
A bill (S. 5926) granting an increase of pension to Lizzie B. Williams (with accompanying papers);
A bill (S. 5927) granting a pension to Annie E. Rock (with accompanying papers);
A bill (S. 5928) granting an increase of pension to Lydia A. Lane (with accompanying papers);
A bill (S. 5929) granting a pension to Isabelle Johnson (with accompanying papers); and
A bill (S. 5930) granting a pension to Walter H. Sterling (with accompanying papers); to the Committee on Pensions.
By Mr. STERLING:
A bill (S. 5931) granting an increase of pension to Erastus T. Cressey (with accompanying papers); to the Committee on Pensions.
By Mr. SHERMAN:
A bill (S. 5932) granting an increase of pension to Helen Slade; to the Committee on Pensions.
By Mr. HUGHES:
A bill (S. 5933) granting an increase of pension to Mary E. Hart; and
A bill (S. 5934) granting an increase of pension to Della H. Johnson; to the Committee on Pensions.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. SMITH of South Carolina. I submit an amendment intended to be proposed by me to the Agricultural appropriation bill (H. R. 12717). The amendment relates to the cotton-futures section, and I ask that it be printed and referred to the Committee on Agriculture and Forestry.

The VICE PRESIDENT. The amendment will be printed and referred to the Committee on Agriculture and Forestry.

Mr. TOWNSEND. For my colleague [Mr. SMITH of Michigan], who is necessarily detained from the Senate, I submit an amendment intended to be proposed to the river and harbor appropriation bill (H. R. 12193), which I ask may lie on the table and be printed.

The VICE PRESIDENT. The amendment will lie on the table and be printed.

Mr. SHEPPARD submitted an amendment proposing to appropriate $20,000 for an international farm congress and soil-products exposition, intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

He also submitted an amendment proposing to appropriate $25,000 for special demonstration work in the sheep, wool, and mohair industries in farming sections in cooperation with the State reclamation service, intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. BROUSSARD submitted an amendment intended to be proposed by him to the river and harbor appropriation bill (H. R. 12193), which was ordered to lie on the table and be printed.

Mr. GORE submitted an amendment proposing to appropriate $150,000 for investigation and demonstration within the United States to determine the best method of obtaining potash on a commercial scale, etc., intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

He also submitted an amendment proposing to appropriate $50,000 for investigation and experiment in the utilization for coloring purposes of raw materials grown or produced in the United States, intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

He also submitted an amendment proposing to increase the appropriation for all necessary expenses for the eradication of the southern cattle ticks, etc., from $632,400 to $880,000, intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. ASHURST submitted an amendment proposing to appropriate $50,000 for the elimination and eradication of the purple loco weed, the white loco weed, and other poisonous leguminous plants known as loco weeds in Arizona, intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. HUGHES submitted an amendment providing that hereafter no official, superintendent, foreman, or other person having charge of the work of any employee in the Postal Service shall be permitted to make or cause to be made with a stop watch, or other time-measuring device or system, a time study of the movements of any such employee, etc., intended to be proposed by him to the Post Office appropriation bill (H. R. 10484), which was referred to the Committee on Post Offices and Post Roads and ordered to be printed.

Mr. WARREN submitted an amendment proposing to appropriate $12,000 for acquiring the Hawaiian Volcano Observatory at the Kilauea Volcano, Hawaii, etc., intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. CURTIS submitted an amendment authorizing the Postmaster General to adopt the Howell system of addressing mail matter, intended to be proposed by him to the Post Office appropriation bill (H. R. 10484), which was ordered to be printed, and, with the accompanying papers, referred to the Committee on Post Offices and Post Roads.

Mr. RANSDELL submitted an amendment proposing to increase the appropriation for investigation of insects affecting southern field crops, etc., from $64,400 to $74,400, intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

TREATMENT OF LEPROSY.

Mr. RANSDELL submitted the following resolution (S. Res. 189), which was referred to the Committee on Printing:

*Resolved*, That there be printed 7,500 additional copies of Senate Report No. 306, Sixty-fourth Congress, first session, entitled "Care and Treatment of Persons Afflicted with Leprosy," for the use of the Senate document room.

NOMINATION OF LOUIS D. BRANDEIS.

Mr. CULBERSON. Mr. President, as chairman of the Committee on the Judiciary I have had some correspondence with the President with reference to the nomination of Louis D. Brandeis to be Associate Justice of the Supreme Court. I ask that that correspondence may be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The correspondence referred to is as follows:

LETTER FROM THE PRESIDENT OF THE UNITED STATES IN RESPONSE TO A LETTER FROM THE CHAIRMAN OF THE COMMITTEE ON THE JUDICIARY.

UNITED STATES SENATE,
COMMITTEE ON THE JUDICIARY,
*Washington, D. C., May 5, 1916.*

DEAR MR. PRESIDENT: As you are aware, the Committee on the Judiciary of the Senate has under consideration the nomination of Mr. Louis D. Brandeis for Associate Justice of the Supreme Court of the United States.

In response to the formal and usual request of the committee made to the Attorney General for all papers in the possession of his department touching this nomination, he replied that there were no such documents in his department.

Inasmuch as this request usually results in the presentation to the Committee on the Judiciary of papers showing the reasons which actuated the President in making the nomination, I would be glad to have you state these reasons for the benefit of the committee, in case you see no objection to so doing.

Very sincerely, yours,

C. A. CULBERSON.

To the PRESIDENT,
*The White House.*

THE WHITE HOUSE,
*Washington, May 5, 1916.*

MY DEAR SENATOR: I am very much obliged to you for giving me an opportunity to make clear to the Judiciary Committee my reasons for nominating Mr. Louis D. Brandeis to fill the vacancy in the Supreme Court of the United States created by the death of Mr. Justice Lamar, for I am profoundly interested in the confirmation of the appointment by the Senate.

There is probably no more important duty imposed upon the President in connection with the general administration of the Government than that of naming members of the Supreme Court; and I need hardly tell you that I named Mr. Brandeis as a member of that great tribunal only because I knew him to be singularly qualified by learning, by gifts, and by character for the position.

Many charges have been made against Mr. Brandeis; the report of your subcommittee has already made it plain to you and to the country at large how unfounded those charges were. They threw a great deal more light upon the character and motives of those with whom they originated than upon the qualifications of Mr. Brandeis. I myself looked into them three years ago when I desired to make Mr. Brandeis a member of my Cabinet and found that they proceeded for the most part from those who hated Mr. Brandeis because he had refused to be serviceable to them in the promotion of their own selfish interests, and from those whom they had prejudiced and misled. The propaganda in this matter has been very extraordinary and very distressing to those who love fairness and value the dignity of the great professions.

I perceived from the first that the charges were intrinsically incredible by anyone who had really known Mr. Brandeis. I have known him. I have tested him by seeking his advice upon some of the most difficult and perplexing public questions about which it was necessary for me to form a judgment. I have dealt with him in matters where nice questions of honor and fair play, as well as large questions of justice and the public benefit, were involved. In every matter in which I have made test of his judgment and point of view I have received from him counsel singularly enlightening, singularly clear-sighted and judicial, and, above all, full of moral stimulation. He is a friend of all just men and a lover of the right; and he knows more than how to talk about the right—he knows how to set it forward in the face of its enemies. I knew from direct personal knowledge of the man what I was doing when I named him for the highest and most responsible tribunal of the Nation.

Of his extraordinary ability as a lawyer no man who is competent to judge can speak with anything but the highest admiration. You will remember that in the opinion of the late Chief Justice Fuller he was the ablest man who ever appeared before the Supreme Court of the United States. "He is also," the Chief Justice added, "absolutely fearless in the discharge of his duties."

Those who have resorted to him for assistance in settling great industrial disputes can testify to his fairness and love of justice. In the troublesome controversies between the garment workers and manufacturers of New York City, for example, he gave a truly remarkable proof of his judicial temperament and had what must have been the great satisfaction of rendering decisions which both sides were willing to accept as disinterested and even-handed.

Mr. Brandeis has rendered many notable services to the city and State with which his professional life has been identified. He successfully directed the difficult campaign which resulted in obtaining cheaper gas for the city of Boston. It was chiefly under his guidance and through his efforts that legislation was secured in Massachusetts which authorized savings banks to issue insurance policies for small sums at much reduced rates. And some gentlemen who tried very hard to obtain control by the Boston Elevated Railroad Company of the subways of the city for a period of ninety-nine years can probably testify as to his ability as the people's advocate when public interests call for an effective champion. He rendered these services without compensation, and earned, whether he got it or not, the gratitude of every citizen of the State and city he served. These are but a few of the services of this kind he has freely rendered. It will hearten friends of community and public rights throughout the country to see his quality signally recognized by his elevation to the Supreme Bench; for the whole country is aware of his quality and is interested in this appointment.

I did not in making choice of Mr. Brandeis ask for or depend upon "endorsements." I acted upon public knowledge and personal acquaintance with the man, and preferred to name a lawyer for this great office whose abilities and character were so widely recognized that he needed no endorsement. I did, however, personally consult many men in whose judgment I had great confidence, and am happy to say was supported in my selection by the voluntary recommendation of the Attorney General of the United States, who urged Mr. Brandeis upon my consideration independently of any suggestion from me.

Let me say by way of summing up, my dear Senator, that I nominated Mr. Brandeis for the Supreme Court because it was, and is, my deliberate judgment that, of all the men now at the bar whom it has been my privilege to observe, test, and know, he is exceptionally qualified. I cannot speak too highly of his impartial, impersonal, orderly, and constructive mind, his rare analytical powers, his deep human sympathy, his profound acquaintance with the historical roots of our institutions and insight into their spirit, or of the many evidences he has given of being imbued to the very heart with our American ideals of justice and equality of opportunity; of his knowledge of modern economic conditions and of the way they bear upon the masses of the people, or of his genius in getting persons to unite in common and harmonious action and look with frank and kindly eyes into each other's minds, who had before been heated antagonists. This friend of justice and of men will ornament the high court of which we are all so justly proud. I am glad to have had the opportunity to pay him this tribute of admiration and of confidence; and I beg that your committee will accept this nomination as coming from me quick with a sense of public obligation and responsibility.

With warmest regard,

Cordially and sincerely, yours,

WOODROW WILSON.

Hon. CHARLES A. CULBERSON,
*United States Senate.*

ADDRESSES BY HON. W. G. M'ADOO.

Mr. FLETCHER. I ask unanimous consent to have printed as a public document an address delivered by Hon. W. G. McAdoo, Secretary of the Treasury, chairman of the United States section of the International High Commission, delivered at the second session of the commission at Buenos Aires, Argentina, Tuesday, April 4, 1916. (S. Doc. No. 438.)

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. FLETCHER. I ask unanimous consent to have printed as a public document an address delivered by Hon. W. G. McAdoo, Secretary of the Treasury, at a luncheon given in his honor by the minister of finance of Chile, Union Club, Santiago, Chile, Tuesday, April 18, 1916. (S. Doc. No. 437.)

The VICE PRESIDENT. Without objection, it is so ordered.

ADDRESS BY SENATOR NORRIS (S. DOC. NO. 439).

Mr. KENYON. Mr. President, I ask to have printed as a public document an address delivered by the Senator from Nebraska [Mr. NORRIS] at the thirty-fifth annual meeting of the National Civil Service Reform League, held in Philadelphia, Pa., December 2, 1915, on the subject of the application of the merit system to post offices of the presidential class.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMAND OF THE AIR.

Mr. SHEPPARD. Mr. President, I have a copy of an article headed "Command of the Air," read before the twentieth annual meeting of the American Academy of Political and Social Sciences, April 28 to 29, 1916, on the subject of "What shall the United States stand for in international relations," and also on the effect of a policy of naval and military preparedness on America's influence as a world power. I ask that the article be referred to the Committee on Printing with a view to its publication as a public document.

The VICE PRESIDENT. The article will be refererd to the Committee on Printing.

POSTAL SAVINGS SYSTEM (S. DOC. NO. 433).

Mr. BANKHEAD. I submit the conference report on the bill (H. R. 562) to amend the act approved June 25, 1910, authorizing a Postal Savings System. I do not desire the report to be considered at this time, but I ask that it be printed and also that it be printed in the RECORD.

The VICE PRESIDENT. Without objection, that action will be taken.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 562) to amend the act approved June 25, 1910, authorizing a Postal Savings System, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment to the title of the bill and agree to the same.

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment, as follows:

In lieu of the matter inserted by the amendment of the Senate insert the following:

"SEC. 2. That postal savings funds received under the provisions of this act shall be deposited in solvent banks, whether organized under national or State laws, and whether member banks or not of the Federal Reserve System established by the act approved December 23, 1913, being subject to national or State supervision and examination, and the sums deposited shall bear interest at the rate of not less than 2½ per cent per annum, which rate shall be uniform throughout the United States and Territories thereof, but 5 per cent of such funds shall be withdrawn by the board of trustees and kept with the Treasurer of the United States, who shall be treasurer of the board of trustees, in lawful money as a reserve. The board of trustees shall take from such banks such security in public bonds or other securities, authorized by act of Congress or supported by the taxing power, as the board may prescribe, approve, and deem sufficient and necessary to insure the safety and prompt payment of such deposits on demand. The funds received at the postal savings depository offices in each city, town, village, and other locality shall be deposited in banks located therein (substantially in proportion to the capital and surplus of each such bank) willing to receive such deposits under the terms of this act and the regulations made by authority thereof: *Provided, however*, if one or more member manks of the Federal Reserve System established by the act approved December 23, 1913, exists in the city, town, village, or locality where the postal savings deposits are made, such deposits shall be placed in such qualified member banks substantially in proportion to the capital and surplus of each such bank, but if such member banks fail to qualify to receive such deposits, then any other bank located therein may, as hereinbefore provided, qualify and receive the same. If no such member bank and no other qualified bank exists in any city, town, village, or locality, or if none where such deposits are made will receive such deposits on the terms prescribed, then such funds shall be deposited under the terms of this act in the bank most convenient to such locality. If no such bank in any State or Territory is willing to receive such deposits on the terms prescribed, then such funds shall be deposited with the treasurer of the board of trustees and shall be counted in making up the reserve of 5 per cent. Such funds may be withdrawn from the treasurer of said board of trustees, and all other postal savings funds, or any part of such funds, may be at any time withdrawn from the banks and savings depository offices for the repayment of postal savings depositors when required for that purpose. If at any time the postal savings deposits in any State or Territory shall exceed the amount which the qualified banks therein are willing to receive under the terms of this act, and such excess amount is not required to make up the reserve fund of 5 per cent hereinbefore provided for, the board of trustees may invest all or any part of such excess amount in bonds or other securities of the United States. When, in the judgment of the President, the general welfare and interests of the United States so require, the board of trustees may invest all or any part of the postal savings funds, except the reserve fund of 5 per cent herein provided for, in bonds or other securities of the United States. The board of trustees may in its discretion purchase from the holders thereof bonds which have been or may be issued under the provisions of section 10 of the act of June 25, 1910. Interest and profit accruing from the deposits or investment of postal savings funds shall be applied to the payment of interest due to postal savings depositors, as hereinbefore provided, and the excess thereof, if any, shall be covered into the Treasury of the United States as a part of the postal revenue: *Provided further*, That postal savings funds in the treasury of said board shall be subject to disposition as provided in this act, and not otherwise: *And provided further*, That the board of trustees may at any time dispose of bonds held as postal savings investments and use the proceeds to meet withdrawals of deposits by depositors. For the purposes of this act the word 'Territory' as used herein shall be held to include the District of Columbia, the District of Alaska, and Porto Rico, and the word 'bank' shall be held to include savings banks and trust companies doing a banking business.

"SEC. 3. That the Postmaster General, in cases of emergency, between October 1 and April 1 of any year, may hereafter return to the mails empty mail bags theretofore withdrawn therefrom as required by law, and for such times may pay for their railroad transportation out of the appropriation for inland transportation by railroad routes at not exceeding the rate per pound per mile as shown by the last adjustment for mail service on the route over which they may be carried, and pay for necessary cartage out of the appropriation for freight or expressage.

"SEC. 4. That when, during a weighing period, on account of floods or other causes, interruptions in service occur on railroad routes and the weights of mail are decreased below the normal, or where there is an omission to take weights, the Postmaster General, for the purpose of readjusting compensation on such railroad routes as are affected thereby, is hereafter authorized, in his discretion, to add to the weights of mails ascertained on such routes during that part of the weighing period when conditions are shown to have been normal the estimated weights for that part of the weighing period when conditions are shown to have been not normal, or where there has been an omission to take weights, based upon the average of weights taken during that part of the weighing period during which conditions are shown to have been normal, the actual weights and the estimated weights to form the basis for the average weight per day upon which to readjust the compensation according to law on such railroad routes for the transportation of the mails, notwithstanding the provision of the act of Congress approved March 3, 1905, requiring that the average weight shall be ascertained by the actual weighing of the mails for such a number of successive working days, not less than 90, as the Postmaster General may direct: *Provided further*, That readjustments from July 1, 1913, may be made under this provision on routes in the first section affected by the floods in the Ohio Valley and tributary territories, commencing about March 25, 1913.

"SEC. 5. That so much of section 4 of 'An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1913, and for other purposes,' approved August 24, 1912, as provides that no adjustment shall be made unless the diverted mails equal at least 10 per cent of the average daily weight on any of the routes affected is hereby repealed.

"SEC. 6. That section 3949 of the Revised Statutes be amended to read as follows:

"'All contracts for carrying the mail shall be in the name of the United States and shall be awarded to the lowest bidder tendering sufficient guaranties for faithful performance in accordance with the terms of the advertisement: *Provided, however*, That such contracts require due celerity, certainty, and security in the performance of the service; but the Postmaster General shall not be bound to consider the bid of any person who has willfully or negligently failed to perform a former contract.'

"SEC. 7. That whenever in the judgment of the Postmaster General the bids received for any star route are exorbitant or unreasonable, or whenever he has reason to believe that a combination of bidders has been entered into to fix the rate for star-route service, the Postmaster General be, and he is hereby, authorized, out of the appropriation for inland transportation by star routes, to employ and use such means or methods to provide the desired service as he may deem expedient, without reference to existing law or laws respecting the employment of personal service or the procurement of conveyances, materials, or supplies.

"SEC. 8. That whenever an accepted bidder shall fail to enter into contract, or a contractor on any mail route shall fail or refuse to perform the service on said route according to his contract, or when a new route shall be established or new service required, or when, from any other cause, there shall not be a contractor legally bound or required to perform such service, the Postmaster General may make a temporary contract for carrying the mail on such route, without advertisement, for such period as may be necessary, not in any case exceeding one year, until the service shall have commenced under a contract made according to law: *Provided*, That the cost of temporary service rendered necessary by reason of the failure of any accepted bidder to enter into contract or a contractor to perform service shall be charged to such bidder or contractor.

"SEC. 9. That if any person shall hereafter perform any service for any contractor or subcontractor in carrying the mail, he shall, upon filing in the department his contract for such service and satisfactory evidence of its performance, thereafter have a lien on any money due such contractor or subcontractor for such service to the amount of same; and if such contractor or subcontractor shall fail to pay the party or parties who have performed service as aforesaid the amount due for such service within two months after the expiration of the month in which such service shall have been performed, the Postmaster General may cause the amount due to be paid said party or parties and charged to the contractor: *Provided*, That such payment shall not in any case exceed the rate of pay per annum of the contractor or subcontractor.

"SEC. 10. That the act of March 4, 1909 (35 Stat., p. 1126), be amended to read as follows:

"'That whoever shall willfully or maliciously injure, tear down, or destroy any letter box or other receptacle intended or used for the receipt or delivery of mail on any mail route, or shall break open the same, or shall willfully or maliciously injure, deface, or destroy any mail deposited therein, or shall willfully take or steal such mail from or out of such letter box or other receptacle, or shall willfully aid or assist in any of the aforementioned offenses, shall for every such offense be punished by a fine of not more than $1,000 or by imprisonment for not more than three years.'

"SEC. 11. That the limit of weight of mail matter of the first class shall be the same as is applicable to mail of the fourth class: *Provided*, That no article or package exceeding 4 pounds in weight shall be admitted to the mails under the penalty privilege unless it comes within the exceptions named in the acts of June 8, 1896 (ch. 370, 29 Stat., p. 262), and June 26, 1906 (ch. 3546, 34 Stat., p. 477).

"SEC. 12. That postage stamps affixed to all mail matter or to stamped envelopes in which the same is inclosed shall, when deposited for mailing or delivery, be defaced by the postmaster at the mailing office: *Provided*, That when practicable postage stamps may be furnished to postmasters precanceled by printing on them the name of the post office at which they are to be used, under such regulations as the Postmaster General may prescribe.

"SEC. 13. That section 2 of the act of April 28, 1904 (ch. 1759, 33 Stat., p. 440), be amended to read as follows:

"'That under such regulations as the Postmaster General may establish for the collection of the lawful revenue and for facilitating the handling of such matter in the mails it shall be lawful to accept for transmission in the mails, without postage stamps affixed, quantities of not less than 300 identical pieces of third-class matter and of second-class matter and 250 identical pieces of fourth-class matter, and packages of money and securities mailed under postage at the first or fourth class rate by the Treasury Department: *Provided*, That postage shall be fully prepaid thereon at the rate required by law for a single pieces of such matter.'

"SEC. 14. That the act approved January 21, 1914 (38 Stats., p. 278), authorizing the Postmaster General to adjust certain claims of postmasters for loss by burglary, fire, or other unavoidable casualty, be so amended as to include Navy mail clerks and assistant Navy mail clerks.

"SEC. 15. That hereafter the Postmaster General may enter into contracts for the conduct of contract stations for a term not exceeding two years.

"SEC. 16. That on and after July 1, 1916, when the total compensation of any postmaster at a post office of the fourth class for four consecutive quarters shall amount to $1,000, exclusive of commissions on money orders issued, and the receipts of such post office for the same period shall aggregate as much as $1,900, the Auditor for the Post Office Department shall so report to the Postmaster General, who shall, in pursuance of such report, assign such post office to its proper class, to become effective at the beginning of the next succeeding quarterly period, and fix the salary of the postmaster accordingly.

"SEC. 17. That all laws or parts of laws in conflict with the provisions of this act are hereby repealed."

And the Senate agree to the same.

PROTECTION OF FISH ON COLUMBIA RIVER AND TRIBUTARIES.

Mr. LANE. Mr. President, I wish to make an inquiry with regard to the reference of the bill (H. R. 6097) to ratify the compact and agreement between the States of Oregon and Washington regarding concurrent jurisdiction over the waters of the Columbia River and its tributaries in connection with rgulating, protecting, and preserving fish. It seems that that bill came over from the other House and was referred to the Judiciary Committee. In my opinion, it relates entirely to the regulation, protection, and preservation of fish, and, being a ratification of a compact in respect to that matter, it should have gone to the Fisheries Committee of the Senate. I am chairman of that committee, but I am not jealous of my prerogatives. The people of the State of Oregon, however, and the people of the State of Washington have initiated a measure providing for the proper protection of salmon in the Columbia River. They wish, and they should be allowed the right, to be heard upon the subject. It seems to me this measure should not be rushed through before the people of these two States have had an opportunity to voice their sentiments and their opinions in reference to the disposition of their own property. There is a fight being waged between the fishing interests in different portions of the river—those who catch the salmon near the mouth of the river and those above in the upper portions of the river, who catch the fish nearer the spawning grounds. The laws proposed to be ratified are in existence now.

The so-called fishing interests, those who pack salmon, both of the upper and lower Columbia River, are in agreement and work in harmony, and have done so for several years in the past; but at this time some of the people are protesting against the method of catching those fish, and claim that the river is being exhausted of its supply of the better grade of salmon, if you please; and that, in my opinion, is true. The salmon are diminishing. They are going the road to-day of the elk, the deer, and the blue grouse, and the timber, and every other thing that we had there in the early history of the State, to my personal knowledge. I have lived there all my life, and I have seen them go.

The people ask that they be allowed to say what they want done with their own property. Why this bill should have been referred to the Committee on the Judiciary instead of to the Committee on Fisheries I do not understand. There is a question, of course, relating to the binding of two States to a compact which prevents either State in the future from ever passing a law to control fishing until that law is agreed upon by the people of another and an adjoining State. The laws of the State of Washington, where the waters are entirely within the jurisdiction of the State of Washington, already provide the protection for salmon which some of the people of Oregon want and are now trying to pass. They ought to be allowed the right to be heard on the subject.

There have been sundry gentlemen here from Oregon who are interested in the catching of fish and marketing them for profit—a sort of a lobby, if you please—working industriously to get this legislation through quickly, promptly—pronto, if you please—before the people of the two States are allowed an opportunity to express their opinion on the subject.

I want this bill referred where it belongs, to the Committee on Fisheries. The Committee on Fisheries have heretofore had a similar bill, which originated here in the Senate, and it refused to report it out favorably. This bill, however, when it comes over from the House is not sent to that committee, but is sent to the Committee on the Judiciary. There are several other committees to which the bill could have gone. It could have been referred to the Committee on Foreign Relations or to a dozen other committees, but it belongs to the Committee on Fisheries. The people of Oregon, those not engaged in making profits by the catching of salmon and grabbing them off the spawning grounds and elsewhere, if you please, want to be heard upon the subject, and in the name of those people I ask that it be referred to the Committee on Fisheries; and I want to know why it was sent elsewhere. I move that the bill be referred to the committee which has the subject in its charge, which is composed of able gentlemen who will handle it fairly, I trust and believe.

For 50 years I have lived on the banks of the Columbia River. I have seen the Chinook salmon and the blueback salmon so thick in the river that they died from injuries and exhaustion in attempting to climb the falls and rapids of the Willamette and the Columbia Rivers. They were so thick that the boys who went in swimming—and I was one of them—had to be careful where they put their clothes or where they stepped lest they might land on a dead salmon and regret it. They have become scarce now. In those days a 50 or 60 pound Chinook salmon sold on the wharves at 25 cents, for the reason that that was the smallest sum of money we had in circulation, having never seen a 10-cent piece, much less a nickel or a copper penny, and when you went to buy a salmon you did not pick a 50 or 60 pound one, but selected a small one, because the large ones were too heavy to carry home. We lived on them; we ate them salted; we ate them fried; we ate them baked and cooked in every other way until we got tired of salmon; but now, when a man goes down to the market to buy Chinook salmon early in the season, he pays 25 cents a pound for it, and later on he gets 2 pounds for a quarter. It is so expensive that the poor man can not afford it. The little blueback salmon, which was the best pan fish of all of them, has been practically exterminated; there are hardly any left. They are using all kinds of nets of every size, and they catch the large fish, the medium-sized fish, and the small fish at the mouth of the river, and in

the upper river, by means of fish wheels and traps; they catch everything that swims up the natural runways and channels which the salmon have used for all time since their existence.

So, as I have said, they are becoming exterminated; and the people of the State of Oregon demand the right and ask that they may have an opportunity to vote upon a measure to set a guard upon the fishing, so as to place it on a reasonably just and fair basis of protection for that food supply. The very men who are now trying to rush this measure through and are here with their importunities in behalf of the measure, are the men who are catching the fish and canning them. They want to tie the hands of the two States, so that there can be no interference on the part of either one of them to change laws which many people believe do no protect the salmon for the future food supply of that country.

The salmon constitute a natural resource of that country of incalculable value to the people who inhabit it, but their rights are to be tied up at the behest, if you please, of gentlemen who want to get rich quick and who do not want anything to stand in the way of putting money in their purses.

I want this measure referred to the Committee on Fisheries, if I can bring that about, and held there until the time when the people of the States of Oregon and Washington say what they want done with their property. I therefore ask that the Committee on the Judiciary be discharged from the further consideration of this bill and that it be referred to the Committee on Fisheries.

The fisheries of Alaska are also declining; the salmon are disappearing, and there will soon be none left, any more than there are buffalo or elk or the wild pigeon, or anything else which men with insatiable maws can reach out and grab.

The VICE PRESIDENT. The Chair referred this bill to the Committee on the Judiciary. The Chair will read it for the benefit of the Senate:

*Be it enacted, etc.*, That the Congress of the United States of America hereby consents to and ratifies the compact and agreement entered into between the States of Oregon and Washington relative to regulating, protecting, and preserving fish in the boundary waters of the Columbia River and other waters, which compact and agreement is contained in section 20 of chapter 188 of the general laws of Oregon for 1915, and section 116, chapter 31, of the session laws of Washington for 1915, and is as follows:

"All laws and regulations now existing, or which may be necessary for regulating, protecting, or preserving fish in the waters of the Columbia River, over which the States of Oregon and Washington have concurrent jurisdiction, or any other waters within either of said States, which would affect said concurrent jurisdiction, shall be made, changed, altered, and amended in whole or in part only with the mutual consent and approbation of both States."

Nothing herein contained shall be construed to affect the right of the United States to regulate commerce, or the jurisdiction of the United States over navigable waters.

This act shall take effect from and after the date of its passage.

Mr. LANE. Mr. President, I have no fault to find with the President for having made the reference, for upon the face of the bill it was a legitimate reference. Yet an identical Senate bill, containing the same language, was referred previously to the Senate Committee on Fisheries. It is a matter regarding the regulation of the catching of fish; and the title misled the President. It has reference to the catching of fish and canning them. There is a contest between the two different factions. I have nothing to do with either of them, but I want the fish protected. A law is in existence now in both States; there is a private agreement also between the canners; and this bill does nothing to either one of them; but it does this: It ties the hands of the people of both States and denies the State of Oregon the right of initiating a proceeding for the protection of their own property without first securing the consent of another State which forbids the catching of salmon in its own waters in the manner here attempted to be fixed on Oregon. I ask then, Mr. President, that the Committee on the Judiciary be discharged from the further consideration of the bill, and that it be referred to the Committee on Fisheries, which is more especially engaged in looking out for the protection of the fish of this country.

The VICE PRESIDENT. Is there any objection to the present consideration of the motion of the junior Senator from Oregon to discharge the Committee on the Judiciary from the further consideration of this bill and refer it to the Committee on Fisheries? The Chair hears none.

Mr. CHAMBERLAIN. Mr. President, it is always unpleasant to find oneself separated from his colleague in the Senate on matters which affect the interests of his State; but I am totally at variance with my colleague, not only as to the reference which has been made of this bill to the Judiciary Committee but as to some of the statements which he has hastily made with with reference to the motives behind the effort to have this bill considered by the Senate.

In the early days of the session, at the request of the good people of my State, I introduced the counterpart of this bill which is now in controversy, and it was referred to the Committee on Fisheries of the Senate. It was probably hastily and inadvertently referred, probably because it used the words "fish" and "the fishing industry" in the title as well as in the body of the bill itself. But, Mr. President, the Senate bill ought to have been referred at that time to the Judiciary Committee, because there is nothing involved in it except a question of law as to whether or not a compact can be entered into between two great commonwealths, under an authorization of the Congress of the United States, as provided by the Constitution.

The Senate bill has not been reported out of the Fisheries Committee of the Senate, and will not be, probably, because at the last meeting the committee, by a vote of 3 to 3, with two members of the committee absent, disagreed. While that did not destroy the bill, it had the effect of tying it up in the committee; and the two absent members, I have been advised, were favorable to the bill. But however that may be, the bill ought to have been referred to the Judiciary Committee in the first instance, so that it might determine as a legal proposition whether or not any constitutional provision has been violated in the agreement which has been sought to be authorized.

Mr. President, I have been as strong a supporter of the initiative and referendum amendment to the constitution of Oregon as any man in the State. It was my privilege, as governor of the State, to see to it that the legislature lived up to the laws which had been enacted by the people of the State; and I believe in that amendment now. If I were in accord with the views of my colleague in this matter, and felt that if this bill were passed the people of Oregon would be denied the right to legislate upon the subject involved, either by initiative or by the legislature, I would be in hearty accord with him in an effort to defeat this measure. But it does not have any such effect; and if it is passed the people of Oregon will have the same right to initiate legislation that they have there now, either through the instrumentality of the people or through the legislature, as they may see fit.

Mr. LANE. Mr. President, I should like to ask my colleague a question. With all due respect, have not the people of Oregon already initiated a measure of this kind, and have not the people of Washington done the same, and are they not trying this out, and is it not in a way interfering with the trial before a court of a case already inaugurated?

Mr. CHAMBERLAIN. I shall discuss that feature of the matter very briefly, Mr. President, and in a general way answer my colleague.

So that the people of Oregon, either by the initiative method of legislation, or through the legislature, and the people of Washington, either through the initiative method or through the legislature, can still legislate upon the subject. Neither State is deprived of any of its constitutional rights. The proposition involved here is to adjust the differences between the people of the two States on a boundary stream so that there may be some cessation from legislation in behalf of special interests, whether those interests be up the river or at the mouth of the river. As my colleague has said, there has been constant warfare between those engaged in the fishing industry on the upper stretches of the Columbia River and those engaged in fishing near or at the mouth of the river.

Mr. President, what have the people of Oregon and Washington sought to do here? They have sought to put at rest, by the concurrent and joint action of the two bodies, this eternal trouble that they have had over the fishing industry in the two States.

From 1902 to 1909, during the time that I had the honor to represent my State as its chief executive, there was constant trouble between those fishing at the mouth of the river and those fishing on the upper stretches of the stream; and so serious did it become sometimes that they were engaged in practical warfare along the river, and the courts went so far as to hold that those who violated the laws of the State of Oregon were protected in the violation if, forsooth, they had a license from the authorities of Washington. So that no matter what laws the people of Oregon might enact for the protection of the fishing industry, if these individuals had licenses from the State of Washington, they could violate the Oregon laws with impunity; and the people of Oregon and the people of Washington then attempted to get together in the hope that they might be able to adjust these differences by uniform legislation. Conference committees of the two legislative bodies were appointed. The legislatures of both States appointed distinguished men on the committee. One of the gentlemen who now represent Oregon in the National House of Representatives was at one time a mem-

ber of this joint commission. So that the two States attempted a number of times through these joint committees to reconcile these differences by formulating a statute which both States could agree upon and which would put at rest the disputes which had been waging between the people engaged in this industry.

Finally, after having had repeated hearings where those interested in fishing on the upper stretches of the river and those engaged in it at or near the mouth, these joint commissions finally formulated a statute and agreed upon it, and then went back to their respective legislatures, and both States enacted laws for the protection of the salmon industry on this boundary stream entirely uniform in character.

Now I call attention to the act. At its session in 1915 the Legislature of Oregon enacted what is known as chapter 188, General Laws of Oregon, covering the whole subject of the fishing industry on the Columbia River, providing the devices that might be used by the fishermen along the whole stream, fixing the license fees which should be paid, and making provision for every contingency that could possibly happen on account of the violation of any of these laws. This law was also enacted by the Washington Legislature, and both of these statutes have in them the provision I am about to read. The laws are identical; there is not any question about that. Section 20 of the Oregon act provides:

SEC. 20. Should Congress, by virtue of the authority vested in it under section 10, Article I, of the Constitution of the United States, providing for compacts and agreements between States, ratify the recommendations of the conference committees of the States of Oregon and Washington, appointed to agree on legislation necessary for the regulation, preservation, and protection of fish in the waters of the Columbia River, over which said States have concurrent jurisdiction, and other waters within either State which would be affected by said concurrent interest, recommendation being as follows:

"We further recommend that a resolution be passed by the Legislatures of Washington and Oregon whereby the ratification by Congress of the laws of the States of Oregon and Washington shall act as a treaty between said States, subject to modification only by joint agreement by said States"; and said recommendation having been approved by resolution adopting the report of the conference committee, then, and in that event, there shall exist between the States of Oregon and Washington a definite compact and agreement, the purport of which shall be substantially as follows:

"All laws and regulations now existing or which may be necessary for regulating, protecting, or preserving fish in the waters of the Columbia River, over which the States of Oregon and Washington have concurrent jurisdiction, or any other waters within either of said States which would affect said concurrent jurisdiction, shall be made, changed, altered, and amended, in whole or in part, only with the mutual consent and approbation of both States."

It is thus seen that the law which was enacted for the protection and regulation of salmon fishing on the boundary stream of the two States provided for submitting this compact to Congress, and asking authority from Congress to enter into it. This resolution was adopted by both legislatures, and these bodies memorialized the Senators and Representatives in Congress to endeavor to have the compact authorized by Congress; and the bill which has now been referred to the Judiciary Committee and which passed the House by a unanimous vote is the bill which has been presented in accordance with the memorial of both legislative bodies. It is almost identical with that introduced by me in December.

Mr. President, this is not a new proposition. It is as old as our Government. It is not the first time in the history of this country that Congress has been appealed to and has granted such an authorization as the bill provides. The legality of such legislation has been directly passed upon by the Supreme Court of the United States, and the legality and constitutionality of the legislation is all that is here involved. There is no question of fact to be tried out before and determined by the Fisheries or any other committee. It is simply a question of law as to whether or not this proposal of the two States of Oregon and Washington is in any way or manner violative of the provisions of the Constitution, and whether or not the Congress has power, under the Constitution, to authorize them to enter into this compact and agreement.

In the case of Wharton against Wise—and I am only going to refer to one case—in One hundred and fifty-third United States, at page 155, this whole subject of the power of the States and of Congress was discussed and passed upon by the Supreme Court of the United States. It grew out of a compact that was entered into under the Articles of Confederation; but, so far as the law of the case is concerned, it is on all fours with that involved in the question pending here.

I am merely going to call attention to it, Mr. President.

This case involved the compact of March 28, 1785, between the States of Virginia and Maryland, which, having been duly ratified by each State, was held by the court to be binding upon both the States of Virginia and Maryland as to all the provisions embraced within it, so far as these provisions were not in violation of any of the provisions of the Constitution of the United States. In reference to the pending bill there is simply a question for the Judiciary Committee to determine as to whether or not there is any infringement upon the constitutional provision authorizing compacts between the States of Oregon and Washington—purely a legal question, and properly referred to the Judiciary Committee.

In the case to which I have called attention, the court says, at page 166:

The provisions of the compact were well designed to promote the peace, good neighborhood, and welfare of both States and facilitate intercourse between their citizens, and it was clearly within their competency at the time to adopt them, if not restrained by the Articles of the Confederation, then in existence, and in which they had joined. They were then sovereign States, possessing, unless thus restrained, all the rights and powers of independent nations over the territory within their respective limits, and could exercise any control and dominion over their navigable waters and make any regulations necessary for the protection of their navigation or to promote the commerce upon them of their respective States.

Mr. LANE. Mr. President, I should like to ask my colleague, with all due respect, if either of those States had the right at that time to inaugurate its own laws, as Oregon and Washington do? And if they had, would not that have modified that decision?

Mr. CHAMBERLAIN. No; not at all. The right to initiate statutes in the States is a matter of recent adoption. Oregon was held at one time to be the fool of the family of States because it had undertaken to adopt this method of legislation. It has been charged that Oregon was the legislative experimental State; but whether it was the fool of the family or not, many of the older and more staid States of the Union have followed in the footsteps of Oregon; and if Oregon was the fool of the family, the family of fools has somewhat increased since Oregon started.

But this legislation does not at all interfere with the right of the people to initiate legislation—not at all. As I said to the Senator a little while ago, if it interfered with the right of the people to initiate legislation, or if it interfered with the right of the legislature, which acts concurrently with the people in the matter of legislation—if it interfered with the rights of the people in any respect—I myself would stand with my colleague in undertaking to defeat this legislation. Any attempted interference with these fundamental rights would be an unconstitutional exercise of power, and that is what the Judiciary Committee of the Senate is called upon to determine.

Mr. WORKS. Mr. President, that statement of the Senator from Oregon presents rather a curious situation. Suppose these States are legally bound by this compact after we give our consent, does the Senator think that under those circumstances the people of one of the States could initiate proceedings to set aside the existing law that had been confirmed in that way? I am doubtful about that. Could the people in that way, acting in a mass, do something that the legislature could not do? Or would the States be bound by this compact, and the confirmation of it or the consent to it by the Government, so that it could not be set aside in either way?

Mr. CHAMBERLAIN. Each State has the power of legislating upon the subject; but that legislation, under the proposed bill, would not become binding until the other State had acted.

Mr. WORKS. I think the Senator is mistaken about that. I think the effect of this compact is to prevent the States from legislating on the subject at all—that is to say, legislating in any way that would conflict with this compact.

The Senator will remember that I was and am a member of the Fisheries Committee, and have given some attention to that matter; not very much, but I suggested some of the difficulties that were in the way of giving this consent, and I am listening with a great deal of interest to what the Senator says about it.

Mr. OVERMAN. The Senator is also on the Judiciary Committee.

Mr. CHAMBERLAIN. I know the Senator's views. I appeared before the Fisheries Committee; and I know, too, that the Senator is a member of the Judiciary Committee; but I was not afraid on that account to ask the Vice President, when the matter came to him, to refer it to that committee. I want the Senator to examine it; and I know that when the Senator does examine it, with the clear judicial mind that he has, he will come to the conclusion that this compact is authorized.

Mr. WORKS. Mr. President, I have given some further attention to that matter since the Committee on Fisheries had it under consideration, and I am quite free to say to the Senator that those authorities, one of which he has now cited to the Senate, changed my views somewhat as to the power of Congress to give the consent; but with me it was largely a question of propriety. If Congress is asked to give its consent, it certainly ought to know what the facts are, and to what it is consenting. I do not quite agree with the Senator that it is purely a question

of law. The Congress, of course, has the right to determine, and for that purpose to investigate the facts in reaching a conclusion as to whether it is a case where that consent ought to be given and the States bound on this particular subject.

Mr. CHAMBERLAIN. I think that question of fact can be safely relegated to the States; and I will ask the Senator if he does not think it is a case where the Committee on the Judiciary ought to have jurisdiction?

Mr. WORKS. There are two questions involved. The Senator is quite right in saying that as far as the legal question is involved the appropriate reference of the bill is to the Judiciary Committee. I think there is no question about that. But the question of fact—that is, the question as to what the nature of the compact is and the effect of it—is one that could be better determined, I think, by the Committee on Fisheries.

Mr. CHAMBERLAIN. That is where we differ. I do not think any question of fact is involved at all. The tribunal to try the question of fact and to determine what ought to be the policy of particular States is a question for the legislature or the people of the State to determine.

Now, I am going to call the Senator's attention——

Mr. WORKS. Before the Senator passes to that, will he allow me to suggest that Congress is now called upon to give its consent to certain legislation by these two States. Does the Senator think Congress has no choice about that matter, but must give its consent, if asked to do it, simply because the States have called for it, or may Congress investigate the fact and determine whether it ought to exercise that power, conceding the power to exist?

Mr. CHAMBERLAIN. I think that is a question for the Judiciary Committee to determine, first, as to constitutionality of the legislation, and then Congress can pass the bill or not, as it sees fit. It is not in duty bound to comply with the memorials from the two legislative bodies.

Mr. SUTHERLAND. Mr. President, I am not entirely sure that I understand the precise situation. Am I correct in my understanding, first, that the State of Washington and the State of Oregon have passed identical laws dealing with the subject of fishing in the Columbia River?

Mr. CHAMBERLAIN. The whole subject.

Mr. SUTHERLAND. The whole subject of fishing in the Columbia River,

Mr. CHAMBERLAIN. Yes.

Mr. SUTHERLAND. Of course, the law passed by Washington and the law passed by Oregon were each severally within the powers of that State.

Mr. CHAMBERLAIN. There is no doubt about that.

Mr. SUTHERLAND. And the validity of the law in each State did not in any manner depend upon the consent of Congress. Congress had nothing to do with that. The sole question is whether or not Congress shall consent to a compact between these States by which the States bind themselves not to alter those laws except by mutual consent.

Mr. CHAMBERLAIN. That is the question.

Mr. SUTHERLAND. If the Senator will permit me to interrupt him further, it seems to me that the Senator is right about that. That simply presents a question for the Judiciary Committee. In other words, Congress is not concerned with the wisdom of these laws. That is a matter for each State to determine, because it is a matter wholly within the power of each State with which Congress has nothing whatever to do. The sole question, therefore, is whether Congress shall give its consent that the status established by these laws shall remain until both the States give their consent to a modification of them. That is the sole question involved, as I understand it.

Mr. CHAMBERLAIN. That is the question as I understand it, exactly as the Senator states it. The question of policy is for the two States to determine. The question of power to grant the petition of the States is purely a legal question, and Congress can withhold or give consent to the legislation as it sees fit after the Judiciary Committee reports back the bill.

Mr. WORKS. I think the Senator from Utah has made a mistaken statement as to the issue presented here and the Senator from Oregon has assented to it. I think it is a very serious question whether these States had a right to pass any such law as that which will bind future legislatures so that they may not legislate upon an important matter of this kind. That is the first question to be determined. I think Congress has the right to determine that question before it gives its consent.

Mr. SUTHERLAND. If the Senator will permit me, I have not made any such assertion as that.

Mr. WORKS. I understood the Senator to say that the legislatures had a right to pass this act.

Mr. SUTHERLAND. No; I say that the several States did have a right to pass the act regulating fishing in the Columbia River, but they have no right to agree that those acts shall remain unrepealable and unchangeable unless both States agree to it. That is a matter that must be submitted to Congress, but it is the sole matter to be submitted to Congress. Whether the legislation considered by itself is wise or unwise is a matter that rests with the legislature or the people of the two States and not with Congress.

Mr. WORKS. Upon that matter I take issue with the Senator. I do not think that Congress is bound by the action of the States to give its consent.

Mr. CHAMBERLAIN. I think the Senator from California [Mr. WORKS] has misapprehended the situation. Neither the State of Oregon nor the State of Washington has undertaken to bind the other State. They have only gotten together, and each of them has passed identically the same statute and has asked Congress for the authorization of a compact between them.

Mr. WORKS. The effect of those statutes is to bind the States, and it is being treated here as a compact or contract between the States which is binding, and binding for all time.

Mr. CHAMBERLAIN. As a matter of policy, I think the Senate could almost take judicial notice of the fact, if it was necessary to do so, that there can be no rest and no cessation of litigation and of trouble unless these States are authorized by Congress to enter into this compact, because the river is a boundary stream.

Mr. SUTHERLAND. As I understood the reading of that portion of the statute, it was not a present compact between the two States that they would not alter their laws, but it was an agreement that when Congress consented to it the compact should go into operation.

Mr. CHAMBERLAIN. That is all there was to it.

Mr. SUTHERLAND. There was no existing compact—no completed compact between the States?

Mr. CHAMBERLAIN. A reading of the statutes will disclose that. I hope the Senator will permit me to proceed, as I have already detained the Senate longer than I had intended.

Mr. WORKS. Before the Senator asks that he be not interrupted let me say a word in this connection. The statement made by the Senator that Congress must necessarily determine that there is such a condition here as would authorize the making of this contract shows there is a question of fact to be determined by Congress whether that condition was then existing or not. With reference to what the Senator from Utah says, it is not an existing compact now, but there will be if Congress takes the action that is asked for; it is simply asked to give consent to a compact that has been agreed upon between the States.

Mr. CHAMBERLAIN. Neither the Oregon Legislature undertook to bind the Washington Legislature nor did the Washington Legislature undertake to bind the Oregon Legislature. They simply did this: In view of the conflicts that had occurred between citizens of the two States on the boundary stream, the legislatures of both appointed a joint commission composed of members of the two legislative bodies to hold hearings of all interested and to report a bill that might be acted upon by both States, with the view of uniformity in legislation. This joint commission reported to each legislature, and each legislature enacted the same law, and now both States appeal to Congress for an authorization of the compact between the States in order that this uniform law may be binding upon both States unless both agree to change it. That is all that is involved in the pending bill. It is for the Judiciary Committee to pass upon the legality of such legislation, in the first instance, and for Congress to determine whether it should be enacted.

Mr. LODGE. They want to turn two individual States into a compact as provided by the Constitution.

Mr. CHAMBERLAIN. That is all. I am going to call the Senator's attention to this fact: In the case that I have called attention to this very question was in issue between the States of Maryland and Virginia. They legislated uniformly upon a variety of different subjects, and they covered the whole field of legislation practically as the compact authorized them to do. Amongst other things in that compact was this. The eighth clause of that compact provided:

> All laws and regulations which may be necessary for the preservation of fish, or for the performance of quarantine in the river Potowmack, or for preserving and keeping open the channel and navigation thereof, or of the river Pocomoke, within the limits of Virginia, by preventing the throwing out ballast or giving any other obstruction thereto, shall be made with the mutual consent and approbation of both States.

Now, that is all the present compact provides—that where the States have mutually enacted uniform legislation in conformity upon a given subject for the purpose of harmonizing differences between the citizens of the two States, no change can be made by one without the consent of the other.

Mr. President, I have discussed this at some length for the purpose of showing that there is involved in this a simple question of law, that is all; and the President was perfectly right in referring the bill to the Judiciary Committee. I believe the distinguished Senator from California [Mr. WORKS] when he looks into this question as I have attempted to do, and examines the decisions of the courts of Oregon and of Washington bearing upon the subject, will favor this proposed compact. The courts have practically nullified the laws by exempting from punishment those violating the laws of Oregon who happen to hold a license from the State of Washington and vice versa; and in view of this condition, the only way in the world to protect the fishing industry and the people of the two States is by the authorization of Congress for a compact between the two States as is here proposed.

Mr. President, I have received very few protests against the enactment of this legislation. My distinguished colleague intimates that those who are interested in destroying the salmon industry and who are engaged in putting up fish for sale are the men who are behind this bill. But the people of the State are behind it as evidence by the action of two legislative bodies. The chambers of commerce of different sections of the State have appealed to me to assist in enacting this legislation for the purpose of putting an end to litigation and turmoil and trouble on this boundary stream.

I appeal to Senators here to have this bill remain with the Judiciary Committee. If there is any question of law involved which would make this compact improper or inadvisable I would cheerfully acquiesce in the judgment of that distinguished committee at once, but it ought to be with that committee, and I have every reason to believe, knowing that committee as I do, that it will determine the question fairly in view of the law involved and the Constitution of our country.

Mr. SUTHERLAND. May I ask the Senator from Oregon whether there is any opposition on the part of any considerable number of people in either Oregon or Washington to an arrangement of this kind?

Mr. CHAMBERLAIN. The only opposition I have heard, I will say to the Senator, comes from the union fishermen at the mouth of the Columbia River. The seiners' union, on the other hand, a large body of men who are engaged in fishing on the Columbia River, favor the legislation. It is the same old conflict I will say to the Senator between those at the mouth of the river who want to stop the people of the upper river from fishing and those at the upper stretches who want to stop those at the mouth of the river from fishing. That is about the size of it.

Mr. SUTHERLAND. This is the same suggestion which a few years ago resulted in the inauguration of a proposition under the initiative at the instance of the seine fishermen by which the wheel fishermen were to be prohibited from taking fish by that device and of a proposition on the part of the wheel fishermen to prohibit the seine fishermen from taking fish by seining. The result of the referendum was that the people accommodatingly passed both laws with the result that fishing was prohibited altogether.

Mr. CHAMBERLAIN. I am glad the Senator has mentioned that, because I want to say to the Senator there was some conflict of opinion on the subject in Oregon.

Mr. SUTHERLAND. It illustrates the wisdom of the initiative, I suppose.

Mr. CHAMBERLAIN. It does, and I am going to show how it does.

Mr. SUTHERLAND. I should like to have it explained.

Mr. CHAMBERLAIN. There was a conflict between the men on the lower river and those on the upper river. That conflict exists now, and it will continue to exist unless this compact is authorized and uniform legislation is enacted. The people at the mouth of the river framed a law that would practically put those on the upper river out of business. The people on the upper stretches of the river formulated a law that would practically put those at the lower end of the river out of business. Now, that was a fight between the men who were engaged in the industry and the fish were lost sight of. The people of Oregon, knowing that this conflict had been on for years, concluded that the best thing to do was to do something to protect the fish. So that by the enactment of these laws they made a closed season that was unsatisfactory to all.

Mr. SUTHERLAND. That is, the people decided that both were right and both were wrong.

Mr. CHAMBERLAIN. They decided that this fight must stop, and they protected the fish by enacting a law that made a closed season for a longer period than was necessary. The result of that was that the fish were protected; they could not be taken. There could be no satisfactory fishing at either end of the river. The result was that the legislative bodies of Oregon and Washington then got together and formulated uniform laws. They did what both sides wanted to do, but what they could not do until driven to it by the laws enacted by initiative to which the Senator from Utah [Mr. SUTHERLAND] refers.

Mr. LANE. Mr. President, if I may be allowed to say a few words, the law is beautiful, regular, also, no doubt; but just as the Senator said in answer to the Senator from New Jersey, the fishing interests got together and secured a law passed by each legislature which protected their interests all right. But in my opinion, and in that of others, it was eternal damnation to the salmon and the people at large who eat them, if you please. They did get together and they got the legislatures of both States to pass a law which requests Congress to tie the people so securely to it that the law never in the future can be changed without the consent of the other sovereign State.

Now, the State of Washington permits no such method of catching salmon in the streams which are entirely within its boundaries, and the people of Oregon are now asking for a similar law in their State which will protect their interests in the salmon. Neither the State of Washington nor British Columbia nor any other civilized country in the world permits the methods that are used and are here to be fastened upon the Columbia River. It means the extinction of the salmon.

While this proposed compact may in part be a legal question by way of authorizing two States to enter into a compact which deprives them of the right of saying what they shall do with their own property, may have been drawn in the manner which meets all legal technicalities, ultimately it lands on the fish and the food supply of the people of two States. That is my contention.

The rule of the Senate, on page 25, states that the Committee on Fisheries shall consist of nine members, to which shall be referred all matters relating to fish and fisheries, and that is all this does refer to. The right to grant a compact is perhaps a legal question, and I have no doubt it may be one. I do not know. It may be that it is constitutional, that it is lawful, but it ties the two States in respect to their fishing rights, which are the rights of the people.

It would not be so bad if the people took no interest in it, but the people have initiated a measure, and at this time it is upon record and it will be upon the ballot. The people of the State of Oregon will say what they want done with their fish, and they have a right to say it. They are, or should be, one of the sovereign powers to settle this question. We are their representatives. I stand here as a servant of the people of one of the States who will cast their vote on this question at the next election.

They have the right to express their wishes to Congress. The laws are now in effect; there is no trouble. There has been no war for years. My colleague will not dispute that. The fishing interests have worked in harmony for years. There was no war last year, or the year before, or the year before, or the year before that. There will not be any this year or next year. But if a compact is entered into they will be tied to certain laws which will, it is feared, exterminate the salmon. I have petition after petition, until one is tired of reading them, asking me to introduce bills into this body to appropriate money to construct hatcheries to breed more salmon in the Columbia River for the urged reason that they are being exterminated. I presented a bill here and it passed this body appropriating $100,000 to take care of this depleted food supply. The gear for catching salmon has increased tenfold in the past few years. The better salmon are going down before the onslaught, and I tell you the day will come when you yourselves will have cognizance of it.

Mr. SUTHERLAND. Is it the position of the Senator from Oregon that the legislation passed by the two States is unwise?

Mr. LANE. The legislation of the past has, in a great measure, been unwise. It is unwise so far as the fish are concerned and the consumers of fish are concerned. It is all right for the canners and those who are catching fish and making immediate profit out of them.

Mr. SUTHERLAND. But does not the Senator from Oregon agree with me that the question as to the wisdom or the unwisdom of legislative action on this subject matter is addressed to the legislature of each State? Does the Senator from Oregon think that Congress ought to review the question as to whether or not this legislation taken by itself is unwise?

Mr. LANE. I think what Congress ought to do is to say this: The Congress here at Washington, knowing not of your local affairs but wishing you well, will not act upon this matter until you, the people of Oregon and Washington, have spoken upon it, and said what you want directly, not what your legislature has said, which body may not have under-

stood the wishes of all of the people or known all of the subject. It is alleged that there were executive meetings, and when these hearings were had all the people having interest in the subject did not have access to them and some were denied them. That is one protest that comes to me.

Why not let the people of Oregon, or of Utah, if you please, say what they want, and then give respectful consideration to it? When we have an initiative measure already on the ballot and the case is being tried before the people and will be settled by them one way or another within a short time why not hold it in abeyance until they have spoken? That is all I ask. If they say it shall go this way, no man will more quickly help put it in effect. Why not give them the right, the right that belongs to them, to say what is to become of their own property when their interests and property are being weighed in the balance? Why put our hand down on one side of the scales and disturb it?

Why the continued effort here and the pressure—the unending pressure—of those who are canning salmon for profit and not permit a hearing from the people who want to eat it to sustain life in the bodies of themselves, their wives, and their children? Why not give them the right to be heard? Why, for once or for many times—I make no reflection there—should not Congress say, "It is your property; do with it as you like, and we will help you to do it"?

Mr. STONE. Mr. President, I should like to ask the Senator from Oregon a question bearing somewhat upon the vote or determinative of the vote which I shall cast upon this matter. That question relates to the immediate issue before the Senate. Does the Senator from Oregon understand that this bill, which has been referred to the Judiciary Committee, but which the Senator now moves shall be referred to the Committee on Fisheries, concerns the preservation of fish in the river? Is that the immediate question involved, or is the question one which concerns an agreement or compact between two States? In other words, is it essentially a legal question, or is it a fish question? Is not the fish question involved a secondary one?

Mr. LANE. Mr. President, in answer to the Senator from Missouri I will say that the fish question is primarily the foundation stone of the whole matter. All of the statistics—and Senators and other members of the committee will bear me out in the statement that they came into the committee by the ream—related to salmon, showing the catch of this year, of last year, of the year before, dating back, if you please, to 1876, if I remember correctly, showing that the fish were increasing or decreasing—sworn statements, affidavits, all bearing upon the fish, if you please, not upon the law. There is no question about it; nothing; not a word; all the tabulated statements of canneries, mercantile associations, and chambers of commerce, even so far back east as New York, are in relation to fish. It is the fish. It is really a gentleman's agreement, if you please, between the two legislatures to tie up the salmon into the nets or the fish wheels or the traps; and certain gentlemen who are catching the fish and the people have a right to be heard. They may agree to it. I do not think, if they are wise, that they will. I should not do so. I would ask them to let salmon enough in numbers get by their devilish contrivances to catch them and let them go up into the headwaters of the river and spawn and raise their own young instead of asking the Congress each year to appropriate money to hatch them artificially by the hand of man.

Believe me when I tell you that I have watched that process all my life. The salmon are going. The blueback, the best one of all of them, has gone practically, as has also the good chinook, the richest salmon in the world; the king salmon is going, and now we are eating steelheads and what we used to call dog salmon, which in the early days no man would eat unless he was starving. It will be dog salmon and steelheads until they are exterminated, and then I suppose we shall have to come to mud cats and carp until it becomes profitable to can them, when they, too, will go out of the waters.

The people are merely asking—and I in their behalf am just asking of the Senate—that you allow this bill to be referred to the Committee on Fisheries. There I will hold it without prejudice until the people of the State of Oregon and the people of the State of Washington have said directly by their own voices and their own votes what they want done. If they want the salmon skinned out of the Columbia River, I will not stop them; but give them a chance to say what they wish. That is all I ask of you. This is directly a question of fisheries; it pertains to fish, and to fish alone, and the men who are catching them for profit, if you please. Under the rules the matter belongs to the Fisheries Committee. I now ask for a vote on my motion.

The VICE PRESIDENT. The question is on the motion of the Senator from Oregon.

Mr. JONES. Mr. President, as I understand, Congress has no jurisdiction over the fisheries of the Columbia River. All the control which Congress has over that river relates to navigation. The States of Oregon and Washington are the only legislative bodies that can legislate with reference to the fishing industry of that stream. So it seems to me that the question here is simply a question of law, as to whether or not Congress can give its consent to this compact, and probably, then, secondarily, whether or not we should do it. We can not, however, regulate the fishing in the Columbia River; we can not control that.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Washington yield to the Senator from Nebraska?

Mr. JONES. Yes.

Mr. NORRIS. I want to ask the Senator from Washington if he has read the rule providing for the Committee on Fisheries, which is found on page 25 of the rules, and which reads as follows:

A Committee on Fisheries, to consist of nine Senators, to which shall be referred all matters relating to fish and fisheries.

Mr. JONES. Yes.

Mr. NORRIS. It occurred to me that, while this was a legal question, it did refer to fish and fisheries; and under that rule it is mandatory that the bill be referred to the Committee on Fisheries, regardless of the fact as to whether it may have a legal question or nothing but a legal question involved in it.

Mr. JONES. I think that rule refers to a subject in connection with fisheries over which Congress may have jurisdiction to legislate, and not to one——

Mr. NORRIS. Does not this bill refer to fisheries?

Mr. JONES. Not in the sense that Congress has any right to legislate upon it. Of course, the subject matter of legislation between the two States relates to fisheries and the subject matter of the compact between the two States relates to fisheries; but the sole question with which we have to deal is to determine whether or not we shall give our consent to the compact made between two States. It seems to me that it is purely a legal question, and, therefore, a proper question for the Judiciary Committee.

I am a member of the Fisheries Committee, and I should like to see that committee retain all the rights that it may have under the rules of the Senate, but I must say that it does seem to me that this is not a question that relates to fisheries in the sense of the rule, because we can not legislate with reference to fisheries.

Now, just a word as to the desire of the people of the two States: I want to say, Mr. President, that I have not received a single communication of any kind or character from anybody in my State protesting against the Congress giving consent to this compact, but I have received many telegrams and petitions urging that it be granted. I received a long telegram a few days ago from the governor of the State and I have received telegrams from the members of the legislature who were members of the joint commission of the two States which framed this legislation, urging its passage. They are on file with the Fisheries Committee.

Mr. LANE. Mr. President, I should like to ask the Senator if they pertain to the legal question or to the fisheries?

Mr. JONES. They urge the ratification of the compact.

Mr. LANE. For the protection of the fish?

Mr. JONES. The Senator may take it in that way, but they think that the agreement made between the two States and the legislation framed between the two States is for the interest of the two States, and that involves, of course, the protection of the fish. That is a question that I think should more properly be considered when the bill comes before the Senate for its final passage, although I doubt if that is a question really for us to pass upon.

I have not lived out there as long as has the Senator from Oregon; I have not lived as near the Columbia River as has the Senator from Oregon; but I do know that last summer I went up on the headwaters of a stream 150 miles away from the Columbia River, and there was not a riffle upon that stream upon which there were not from 10 to 15 salmon, and the shores of the stream were lined with dead salmon. There were so many that the odor was a little offensive to persons coming near the stream.

Mr. LANE. I should like to ask the Senator what kind of salmon they were?

Mr. JONES. I am not an expert, as is the Senator, but I know they were big salmon.

Mr. LANE. I suspect they were dog salmon.

Mr. JONES. I do not know whether or not the Senator is right as to that. They were the kind of fish apparently which the Indians have been gathering for a long time, and they were drying lots of them there, but whether they were dog salmon I do not know. I am not willing on that question to take even the word of the Senator from Oregon. I am satisfied that he thinks he is right about it, but I did not see him in that neighborhood, and I did not hear of his being in that neighborhood, and so I can not exactly accept his positive statement as to the character of the fish. At any rate there were lots of them.

But that is not the question. The question simply is whether Congress will give its consent to this compact between the two States. As the Senator from Oregon has said, for many years we had turmoil and all sorts of controversies, resulting in loss of life and the wounding of people. Several years ago the two States got together and adopted uniform laws; they have agreed to those laws, and since those laws have been put into effect we have not had any trouble. They come now to Congress and ask Congress to give its consent to their entering into that compact, so that the laws which have worked so well may not be changed without the consent of both States.

It is in the interest of the preservation of the fish, in the interest of harmonious relations between the people of the two States, and it seems to me Congress ought to be willing to give its consent to the compact. At any rate, the Judiciary Committee should not be discharged from the consideration of this measure. The measure, I think, is properly there. The Senator from Oregon does not know whether the committee will report on it favorably or unfavorably. They may report in favor of his position and in favor of his contention.

The Senator says, "Send this bill to the Committee on Fisheries, and I will hold it up." That is just exactly what we do not want done. We want the committee to act on it one way or the other, to bring it out here and give the Senate an opportunity to say whether or not legislation which passed the House unanimously shall be acted upon by the Senate. The Senator from Oregon says, "I will hold it up." How can he do that? By not calling the committee together and not giving us an opportunity to vote upon it. While that argument has nothing to do with the merits of the proposition, it does not commend the motion of the Senator to my favorable consideration. I think that the Judiciary Committee ought to be left in charge of this measure, and left to take such action and to make such recommendation to the Senate as it may see fit.

Mr. LANE. Mr. President, I am willing to consent that the Judiciary Committee make findings upon the legality of the measure, and then, when it is brought back to the Senate with their report, I reserve the right to move to refer it to the Committee on Fisheries, in respect to the influence and effect it will have upon the fisheries of Oregon.

I will say that there have been held a number of meetings of the Committee on Fisheries. I have called three or four meetings, but there has been a very slim attendance. Finally there were a majority of the committee present, and we had a vote upon a bill identical with this, but they declined to report it out favorably. There has been pressure made—not much, but some pressure—for a further hearing, but there were also requests made that the matter be allowed to rest until such time as the people of Oregon might have an opportunity to present their side of the case. They have not been before the committee. Every man who has been before the committee has been one who is engaged either in catching or in canning the salmon; but the people who eat them, the people who depend upon them for a food supply, have entered their plea, their protest, if you please, in the high court of the State of Oregon to the people of Oregon, and I want to hear from and be advised by them before I take action.

Now, Mr. President, I will withdraw the motion, with the understanding that the Committee on the Judiciary will consider the legal aspects of the matter, and that I may ask when the bill is reported back to the Senate that the Committee on Fisheries be allowed to take up that portion of the measure which refers to the economic aspects of it as it relates to fish. I do not know whether that would be proper, but, if that is possible, I should like that course taken.

Mr. CLAPP. Mr. President, if the Senator will allow me, while that might not be the subject of an arrangement, the Senator will have the absolute right when the bill is reported to the Senate to move to have it referred to the Committee on Fisheries.

Mr. LANE. I do not know how the Chair feels about that.

The VICE PRESIDENT. The Chair has no feeling in the matter.

Mr. LANE. I will let it go in that way, then.

Mr. BRANDEGEE. Mr. President, I think it will be impossible to have any such general understanding as the Senator from Oregon has asked for——

Mr. LANE. I do not ask for it.

Mr. BRANDEGEE. Because any bill that is referred to the Judiciary Committee, I assume, would be open to amendment by the committee, and that committee could consider any feature of it which they wanted to consider. Of course, whatever the committee may report, the Senator can make any motion that he desires to make after the bill is reported to the Senate.

Mr. CULBERSON. Mr. President——

The VICE PRESIDENT. The Senator from Oregon has a clear right when the bill is reported from the Judiciary Committee to move then to refer it to the Committee on Fisheries. That is his clear right.

Mr. LANE. Very well; I will rest upon that, and withdraw my motion.

Mr. CULBERSON. Mr. President, I simply want to reiterate the statement made by the Senator from Connecticut [Mr. BRANDEGEE], that it would be impossible for any such agreement as that suggested by the Senator from Oregon to be entered into.

Mr. LANE. I withdraw the request in that respect.

Mr. SMOOT. Mr. President, is morning business closed?

The VICE PRESIDENT. The introduction of bills and joint resolutions is still in order.

Mr. SMOOT. That is what I thought.

Mr. JONES. As I understand, the Senator from Oregon has withdrawn his motion to discharge the Committee on the Judiciary from the further consideration of the bill.

Mr. LANE. I have withdrawn the motion.

The VICE PRESIDENT. If there are no concurrent or other resolutions, morning business is closed.

### RIVER AND HARBOR APPROPRIATIONS.

Mr. CLARKE of Arkansas. Mr. President, I merely wish to make an announcement. The river and harbor bill is ready for consideration, the report having been filed, and the bill printed. I understand the Senator from Maine [Mr. JOHNSON] has in charge a bill connected with pension matters which will require a short time to complete. I give notice that, immediately upon the disposition of that measure, I will ask the Senate to proceed to the consideration of the river and harbor bill (H. R. 12193).

### GOVERNMENT OF THE PHILIPPINES.

Mr. HITCHCOCK. I ask that the Philippine bill be laid before the Senate.

The VICE PRESIDENT. The Senator from Nebraska moves that the Senate proceed to the consideration of what is known as the Philippine bill.

Mr. SMOOT. Mr. President, I should like to call the attention of the Senator from Nebraska to the fact that it is now 20 minutes of 2 o'clock. Does the Senator think that he can get the Philippine bill disposed of in 20 minutes?

Mr. HITCHCOCK. I have no reason to believe that there will be any extended discussion on the measure, after the situation is understood. I am satisfied that there is nothing to be said on this side of the Chamber. The Senator can speak better for the other side.

Mr. LODGE. Mr. President, I think there will be more than 20 minutes occupied on the motion to concur.

Mr. SMOOT. I only had in mind the saving of the 20 minutes' time.

Mr. HITCHCOCK. I had hoped I might be able to persuade the Senator from Maine [Mr. JOHNSON], in case we ran over 2 o'clock, to permit the discussion of the Philippine matter to be concluded, as I think it should.

Mr. SMOOT. I am perfectly satisfied with that, so far as I am concerned, with the exception that I know that the Senator from Arkansas [Mr. CLARKE] desires to take up the river and harbor bill.

Mr. LODGE. The Senator from Arkansas has given notice that he is going to take up the river and harbor bill.

Mr. HITCHCOCK. Yes. For that reason I thought if I could crowd in the Philippine bill now, and the Senator from Maine would be lenient, we could finish that; and that would be followed then by the bill of which the Senator from Arkansas has charge.

Mr. SMOOT. I do not know how long this is going to take.

Mr. LIPPITT. Mr. President, I think there will be some little discussion on the question of disposing of the Philippine bill in the way in which the Senator from Nebraska proposes. I almost doubt if it would be finished to-day, even if the entire time of to-day were given to it. It opens up some entirely new questions in connection with the whole matter. I only suggest that. I know that there are several Senators on this side who have indicated a disposition to make some remarks in regard to it.

Mr. HITCHCOCK. Under those circumstances, I give way to the Senator from Maine, Mr. President.

PENSION FOR SURVIVORS OF INDIAN WARS.

Mr. JOHNSON of Maine. I move that the Senate proceed to the consideration of House bill 655, which was under consideration at the time of adjournment.

The VICE PRESIDENT. The Senator from Maine moves that the Senate proceed to the consideration of House bill 655, which is the unfinished business.

The motion was agreed to; and the Senate resumed the consideration of the bill (H. R. 655) to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes.

Mr. SMOOT. Mr. President, my good friend from Georgia [Mr. SMITH], in his criticism of the bill, laid particular stress upon the fact that the bill requires but a 30 days' service to entitle a person to a pension. There are a number of Indian appropriation bills that have passed Congress and are now in force, and every one of them requires but a 30 days' service. There is a good reason for this. An Indian campaign or war is not the same as a war between civilized nations. Many times in the early days a band of roving Indians, 100 to 1,000 of them, would make a raid upon a city or a remote town within the territory without any notice whatever, and there was no time to muster in an army. There was no time to examine the men physically and see whether or not they were unfit to enter the service. They were called upon to act immediately to defend their lives; and it is for this, as well as other good reasons, that all past legislation granting pensions to Indian-war veterans have required only a 30 days' service.

There is, as I stated, a great difference between defending a sparsely settled community from Indian attacks and fighting a civilized army. Any man who went into a fight with Indians knew before he entered it that if the Indians were successful the chances for his life were not worth considering. If captured, he was butchered in the most inhuman and brutal way. They did not kill him at once. About the first thing they did was to scalp him, and I know of cases, Mr. President, after the man had been scalped he was taken by his captors and tied near an ant heap, and the ants would feed upon him until death came. That was the kind of a death that many of the early Indian fighters experienced. The amendments that have been proposed to the bill by the Senate Committee on Pensions are simply following previous laws granting pensions to Indian fighters.

The Senator objected to the provision that the want of a certificate of discharge shall not deprive any applicant of the benefits of this act. That is simply following the language of every pension bill granting pensions to Indian fighters, from the first that was passed in 1892 until the last one passed. The early Indian fighter was considered a minuteman. No one knew when he would be called upon to serve, nor how long he would have to serve. He furnished his own horse and saddle, as well as his own provisions.

Mr. SMITH of Georgia. They defended their own homes, too.

Mr. SMOOT. Yes; and they were defending the property of the United States at the same time.

Mr. CLAPP. Mr. President——

Mr. SMOOT. I wish also to say to the Senator from Georgia that the pioneers of that great, vast territory that has made the United States what it is to-day never could have settled that territory successfully unless these men had taken their lives in their hands and defended not only the property but the interests of the United States.

Mr. SMITH of Georgia. Mr. President——

The PRESIDING OFFICER (Mr. SMITH of South Carolina in the chair). Does the Senator from Utah yield to the Senator from Georgia?

Mr. SMOOT. For a question.

Mr. SMITH of Georgia. Is not that equally true of the coast States on the Atlantic? If our ancestors had not come over here and driven out the Indians, we would not have occupied the lands, would we?

Mr. SMOOT. Mr. President, they were in an entirely different situation in the 13 coast States. The country west of the Rocky Mountains was a vast wilderness, an empire, with very few people in it. Take the conditions in the year 1847, when the pioneers first settled Utah. There were about 1,500 white people, surrounded by twenty or thirty thousand savage Indians. They were defending their homes then as did the people in the original States of the Union. This bill does not provide pensions for the pioneers of 1847. We are not asking in this bill that pensions be granted on account of Indian attacks under those conditions. The Government was not requested to defend the people against the Indians until years after. The policy of those early pioneers was to divide everything they had with the Indians, and it proved to be a wise policy, and if it had not been adopted none would have been spared from a cruel death.

This bill does pension the veterans of the Black Hawk War of 1865–1868. That war occurred after the settlements had been established, titles to lands had been secured from the United States, business that had been established with eastern States. The organization was a Territorial one and was called upon not only to defend the cities but to defend the property and interests of the United States at the same time. The United States troops located at Fort Douglas were ordered to protect the mail route between Council Bluffs and San Francisco, and in addition a company of Utah men assisted in that campaign; but this bill has not reference to that class of service. The United States Indian agent located at Salt Lake City asked the Government for protection against the Indian raids, and the department responded that it was impossible for the Government of the United States to comply with the request, for they had no soldiers in the West except those that were engaged in protecting the mail route between Council Bluffs and San Francisco. So, Mr. President, we are not asking for pensions for anyone who did not serve as a defender not only of his home and the lives of his wife and children but of his country.

There are very few of these Indian war veterans living. They were not boys when called upon to fight. They were grown men, necessarily so, whereas in the Civil War the great majority of the enlistments were boys between the ages of 15 and 22 years. Indian fighters were generally middle-aged men, and there are very few of them alive.

I have a letter dated April 30, 1916, from Mr. William O. Taylor, of Orange, Mass. Mr. Taylor served in the Civil War, as many of the Indian fighters who are affected by this bill served in that war, and they can not receive a pension under this bill. Mr. Taylor has undertaken to write a history of the campaign known as the Little Bighorn Indian campaign. That was the campaign that was led by Gen. Custer. He says:

> I have been collecting data for the purpose of writing my reminiscences of that campaign, and have tried to keep in touch with as many of the regiments as possible; and as a result I find that out of the 27 officers who, under Custer, led our regiment, the Seventh Cavalry, against Sitting Bull that day in June but 4 are living to-day.

The Senator must remember that upon that fatal day in June over 50 per cent of all the soldiers under Custer's command were slaughtered, and there live to-day but 15 survivors who took part in that campaign.

Mr. President, this campaign is but one, but points with accuracy to how few of the Indian fighters are left. The Indian fighters provided for in this bill are entitled to pensions just as much as any Indian war veteran who has been pensioned in the past; and I do not believe that we ought to be straining at a gnat when we have already swallowed a camel.

The Senator from Colorado [Mr. THOMAS] rightfully referred—and I have no criticism for his doing so—to the enormous expense that the Government is under and will be burdened with by this year's appropriation bills. I wish that the Senator, at an early day, would help me pass a law requiring that the heads of every department of this Government shall file an itemized statement of the expenditure of all lump-sum appropriations, and shall also file a statement of the number of employees and the salaries paid out of lump-sum appropriations; and I will guarantee now that if such a law were passed we would not only save the $1,000,000 per annum, the very most this bill will amount to, but we would save, I was going to say, tens of millions of dollars.

Let me call attention to one such report to show what I mean in this regard. Congress appropriated $2,000,000 for the eradication of the foot-and-mouth disease in the year 1915, and the Secretary of Agriculture was required to file an itemized statement of the expenditure of the money; and this is not any different, in my opinion, from what we would find in many lump-sum appropriations made by Congress if examined into.

Was it all used for the purpose it was appropriated for? No; I am sorry to say. I am going to refer to only a few of the misuses to which the fund was converted. For instance:

To inspect renovated butter factories and creameries, $468.72; to investigate the cheese industry in the Western States in the way in which the bureau might help this industry, $511.76; to attend the meeting of the potato growers of Maine, $291.38; to assist in organizing cow-testing associations, $255.62; to study market stock and grades of wool, $903.96; to attend meeting of the Southeastern Sanitary Association, $49.05; to investigate cooperative ostrich-breeding work being done in Arizona and other points, $271.81; and so forth.

Mr. President, if we had a law requiring an itemized statement of the appropriations of lump sums I am sure occurrences such as above would not happen often, and there would be tens of millions of dollars saved to the Government.

Mr. SMITH of Georgia. I ask the Senator how much is appropriated in all in lump sums? Can he tell us?

Mr. SMOOT. Hundreds of millions of dollars, I will say to the Senator. The Committee on Appropriations have been trying to reduce them, and have done so to a limited extent, but the departments claim they do not know what emergencies will arise; that they must have sufficient to cover every possible contingency; that every dollar will be spent economically; but I am sure an investigation would prove the latter to be untrue.

I know that such appropriations are unwise. I wanted to make this much of a statement, pointing out our obligations and the responsibility as Senators in the matter. No one has followed the appropriations of the Government who does not know that these evils exist, for they can not be classed as being other than evils.

Mr. President, it seems to me that this is a bad time to say to the country that Congress will not recognize the patriotic service of men who defend our country. I believe the Senator from Georgia will admit that Indian war veterans in the early days fought a canny and brutal foe under the most trying circumstances and conditions, and are entitled to a pension at least equal to some of the men who enlisted in the United States Army for the War with Spain.

Mr. CLAPP. Mr. President——

Mr. SMOOT. In saying this, Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Minnesota?

Mr. SMOOT. Yes; I yield to the Senator.

Mr. CLAPP. In the first place, I would want to question the statement the Senator made a moment ago when he said he thought this was an inopportune time to show a want of willingness to recognize those who had served. Of course, I think any time is an inappropriate time to withhold justice, but I could not agree with the Senator if he had in mind the probability of immediate enlistment.

Mr. SMOOT. I had no such idea in mind, I will say to the Senator. What I had in mind was that if the Congress of the United States should refuse to grant these few veterans a pension right at the time when the Government of the United States is asking for volunteers it would be, it seems to me, a rather unfortunate thing.

Mr. CLAPP. I do not think so with reference to any existing condition, for I do not believe that when the men enlist they have any thought of pension.

Mr. SMOOT. I do not say that they have.

Mr. CLAPP. I would differ with the Senator in his comparison of service.

Mr. SMOOT. I will try to explain just what I had reference to when I made the statement. When interrupted I had just began a statement in these words, "In saying this, Mr. President"—I would have added I do not want to be understood as casting any reflection upon the service that was rendered by or the patriotism of the soldiers in the Spanish War.

Mr. CLAPP. I do not think in all history there is any instance where men went forth——

Mr. SMOOT. With greater willingness.

Mr. CLAPP. With greater willingness and with more absolute altruism, because they were not going to defend their own country, they were going prepared to die for an alien race to whom they were under no obligation.

Mr. SMOOT. I heartily agree with the Senator, and if I had not been interrupted I would have made my former statement clear. I had no idea whatever of reflecting upon that remarkable show of patriotism.

Mr. CLAPP. I knew the Senator had not, and that nothing was further from the Senator's line of thought.

Mr. SMOOT. Mr. President, I do not believe there is any particular need of discussing the question further. I think Senators understand the purpose of the bill, and I think they are convinced that it is a just and proper one, if the country is to pay pensions to its worthy defenders, and I say there is no class of veterans who are more worthy than the men provided for in this bill.

The PRESIDING OFFICER (Mr. BROUSSARD in the chair). The question is on the motion of the Senator from Georgia to reconsider.

Mr. SMOOT. Mr. President, yesterday I stated to the Senate that I did not desire to make a point of order against the motion of the Senator from Georgia until the discussion was over but I did intend to make it whenever the discussion had ended. I do not want to foreclose anybody from making whatever statement they desire upon the bill, but if no one desires to speak futher——

Mr. NORRIS. Will the Senator yield to me? I have an amendment that I intend to offer, and I will perhaps submit some remarks upon it, but the debate will not be precluded by this motion. So I have no objection to the Senator making his point of order and letting that be disposed of as far as I am concerned.

Mr. SMOOT. I will say to the Senator the point of order has nothing to do with whatever the Senator may decide to do in relation to offering an amendment. Rule 13, paragraph 1, provides that—

> When a question has been decided by the Senate, any Senator voting with the prevailing side may, on the same day, or on either of the next two days of actual session thereafter, move a reconsideration, etc.

Mr. SMITH of Georgia. It is not necessary for the Senator to take any time to debate that proposition. He is right about it. The point of order is made. My motion came too late.

Mr. NORRIS. Did the Senator from Utah make a point of order?

Mr. SMOOT. I make the point of order that the motion to reconsider came too late.

Mr. BRANDEGEE. I understand the Senator makes the point of order. That is the end of the motion to reconsider, of course.

Mr. SMOOT. The Senator from Georgia so stated.

Mr. SMITH of Georgia. I do not think there is any doubt about it. I never argue a point of order before the Senate when I have a clear conviction that the other side is the correct view. I have no doubt that under the rule the motion should have come earlier. The truth is these amendments went into the Senate and were adopted by the Senate and I did not know it. The President of the Senate just inquired formally and put them through, and the point of order being made I am too late.

Mr. BRANDEGEE. I was aware of that, but I assumed that the Senator made a motion simply to give him a parliamentary standing to debate it.

Mr. SMITH of Georgia. No; I hoped no point of order would be made on it. I want to have it reconsidered, and I have still another motion to make. There are several other motions that are entirely proper.

The PRESIDING OFFICER. The Chair sustains the point of order made by the Senator from Utah.

Mr. NORRIS. The bill being in the Senate, I offer the following amendment.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 2, line 17, after the semicolon and the words "eighteen hundred and sixty-eight," insert:

> To the following organizations of the First Regiment Nebraska Militia engaged in fighting Indians and guarding United States mails on the western frontier: Company A, First Regiment, First Brigade, Nebraska Militia, who served from August 30, 1864, to November 12, 1864; Company B, First Regiment Nebraska Militia, who served from August 13, 1864, to February 13, 1865; Company C, First Regiment, Second Brigade, Nebraska Militia, who served from August 24, 1864, to February 7, 1865; to Capt. Edward P. Childs, Artillery detachment, Nebraska Militia, who served from August 30, 1864, to November 12, 1864; and Company A, First Regiment, Second Brigade, Nebraska Militia, who served from August 12, 1864, to December 24, 1864.

Mr. NORRIS. Mr. President, I do not care to discuss this amendment. I have gone over it with the chairman of the committee. There is not any doubt in my mind about its being meritorious, and I think the chairman agrees with me. There are four companies included in this amendment. The least service of any of them was 74 days, and from that up to 6 months. The bill under consideration provides for giving relief in case of a service of over 30 days. So all these mentioned companies, so far as length of service is concerned, at least, will be much more meritorious than the minimum provided for in the bill.

In 1864, when the State of Nebraska was still a Territory, the Secretary of War asked the then governor, Gov. Saunders of that Territory, to enlist a regiment of militia under Territorial law to defend the frontier. The soldiers were engaged in the Civil War throughout the South, and the Indians were commit-

ting various depredations throughout the West. The governor of the Territory, in accordance with that request, started out and enlisted the companies named in the amendment.

The first company had 44 enlisted men, the second company had 50 enlisted men, the third one mentioned in the amendment had 54 enlisted men, the Artillery detachment mentioned in the amendment had 11 enlisted men, and the last one mentioned in the amendment had 51 enlisted men.

A great many of these men had served in the Civil War prior to this service. Some served afterwards. So there are a great many of them getting pensions now. Of course, there are a great many of them dead. The majority of them are dead. There is no way to ascertain just exactly how many are still living. I have tried to find out, but can get nothing definite.

I have here a letter from the captain of one of these companies, and he gives it as his judgment that there are not to exceed 25 or 40 men left who would come under the provisions of the bill if my amendment were adopted. They are either dead or they are getting pensions for other service in the Civil War as he was himself.

After these regiments were enlisted they were placed under the command of Federal officers. They were officered by United States Federal officials. They were clothed by the Federal Government; they were fed by the Federal Government. Their horses were furnished by the Federal Government. Their arms and ammunition were furnished by the Federal Government, and the only reason why they are not occupying a pensionable status now is the one technicality that they were not sworn into the service.

As a matter of fact they were paid by the Territory, and later on the Government of the United States, recognizing its obligation, reimbursed the Territory for the payment of all these men who served, so that the Government has recognized them. There can be, in my judgment, no question but that the survivors of these companies occupy a position much more meritorious than the provisions of the bill technically require. But they are not included in the bill.

In preparing the amendment that I have offered I procured the names of the different companies from the War Department. I have here a letter from The Adjutant General, from which I quote:

The records of this office show that four companies of mounted men, which are shown by the roster of Nebraska Volunteers (1861 to 1869), compiled from records on file in the office of the adjutant general of the State of Nebraska, to have belonged to the First Regiment Nebraska Militia, and a detachment of artillery were called out by the governor of the Territory of Nebraska in the year 1864 and placed under the command of the commanding general of the troops of the United States in that Territory.

Let me say to the Senate that when they were brought out into the service at the various times mentioned they were not only put under the command of Federal officers but they served with Federal soldiers side by side. They saw some very severe service, as I shall show. The Adjutant General's office did not have the records of the payments and I took it up with the Treasury Department. I have from the Auditor of the Treasury a letter from which I quote the following:

I have the honor to inform you that the records of this office show that in the claim of the State of Nebraska for reimbursement for moneys expended for raising, equipping, etc., her militia for the above-named service, there are found five company rolls of organizations.

I inadvertently used the word "four." There were four companies and one detachment of artillery, which make five. Then follows the description in this letter as contained in my amendment, with the exception that in the amendment I did not tell how many men there were in each one.

In conclusion the officer says:

For the services above mentioned the several organizations were paid by the State of Nebraska and said State has been reimbursed by the United States.

They were under the command of Brig. Gen. R. B. Mitchell of the Federal Army. He had other soldiers besides these under his command and these men served with them. As a matter of fact at that time there were some very severe depredations by the Indians. These men followed the Indians clear across the State of Nebraska. They went into Colorado. It was partly in the wintertime, you will notice. It commenced in August and ended up in February.

Gen. Mitchell, after the service had been completed and the Indians driven out of the country, issued a field order in which he referred particularly to these particular companies that are included in this amendment. I want to quote from that order. It was issued in January, 1865. Some of these men served nearly a month after this order was issued:

The general commanding wishes to tender his thanks to the men of his command who were with him on his recent expedition against the Indians.

This was just one of the expeditions, and then he mentions various persons by name. Capt. T. J. Majors was an officer of one of these companies commanding detachments of the First Regiment Nebraska Militia, and Capt. N. J. O'Brien commanding a battery formed from artillery detachments; Capt. E. B. Murphy for valuable services rendered while on the march. Then he says:

Hardships were encountered which to overcome requires the highest order of soldierly qualities, patience, and endurance, and during a march of over 300 miles over a wild and desolate country in the midst of winter and during intense cold, not a word of impatience or complaint was heard.

The general commanding further wishes to call especial attention to the admirable conduct of Capt. Wiles's Company B, and Capt. White's Company C, First Nebraska Militia, who although poorly equipped and supplied and their time of service expired excited admiration by their soldierly conduct and cheerful performance of duty.

This Capt. Wiles mentioned here particularly by the commanding general is still alive and lives in my State. He has written a very lengthy letter in regard to this service performed at the time he speaks of. He himself would get no benefit from the amendment that I have offered because he also served in the Civil War and was a captain or lieutenant in that service. So there is in no way any personal advantage for him in it. He is now receiving a pension for his services in the Civil War.

I want to quote a few things from Capt. Wiles. He says:

I also served—

He has just spoken of his services in the Civil War—

I also served about six months in Company B, First Regiment, Second Brigade, Nebraska Militia.

That is one of these organizations included in the amendment.

We were ordered to report to Fort Kearney for duty, which order was promptly obeyed. We were consolidated with First Nebraska Veteran Cavalry for duty.

That was a Regular Army organization.

We performed the duties of soldiers in every particular.

In other words, they served just the same as the Regular soldiers did who were mustered into the service.

In another place in the letter he says:

Gov. Saunders—

Who was then governor of the Territory—

had been requested by the Secretary of War to raise a regiment of four-months' troops to protect the settlers and United States mails and express.

The men were most of them farmers, but were well acquainted with the use of firearms. I am willing to admit that we were not mustered into the United States with a regular mustering officer, but we were mustered by Col. P. P. Mason, of Nebraska City, who was a provost marshal.

So, as a matter of fact, while they were mustered into the State service, the man who actually did the work and administered the oath was a United States official, and he was only acting there under the request of the governor, who had been requested to take this action by the Secretary of War.

Capt. Wiles further on says:

The United States furnished transportation, forage for the army, and ammunition and clothing and provisions for the men.

My requisition was honored by the quartermasters and commissary while I was captain of Company B just as prompt as when I was first lieutenant of Company H, Second Nebraska Cavalry.

That was a regiment in the Regular service. So there was absolutely no difference.

Mr. President, as a matter of fact, most of these men never did know for years afterwards that they had not actually served in the Federal service.

I have here, Mr. President, received from Capt. Wiles a large number of receipts for various supplies—the originals that were given to him. When his company went into this service the United States quartermaster's department supplied them with guns, with revolvers, and with ammunition, with saddles, and with bridles, and at the end of the service this was all turned back to the United States, and I have here the original receipts given to him by the quartermaster's department of the Federal Government when he returned them at the end of this service. It seems to me, therefore, that there can be no question, and I am satisfied the Senator from Maine is perfectly satisfied that these men not only rendered a very meritorious service, but that they ought to be included in this bill.

Mr. JOHNSON of Maine. Mr. President, I have conferred with the Senator from Nebraska in regard to the claim covered by his amendment, and I can see no objection to its being adopted. It seems to me that they should all be treated alike, and that these citizens of Nebraska who served should also be covered by the bill as well as those who participated from the other States. I have no objection to the amendment, and, as far as I have any authority as the chairman of the committee, I consent to its adoption.

Mr. WALSH. Will the Senator advise the Senate as to which of the Indian wars are provided for in the early statutes, the statutes of 1892, 1902, and so on?

Mr. JOHNSON of Maine. They are all included, I will say to the Senator, in the act of 1892 and in the act of 1902. I have before me the act of 1892, which covers the Black Hawk War, the Creek War, and the Florida war with the Seminole Indians.

Mr. WALSH. The veterans of the Creek and Seminole Wars, at least, my understanding is, were drawn largely from Tennessee, Georgia, and Florida, and they have in the past been provided for.

Mr. JOHNSON of Maine. Yes; in the act of 1902.

Mr. WALSH. My understanding is also that the veterans of other wars who served 30 days are provided for.

Mr. JOHNSON of Maine. That is true.

Mr. WALSH. The Senator from Georgia seems hardly in line with his predecessors. I dare say they were asking for legislation for their own people.

Mr. SMITH of Georgia. There is no doubt about that. I think the legislation was inexcusable. If they asked for it, I never before heard of it.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Nebraska [Mr. NORRIS].

Mr. SMITH of Georgia. I move a rereference of the entire bill to the Committee on Pensions; and while I have the floor, I want to take a look, if the Senator will give it to me, at these bills.

Mr. NORRIS. Mr. President, I will ask the Senator from Georgia if he will not permit this amendment to first be voted on before he makes his motion?

Mr. SMITH of Georgia. Oh, I am afraid the Senator will get a chance to have it voted on after the motion that I have now made is voted down; and I want to make a few remarks on it before it is voted on.

Mr. NORRIS. Mr. President, I make the point of order on the Senator's motion. I do not believe a motion to recommit is in order while there is a motion to amend pending.

Mr. SMITH of Georgia. Mr. President, in answer to the point of order, that is one of the very bases of the motion to recommit. The object of the motion to recommit is to turn the whole subject back to the committee for investigation; and the pendency of any number of amendments would be no reason on earth why the motion should not be made. The rules of the Senate expressly provide that at any stage of the procedure a motion to recommit is in order.

Mr. NORRIS. I do not know but that the Senator from Georgia has the right to make the motion; but, though I have not looked up the rule, I do not believe he has a right to insist on that motion while another motion is pending.

Mr. SMOOT. Mr. President, I desire to call the Senator's attention to Rule XXII, which, under the heading of "Precedence of motions," says:

When a question is pending, no motion shall be received but—
To adjourn.
To adjourn to a day certain—

And a number of others. Then—

To commit.

So the motion of the Senator from Georgia [Mr. SMITH] would be in order, if he desires to make it.

Mr. BRANDEGEE. In what order of preference does the motion to amend come with reference to the motion to commit or to recommit?

Mr. SMOOT. The order is as follows:

To adjourn.
To adjourn to a day certain, or that when the Senate adjourn it shall be to a day certain.
To take a recess.
To proceed to the consideration of executive business.
To lay on the table.
To postpone indefinitely.
To postpone to a day certain.
To commit.
To amend.

Mr. NORRIS. Mr. President, I withdraw my point of order pending the motion of the Senator from Georgia to recommit the bill. It does not make much difference anyway.

Mr. WALSH. Mr. President, the story of Andrew Jackson's war against the Creeks and his march through the State of Georgia, particularly, is one of the thrilling incidents of the interesting history of our Indian wars. I assume that the patriotic and spirited people of the State of Georgia flocked to his standard, and that very likely they furnished a considerable number of the veterans who had the advantage of the act to which the Senator's attention is now invited.

Mr. SMITH of Georgia. Mr. President, if the Senate will permit me, the Senator from Nebraska [Mr. NORRIS] is so anxious to have his amendment first acted on that I will withdraw my motion to recommit until he may have his amendment acted upon.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Nebraska [Mr. NORRIS].

The amendment was agreed to.

Mr. NORRIS. Mr. President, in connection with the amendment which I have offered, I should like to offer one more amendment to correct the phraseology in one place, where I think the adoption of my amendment makes it necessary. I want the chairman's attention to this provision of the bill on page 4, beginning on line 6, where the second proviso reads:

*Provided further*, That where there is no record of enlistment or muster into the service of the United States in any of the wars mentioned in this act, the record of pay by the United States shall be accepted as full and satisfactory proof of such enlistment and service.

The Nebraska regiments were paid by the Government; but through the instrumentality of the then Territory of Nebraska. I want to add after the name "United States," in line 9, the words "either to the soldier or to the State or Territory," so as to read:

That there is no record of enlistment or muster into the service of the United States in any of the wars mentioned in this act, the record of pay by the United States, either to the soldier or to the State or Territory, shall be accepted as full and satisfactory proof of such enlistment and service.

Mr. THOMAS. Mr. President, does the Senator from Nebraska know whether or not the record of payment by the United States to the State specifies the names of the soldiers?

Mr. NORRIS. No.

Mr. THOMAS. Or whether it is merely the record of the payment of a sum in gross?

Mr. NORRIS. No; but the record shows that, I take it, and the communication which I had from the department shows exactly how many men there were and the exact length of service of those men, but that was handed to the reporter.

This is not a new procedure. For instance, there was a bill passed some time ago putting some Texas soldiers who had served in Indian wars on the pension list, where they had been paid just as these have been paid. They had been paid by the State of Texas, and the State of Texas was reimbursed by the United States.

Mr. THOMAS. I shall not object to the amendment; but the fact that other legislation has set a precedent for legislation of this kind does not appeal to me at all.

Mr. SMOOT. Mr. President, I will say to the Senator from Nebraska that I think the names of all the veterans are included as a basis for the claims. I know that as to the Walker war, the name of every soldier who served therein was reported.

Mr. NORRIS. Mr. President, these names, of course, are all in the adjutant general's office of the State of Nebraska; there is not any doubt about that. Before a man could get a pension under this bill he would have to prove that he was a member of the organization named in the law. I really do not know that this amendment is necessary to give effect to the other amendment, but it certainly can do no harm and it relieves the situation from any doubt.

Mr. SUTHERLAND. Mr. President, I do not object to the amendment offered by the Senator from Nebraska, of course; but I wish to ask him whether or not the same thing is not accomplished by the proviso contained on line 20, page 4, which reads:

*Provided*, That when there is no record of service or payment for same in the War Department or Treasury Department, the applicant may establish the service by satisfactory evidence from the muster rolls on file in the several State or Territorial archives.

That would seem to be a broader rule than the one which the Senator from Nebraska proposes.

Mr. NORRIS. I am rather inclined to think that it would be; but I can not see any possible objection to this amendment, and it would make the matter certain.

Mr. SUTHERLAND. I am not objecting to the amendment, but I merely call the Senator's attention to the feature which I have cited.

Mr. JOHNSON of Maine. Mr. President, I had in mind the proviso to which the Senator from Utah [Mr. SUTHERLAND] has called attention. It seems to me that covers the case which the Senator from Nebraska [Mr. NORRIS] has in mind, and that the amendment which he has proposed is unnecessary. I am afraid it would open up too wide a door to provide that the record of payment by the State shall be received as sufficient evidence without any record of the soldier to whom the payment is made. It seems to me that when we have provided that the muster rolls of the State shall furnish evidence and be resorted to for evidence as to the service of the soldier, that suffi-

ciently covers the cases mentioned by the Senator from Nebraska.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Nebraska.

The amendment was rejected.

Mr. CATRON. Mr. President, I have two small amendments which I wish to offer to the bill.

The PRESIDING OFFICER. The first amendment proposed by the Senator from New Mexico will be stated.

The SECRETARY. It is proposed to amend section 1, on page 2, line 23, by inserting, after the word "Arizona," the words "and New Mexico, or either of them."

Mr. CATRON. The object of the amendment is merely to make the legislation apply to New Mexico as well as to Arizona.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from New Mexico.

The amendment was agreed to.

The PRESIDING OFFICER. The second amendment proposed by the Senator from New Mexico will be stated.

The SECRETARY. On page 3, line 15, after the name "Arizona," it is proposed to insert the words "and New Mexico, or either of them."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New Mexico.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and the third reading of the bill.

Mr. SMITH of Georgia. I move that the bill be recommitted to the Committee on Pensions.

The PRESIDING OFFICER. The question is on the motion of the Senator from Georgia that the bill be recommitted to the Committee on Pensions.

Mr. SMITH of Georgia. Upon that motion I desire to address the Senate.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. SMITH of Georgia. Mr. President, in support of this measure and its remarkable provisions reference has been made to other pension bills. Most of those that I find—I am not entirely familiar with them—were passed very much longer after the war than it is now proposed to pass this bill. The Cherokee Indian pension bill seems to have been passed some 50 years after the war.

Mr. SMOOT. It is now 51 years since the war of 1861–1865.

Mr. SMITH of Georgia. Some of the wars covered by this bill ended much later. The former Indian pension bills seem to have been passed so long after the wars that there were almost none left to receive pensions.

Mr. SMOOT. That is just the way these are.

Mr. SMITH of Georgia. That is just the way these are not, because it is admitted that this bill will necessitate a million dollars a year tax on the Treasury, as it passed the House, and with all the amendments that have been offered here if we get through with five millions annually we shall be fortunate.

Mr. SMOOT. I will say to the Senator that there has not been an amendment offered here to-day and accepted that increased the amount carried by the bill, with the exception of one offered by the Senator from Nebraska [Mr. NORRIS], but that only increases the number by 15 men.

Mr. SMITH of Georgia. I am talking about the amendments put on by the Senate, which I moved to reconsider, and which motion was properly held out of order because it came too late. The amendments got into the Senate with the usual rapidity, and, not being reserved, they were approved in the Senate without many of us hearing even what was done.

Now, I wish to call attention to the peculiar language in this bill:

That the provisions, limitations, and benefits of an act entitled "An act granting pensions to survivors of the Indian wars of 1832 to 1842, inclusive, known as the Black Hawk War, Creek War, Cherokee disturbances, and the Seminole War," approved July 27, 1892—

If the law was approved in 1892 it was over 70 years after the Creek-Cherokee Wars took place, for, as I recall it, they were away back before the War of 1812. The Cherokee veterans were not, therefore, pensioned until 70 years after the war.

The bill goes on—

as amended on February 19, 1913, be, and the same are hereby, extended from the date of the passage of this act—

To whom?

to the surviving officers and enlisted men of the Texas volunteers who served in defense of the frontier of that State against Indian depredations from January 1, 1859, to January 1, 1861, inclusive, and from the year 1866 to the year 1876, inclusive.

There is a comma at that point. Whom does that cover? Practically anybody who enlisted with the Texas Volunteers and served any portion of the entire time, so far as the language indicates. Then the language goes on—it does not say "who have reached 62 years of age"; it does not say anything about age. The bill goes on—

and to the surviving officers and enlisted men, including militia and volunteers of the military service of the United States, who have reached the age of 62 years.

To whom do the words "who have reached the age of 62 years" apply? To "the militia and volunteers of the military service of the United States"; to all of them. The language is very indefinite; it is not at all clear. Nor is it at all clear that the words "who have reached the age of 62" apply to any of the classes subsequently mentioned; indeed, I do not think they do. The age limit of 62 years, as expressed in line 9, is certainly limited to the provisions which precede it. The bill continues—

and who served for 30 days in the campaign in southern Oregon and Idaho—

The first part applies, without reference to length of service, to anybody who served with any of these troops or any of these organizations during all of those years named. Then is added—

and who served for 30 days in the campaign in southern Oregon and Idaho and northern parts of California and Nevada.

The limitation of 30 days' service has no reference to those lines which precede it and the age limit of 62 has no reference to the lines that follow it. There is no comma in the clause "and who served for 30 days in the campaign in southern Oregon and Idaho and northern parts of California and Nevada." That 30 days' limitation does not apply to the language that precedes it, but applies alone to those who served "in the campaign in southern Oregon and Idaho and the northern parts of California and Nevada from 1865 to 1868, inclusive."

Mr. SMOOT. If that is the construction which the Senator puts upon it, of course, those who were Texas Volunteers and "served in the defense of the frontier of that State against Indian depredations from January 1, 1859, to January 1, 1861, inclusive," will certainly all be more than 62 years old, because 1861 was 55 years ago; and it is quite evident that no one would serve in the army at 6 years of age.

Mr. SMITH of Georgia. The bill includes, however, service as late as 1876, and unquestionably a man could have served in 1876 who is not now 62.

Mr. SMOOT. The Senator's statement had reference, as I understood, to the "Texas Volunteers who served in defense of the frontier of that State against Indian depredations from January 1, 1859, to January 1, 1861, inclusive."

Mr. SMITH of Georgia. There are two different classes of Texas Volunteers.

Mr. SMOOT. But did not the Senator make a statement that the limitation as to 62 years of age only applied to——

Mr. SMITH of Georgia. Texas troops.

Mr. SMOOT. No; the limitation is as to the wars after the campaigns in which they were engaged—that is, to the words that follow that clause, and not to the words that precede it.

Mr. SMITH of Georgia. No; I said that the limitation of 30 days only applied to the language which followed. If I did not say that, I will say that whether the words "who have reached the age of 62 years" apply to the class mentioned previously or to the class mentioned subsequently is uncertain; but it is absolutely certain that the 30 days' limitation only applies to the remainder of that sentence. There can be no question about that. Now, let us look at it and see. It reads:

And who served for 30 days in the campaign in southern Oregon and Idaho and northern parts of California and Nevada from 1865 to 1868, inclusive.

Mr. SMOOT. Mr. President——

Mr. SMITH of Georgia. Wait a moment; let me go on. There is no comma; there is no punctuation in that entire sentence.

Mr. SMOOT. There is a comma after the words "sixty-two years."

Mr. SMITH of Georgia. There is a comma after the words "sixty-two years," yes; but the entire sentence, "and who served for 30 days in the campaign in southern Oregon and Idaho and northern parts of California and Nevada from 1865 to 1868, inclusive," is a sentence by itself, and the words "who served for thirty days," modify and affect alone those who were in the campaign in southern Oregon, Idaho, California, and Nevada. It might be held that the entire sentence modifies the preceding sentences and requires the Texas Rangers to have also served in Oregon and Idaho. That is one construction which could be placed upon it; but unquestionably the 30 days' limitation has no application to any troops except those who served "in southern Oregon and Idaho and northern

parts of California and Nevada," unless the entire sentence qualifies the preceding or subsequent sentences, in which event those to whom it applies must not only have served 30 days, but also have served in southern Oregon and Idaho and northern parts of California and Nevada.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Montana?

Mr. SMITH of Georgia. Yes; for a question.

Mr. WALSH. I can put it in the form of a question.

Mr. SMITH of Georgia. Very well.

Mr. WALSH. What, then, precedes the words "the campaign against the Sioux in Minnesota," and so forth, appearing in lines 13 and 14?

Mr. SMITH of Georgia. I am coming to that now; I have just reached that.

Mr. WALSH. Does it not mean those who are 62 years of age and who served for 30 days in the campaign in southern Oregon; those who are 62 years of age and served 30 days in the campaign against the Sioux; those who are 62 years of age and served 30 days in the campaign against the Cheyennes; those who are 62 years of age and served 30 days in the campaign against the Apaches, and so on? Is not that the proper construction of the language?

Mr. SMITH of Georgia. I am coming to that part now; I have not read it as yet. A semicolon separates the words "the campaign against the Sioux in Minnesota" from all of the preceding language. The 30 days' limitation is separated by no punctuation from the words "in the campaign in southern Oregon and Idaho and northern parts of California and Nevada." There is really nothing which clearly shows——

Mr. JOHNSON of Maine. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Maine?

Mr. SMITH of Georgia. Yes.

Mr. JOHNSON of Maine. If that is the only ground of the Senator's objection, I will be glad to remove it and make certain the meaning by inserting the words, "who have reached the age of 62 years and served for 30 days," in the first line after the word "who," so as to make it clear, and the Senator need not spend further time upon that.

Mr. SMITH of Georgia. Mr. President, I am much obliged to the Senator. I am criticising the loose construction of this language as well as its loose distribution of the public funds. I do say that, grammatically construed, you can not tell to what the age limitation of 62 years applies, and that the words "who served 30 days" are limited to the language in the sentence in which it is found.

Mr. SUTHERLAND. Mr. President, may I ask the Senator a question about that?

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMITH of Georgia. Yes.

Mr. SUTHERLAND. Is it the Senator's contention that the language beginning in line 13, "the campaign against the Sioux in Minnesota and the Dakotas in 1862 and in 1863 and the campaigns against the Sioux in Wyoming in 1865 to 1868," is not related to what precedes it?

Mr. SMITH of Georgia. I do not deny it is related to it; but I do say you can not tell how it is related to it or what part of the preceding language applies to it.

Mr. SUTHERLAND. I ask the Senator whether or not that language standing alone contains a proposition at all? It is a mere incomplete clause, and it must refer either to something that precedes or something that follows, and evidently it can not refer to anything that follows.

Mr. SMITH of Georgia. I am criticizing the indefinite and crude manner in which the language is presented to the Senate. How much of the preceding language applies to it, I can not tell. It might be held that it also meant to relate to the entire preceding sentence, and that the men in the campaign against the Sioux in Minnesota must have also served in the campaign in southern Oregon and Idaho. Of course, this is the language as the bill came to us from the House. It goes on with campaign after campaign, and campaign after campaign, and includes the campaign in the Black Hawk Indian War, the campaign against the Ute Indians in Colorado and Utah, the campaign against the Apache Indians in Arizona, the campaign against the Sioux Indians in South Dakota from 1890 to 1891, and also includes the surviving widows of the officers and enlisted men. I think it may safely be said that just what portion of the preceding language applies to the clauses beginning "the campaign against the Sioux," is certainly not clear.

Mr. SUTHERLAND. May I interrupt the Senator again?

Mr. SMITH of Georgia. Yes.

Mr. SUTHERLAND. I invite the Senator's attention to the proviso on page 4, which reads:

*Provided, further,* That if any certain one of the said campaigns—

The words "said campaigns" obviously refer to all of the campaigns that have been enumerated preceding it.

Mr. SMITH of Georgia. What page and line is that?

Mr. SUTHERLAND. Page 4, line 2. I will read it again:

*Provided further,* That if any certain one of the said campaigns—

Meaning all of them—

did not cover a period of 30 days, the provisions of this act shall apply to those who served during the entire period of said campaign.

There is a statement that the 30 days' limitation applies to all of the campaigns that are enumerated.

Mr. SMITH of Georgia. No; that statement is not made except as it is made in the proviso. There is an indication from that language that it was intended that the preceding limitation as to 30 days should apply to all of the campaigns, but there is no such express declaration.

Mr. SUTHERLAND. It is a pretty clear indication that the 30-day limitation was intended to apply to all of the campaigns.

Mr. SMITH of Georgia. Yes; I think there is an indication there that the 30 days' limitation was intended to apply, but it does not say so; and if so, the entire sentence, including the 30-day limitation, applies to them. The trouble is the language, starting with the words "the campaign against the Sioux," is not grammatically connected with the preceding language; it is not put together properly, and does not show clearly what really is meant. You can not say from the language used to what the 62-year age limit is to apply or to what the 30 days' service limitation is to apply, or whether the soldiers must also have served in the campaign in southern Oregon and Idaho.

Additional amendments have been made to this bill. The Senator from Utah insisted that this was a bad time to be particular about granting pensions. Why, Mr. President, men do not enlist for a pension. Pensions are not so much given on account of enlistment as incident to conditions long after a war has taken place, and, I fear, largely for political reasons.

It is conceded that as the bill came from the House it involved an expenditure of a million dollars a year; but no one knows what it involves now, with the amendments which have been added. Have we not some other use for the money?

It is said we have before granted pensions to men who had not been any length of time in the service of the United States and who really may not have done any fighting at all, and that we have heretofore made the 30 days' service provision applicable to veterans of Indian wars. The Senator from Utah dwells upon what a terrible thing Indian fighting has been in the West. Why, we have all read the stories of our ancestors long before they passed the Mississippi, upon the shores of the Atlantic, when it was all a wilderness before them, and when they were in the first process of driving the Indians out and taking the land of the Indians from them. They wanted the land, and they drove out the Indians. These splendid pioneers who went to the West wanted the land that was there, and when the Indians bothered them they did just like our ancestors did; they drove them out. It was not a great national service. It was taking care of themselves and taking care of the property they wanted; and as they got close to where the Indian was and drove him farther back there was some danger incident to the acquirement of the possession of the property that the Indian did not want to give up.

Mr. President, if all the bills on this calendar for pensions are passed, it is hard to tell how much the annual increase will be. I think it will amount to forty or fifty million dollars a year. There is another bill on the calendar from the West which, if it is passed, will give up fifty millions of oil lands belonging to the Government.

The Senator from Minnesota [Mr. CLAPP] suggested that at times I have favored bills that involved public expenditures. I have, and I still do. There is a bill now on the calendar providing for work by the National Government in the interests of vocational education, looking toward extending to the people of this country an opportunity to prepare for the struggle of life, extending its beneficial provisions to all of them; not singling out a few to give them a bounty the balance of their lives out of the National Treasury, but broadly seeking to stimulate a better preparedness by all of the children of this country for the struggle of life. Yet this pension bill was selected and brought up ahead of such legislation as the bill for vocational education. I suppose it will be passed. I do not recall any pension bill that was ever entirely defeated.

Mr. President, I shall not detain the Senate longer on this bill. It is not my purpose in any sense to seek to obstruct a vote on the measure. I suppose—in fact, I think I realize—that I am wasting the time of the Senate and wasting my own

energy, and I got into it because it so shocked me. It does not seem to shock many others. I am going to ask for a yea-and-nay vote on this measure. I hope the Senate will give it; and I will not take any more of the time of the Senate.

I ask for the yeas and nays.

The PRESIDING OFFICER. The question is on the motion of the Senator from Georgia [Mr. SMITH] to recommit the bill to the Committee on Pensions, on which the yeas and nays have been demanded.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I have a pair with the senior Senator from New Mexico [Mr. FALL]. In his absence I withhold my vote.

Mr. CLAPP (when his name was called). I have a pair with the senior Senator from North Carolina [Mr. SIMMONS]. Not seeing him here, and not knowing what his vote would be on this matter, I withhold my vote.

Mr. CHILTON (when Mr. GOFF's name was called). I desire to announce for the day that my colleague [Mr. GOFF] is absent on account of illness.

Mr. SAULSBURY (when his name was called). Has the junior Senator from Rhode Island [Mr. COLT] voted?

The PRESIDING OFFICER. He has not voted.

Mr. SAULSBURY. I have a pair with that Senator, and therefore withhold my vote.

Mr. ASHURST (when the name of Mr. SMITH of Arizona was called). My colleague [Mr. SMITH of Arizona] is unavoidably absent from the Chamber. If he were present, he would vote "nay."

Mr. STONE (when his name was called). I have a pair with the senior Senator from Wyoming [Mr. CLARK], who is absent from the Senate on an important matter. I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER]. I transfer that pair to the senior Senator from Nevada [Mr. NEWLANDS] and will vote. I vote "yea."

Mr. TILLMAN (when his name was called). I transfer my pair with the junior Senator from West Virginia [Mr. GOFF] to the junior Senator from Arkansas [Mr. ROBINSON] and will vote. I vote "yea."

Mr. UNDERWOOD (when his name was called). I desire to inquire whether the junior Senator from Ohio [Mr. HARDING] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. UNDERWOOD. I have a general pair with that Senator. I transfer that pair to the junior Senator from South Dakota [Mr. JOHNSON] and will vote. I vote "yea."

Mr. WALSH (when his name was called). I have a general pair with the senior Senator from Rhode Island [Mr. LIPPITT], who appears to be absent. I transfer that pair to the junior Senator from Illinois [Mr. LEWIS] and will vote. I vote "nay."

Mr. WEEKS (when his name was called). I have a general pair with the senior Senator from Kentucky [Mr. JAMES]. As he is absent, I withhold my vote.

Mr. WILLIAMS (when his name was called). Transferring my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the junior Senator from Arizona [Mr. SMITH], I vote "yea."

The roll call was concluded.

Mr. HITCHCOCK. I transfer my pair with the junior Senator from Maine [Mr. BURLEIGH] to the junior Senator from New Jersey [Mr. HUGHES] and will vote. I vote "nay."

Mr. REED. I have a pair with the senior Senator from Michigan [Mr. SMITH]. In his absence I withhold my vote.

Mr. JONES. I have a pair for the afternoon with the junior Senator from Virginia [Mr. SWANSON]. I transfer that pair to the senior Senator from Iowa [Mr. CUMMINS] and will vote. I vote "nay."

Mr. DILLINGHAM. I inquire whether the senior Senator from Maryland [Mr. SMITH] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. DILLINGHAM. Having a pair with that Senator, I withhold my vote.

Mr. CHILTON. I understand that my pair, the senior Senator from New Mexico [Mr. FALL], if present, would vote as I desire to vote. I therefore vote "nay."

Mr. GALLINGER. I ask whether the senior Senator from New York [Mr. O'GORMAN] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. GALLINGER. I have a standing pair with that Senator and for that reason withhold my vote.

Mr. MYERS. Has the junior Senator from Connecticut [Mr. MCLEAN] voted?

The PRESIDING OFFICER. He has not voted.

Mr. MYERS. I have a pair with that Senator, which, in his absence, I transfer to the senior Senator from Indiana [Mr. KERN] and vote "nay."

The result was announced—yeas 26, nays 33, as follows:

YEAS—26.

| | | | |
|---|---|---|---|
| Bankhead | Lane | Simmons | Townsend |
| Beckham | Lee, Md. | Smith, Ga. | Underwood |
| Brandegee | Martin, Va. | Smith, S. C. | Vardaman |
| Clarke, Ark. | Overman | Stone | Wadsworth |
| Fletcher | Ransdell | Taggart | Williams |
| Gore | Sheppard | Thomas | |
| Hardwick | Shields | Tillman | |

NAYS—33.

| | | | |
|---|---|---|---|
| Ashurst | Gronna | Martine, N. J. | Sherman |
| Borah | Hitchcock | Myers | Smoot |
| Broussard | Hollis | Nelson | Sterling |
| Catron | Husting | Norris | Sutherland |
| Chamberlain | Johnson, Me. | Owen | Walsh |
| Chilton | Jones | Page | Warren |
| Clapp | La Follette | Pittman | |
| Curtis | Lea, Tenn. | Poindexter | |
| du Pont | Lodge | Shafroth | |

NOT VOTING—37.

| | | | |
|---|---|---|---|
| Brady | Goff | McLean | Smith, Ariz. |
| Bryan | Harding | Newlands | Smith, Md. |
| Burleigh | Hughes | O'Gorman | Smith, Mich. |
| Clark, Wyo. | James | Oliver | Swanson |
| Colt | Johnson, S. Dak. | Penrose | Thompson |
| Culberson | Kenyon | Phelan | Weeks |
| Cummins | Kern | Pomerene | Works |
| Dillingham | Lewis | Reed | |
| Fall | Lippitt | Robinson | |
| Gallinger | McCumber | Saulsbury | |

So the motion to recommit was rejected.

The PRESIDING OFFICER. The question is on the engrossing of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read three times, the question is, Shall it pass?

The bill was passed.

RIVER AND HARBOR APPROPRIATIONS.

Mr. CLARKE of Arkansas. I move that the Senate proceed to the consideration of House bill 12193, commonly known as the river and harbor appropriation bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, which had been reported from the Committee on Commerce with amendments.

Mr. CLARKE of Arkansas. Mr. President, I ask that the formal reading of the bill be dispensed with and that the Senate proceed to consider first the Senate amendments, second the amendments to strike out the text of the House bill or to amend the same, and third the amendments offered by individual Senators.

In that way we will classify the amendments, and Senators who propose to offer amendments belonging to either one of the groups will know when to attend and what preparation to make.

Mr. GALLINGER. Will the Senator from Arkansas kindly repeat the order?

Mr. CLARKE of Arkansas. That the formal reading of the bill be dispensed with, and that the Senate proceed to consider first the committee amendments, second the amendments to strike out the House text or to amend it, and third the amendments offered by individual Senators to insert.

The VICE PRESIDENT. The question is on the motion of the Senator from Arkansas.

The motion was agreed to.

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary proceeded to read the bill.

Mr. CLARKE of Arkansas. The formal reading of the bill was dispensed with. That was included in my motion.

The VICE PRESIDENT. It is being read now for committee amendments.

Mr. CLARKE of Arkansas. I think it is the purpose of the Senator from Iowa [Mr. KENYON] to address the Senate at this stage.

Mr. KENYON. Mr. President, I desire to discuss this bill at considerable length. I do not know what the purpose of the chairman of the committee may be as to the time to be occupied this afternoon, but I am very firmly of the opinion——

Mr. CLARKE of Arkansas. Mr. President, in so far as I can control the matter, whatever the Senator from Iowa desires to be done will be done.

Mr. KENYON. I want to say, Mr. President, that so far as I am personally concerned, as I understand the situation now, there is no purpose on my part to enter into a filibuster against this bill. I should certainly be very glad if, in the progress of the debate, enough Senators could be attracted to a study of the problems in the bill to fight the bill by any legitimate parliamentary tactics. I have not the power to do it alone, and am not going to do it; but I am going, candidly and fairly, and without passion, and I hope without inciting any bad feeling on the part of anyone else, to discuss the various items and the general policy which, to my mind, make this an absolutely indefensible bill.

I know it is a very unpopular thing to question any appropriation bill, especially a river and harbor bill or a public buildings bill; that any Senator who raises any objection is heralded in sneering and slurring terms as a "reformer" or an "uplifter" or a "Horatius at the bridge," or as trying to set himself up as the only honest person in the Senate. I have perfect confidence in all my fellow Senators, and the same honesty of purpose which I accord to them I claim for myself.

There has been no chance, as far as the Senate is concerned, to consider the various items of this bill. I think it will not be claimed that the Senate Committee on Commerce paid practically any attention to the various items of this bill. I say that in no spirit of criticism, because it was suggested that the bill would be thoroughly discussed upon the floor. Especially would I make no criticism of the distinguished chairman of the committee, who has a very speedy and creditable habit of getting through with business, and the various motions which were made before that committee were very speedily disposed of. I think I might say in passing that I should be glad to see a river and harbor bill that would be framed by the distinguished chairman of that committee, and I doubt if many objections then could be raised.

So, having no opportunities before the committee for a full and free discussion of the various items of this bill, I think it is right and proper that we should take some time in the discussion of the general policy of the bill, the various questions that arise concerning river and harbor appropriations, and a calm consideration of the projects included in the bill.

This bill as it came from the House carried a total of $39,608,410. That included the appropriation of approximately $37,000,000 and the authorization of contracts of $1,710,000. The Committee on Commerce first decided, I think, that there should be no new projects, but as the bill is now presented to the Senate there is a total net increase in cash appropriations of $2,991,525 and in authorized contracts of $334,950, making a total net increase of $3,326,475; or this bill carries a grand total of $42,934,885.

I do not believe, Mr. President, that anyone is objecting to river and harbor appropriations that are national in scope and character. I do not believe we are ready to abandon in this country all river and harbor work, certainly not harbor work. I know we are confronted with very serious problems as to whether transportation by river can be a success in this country. But there is a sentiment in the country, and we might just as well face it, against the system of appropriations not purely for navigation but for local interests and along the line of getting something out of the National Treasury that is not for the benefit of the whole Nation.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Colorado?

Mr. KENYON. I yield.

Mr. THOMAS. I am very glad to hear the Senator announce that there is such a sentiment in the country. My experience is that there is no such sentiment except as we see it occasionally in some of the magazines or newspapers. I have been looking and hoping for a development of that sort of sentiment, but my experience is that if the bill is broad enough and comprehensive enough, if it contains enough of appropriations judiciously scattered over the country, the sentiment is just the other way, and because the sentiment is the other way such bills invariably pass and the passage of each becomes a precedent in time, and it encourages similar legislation with reference to all conceivable projects. I hope the Senator is right, but I am afraid not.

Mr. KENYON. I hope I am right, but my judgment is weakened somewhat, of course, by the statement of the Senator from Colorado, which I realize has great force. I had sometimes thought that the whole responsibility, or at least a large part of it, for our system of appropriations in river and harbor bills might be placed upon the people, who, it is true, insist upon Members of Congress getting certain appropriations for their States and their districts; but at the same time while that is in a measure true, yet it is true also that the sentiment in this country against that kind of appropriations is certainly growing. The last two river and harbor bills were defeated because of the public sentiment, and I have not observed that the country particularly suffered because of their defeat.

A general discussion of the policy of river and harbor legislation, of the effect of the construction of waterways upon railroad rates, of the reasons for diminishing water traffic is just as important, I think, as the discussion of specific matters in this bill. But I want to call attention to just a few facts in the bill. The bill strikes out an appropriation for the East River at New York, an appropriation that the President of the United States deemed so important that he wrote a letter, or rather his Secretary wrote a letter, to the House committee, which I will read, in which he urged the House committee to insert this provisions:

THE WHITE HOUSE,
*Washington, February 11, 1916.*

MY DEAR MR. SPARKMAN: The President directs me to say to you that he is strongly of the opinion that the pending river and harbor bill should carry an appropriation for the immediate improvement of the East River adjacent to the Brooklyn Navy Yard. He fully appreciates the fact that this would be contrary to the rule of the committee not to recommend appropriations for new projects at this time, but he feels that the importance of the matter in its relation to the question of national preparedness fully justifies an exception to the rule.

The President understands that Secretary Daniels has fully explained this matter to the committee.

Sincerely, yours,
J. P. TUMULTY,
*Secretary to the President.*

Hon. S. M. SPARKMAN,
*Chairman Committee on Rivers and Harbors.*

The President of the United States thought it so important on the question of preparedness and arousing the country that he left his place of duty and went into the West along about the 1st of February and aroused the people to some extent. We have seen very little here of any preparedness measure undertaken by Congress, but the one sent here that the President asked along the line of preparedness, that our battleships might reach the Brooklyn Navy Yard, is stricken out of this bill by the committee and the appropriations for Podunk Creek and Skillet River are kept in. I suppose that is done for the purpose of trading in conference. If it is, it illustrates the exact vice that gets into these river and harbor appropriation bills.

The committee also struck out Cache River.

Mr. THOMAS. Before the Senator passes from the East River project may I ask what reason was assigned by the committee for its elimination? I take it for granted that the reason given was not stated in so many words to the committee. I should like to know what the ostensible reason was.

Mr. KENYON. I do not know whether there is a rule——

Mr. THOMAS. That is, if the Senator is at liberty to state it.

Mr. KENYON. I do not know whether there is a rule against disclosing what took place in committee or not. There ought not to be.

Mr. CLARKE of Arkansas. Mr. President, if there is any such rule, as far as the chairman of the Commerce Committee has a right to waive it it will be waived, and there is nothing which transpired in the committee which may not be commented on by the Senator from Iowa or anyone else.

Mr. THOMAS. That being the case, I am sure the Senator will answer the question.

Mr. KENYON. I am glad to answer it. The only discussion I heard in committee was to the effect that it would be a good thing to have something to trade about in conference.

Mr. THOMAS. Trade with whom? Trade with the House?

Mr. KENYON. Trade with the House.

Mr. THOMAS. That is a good reason.

Mr. KENYON. It is one of the best reasons that can be given for a lot of these appropriations.

The Cache River is a good name for a river in a river and harbor bill. It has sometimes been known to have over 6 and 8 inches of water in it and has had a large amount of appropriations. It was also stricken out. I think the committee ought to have some kind of a resolution of thanks for that. Its action there was a good job.

Mr. THOMAS. May I ask the Senator if that was stricken out for trading purposes also?

Mr. KENYON. I am unable to say. I believe the Senator from Arkansas had concluded that that was no longer a navigable river, that it was very expensive to maintain the bridges over this mighty stream of 6 to 8 inches in depth, and the chairman of the committee making that request the balance of us interested in these great projects who had sometimes felt that Cache River might sometimes be used as a place for submarines to hide did not feel like opposing it.

Then our old friend Arcadia came into the bill. I am sorry that the distinguished Senator from Michigan [Mr. SMITH] is not here, because any subject that involves Arcadia commands his enthusiastic attention. Arcadia is a little harbor up in Michigan where quite a sum of money has been spent, not a great sum possibly, but Arcadia has been condemned as a project by the Army engineers. I hold in my hand a document relating to Arcadia of February 8, 1916, signed by Mr. Kingman, Chief of Engineers of the United States Army. First the report of Col. W. M. Black of January 12, 1916, says:

It was anticipated when maintenance was undertaken by the United States that there would be a great increase in water shipments of fruit and farm products as the timberlands were denuded. This has not been the case, although there has been an increase in the production of these commodities. They have sought other means of transportation, and there is no evidence that this condition will not continue.

Mr. Kingman says:

The district officer is of opinion that the present and prospective commerce is too small to justify the necessary expenditure for the maintenance of this harbor and he recommends that the improvement be abandoned by the United States. The division engineer and the Board of Engineers for Rivers and Harbors concur in this opinion.

You could not have the East River, the greatest port in the world, with more commerce than any other port in the world, a place for battleships to get to the navy yard in these times of preparedness. We struck that out, but we saved Arcadia.

The Chief of Engineers concurred in that recommendation. Of course, the Senator from Michigan, who is deeply interested in Arcadia and can almost transport you in romance to the beautiful land of Arcadia, is a member of the Committee on Commerce.

Also in this bill, on page 11, is found a new item:

Maintenance and repair of the Government iron pier, Harbor of Lewes, Del., hereafter under regulations prescribed by the Secretary of War, to be opened to public use, $10,000.

What appealed to the committee to insert that item above the East River item? What is the great necessity of fixing this particular pier. The report of the Chief of Engineers on this subject shows that the amount expended for maintenance of the pier since completion is $34,292.99, making a total of $387,339.40 expended on the work up to the close of the previous fiscal year. The pier has never been used, says the Chief Engineer, to any extent for the interchange of commerce. It has been used occasionally as a landing place for vessels reporting at Lewes, and is in bad condition, because it has been there so long that the worms have eaten through and almost destroyed the piling.

Mr. REED. When was it put in?

Mr. KENYON. It was commenced April 15, 1871, completed in 1882, and there never has been any commerce, and there never has been any use of it, as far as the reports of the engineers go to show.

Mr. SAULSBURY. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Delaware?

Mr. KENYON. I do.

Mr. SAULSBURY. If the Senator will permit me, of course he is wrong about the worms eating the piling, because that pier was built of solid iron piles.

Mr. KENYON. If I am wrong, the engineer is wrong.

Mr. SAULSBURY. Then the engineer is wrong, because that pier was built of solid iron piles. The reason why that pier has never been used is because there have been no regulations made by the War Department permitting its use, and they report as a reason for not repairing it that it is not used.

The amendment inserted by the committee is that hereafter the pier is to be opened to public use under regulations of the War Department.

If the Senator will permit me, I will say in addition to that it so happened that, with the Secretary of Agriculture, I was making a short tour of the lower portion of my State, and I came to the town of Lewes. I found there at a public meeting, when I just happened in, the representatives of steamboat lines trying to interest the town in establishing new steamboat lines, and among those present was the mayor of Cape May, N. J., and he was very anxious to have this pier opened to public traffic.

There is every reason in my judgment why $385,000 of Government property, or $360,000 as originally expended for the building of that pier, should not be utterly and entirely wasted. I think it is a commentary on the very poor management or the very poor recommendations of the body in the War Department having charge of these matters that they should allow the flooring of that pier, which is the trouble with the pier, to go to rack and ruin so that no one can now safely use the pier.

This appropriation of $10,000 is to put $360,000 of public property in a condition where it may be of some use to the public.

In addition to that, the Government has just about completed a canal opening 500 miles of shore line from which commerce will come to a small canal between Rehoboth and Lewes, and much of it will certainly use this pier.

In my humble judgment, and I know the locality as well as I know my way from the Capitol to the Willard Hotel, there could be no more useful appropriation made than to enable the people, as this amendment does, to use that $360,000 of public property. Steamers used to run, and I hope will soon again run, daily to New York and Philadelphia. They have a number of private piers used for landing at Lewes, but this appropriation will open the greatest pier there to public use without charge.

I hope the Senator from Iowa will find upon further examination that this is as meritorious an appropriation and as meritorious an object of public attention as I know it to be.

Mr. KENYON. I think it is fully as meritorious as 50 per cent of the bill, possibly more so.

I want to correct my statement, because the Senator is right about the misstatement I unintentionally made in wrongly reading the record. The structure I should have referred to as having the piles honeycombed by boring worms seems to have been a structure that preceded this.

Mr. SAULSBURY. That is quite possible. I do not know anything about that.

Mr. KENYON. I am in error about that. But I cited this, I say to the Senator, as a comparison with the New York item. I think—and believe the Senator will agree with me—that New York Harbor, East River, is an item infinitely more important than taking care of that pier at Lewes, Del.

I wish to put in the RECORD before I leave this subject what I did not have in my hand a moment ago, and that is on page 907 of the Report of the Army Engineers for 1914 concerning this somewhat famous Cache River as showing the kind of project on which the money of the people of this country has been spent, and it is not alone among that class:

In its original condition this river was much obstructed by snags, drift, and overhanging timber. The low-water depth on the controlling shoals was 6 to 8 inches.

* * * * * * *

To June 30, 1914, there has been expended $25,127.04 on maintenance of channel. The total expenditures to that date under all projects were $34,127.04.

* * * * * * *

The operations this fiscal year were by hired labor with Government plant, and were for maintenance of channel by snagging operations between Brasfield and the mouth of the river, 31 miles. There were 307 snags removed from the channel, 597 trees were cut, and 142 others were girdled.

Mr. THOMAS. What project is the Senator reading about?

Mr. KENYON. Cache River, which was taken out of the bill—the only item, I think, taken out of the bill. I think I will put a little more of that in the RECORD:

Grays Bridge, 95 miles above the mouth of the river, is considered the head of steamboat navigation; but the river is not navigable to that point all the year, the ruling depth in the channels over the shoals throughout the river being only 8 to 10 inches during lowest water. During high-water seasons rafts are run from 100 or more miles above Grays Bridge.

* * * * * * *

The commerce was made up of forest products, 99 per cent, and agricultural products and supplies, 1 per cent; 61 per cent of the total commerce was rafted saw logs.

Now, think of it going on, a project of that kind up to this time, 8 to 10 inches of water! Yet if anybody says a word against appropriations in these river and harbor bills in the past we are met with, "It is small to take up these little things; act on the broader basis"; whatever is best for the good of the whole country. So it goes on year after year, and you gentlemen who are insisting on this kind of propositions might just as well make up your minds that you are the worst enemies to real, substantial waterway legislation, because the people of the country, I believe, despite what my good friend the Senator from Colorado says—and if they are not, I am going to despair of popular government—are not going to stand it much longer to pay taxes and war taxes for little creeks and rivers that are good for nothing except to help reelect people to Congress.

Now, what are you Democrats going to say about a $42,000,000 river and harbor bill at this time? I do not want to discuss this question in any partisan way. I believe the Republicans are just as bad as the Democrats when you come to appropriations. I may have my idea of what are right appropriations and may not agree with you, and you have your idea of what are right and not agree with me, and both probably be perfectly honest in our judgment. But you Democrats are in power for a while yet, not for long, and the responsibility is upon you for these appropriations. You can not dodge it. You can not go out to the people this fall and point to your platform and then point to what you have done and not confess that you have

made a miserable failure in these expenses of the Government. I do not say that in any harsh way, because I have an affection for my Democratic friends individually. I am not going to say anything about them. They certainly have shown a wonderful degree of incompetency as a collective institution. I can not understand how such splendid individuals, such economical individuals, when you get them bunched up in a party can be so absolutely incompetent. If the Republicans come into power, as of course they will, and carry on appropriations as you have carried them on, and create the offices and salaries and spend the money as you have spent it, I hope the Republican Party will be turned out of power just as quickly as it can be.

I know that in pleading with Senators to defeat a bill of this kind it may be out of place for a Republican to appeal to the Democrats to stand by their platform. Everybody recognizes, of course, that we must have appropriations. Wise appropriations, considered as investment, not waste, find no complaint from the people. It is the wasteful appropriations, and when you pass this river and harbor bill, with $42,000,000 to be placed upon the backs of the people in taxation, you have just about broken the last plank that is left in your platform. You have now broken your Philippines plank, apparently through the influence of some great political organization in New York City, known as Tammany Hall.

Mr. VARDAMAN. I should like to ask my friend, the Senator from Iowa, if almost the entire Republican membership of the House did not vote with the Tammany body?

Mr. KENYON. They did.

Mr. VARDAMAN. So it did not depend altogether on Tammany.

Mr. KENYON. But without the Tammany vote and the Tammany influence they would have been helpless.

Mr. VARDAMAN. I am sorry the Republicans were seduced by Tammany. Without the assistance of the Republicans Tammany could not have done anything.

Mr. KENYON. Of course, the Republicans were standing by their platform. I did not agree with my party on that proposition. I voted for Philippine independence and received considerable condemnation therefor. But that is a plank in your platform which has been shattered. I know my good friend from Mississippi is a man who believes in keeping the platforms of his party and he has been consistent in this Chamber. With a high courage and fidelity to public duty he has attempted to keep the platform of his party.

Mr. VARDAMAN. I will say to my friend I am greatly obliged to him for the tribute he has paid to me. I know how the Senator from Iowa felt about it, and I am sincerely sorry that the Republicans of the House made it possible for a small contingent of the Democratic Party in the House to defeat the will of the American people as expressed at the polls nearly four years ago.

Mr. KENYON. Of course, there will not be any Democratic contingency after the next election that will have much influence. You had in your platform free tolls. You violated that. You had in your platform the reduction of the tariff, proclaimed by the distinguished Senator from Kentucky [Mr. JAMES] in a masterly address here one evening to mean free sugar. You violated that.

What you got in your tariff on sugar is just about the amount that you can put into the river and harbor bill, and he pictured that night so eloquently how you were going by free sugar to lift the burden from 20,000,000 homes in this country and provide the laboring men out of that tax alone with 140,000 homes. If you did not have your river and harbor bill you could probably have stood for your free sugar. You have broken your platform in all those things.

Mr. REED. Mr. President, will the Senator from Iowa pardon an interrogatory?

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Missouri?

Mr. KENYON. I yield.

Mr. REED. The Senator says that if we did not have the river and harbor bill we might have had free sugar; in other words, that the total amount carried in this bill is about the equivalent of the present tariff on sugar. I want to ask the Senator if he is in favor of passing any river and harbor bill or of appropriating any money for that purpose?

Mr. KENYON. The Senator from Missouri knows very well that I am in favor of passing some river and harbor bill; but I am in favor of smashing, if it can be done, the present system of formulating river and harbor bills.

Mr. REED. Now, manifestly the inference the Senator left by his argument a moment ago was that it was this wicked river and harbor bill that made it necessary to keep the tax on sugar, and just as manifestly the only way we could dispense with the tax on sugar would be to entirely destroy the river and harbor bill, and yet the Senator does not propose to do that?

Mr. KENYON. No.

Mr. REED. And I apprehend if he were giving a pruning knife and told to go through it and cut out everything that his conscience would let him that he would leave the majority part of the bill stand.

Mr. KENYON. I think I would cut it in half.

Mr. REED. Then we should have to have a tax on sugar.

Mr. KENYON. We would have to have a tax on sugar, but we would not need to have so high a tax on sugar as you people have placed on it.

Mr. REED. No; as we left on, and as you people put on.

Mr. KENYON. And that you people promised the country you would take off.

Mr. REED. Yes; and I voted to do so.

Mr. KENYON. I know the Senator did; he had the courage of his convictions.

Mr. REED. And I should continue to vote for it, and raise the difference on incomes.

Mr. KENYON. I agree with the Senator in raising it on incomes for proper purposes.

Mr. SHAFROTH. The Senator from Iowa has called attention to the fact that the Republican platform was of such a nature concerning the Philippine Islands as not to recognize their independence. I want to call the attention of the Senator to the fact that the declaration of the Republican Party upon the Philippines is as follows:

> The Philippine policy of the Republican Party has been and is inspired by the belief that our duty toward the Filipino people is a national obligation which should remain entirely free from partisan politics.

So I do not see, when the Senator cast his vote and made his speeches concerning Philippine independence, that it was contrary to the expressed plank of his party in its platform of 1912.

Mr. KENYON. I possibly made my statement a little strong. What I said was that I thought that many Republicans of my State felt my vote was contrary to the policy of the Republican Party, but nevertheless I thought it was right. World conditions have changed some since that time, and I might have a different opinion now.

Mr. SHAFROTH. I do not see how they could have so interpreted that declaration, which says that it is a nonpartisan question. Consequently, as a Republican, the Senator from Iowa would be entitled to vote as he pleased, and I believe the Senator has done nothing in his career which does him greater credit.

Mr. KENYON. Does the Senator feel that his party has now carried out the pledge they made in the platform concerning the Philippines?

Mr. SHAFROTH. No; we have not done so yet, because the bill has not yet become a law.

Mr. KENYON. But when does the Senator think that the pledge will be carried out?

Mr. SHAFROTH. The pledge of the Democratic Party, according to the Democratic platform, is not as to any definite date at which the Filipino people are to be granted their freedom. I had hoped just as had the Senator from Iowa that we should fix a date to give the Filipinos independence; but that has not been done, according to the action of the other House. What the action of the Senate will be I do not know; but it seems to me that though the platform of the Democratic Party recognizes that the Filipinos will be given independence, it does not state when.

Mr. CLARKE of Arkansas. Mr. President, I am not in the habit of injecting a partisan argument into a discussion relating to an important governmental function; but I want to say that in this particular instance the Democratic Party made a fair effort to redeem that pledge. Of course we had the assistance of five excellent Republicans on the other side of the Chamber in redeeming the part of it that was performed by the Senate; but when we got to the House of Representatives it was made a party question. The Democratic Party, speaking through its recognized organ of communication with the public, stood for the proposition to the extent of giving it all the votes that it could control through its party action; and the President of the United States lent his influence in favor of its enactment. I think the Democratic Party has a fairly good record on that particular plank of the platform; thanks to the Senator from Iowa and other progressive and patriotic Senators on the other side of the Chamber.

Mr. THOMAS. Mr. President, will the Senator from Iowa permit me a word?

Mr. KENYON. Yes.

Mr. THOMAS. I have always understood the Democratic policy regarding the Philippines to mean that whenever it had the power to do so it would give them their independence. My reading of Democratic platforms since we acquired the Philippine Islands has confirmed this view. I think the Democratic Party has tried by the imperfect and unfinished and now mutilated legislation of this session to comply with the requirements of its frequently repeated pledges.

I also believe that, if the Democratic Party, as such, were in control of the House of Representatives it would have fulfilled that obligation, and that the bill which passed the Senate with the Clarke amendment would by this time have become a law; but, Mr. President, it is painfully evident that at times the Democratic majority in the other House is no majority at all, but that its membership is composed of about an equal number of Democrats and Republicans, the balance of power being held by an organization which wears the livery of the Democratic Party, wears its colors, and dishonors its name.

Mr. KENYON. Would the Senator put them in our party?

Mr. THOMAS. Of course I would not do that, although they are sometimes its useful instrument; and yet there are organizations in other cities of a similar character which call themselves Republican, just as this organization calls itself Democratic, because it is necessary to assume the prevailing party public sentiment. The organization to which I refer is a politico-commercial affair, in politics for practical purposes, and always ready to do that which is practical and, therefore, profitable, whether Democratic or not.

For my part, Mr. President, I want to repudiate the notion that the Democratic Party of the country, as a party, has up to this time been faithless to its Philippine pledges. I assert that it will be in actual power when and only when, independently of the membership to which I have just referred, it has an actual majority in both Houses. Until then it must encounter the rear attacks like that which so recently assassinated the Philippine bill in the House of its reputed friends.

Mr. KENYON. Mr. President, I did not expect to start a discussion on the Philippine question. I was simply taking up some of the broken planks of the Democratic platform, more particularly desiring to call attention to the plank as to economy. I notice another plank which I think I shall perhaps put into the RECORD.

Mr. SIMMONS. Mr. President, the Senator from Iowa has denounced the Democratic Party for extravagance and he has cited the present river and harbor bill as an illustration of the failure of the Democratic Party to carry out its platform pledge of economy. I wish to ask the Senator if, as a member of the Committee on Commerce, he is not the only Republican member of that committee who voted against reporting this bill in the form in which it now is?

Mr. KENYON. I think not.

Mr. SIMMONS. Then, I ask the Senator if there were others?

Mr. KENYON. The Senator from Illinois [Mr. SHERMAN], I think——

Mr. SIMMONS. The Senator from Illinois, I think, voted against some of the provisions of the bill.

Mr. KENYON. He voted against reporting the bill, I think. I know he signed the minority report.

Mr. SIMMONS. He voted against some of the new items of the bill.

Mr. KENYON. He signed the minority report.

Mr. SIMMONS. The Senator from Illinois voted against some of the new items of the bill, but I do not understand that the Senator from Illinois, or any other Republican Senator on the committee, voted against the bill as a whole.

Mr. KENYON. I will say that, in my judgment, as I remember the matter, the Senator from Illinois voted against reporting the bill as it was reported; but I am not absolutely certain as to that.

Mr. REED. Mr. President——

Mr. KENYON. I yield to the Senator from Missouri.

Mr. REED. I think I can throw a little light on the attitude of the Senator from Illinois. I think he voted in favor of every appropriation for his State, but was very economical as to other States.

Mr. KENYON. Mr. President, I think the Senator from Illinois did not hear the statement which has just been made by the Senator from Missouri; it is a very unfair statement; for the Senator from Missouri, as I remember, was seldom present at committee meetings, and the Senator from Illinois claimed the right to file a minority report, and said that he objected to many items in the bill. I think the Senator from Missouri is not fair in his statement.

Mr. REED. I think the Senator from Iowa did not understand me, or he would not say I am unfair. I say, as I understood the attitude of the Senator from Illinois, he voted in favor of all appropriations for his own State, but when it got to other States he was economical.

Mr. KENYON. I will say this about the Senator from Illinois——

Mr. SHERMAN. I will answer that.

Mr. KENYON. That the Senator from Illinois——

Mr. SHERMAN. Will the Senator yield to me?

Mr. KENYON. I will yield.

Mr. SHERMAN. I will answer the statement made by the junior Senator from Missouri [Mr. REED] in due time, when I have more leisure, and when I can do so under the rules as they might be administered here without taking the Senator from Iowa off his feet.

The cutting off of the appropriations for my own State will not deter me in the least from criticizing or voting against any of the items of this bill, should I deem it proper to do so when I get the opportunity. If the penalty for such criticism is to be the cutting off of appropriations from this bill that may affect my own State, I will challenge the Senators to cut them off at their pleasure, and I will take the consequences.

Mr. KENYON. I hope the Senator from Missouri will join in that challenge.

Mr. SHERMAN. That possesses no terror whatever for the Senator from Illinois; and I refuse to be punished or afflicted in that way.

Mr. REED. Mr. President, no one has made the slightest suggestion that anything could at all imperil the courageous attitude of the Senator from Illinois. I did not charge that the Senator from Illinois was not economical with reference to appropriations for other States; but I failed to notice him practicing any particular economy when it came to the State of Illinois. That is all I said. I know that the high courage and magnificent patriotism of the Senator from Illinois will lead him to take an exalted ground when it comes to the discussion of this bill; and yet I venture to say that he will in no single instance move to reduce an Illinois appropriation.

Mr. KENYON. Mr. President, the Senator——

Mr. SIMMONS. Mr. President——

Mr. KENYON. Just a moment. The Senator from Illinois asked the committee that the State of Illinois be permitted to spend $5,000,000 of its own money. That is all the Senator from Illinois asked of the committee. I suppose that remarks of the kind we have heard must be made about men who express their convictions about this bill, but they seem to me very unfair to the Senator from Illinois.

Mr. SIMMONS. Mr. President, I, of course, do not care to enter into the controversy as to how the Senator from Illinois voted, because I do not remember as to that. I was, however, under the impression that the Senator from Iowa was the only Republican member of the Committee on Commerce who voted against this bill as a whole. I thought the Senator from Illinois voted against some new items which were put on the bill, as some Democratic members of the committee probably did; but there are eight Republicans on the committee; and, if the Senator from Illinois joined the Senator from Iowa in voting against the bill, they are the only two Republicans, I am sure, who did pursue that course. I think the bill comes here with the joint approval of all the members of the committee, except those two Senators. I am speaking of the bill as a whole; I am not speaking of items, because I think there were differences in the committee as to items.

Mr. JONES. Mr. President——

The VICE PRESIDENT. This is about the time for the Chair to begin to call attention to a rule of the Senate. The Senator from Iowa has lost the floor three or four times, in accordance with the rule. The Chair has not been enforcing it, but we are getting nowhere, and the Chair is going to enforce it from now on.

Mr. KENYON. I yield to the Senator from Washington for a question.

Mr. JONES. I have no question to ask.

Mr. SIMMONS. Then, Mr. President, if the Chair is going to enforce the rule now, after having permitted its violation repeatedly since the Senator from Iowa has been upon his feet, I will ask permission of the Senator to ask a question.

Mr. KENYON. I yield to the Senator for a question.

Mr. SIMMONS. I wish to ask the Senator if it is not a fact that up to this time no river and harbor bill has been passed since the Democratic Party came into power and has been in

control of both Houses of Congress, except a lump-sum appropriation?

Mr. KENYON. I think that is true.

Mr. SIMMONS. No river and harbor bill proper has been passed by the Democratic Party since it came into power. Now I will ask the Senator, further, if the present bill as it came from the House was not a bill that included only old projects, with the single exception of the New York item, to which the Senator has referred?

Mr. KENYON. I think so.

Mr. SIMMONS. Is it not true, then, that the bill as it came from the House, carrying $40,000,000 of appropriations, provided for projects that had been approved by the Republican Party while it was in power?

Mr. KENYON. I do not know and do not care. I have already said that the Republican Party has been just as wasteful in this regard as the Democratic Party; but I say the Senator's party is now charged with responsibility, and the Senator's party in its platform and upon the stump has gone before the people of this country telling them what they would do along lines of economy and denouncing the Republican Party. I denounce the Republican Party, too, where it deserves to be denounced.

Mr. SIMMONS. But did not the Senator hold the Democratic Party up as responsible for the items in this bill?

Mr. KENYON. Oh, of course.

Mr. SIMMONS. And I am asking him if every one of these items was not a Republican item——

Mr. KENYON. Oh, no.

Mr. SIMMONS. Adopted and approved by the Republican Party and appropriated for before the Democratic Party came into power?

Mr. KENYON. Mr. President, I do not want to lose the floor; but I do not wonder that the Democratic Party seeks to avoid responsibility for some of the things that have gone on; but these items can not go into the law without the action of your party; and, to use an expression of the Senator from New Jersey [Mr. MARTINE], God knows you tried hard enough to pass two river and harbor bills, and you would have done so had it not been for the former Senator from Ohio, Mr. Burton.

Mr. JONES. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Washington?

Mr. KENYON. For a question.

Mr. JONES. Was there any roll call in the committee upon the vote to report this bill?

Mr. KENYON. There was not, as I remember.

Mr. JONES. I will ask the Senator whether or not several Republican Senators reserved the right to oppose provisions of the bill on the floor of the Senate?

Mr. KENYON. They did, and I remember very distinctly the Senator from Pennsylvania making that suggestion, and also the Senator from Washington.

Mr. President, I want to proceed with a few more of the planks in the Baltimore platform. There is one that is to be broken in a few weeks now.

Mr. CLARKE of Arkansas. Mr. President——

Mr. KENYON. I yield to the Senator.

Mr. CLARKE of Arkansas. I rise rather to a parliamentary inquiry than otherwise. The Senate, by a yea-and-nay vote, determined that the question as to whether or not a Senator lost the floor by submitting to an interruption was not a question for the Chair to decide, but that an objection of that kind must originate upon the floor and become operative at the instance of the Senate. We have been proceeding under that modified form of the rule so long that I think it is but fair for the Chair to give notice that he will not be bound by it, so that we may know in the further progress of this debate how to conduct ourselves. It must either be one or the other; it must either be a matter that the Chair must decide or that the Senate must decide.

The VICE PRESIDENT. The Chair does not think that the Senate so decided. The Chair thinks that the Senate decided that the Chair could not autocratically and dictatorially say to a Senator——

Mr. CLARKE of Arkansas. Of course, the present occupant of the chair would not do anything autocratically or dictatorially. He is a very mild-mannered individual.

The VICE PRESIDENT. That a query only consists of one question with an interrogation point at the end of it. The Chair thinks a Senator, if he wants to ask a question, is entitled to the right to state a premise as the basis of the question. That is as the present occupant of the Chair understands the action of the Senate.

Mr. CLARKE of Arkansas. We can only accept the ruling as it was made; and it determined one fundamental question, and that was, that it was not for the Chair to determine what constituted a question. In that particular instance the Chair did determine that the character of the interruption was material.

If the attempt is going to be made to enforce the rule now, which has not been enforced since that time, I think there ought to be no misgivings as to how the debate shall proceed. If the rule as announced by the Chair is going to be enforced, so far as I am concerned, I am entirely agreeable to submit to it. There are, however, one or two matters I should like to address to the Senator from Iowa, but I do not want to do so at the risk of having him arbitrarily taken off the floor, and I will take occasion to say what I have in mind at a later period, in my own time.

Mr. GALLINGER. Mr. President, I rise to a parliamentary inquiry.

The VICE PRESIDENT. The Senator from New Hampshire will state it.

Mr. GALLINGER. I will premise the inquiry by a single observation. I have been here a long time, and at one time I thought I understood the rules of the Senate fairly well; but now I will ask the Vice President to have read the rule to which he refers, providing that a Senator can be taken off the floor if he yields to anything more than a simple question. I should like to have the rule read.

The VICE PRESIDENT. There is not any such rule as that. There is a rule to the effect that no Senator shall speak more than twice in one day upon any one question without leave of the Senate.

Mr. GALLINGER. Certainly.

The VICE PRESIDENT. And there have been innumerable decisions, which were not made by the present occupant of the chair, but were made long before he came here, to the effect that a Senator could not yield the floor for any other purpose than for a question; otherwise when he obtained possession of the floor he could farm it out as he pleased. The Chair has never until this moment heard it insisted upon that when a Senator yielded for any other purpose than for a question he did not yield the floor thereby, so that it could be considered that he had made one of the speeches which he is entitled to make on any one day.

Mr. GALLINGER. Mr. President, the Chair says that the Chair has never heard that questioned before. The fact is the issue which the Chair raised on a certain memorable occasion was in direct antagonism to the custom of the Senate. Debate is about all there is in this body that is worth anything, and we can not have debate unless we have an interchange of views. The idea that a Senator has got to stand on the floor and talk for hours at a time, to be followed by another Senator, and then by another, is to me rather preposterous. We had a short time ago a debate on a very important question, and we spent a whole day interchanging views. Most of the debate was in the nature of interrogatories, as a matter of fact, and it was the most enjoyable day that I have spent in the Senate since the rule was enforced that a Senator occupying the floor and keeping the floor could not allow an interruption, except by way of an interrogatory. Of course if it is patent that it is the purpose of a Senator to farm out the floor to other Senators in order that he may get rest, that is an entirely different affair; and I remember that there are decisions that that can not be done; but I confess that I think it is going to take from the Senate of the United States its highest prerogative and the most enjoyable conditions that exist here if we can not have an interchange of views, except by way of simple questions.

Mr. JONES. Mr. President, I rise to a parliamentary inquiry.

The VICE PRESIDENT. The Senator from Washington will state his inquiry.

Mr. JONES. I merely want to inquire whether or not the decisions to which the Chair referred a moment ago were not decisions made upon objections raised from the floor?

The VICE PRESIDENT. The Chair can look those questions up, but the Chair has no recollection as to whether or not they were made from the floor. The Chair has not the slightest desire in the world to enforce this rule; he does not care whether it is enforced or not. If the Senate does not want it enforced, then all they have to do is to say so. The interruptions that were taking place were not taking place on a discussion of the river and harbor bill.

Mr. CLARKE of Arkansas. I ask unanimous consent that the Senator from Iowa may proceed with his argument and yield to such Senators as he may see proper, and yield for pur-

poses that may be satisfactory to him and to the Senator interrupting him.

Mr. KENYON. I will be very glad, of course, to do that.

The VICE PRESIDENT. The Chair does not care anything about it.

Mr. CLARKE of Arkansas. I ask that that request be submitted to the Senate.

The VICE PRESIDENT. Is there any objection?

Mr. JONES. Mr. President, before that request is submitted, I merely want to suggest that there are certain rules which it is expressly required shall be enforced by the Presiding Officer. There are other rules concerning which there is no such provision, and I take it that, as to them, no action will be taken unless there is some objection from the floor.

The VICE PRESIDENT. There seems to be no objection to the request of the Senator from Arkansas; and the rule will not be enforced until the Chair is notified of the further desire of the Senate.

Mr. KENYON. I thank the Chair.

Mr. CLARKE of Arkansas. Mr. President, will the Senator from Iowa indulge me in just one little observation?

Mr. KENYON. Certainly.

Mr. CLARKE of Arkansas. Reference has been made to the so-called political alignment of the Committee on Commerce. No such alignment exists in that committee, and nothing of that kind was apparent in the preparation of this bill. Ninety per cent of the additions that we made to the bill were made at the instance of Republican Senators; but no notice was taken of that fact, and no point should be made on it here. They were considered on what we supposed to be their merits, and they were freely voted for by Democrats and Republicans alike. We took no notice of the fact that they were of one party or the other, and I hope we never will, because the matters to which the legislation pending before that committee relates can not by any possibility have a partisan application.

There was a reservation made by several Republican members of the committee of the right to vote against any item in this bill that they saw proper to vote against, and they are at liberty to do so now if they desire, just as the Democrats on the committee are at liberty to do so. We did the best we could in the preparation of the bill under the limitations that surrounded us. Whilst we have not made an excellent job, we did the best we could under the circumstances.

Mr. KENYON. Nor do I think I made any intimation—I did not intend to—that there was any partisanship in the bill as far as the committee was concerned or in any other way. I do not believe party lines exist when it comes to getting appropriations out of the Federal Treasury. I was simply contending that the Democratic Party were responsible for the expenses of this session and of these Congresses, and that they were breaking the platform of their party in passing these enormous appropriation bills. I do not know that you can ever economize. It seems almost impossible; but if you can not economize do not announce in your platform what you are going to do.

I was passing along to these various violations of the Democratic platform. I want to put one or two more in the RECORD.

Our Democratic friends declared themselves in favor of the civil-service law, and yet we behold, in the rural-credits bill just passed, that as far as that is concerned it seems to be formulated on the proposition of getting the appointees into office absolutely regardless of the civil service; and many other violations of that plank could be cited.

Here is another one:

> We favor a single presidential term, and to that end urge the adoption of an amendment to the Constitution making the President of the United States ineligible for reelection, and we pledge the candidate of this convention to this principle.

Of course, that may be defended on the ground that it was absolutely superfluous, because the people of the country will see that that plank in the platform is carried out.

Here is another one:

> The constitutional rights of American citizens should protect them on our borders and go with them throughout the world, and every American citizen residing or having property in any foreign country is entitled to and must be given the full protection of the United State Government, both for himself and his property.

As to whether or not that plank has been violated would be a matter for serious reflection; but here is the plank I have been leading up to. With all this record of broken promises, the one that you Democrats will have to face—and I am sorry for you when you face it—is the one about extravagance:

> We denounce the profligate waste of the money wrung from the people by oppressive taxation through the lavish appropriations of recent Republican Congresses, which have kept taxes high and reduced the purchasing power of the people's toil. We demand a return to that simplicity and economy which befits a democratic government and a reduction in the number of useless offices, the salaries of which drain the substance of the people.

We have had four urgent deficiency bills in this session, and how many more are to come God only knows! The other day when you placed the salaries of the directors of these land banks at $10,000 per annum and had the proposition squarely up to you along the line of your platform as to high salaries, what did you do? I think practically all the Republicans voted to reduce the salaries, and some Democrats; but you, the party of economy, voted to keep them at $10,000. What a joy to the farmers of this country when they study your platform and then look at the record! How they will enjoy helping to pay $10,000 per annum for somebody to do what they can do just as well themselves!

So there is a lot of buncombe about this platform business. How you can sit quietly by, with easy consciences, and keep voting this money out of the Public Treasury and piling up the taxes for the people to pay I can not understand.

Here is a good Senator from Colorado [Mr. THOMAS]. He stands up here and fights for economy. He votes aginst things that his own State is after, at times. [Laughter.] He is one of the consistent men on this economy proposition. I did not mean to qualify my words in that sudden fashion. The urgent deficiency bills come in here now carrying over $25,000,000—$25,730,000, as I am told by the Senator from Utah [Mr. SMOOT], who always knows about these matters. Are you going to stop at all? What about the trips of battleships to South American countries, with distinguished lawyers thereon from New York, and trips to San Francisco fairs? Whose money is this that we are continually voting away? Is it our own?

Mr. WORKS. Mr. President, I hope the Senator will not overlook the good-roads bill in his denunciation of extravagance on the part of our friends on the other side of the Chamber.

Mr. KENYON. I supposed, when I referred to the California Exposition, that that was what had drawn the Senator from California to his feet.

Mr. WORKS. Not at all.

Mr. KENYON. I do not stand here to say that a lot of these appropriations are not wise. I am trying to plead with my Democratic friends before it is too late for them to get a little salvation on this question of economy, and to carry out the provisions of their platform to some extent, and to start now by cutting this river and harbor bill squarely in two. Then you can go out to the country and say that you at least have cut the thing down $20,000,000.

In the case of the last two river and harbor bills, which were cut in that way, has the country suffered from the reduction? I have not heard, though I may be mistaken, of any meritorious projects that have suffered at all. At this time, when the expenses of the Government for preparedness are going to amount to enormous sums, do you not honestly think, without stopping internal improvements, without letting any worthy projects suffer, that it is a good time to try to cut down a bill of this character?

Mr. SHERMAN. Mr. President——

Mr. KENYON. Mr. President, I should like to make a parliamentary inquiry, as to whether the rules are in force or not.

The VICE PRESIDENT. Oh, the rules are not in force.

Mr. KENYON. There are no rules?

Mr. SHERMAN. I should like to make an inquiry.

Mr. KENYON. I yield to the Senator from Illinois.

Mr. SHERMAN. I will promise not to deliver an address ad interim. Will the Senator, before he leaves that very comprehensive and alluring subject——

Mr. KENYON. Did the Senator think I had left it?

Mr. SHERMAN (continuing). Refer to some of the methods of thumb-screw taxation that must be resorted to in order to supply this deficiency and consider the sources from which this revenue is to be derived?

Mr. KENYON. Every farmer, of course, as he goes to the telephone for messages over 15 cents, I think, pays his cent, or on any telegrams he sends pays his tax, or when he makes a deed of his farm he pays his tax. Of course, he can be expected to hurrah for Mud Creek and Newbegun Creek and Contentnia Creek and all these things. I do not know how the money is going to be raised. Does the Senator from Illinois know how it is going to be raised?

I hope we will increase the income tax. We will have to raise a large amount of taxes outside of this river and harbor bill, of course; but that may be a forerunner of other great expenses that are to come. I think we will have plenty of time to discuss that during the warm summer months.

Mr. President, our appropriations and expenses are simply going up to an enormous extent.

In such a precarious condition is the Federal Treasury that my good friend from Texas [Mr. SHEPPARD], on the 11th day of January, 1916, stimulated by this spirit of economy, introduced a bill providing for temporarily reducing the salaries of persons in the Federal service, in which he recited—and that was very apropos to the present condition of the Treasury:

Whereas the war in Europe has caused a serious decrease in importations and a serious decline in the revenue ordinarily derived from importations; and

Whereas these conditions are imposing an enormous strain on the Federal Treasury and have made it necessary to levy additional taxes on the people; and

Whereas the present emergency calls for every legitimate measure tending to relieve the Treasury and the people as far as possible: Therefore

*Be it enacted, etc.*, That the salaries of persons in the civil, military, naval, or other employment of service of the United States, including Senators, Representatives, and Delegates in Congress, exceeding $6,000 per annum, are hereby reduced 12 per cent per annum; that the salaries of persons in said employment or service amounting to $1,200 and not exceeding $1,500 per annum are hereby reduced 2 per cent per annum; that the salaries of persons in said employment or service exceeding $1,500 per annum and not exceeding $2,000 are hereby reduced 3 per cent per annum; that the salaries of persons in said employment or service exceeding $2,000 per annum and not exceeding $3,000 are hereby reduced 4 per cent per annum; that the salaries of persons in said employment or service exceeding $3,000 and not exceeding $4,000 are hereby reduced 6 per cent per anum; that the salaries of persons in said employment or service exceeding $4,000 per annum and not exceeding $5,000 are hereby reduced 8 per cent per annum; that the salaries of persons in said employment or service exceeding $5,000 per annum and not exceeding $6,000 are hereby reduced 10 per cent per annum.

I summon that to my help in this argument; that the Senator from Texas—the country of the Brazos and of the Trinity, with enormous appropriations in this bill and in all the bills that have gone before us—felt that the condition of our Treasury was such that we ought to reduce the salaries of the poor clerks around here who are drawing from twelve to fifteen hundred dollars a year.

Mr. GALLINGER. Mr. President——

Mr. KENYON. I yield to the Senator from New Hampshire.

Mr. GALLINGER. That bill was introduced on the 11th day of January, as I recall. On the 12th day of January the Senator from Texas, who was going to save something to the Treasury, introduced a bill appropriating $250,000 for a Federal building at Brownsville, Tex.; $75,000 for one at Childress, Tex.; $75,000 for one at Huntsville, Tex.; $75,000 for one at Memphis, Tex.; and $50,000 for one at Canadian, Tex.

Mr. KENYON. Has the Senator overlooked the one at Huntsville, Tex., where an appropriation of $75,000 was proposed, Huntsville having a population of 2,072 people?

Mr. GALLINGER. I stated that, Mr. President.

Mr. HARDING. Mr. President——

Mr. KENYON. I yield to the Senator from Ohio.

Mr. HARDING. I wanted to ask the Senator from Iowa, inasmuch as he had read the preamble to the measure of the Senator from Texas, reciting the decrease of imports incident to the European war, if he would not like to put into the RECORD the fact that the imports for March, 1916, were thirty-one millions more than for March, 1914; fifty-nine millions more than for March, 1913, when Mr. Wilson came into the White House; and seventy-four millions more than for March, 1911?

Mr. KENYON. Mr. President, of course I have no knowledge of the accuracy of the figures; but, knowing that the Senator from Ohio is engaged upon a very important work shortly to take place and undoubtedly is familiar with the figures, I am willing to accept them.

Mr. SHEPPARD. Mr. President——

Mr. KENYON. I yield to the Senator from Texas.

Mr. SHEPPARD. I know the Senator wants to be fair. I have also introduced bills directing the Secretary of the Treasury to examine the building needs at the points in Texas quoted by the Senator from New Hampshire, and at all other points in the country for which building bills are introduced, and to report what the need actually is, what the postal receipts and rentals are, what Government offices are established at such places, and also the lowest possible cost at which the proper buildings, if needed, could be erected.

I believe that method ought to be adopted in making public-building appropriations. I think the present system is a wasteful system, an unscientific system, and that it ought to be fundamentally changed. Projects of pressing importance are now compelled to await the preparation of an omnibus bill covering the entire country and covering places where the need can not be said to be especially urgent.

For instance, if the Senator will pardon me, at Paris, Tex., some weeks ago a disastrous fire destroyed the public building there. The need for a new structure is immediate and imperative. The blackened walls have been standing there, a menace to the passers-by; and yet, on account of the custom that prevails with regard to public buildings—the custom that has prevailed for the last 15 or 20 years—that situation can not be promptly cared for. Senators and Representatives with projects of similar urgency in their States and districts must wait until the pressure becomes so great from all parts of the country that an omnibus building bill carrying thirty or forty million dollars is introduced and literally forced through, including many projects that could not stand on individual merit. This system should be discontinued. Each project should stand or fall on its own inherent worth.

Mr. KENYON. I think the Senator's resolution applied only to buildings in Texas, did it not?

Mr. SHEPPARD. I introduced a general resolution or bill requiring all measures providing for the erection of public buildings to be referred to the Secretary of the Treasury for investigation and for report as to whether they are actually justified by Government needs.

Mr. KENYON. I always have a great admiration for the ability of the Senator from Texas, because I believe he is one of the few persons who have been able to discover water in the Trinity River. I do not want to enlarge very much on what the Senator from New Hampshire has said; but, inasmuch as that question has arisen, and the Senator from Texas has by this bill placed himself on the side of economy, certainly he must feel that there is a great need for economy when we are to take a certain percentage from the salaries of the poorly paid Government employees.

Mr. SHEPPARD. Mr. President——

The PRESIDING OFFICER (Mr. OVERMAN in the chair). Does the Senator from Iowa yield to the Senator from Texas?

Mr. KENYON. I do.

Mr. SHEPPARD. I think it is in the interest of economy to make necessary improvements, which, if not made, will necessitate a greater expenditure in the future. I shall answer the Senator as to the Trinity later.

Mr. KENYON. Well, Mr. President, I prefer the kind of economy that gives living wages to the employees of the Government in Washington than to take the money and dump it in the Trinity and the Brazos Rivers.

Mr. LEWIS. Mr. President, will the Senator from Iowa allow an interruption?

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Illinois?

Mr. KENYON. I do.

Mr. LEWIS. I desire, with the Senator's permission, to address myself to the inquiry of the Senator from Ohio [Mr. HARDING].

The Senator from Ohio interpolated the address of the Senator from Iowa, asking the Senator if he would not consent to allow the figures suggested by the Senator to be introduced in his remarks. Those figures, suggested by the able Senator from Ohio, suggest the increase of importations of one month in this year, as being in excess of those of the same month in the previous year.

I desire to ask the able Senator from Chio if he is able to state whether those importations did not include items which paid tariff duties, and if he knows the amount of revenue they did pay, and if the latter item of importations does not include one-third gold, being money?

I am quoting from a newspaper observation. I am not able to say that I know that fact, as reported in this article.

Mr. HARDING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Ohio?

Mr. KENYON. I am always glad to have anything I may say added to or illuminated by the distinguished Senator from Illinois. I do not want to be responsible for the figures. I do not know anything about them, myself.

Mr. LEWIS. I thank the Senator. I am asking the Senator from Ohio if he has investigated the figures in the respect I have mentioned? I am sure he will state the matter as he knows it.

Mr. HARDING. Mr. President, I should be very happy, indeed, to enlighten the distinguished Senator from Illinois. I do not happen to have in my possession the figures, and I should not attempt to quote them from memory. I had not singled out one month to compare it unfavorably to the Democratic Party with the same month under a Republican administration. I only know that the figures given for the month of March are fairly representative of the various months of this administration as compared with those of the previous administration. I should not attempt at this moment to go into detail as to an analysis of the imports.

Mr. LEWIS. Mr. President, the Senator does not assume to say that the imports to which he alludes might not have been imports upon the protected list and pay a duty as they came in?

Mr. SMOOT. Mr. President, I think the Senator——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Utah?

Mr. KENYON. Mr. President, I dislike to have such a good address as I am making spoiled by a tariff debate.

Mr. LEWIS. I think myself that should not be done. I withdraw the query.

Mr. KENYON. If it will end shortly, I will yield.

Mr. LEWIS. I withdraw the query. It may lead to a consumption of time. I did not notice how late the hour was.

Mr. KENYON. And it destroys the continuity of the address I am making.

Mr. LEWIS. That is sufficient objection—that it does interfere with the joyous, as well as the harmonious, flow of an otherwise delightful utterance. [Laughter.]

Mr. KENYON. I return, Mr. President, to this delightful interruption—this question of economy in Texas.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from North Carolina?

Mr. KENYON. I should like to inquire if it is an inquiry concerning the tariff?

Mr. SIMMONS. It may have some remote relation to the tariff.

Mr. KENYON. Some remote relation? I yield to the Senator.

Mr. SIMMONS. Does the Senator object to having an inquiry with relation to the tariff?

Mr. KENYON. Not at all; but all tariff inquiries I turn over to my friend from Ohio [Mr. HARDING].

Mr. SIMMONS. What the Senator from Ohio said had some relation to the tariff. I simply wish to point to the fact that I have from the department the imports and exports for the month of March. That is the month he quoted from. I have also the summary of foreign commerce for the month of January, and I think the report for that month is somewhat similar in character and in amount. As to the imports for the month of January, 1916, I have not made an accurate calculation, but they were about $60,000,000. However, $40,000,000 of that amount was crude material for use in manufactures and about $8,000,000 of that amount was for manufacture for further use in manufactures. So $48,000,000 of the $60,000,000 represented materials used by our manufacturers.

Mr. HARDING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Ohio?

Mr. KENYON. I yield.

Mr. HARDING. I should like the Senator from North Carolina to specify the character of the materials to which he refers and whether there were changes in the duties thereon.

Mr. SIMMONS. I was quoting at that time the materials that come in free; crude materials for use in manufactures, in 1915, $33,000,000 in round numbers; in 1916, $83,000,000 in round numbers; an increase of about $40,000,000 of these products used by our manufacturers in making goods that they are exporting in such large quantities now to foreign countries; then, manufactured for further use in manufacturing, about $13,000,000 free in 1915 and about $21,000,000 free in 1916, a difference again of about $8,000,000. So I say about $48,000,000 of these goods that came in free used in manufacture were things that were used by our manufacturers in making the things that we are exporting in such enormous quantities, and so much in excess of what we ever exported before to foreign countries.

Mr. KENYON. Mr. President, if we are through with the tariff question now, we will return to a more interesting subject. The Senator from New Hampshire has referred to several public-building bills that have been introduced in towns of rather small population, and I think I will not take the time to enlarge upon that except as to one town, the town of Childress. There is a bill now pending for a $75,000 public building. According to the 1910 census Childress had 3,818 souls.

Mr. SHEPPARD. What are the postal receipts? If I am correctly informed, the postal receipts are now in excess of $10,000 a year.

Mr. KENYON. That is remarkable; it is wonderful.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from New Hampshire?

Mr. KENYON. I do.

Mr. GALLINGER. The town of Canadian, in the State of Texas, has 1,648 people, and there is an appropriation of $50,000 proposed for a public building.

Mr. SHEPPARD. Will the Senator give us the postal receipts at that place?

Mr. GALLINGER. I can not.

Mr. SHEPPARD. Then the Senator ought to take the time to obtain the information.

Mr. GALLINGER. I am giving the population.

Mr. SHEPPARD. That is not the entire test. The postal receipts and the fact that there may be other Government offices besides the post office are elements of equal importance with population.

Mr. GALLINGER. The city of Memphis calls for an appropriation of $75,000 and they have 1,936 people in that town, and Huntsville, which calls for $75,000, has actually 2,072 people. They are doing pretty well. The only place that has a population sufficient, as I think, to warrant a public building is Brownsville, where they have 10,000 people. Big Springs has 4,002 people.

Mr. President, I am not a great believer in liberal appropriations for public buildings in small towns. I have not asked it for my own State, and I never expect to, and I think we ought to stop making appropriations for little towns of two or three thousand people.

Mr. SHEPPARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Texas?

Mr. KENYON. I do.

Mr. SHEPPARD. In the last public building bill which passed Congress, I think, on March 4, 1913, a clause was inserted, on motion of the Senator from Indiana [Mr. KERN] to the effect that thereafter public buildings should not be constructed in towns having less than $10,000 in annual postal receipts. Some of these towns for which I have introduced bills are the only towns of any size within a radius of 50, 100, or 200 miles, and in that section of the country towns of 1,500 and 2,000 people are of as much relative importance as cities of 10,000, 15,000, 20,000, and 30,000 in the North and East. I think the Senator will find that these places come within the minimum as to postal receipts established by the last public buildings act, a minimum that was voted for by the Senator from New Hampshire, if I am not mistaken.

Mr. GALLINGER. I quite agree with the Senator on that point. We ought to have some limit as to postal receipts. I think we ought to have a limit also as to population. But what attracted my attention—and I thought it was inadvertence, probably, on the part of my genial friend from Texas—was that he offered the very extraordinary and, as I think, indefensible bill reducing the salaries of the poorly paid clerks in Washington and then offered these six bills on the following day for public buildings in these small towns. I did not think it was consistent, and I thought he probably did it inadvertently.

Mr. SHEPPARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield further to the Senator from Texas?

Mr. KENYON. I do.

Mr. SHEPPARD. If the Senator will permit me, the bill that I introduced reducing salaries provided a very small reduction in the salaries of clerks, perhaps 1 or 2 per cent, and a much greater reduction was made in the salaries of Members of Congress and other salaries that exceeded $6,000 a year. As to salaries below $1,200, my bill made no reduction at all. I think it was a fair measure.

Now, Mr. President, another thing. It is well known that the amounts called for by these public-building bills, when they are introduced, are merely nominal, merely tentative, and that the determination of the proper amount is left to the investigation of the Public Buildings Committees and the Treasury Department. The bills I introduced had most of them been pending for some time in both the House and the Senate. Some of them I had introduced at different times during the past several years in the House during my membership there. I simply got them all together on one day and introduced them at one time for the consideration of this Congress.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Mississippi?

Mr. KENYON. I do.

Mr. VARDAMAN. While it is not relevant to the question before the Senate, it occurs to me that the erection of buildings for the United States Government, if economically constructed, is not an extravagance. It does not become a liability; it is an asset; and I think it would be very wise economy if the Government were to erect buildings and occupy them here in Washington. Not all would be wise economy, because the Government might not need it. If the building is not needed, of course, it is an extravagance; but I refer to cases where the Government needs a building, when it pays rent. I was informed a few days ago that the Government is paying for a building here in Washington 16 per cent on the amount invested in that build-

ing. It is no economy for the Government to do that. The Government can borrow money at 2½ per cent and construct its own buildings, and I think very often, if instead of renting post-office buildings and public buildings of that kind, money is prudently expended in the erection of buildings it is not a liability; it is an asset.

Mr. KENYON. I only want to say about the colloquy with the Senator from Texas, I know him so well, I know he would not introduce any bill or do anything he did not thoroughly believe in; I cited it merely because I felt that when the question was reached here of additional money for Brazos and Trinity, feeling as he did about these items, he certainly would not care to press the matter.

Mr. CLARKE of Arkansas. Would it suit the Senator from Iowa to suspend at this point and conclude on to-morrow?

Mr. KENYON. I would be very glad to do so.

Mr. CLARKE of Arkansas. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 5 o'clock and 12 minutes p. m.) the Senate took a recess until to-morrow, Wednesday, May 10, 1916, at 12 o'clock meridian.

[Mr. KENYON continued his remarks on the river and harbor appropriation bill (H. R. 12193) Wednesday, May 10, Thursday, May 11, Friday, May 12, and Saturday, May 13, as follows:]

*Wednesday, May 10, 1916.*

Mr. KENYON. Mr. President, I desire to place in the RECORD a few more citations from the platforms in the past of the Democratic Party on the question of economy.

In 1876, this party that has always pretended at least to stand for economy, in its platform said:

We demand a judicious system of preparation by public economies, by official retrenchments, and by wise finance.

Again in 1880, when that splendid old soldier, General Hancock, was nominated for President, this same party said:

We congratulate the country upon the honesty and thrift of a Democratic Congress which has reduced the public expenditures $40,000,000 a year.

In 1884 you said:

We demand that Federal taxation shall be exclusively for public purposes and shall not exceed the needs of the Government, economically administered.

In 1888 you said:

Every Democratic rule of governmental action is violated when, through unnecessary taxation, a vast sum of money far beyond the needs of an economical administration, is drawn from the people and the channels of trade and accumulated as a demoralizing surplus in the National Treasury. * * * Debauched by this immense temptation, the remedy of the Republican Party is to meet and exhaust, by extravagant appropriations and expenses, whether constitutional or not, the accumulation of extravagant taxation. The Democratic policy is to enforce frugality in public expense and to abolish unnecessary taxation.

In 1892 you said in your platform:

We pledge the Democratic Party if intrusted with power not only to defeat the Force Bill, but also to relentless opposition to the Republican policy of profligate expenditures.

In 1896 you said:

We denounce the profligate waste of the money wrung from the people by oppressive taxation and the lavish appropriations of recent Republican Congresses, which have kept taxes high, while the labor that pays them is unemployed, and the products of the people's toil are depressed in price till they no longer repay the cost of production. We demand a return to that simplicity and economy which befits a democratic government, and a reduction in the number of useless offices, the salaries of which drain the substance of the people.

I wonder what they might have thought when an under Secretary of State was provided for in an appropriation act, to emulate the effete monarchies of Europe.

In 1900 you said:

We favor a reduction and speedy repeal of the war taxes and a return to the time-honored Democratic policy of strict economy in governmental expenditures.

And the people now favor a speedy repeal, I think, of the war taxes, and the return, if possible, to economic expenditures.

In the platform of 1904 you said:

Large reductions can easily be made in the annual expenditures of the Government without impairing the efficiency of any branch of the public service, and we shall insist upon the strictest economy and frugality compatible with vigorous and efficient civil, military, and naval administration as a right of the people too clear to be denied or withheld.

Yesterday I think I placed in the RECORD something from the platform of 1912. To have the matter complete I quote from the platform of 1908:

The Republican Congress in the session just ended made appropriations amounting to $1,008,000,000, exceeding the total expenditures of the past fiscal year by $90,000,000, and leaving a deficit of more than $60,000,000 for the fiscal year just ended. We denounce the needless waste of the people's money, which has resulted in the appalling increase, as a shameful violation of all prudent considerations of government and as no less than a crime against the millions of working men and women from whose earnings the great proportion of these colossal sums must be extorted through excessive tariff exactions and other indirect methods. It is not surprising that in the face of this shocking record the Republican platform contains no reference to economical administration or promise thereof in the future. We demand that a stop be put to this frightful extravagance and insist upon the strictest economy in every department compatible with frugal and efficient administration.

Mr. Bryan, who has recently left office, I assume because of the extravagance of this administration, in a great speech to the farmers of Minnesota during that campaign took occasion to denounce, as only he can denounce, the extravagances of the Republican Party. He said:

Why is it that the Republican Party is so much more extravagant than the Democratic Party in the expenditure of public money? There are two reasons: First, because the Republican leaders are more intimately associated with the tax eaters than with the taxpayers. They hear the hungry clamor of the men who spend money more than they do the protests of the masses who contribute revenues.

* * * * * * *

The Democratic Party—

Says Mr. Bryan—

is in a position to bring reform in the matter of expenditures.

Yet we find the Democratic administration piling up the cost of government beyond what any Republican administration has ever done.

The distinguished Senator from Texas [Mr. CULBERSON], along about the close of the Roosevelt administration, denounced in a wonderfully strong speech in this Chamber the Republican Party for its extravagance. He had a right to do it. The Senator from Mississippi [Mr. WILLIAMS] in a speech in this body some time ago, talking of the extravagances of government, said, among other things:

Mr. President, I have drawn a picture. What is the lesson from it? That we ought to strain our nerves to try to circumscribe and limit the expenditures of this Government. There is no sense in having the expenditures increase 400 per cent while population increases only 84 per cent.

In 1896, I think it was, in the House of Representatives a distinguished citizen from Missouri, once governor of that State or since then governor of the State, in a speech on the river and harbor bill, a gentleman who is now, I think, connected with the administration as Third or Fourth Assistant Postmaster General, Mr. Dockery, said:

Why, Mr. Speaker, there was not a King of France who ever laid the heavy hand of the tax gatherer upon the people who did not claim to do it in the interest of the people.

And there is not a single item in this bill—

He said, referring to the river and harbor bill—

that does not come here challenging our approval in the name of the people. [Applause.] And I say further that you know, and I know—because I have not the time to analyze the items of this bill in the limited time accorded me—you know that while the bill has many meritorious features, yet it is honeycombed with local projects for private purposes. I know—

He said—

that my protest will be unheeded. I know that my voice will fall on dull ears. I know the claim will be made here and throughout the country that the enormous total of this bill, covering as it does about $80,000,000 of liabilities, is for the public weal. But I desire to say—

Then a question was interposed, after which he continued:

But I appeal from this tribunal to the great body of the American people. [Laughter on the Republican side.]

It was a great joke among the Republicans apparently at that time if anybody raised any objection to a river and harbor bill; but this distinguished Democrat continued:

I appeal from the Representatives here who intend to support this bill to the farmers of the country, to men who follow the plow and toil for their daily subsistence. I appeal to the men who work in the fields and in the factories and in the mines, and to the men who are engaged in the various business avocations of the country. I appeal to the vast army of men who earn their bread by their daily toil. I appeal, Mr. Speaker, to them to condemn this rioutous, this enormous, this unjustifiable, this profligate appropriation of public money.

That distinguished man from Missouri seemed to believe that there was a sentiment in the country in favor of some kind of economy. That was some years ago, and possibly he was mistaken.

Mr. THOMAS. May I ask the Senator in what year the speech from which he has been reading was delivered?

Mr. KENYON. My recollection is that it was a number of years ago—10 years ago.

Mr. THOMAS. I think the Senator will admit that the appeal was a fruitless one.

Mr. KENYON. Yes.

Mr. THOMAS. I have no knowledge of any year elapsing since then in which a river and harbor bill was not introduced, and, with the exception of the last two years, enacted into law.

Mr. KENYON. I think that is true. The appeal was a fruitless one. The Senator from Colorado, in his suggestions of yesterday, may be absolutely correct that there is no public sentiment in this country for any economy, but that the people enjoy having their money spent. If they do, they ought to have been pretty happy through all these years.

Mr. WORKS. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from California?

Mr. KENYON. I do.

Mr. WORKS. May I suggest to the Senator whether we are likely to reach any different rule or different system of legislating on this subject so long as we make it a partisan issue? Whenever such a bill comes from the Democratic side of the Chamber, it is charged against them as being a partisan measure, and when it comes from this side of the Chamber the same charge is made on the other side. This is not a political issue at all, and I do not believe that politics ought to be brought into it in any way whatever. It ought to be treated upon broader grounds of economy. I insist that both parties are equally at fault so far as this kind of legislation is concerned. It happens just now to be the Democratic Party that is in control, but exactly the same conditions existed when the Republican Party was in control. If we can get this legislation on a little higher ground and deal with this question as an economic question, and leave out of it all politics or charges of one side against the other with respect to it, we may accomplish something.

Mr. KENYON. I do not agree with the Senator from California that it has been made in any way a party question or that there is any politics in it.

Mr. THOMAS. Mr. President, I think this is one of the bills that are entirely nonpartisan. This bill is drawn for the purpose of appropriating money to distribute it all over the country. Consequently it will go through by a very large vote.

The Senator from Iowa referred just now to the fact that the speech from which he has read, and which was delivered in the other House some years ago, was received with derision. I want to tell the Senator that his speech now is being received with quiet derision. He is making a speech here against a bill which carries $45,000,000, to be distributed throughout the country; he is making a splendid fight, but in so far as the effect of his opposition is concerned, I think it will be like that of the distinguished Democrat from Missouri. As was stated by the Senator from Massachusetts [Mr. LODGE] the other day, this is one of the bills that are "made to pass."

Mr. KENYON. I realize that and I realize that any effort I may make in opposition is perfectly futile, a waste of strength, and probably a waste of the time of the Senate; but I am simply calling attention to this bill, and performing what I think is a public duty, realizing full well what the Senator says as to the derision and the sneers with which any such effort is met, and the charges of bad faith and matters of that kind, which I care nothing about. I am going to do my duty as I see it.

Mr. WORKS. Mr. President, I hope the Senator from Iowa will understand that in what I said I was not in any sense criticizing his effort in this matter. I sympathize with him entirely, and I think he is deserving of great credit that he has the courage to make the fight which he is making against this bill.

Mr. KENYON. I think the Senator from California, in whose judgment I have such confidence, probably has in mind some criticism of me—which is perfectly proper; and I accept it in the best of faith, because I like criticism—that I have been attempting to make this a political question.

Mr. POINDEXTER. Mr. President——

Mr. KENYON. Just a moment. I have not intended so to do. I realize that any raid at any time upon the Public Treasury is not a political question. I was calling attention, however, along the lines of the platform of the Democratic Party, looking toward economy in reference to this bill, because this bill, with others, helps to pile up the enormous expenses of this Government, and thus to belie that part of their platform. That is the only politics that is in it, so far as I am concerned. Now I yield to the Senator from Washington.

Mr. POINDEXTER. Mr. President, I have not had the privilege of hearing the entire remarks of the Senator from Iowa; hence I make this inquiry. I ask whether the Senator has undertaken, or whether he will before he concludes his speech, undertake to segregate those items in the bill which he believes to be unwarranted from those which he thinks are meritorious? That is a practical problem which has ultimately to be dealt with on some system—either on this system or through some commission or administrative tribunal. We either have to do it ourselves or appoint somebody else to do it for us.

The Senator from Iowa participated in the great attack that was made upon the river and harbor bill in the last Congress, in which he had the cooperation of the former Senator from Ohio, Mr. Burton. As he is renewing it this year, I take it for granted that the Senator from Iowa has made an exhaustive study not only of the bill in general and the principles upon which this great public work has been conducted, the system, but the details of it.

I am in utmost sympathy with any effort which is made to eliminate from the bill any items which have no substantial merit, if there are any such items in it—and I take it for granted that there are some of that kind—while, at the same time, I deprecate very much any general attack—I am not saying that the Senator from Iowa is making any general attack—upon the great principle of waterway improvement and water transportation. I think that is essential to the growth and progress of this country.

Mr. KENYON. I am not, I will say to the Senator, making an attack upon water transportation that may be national in its character and that may do some good either in the regulation of railroad rates—and that is a subject I will discuss later—or in the actual transportation of traffic. I am attacking the system of these expenditures for local interests where they have no beneficial effect, apparently, upon the nation at large; and I will say to the Senator that I do propose later to take up specifically a large number of items in this bill, and make my case against this bill from the records as furnished by the Army engineers; and I have spent a good deal of time in trying to get the data ready.

Mr. POINDEXTER. Mr. President, may I make a further inquiry of the Senator?

Mr. KENYON. Certainly.

Mr. POINDEXTER. Does the Senator propose, by a motion to strike out, or by any kind of an amendment, or otherwise, to present to the Senate an opportunity to render judgment upon the separate portions of the bill which have no merit?

Mr. KENYON. I certainly do. I said yesterday that I would be glad to see a sufficient number of Senators who are opposed to this bill resort to any proper legislative tactics to defeat the bill. I know that situation does not exist, and I have not the physical strength nor the ability to stand up here and do it, and so I am going to point out the specific items in the bill, and then I am going to urge that this amount be cut squarely in two.

Mr. SIMMONS and Mr. WORKS addressed the Chair.

The VICE PRESIDENT. To whom does the Senator from Iowa yield?

Mr. KENYON. I yield to the Senator from North Carolina.

Mr. SIMMONS. Mr. President, I am very glad the Senator from California [Mr. WORKS] made the observations which he did a little while ago. Of course we have no objection on this side of the Chamber if the Senator desires to make a political issue of this bill for him to do so, but I regret very much the character of speech that he has pursued up to this time with reference to the bill. I think it has been more of a political discussion than a discussion of the items of the bill, and I assume the Senator will soon get to the items of the bill.

What I wish to say, however, is this: I do not think there is any capital to be gained for either party out of the river and harbor bill. I have been here now for about 15 years and during a part of that time I have been on the Committee on Commerce. I have never known the river and harbor bill to be regarded as a political measure, and my observation during those 15 years has been that Republican Senators have been just about as much in favor of these appropriations as Democratic Senators have been.

My impression is that, if an examination is made of the river and harbor bills which have passed heretofore, it will be found that they carried pretty nearly as large appropriations as recent river and harbor bills have carried, and that they have had the support of Republicans and of Democrats alike. When the Republican Party framed the river and harbor bills they were generally supported by the Democrats, and the bills which have been framed by the Democratic Party—no one of which has been passed up to this time—have had, generally speaking, the support of Republican Senators. The last two bills of this character were antagonized by certain Republican Senators as they were antagonized by certain Democratic Senators; but I am under the impression that the proportion of Democrats who opposed those bills was something near as large as the proportion of Republicans who opposed them. This is the first time, so far as I know, that there has been an effort to make political capital out of the appropriations carried in a river and harbor bill.

Mr. KENYON. Mr. President, I think my motives must have been misunderstood. I had no desire to make any political capital out of the bill. I was calling attention to the promises of the Democratic Party for economy and its failure to fulfill those promises, and the fact that this is an extravagant bill, un-

justifiable in many particulars, goes to the question I was discussing. Of course, when you come to local interests, there is no politics in it; everybody knows that.

Mr. SHEPPARD and Mr. WORKS addressed the Chair.

Mr. KENYON. I yield to the Senator from Texas.

Mr. SHEPPARD. Under the substitute which the Senator proposes every item which he denounces may be provided for to a certain extent.

Mr. KENYON. Yes; that is one of the unfortunate situations with which we are confronted.

Mr. SHEPPARD. Why does not the Senator stand for the abandonment of every project that he may consider unworthy?

Mr. KENYON. I am going to give the Senator an opportunity along that line.

Mr. SHEPPARD. And make the necessary motion to accomplish that end? What does the Senator gain by merely cutting the amount in half and leaving in the measure every project that he considers objectionable?

Mr. KENYON. All that is gained is to save half of the waste; that is all.

Mr. SHEPPARD. But the projects the Senator considers objectionable will be preserved and will be appropriated for later on——

Mr. KENYON. Perhaps so.

Mr. SHEPPARD. And finally nothing will be saved by that course.

Mr. KENYON. Possibly not, but it has seemed to me plain——

Mr. WORKS. Mr. President, I was just going to suggest the same idea that has been advanced by the Senator from Texas [Mr. SHEPPARD]. I suppose what is desired by the Senator and by others of us is to eliminate from this bill the unworthy projects, projects that ought not to be supported by the Government. Certainly to cut this bill in two, as is suggested, would not accomplish that result. It may be a very difficult matter to reach it in a proper way, but it seems to me that what should be done is to eliminate from this bill such projects as ought not to be supported by the Government and to let the meritorious ones stand.

Mr. KENYON. I agree with the Senator.

Mr. WORKS. Certainly, there are some projects, as the Senator says, that ought to be supported by the Government.

Mr. KENYON. There is no doubt about that. I agree with the Senator on that proposition, and I propose at the proper time to make the different motions and let us vote upon them.

Mr. GALLINGER. Mr. President, will the Senator yield for me to make a correction of the RECORD?

Mr. KENYON. Certainly.

Mr. GALLINGER. Mr. President, on yesterday I mentioned certain towns in Texas for which appropriations had been made for public buildings, and stated their population. I gave the figures correctly, but a mistake was made by the reporter in one case to which my attention has been called. I am reported as having said, on page 8685:

> The city of Memphis calls for an appropriation of $75,000, and they have 936 people in that town.

What I did say was that there were 1,936 people. I ask that the correction be made.

Mr. SHEPPARD. I thank the Senator for making the correction.

The VICE PRESIDENT. The correction will be made.

Mr. KENYON. Just one thing more along this line, and then I will accept the suggestion of my friends and pass from anything that may be termed a political discussion; but I do want to put in the RECORD a part of a statement made by Mr. FITZGERALD in the other House some time ago. Mr. FITZGERALD is chairman of one of the important committees of that body, and he said:

> In a few months I shall be called upon, in the discharge of my official duties, to review the record that this Democratic House shall have made in its authorization of the expenditure of the public moneys. Whenever I think of the horrible mess that I shall be called upon to present to the country on behalf of the Democratic Party I am tempted to quit my place. I am looking now at Democrats who seem to take amusement in soliciting votes on the floor of this House to overturn the Committee on Appropriations in its efforts to carry out the pledges of the Democratic platform. They seem to take it to be a huge joke not to obey their platform.

I have wondered a little, Mr. President, why it was that the Army appropriation bill and the naval appropriation bill, after the suggestions of the President on his western trip, were not brought before the Senate ahead of the river and harbor bill; but it seems the steering committee has decided that the river and harbor bill shall come first. All I want to say about that, in closing that branch of the discussion, is this: It is not an excuse that the Senator——

Mr. THOMAS. Mr. President, I am a member of the steering committee, to which the Senator refers, and I want to correct his statement that this bill was reported by that committee in advance of or with reference to the bills concerning preparation. We are waiting upon the House. The military bill is passed and is in conference, as the Senator knows.

Mr. KENYON. The general reorganization bill?

Mr. THOMAS. Yes.

Mr. KENYON. I referred to the Army appropriation bill and the naval bill.

Mr. THOMAS. The Army appropriation bill and the naval bill have not yet reached us. When those bills reach us, I am satisfied that they will be given the right of way.

Mr. KENYON. This bill is placed first by the steering committee?

Mr. THOMAS. This bill is here because there is no other matter of importance ready for consideration.

Mr. KENYON. I should like to inquire if any action was taken as to the child-labor bill by the steering committee?

Mr. THOMAS. There has been no definite action taken by the committee with reference to any bill up to this time.

Mr. KENYON. Except this.

Mr. THOMAS. This was taken up as a matter of tacit consent, because it was here before the Senate, and is an appropriation bill.

Mr. KENYON. I only want to say this in closing as to that question and I am not going back to that proposition. The excuse offered by the Senator from North Carolina that projects in this bill, if they are bad projects, are Republican projects, and were started by the Republican Party, and so are now carried on by the Democratic Party, is rather a poor excuse; because, if they are bad, that is exactly what you told the people you were going to stop. If you can not do any better than the Republicans did about it, and they were wrong about it, and you are going to confess that your defense is that they were wrong, then we had all better get out, and let somebody have a chance here who can do something.

Mr. President, as suggested by the Senator from North Carolina and the Senator from California, this is not a party question. It ought not to be determined on any party lines. It ought to be determined on the question of whether it is right or wrong; and the propositions in this bill ought to be settled on the question of whether they are right according to our various judgments, or whether they are expenditures that can not be justified. I am not criticising any Senator for his view, however much I may be criticised for mine. I recognize that the men in this body who are standing for parts of the appropriations in this bill believe they are proper expenditures of public money. I do not claim for myself any more patriotism than I accord to my fellow Senators; but I sincerely believe that a large number of these items are unwarranted, and should be stricken from the bill.

Col. Townsend, the chairman of the Mississippi River Commission, I think, made a speech to one of the river and harbor congresses, and that speech was placed in the CONGRESSIONAL RECORD of December 10, 1915. We hear a good deal about the Army engineers in these matters. Apparently we take the recommendations of the Army engineers. They are given tremendous power. Col. Townsend is one of them. He was the district engineer, I think, at Memphis, and he has been or is now chairman of the Mississippi River Commission. Of course he has given great study to these problems; and I want to read one or two things he says in this speech, extracts here and there. He says:

> St. Louis for the past 50 years has been the principal origin or terminus of the traffic on our western rivers, and its records summarize their tendencies. Its river commerce attained its maximum of 2,120,000 tons in 1880 and has since steadily declined to 153,000 tons in 1914. In contrast, it may be stated that the commerce at Sault Ste. Marie, the outlet to Lake Superior, in 1880 was 1,300,000 tons, and attained a maximum of 79,000,000 tons in 1913. The commerce of New York Harbor exceeds 125,000,000 tons.

He takes the position that the falling off in river traffic is not due to unfair methods of railroads. I myself believe that the falling off in river traffic has been caused to some extent by the unfair methods of the railroads and the attempts to put the water traffic out of business in the days that have gone by. He says:

> Whatever may have occurred in early days, such methods have practically ceased since the establishment of the Interstate Commerce Commission; but the decline in river commerce has been more rapid, since the railroads have been compelled by law to give the shipper equal rates, than when there was no restraint on the practices of which they are accused.
>
> Nor can the decline of commerce be attributed solely to the shallowness of our rivers, nor the failure of Congress to make adequate appropriations for them. For the past 10 years there has been maintained in the Mississippi River at all stages a channel of 9 feet from Cairo to New Orleans, and one of 8 feet from Cairo to St. Louis—a channel which far exceeds in navigability that of the far-famed Rhine with its 50,000,000 tons of freight annually.

He calls attention to the difference between this country and European countries on this question, which I shall take up a little later.

It is thus seen that a revival of commerce on our western rivers can only result from a revolution in our methods of doing business. A southern market must be substituted for the eastern, and this can only occur from a radical reduction of freight charges in a north and south direction. Such a reduction can be produced by water transportation, but to be a success requires cooperation by four agencies—first, the General Government, which must provide a proper depth of channel in the river bed; second, the muncipality, which must create suitable terminal facilities, or at least prevent the obstruction of those which nature has provided; third, the boat owner, who must substitute for the obsolete packet at present in use an economical freight carrier; and fourth, the most important member of the combination, the shipper, who must be in a position to utilize the opportunities the other agencies afford him.

Mr. NORRIS. Mr. President——

Mr. KENYON. I yield to the Senator from Nebraska.

Mr. NORRIS. I was going to ask the Senator if he would not give us at that point the tonnage on the Mississippi River, in connection with his statement about the depth of the channel that has been maintained from Cairo down of 9 feet, and from Cairo to St. Louis of 8 feet. How does the tonnage compare, since that depth has been maintained by the Government, with the tonnage prior to that time, and what is the tonnage on the river between those points?

Mr. KENYON. I can only give that now from recollection, and I may be in error. If so, I will correct it later. At what date does the Senator want me to give it?

Mr. NORRIS. I wanted to compare the tonnage since the maintenance by the Government of the depth of channel that the Senator has just spoken about with the tonnage prior to that time, and also to get the tonnage now, during the last year.

Mr. KENYON. The St. Louis Merchants' Exchange reports that it gave out that tonnage, or, rather the shipments and receipts of freight, which would be the same thing, from 1890 to 1913; and I have here a statement which was compiled from the St. Louis Merchants' Exchange reports.

In 1890, on the upper Mississippi River, there were 22,547 tons; on the lower Mississippi, 543,805 tons.

Mr. NORRIS. Where is the division-point between the lower and the upper Mississippi River?

Mr. KENYON. That is taken from St. Louis shipment and receipts at St. Louis—above and below St. Louis.

That traffic seems to have reached its maximum about 1893, when the tonnage on the upper Mississippi was 54,230 tons, and the tonnage on the lower Mississippi, 342,785 tons.

Getting down later, in 1909 on the upper Mississippi there were 16,695 tons, and on the lower Mississippi, 21,140 tons.

In 1912, on the upper Mississippi, 9,025 tons; on the lower Mississippi, 24,330 tons.

In 1913, on the upper Mississippi, 8,830 tons; on the lower Mississippi, 20,000 tons.

So the tonnage has gone down from 54,000 on the upper Mississippi in 1893 to 8,830 tons in 1913, and from 342,785 tons on the lower Mississippi in 1893 to 20,000 tons in 1913.

Mr. NORRIS. If the Senator will permit me, it would be interesting, I think, if the Senator would give us his idea of the reasons for that wonderful decline in the tonnage, when the river has been so greatly improved. At the same time that the tonnage was going down, the river had been improved by the Government. What is the cause of that great decline?

Mr. KENYON. Of course that raises a large number of questions. I was going to discuss that at some later time.

Mr. NORRIS. If the Senator had that in mind, I hope he will not consider my question now.

Mr. KENYON. Yes; I did.

Mr. NORRIS. I did not want him to omit it; that was all.

Mr. KENYON. The question of the character of boats, the question of transshipment, the question of warehouse terminal facilities, the question of the development of the railroads, the speedier traffic on the railroads and the safer traffic on the railroads, the manner in which the railroads build switch tracks to the side doors and the back doors of factories, saving all the expense incident to loading, and many other questions, enter into that matter. I want to discuss them more at length after a while. I think the reports will substantiate the statement that the commerce on the Mississippi in the last 40 or 50 years has decreased something like 90 per cent, even though we have been spending money in trying to improve the channel.

I want to read a little further from Col. Townsend. He says:

It is impossible with the present state of public opinion to ignore geographical subdivisions, but I believe an enlightened public opinion can be created which would enlarge the subdivisions. Instead of thinking by congressional districts or States the people could be readily taught to seek the welfare of groups of States. While Congress must recognize the East and West, the North and South, the Great Lakes, and the Mississippi Valley, and make an equitable distribution of funds between those sections, the inherent patriotism of the people can be aroused so that the appropriations thus made can be expended in such a manner as to produce the greatest good. By considering the Mississippi Valley as a whole, and treating the problem of transportation by water just as a railroad handles transportation by land, i. e., first completing a trunk line connecting those localities where there is a large commerce awaiting transportation, and then successively completing the most important branches, much better results would be obtained.

Many times the branches of these streams have been improved before the main channel was improved, and he says this—and this is the point I am particularly anxious to emphasize:

Specifically the writer would not abandon any navigable stream in the Mississippi Valley that has been partially improved, but would leave 58 of them in their status quo, confining operations to snagging and the maintenance of existing works, and would concentrate appropriations on opening up a channel of the capacity of that existing on the lower and middle Mississippi to Chicago and Pittsburgh. * * * But it must frankly be admitted that such a program will be impossible of accomplishment without a change of sentiment in the average American voter. While it is impossible to indite a people, they can be educated.

The trouble with the whole manner of these expenditures, it seems to me, is that we have no budget system in this country. We are about the only civilized Nation in the World without a budget system. We have different committees appropriating money in both branches, with no coordination between them, no relationship between receipts and expenditures, and the result is, of course, an irresponsible, unbusinesslike, uneconomical carrying on of public affairs.

Parliament 200 years ago passed a resolution that it would consider no bill appropriating money except on the representation or recommendation of the responsible minister of the Crown, and that was the foundation, as far as Great Britain was concerned, of the budget system. I can not understand why we are perfectly helpless in trying to have a budget system in this country. President Taft in a message to Congress appealed to Congress to do something along that line. Bills have been introduced here for that purpose. It may be that because we have no responsible ministry the budget system might not work out as well as in other countries, but if some Cabinet officer presented an investigation of projects for rivers and harbors with his sanction and his approval and his request, and stood good therefor, it might be that some money could be saved.

There have been a good many vetoes of river and harbor bills. President Jackson vetoed one on the ground that it was no part of governmental affairs to make appropriations for internal waterways. President Arthur vetoed another; President Cleveland vetoed one; and President Taft, while he did not veto the river and harbor bill, sent a most illuminating statement to Congress in relation thereto.

There has grown up an absolute industry in this country of creating sentiment for river and harbor appropriations. There are booster clubs, commercial clubs, river and harbor congresses, some of them advertised in the letterhead as second only in importance to the Congress of the United States, and invitations extended to prominent citizens to participate in banquets. Senator Burton said on the floor that he had attended these banquets where at 9 o'clock in the evening they were in favor of a 9-foot channel, at 10 o'clock they were in favor of a 12-foot channel, at 11 o'clock they were in favor of a 15-foot channel, and at midnight they were all shouting for a 35-foot channel. [Laughter.]

Mr. MARTINE of New Jersey rose.

Mr. KENYON. That was not in New Jersey.

Mr. MARTINE of New Jersey. I suppose that at that hour of the night there was a greater increase in liquid and hence the necessity for a deeper channel than there was at the earlier stages of the game. [Laughter.]

Mr. NORRIS. And evidently they did not use water. [Laughter.]

Mr. KENYON. So we have this agitation going on in great books presented. I have some here. Here is one as to Freeport Harbor, with your name printed in gold, and there are wonderful illustrations. What is the result of all this, and this constant boosting? It is perfectly natural for communities who feel that there is a lot of money to be turned loose in the community to carry an absolute campaign all over the country to develop sentiment in favor of river and harbor appropriations.

As a result of all this we have as some of the plans and schemes, from the Lake to the Gulf deep waterway, canalization of the Mississippi River from St. Paul to St. Louis, there to connect with the Lakes to the Gulf waterway, estimated cost $53,000,000; Missouri River improvement, canalization of the Missouri River from Kansas City to Sioux City, estimated cost of improvement $43,000,000; canalization of the Ohio River for the entire length, estimated cost $63,000,000; canal from Lake Michigan to Lake Erie, canal across central Michigan, Grand and Saginaw Valley waterway; Erie barge canal, Lakes to Atlan-

tic waterway; Lake Erie and Ohio River ship canal, Boston to the Gulf of Mexico, a great canal project to parallel the ocean, costing millions upon millions of dollars; Atlantic and Great Western waterway, connecting St. Louis, Mo., with Brunswick, Ga.; canalization of the Columbia River above and a canal with locks around The Dalles.

These may be all right, but they ought to be investigated and then carried out in some comprehensive plan by some board that had some knowledge upon such subjects.

France and Germany do not appropriate as we do upon the installment plan. They find out whether the improvement is good for the country, and if it is, they go ahead and appropriate the necessary sum for the improvement. They do not have a committee plan in which the members of the committee seem to have the power to simply put upon the bill nearly anything they desire, especially surveys.

I understand it is the rule of the committee that any survey asked by any member of the committee is put upon the bill. A survey is merely a consolation prize, but a large percentage of these surveys actually become projects, and it is the first step. We have in this bill now surveys, more surveys of the Trinity, and the Brazos; for the St. Francis River, in, I think, Louisiana.

Mr. RANSDELL. In Arkansas.

Mr. KENYON. Is it in Arkansas? Does it flow into the Gulf?

Mr. RANSDELL. No, sir; it empties into the Mississippi River considerably above the Louisiana line.

Mr. KENYON. One hundred thousand dollars is added to the amount of the House appropriation in order to have these new surveys.

There is added to this bill also a provision for investigating the Kansas floods. I ought perhaps to say in relation to flood matters that a bill is on its way here now for that purpose. I do not know whether it has passed the House; I will ask the Senator from Louisiana.

Mr. RANSDELL. It has not. It is under consideration in the House to-day, I understand.

Mr. KENYON. That bill is under consideration in the House to-day, appropriating $45,000,000 for flood control on the lower Mississippi and also some projects in California.

Mr. RANSDELL. With an addition of $5,500,000 for the California project, making $50,500,000 in all, $45,000,000 for the lower Mississippi and five and a half millions for the Sacramento River, California.

Mr. KENYON. Forty-five million dollars on the lower Mississippi and something like $5,000,000 on the Sacramento.

Mr. OLIVER. Will the Senator allow an interruption?

Mr. KENYON. I yield.

Mr. OLIVER. I ask the Senator if he has heard any intimation of how the money is to be raised for all these improvements that are projected?

Mr. KENYON. The only intimation I have about money being raised is that we shall tax the people of Pennsylvania and New York and Connecticut and the States having a large amount of money. That bill carrying $50,000,000 will be here shortly. I think this bill ought to wait for that. That is more important than this bill. That, I hope, is going to get at the question in some scientific and rational way.

The Senator from Louisiana [Mr. RANSDELL] is certainly entitled to credit for what he has tried to do on the flood-control question and likewise the Senator from Nevada [Mr. NEWLANDS], whom I have always regarded as a statesman with a great vision and one of the real constructive statesmen of the country. But why would it not be wise to wait for that bill and take them both up together and work out some plan of flood control and navigation, if we can, and some plan of coordination between the States and the Government and the local interests?

Mr. NEWLANDS. Mr. President——

Mr. KENYON. I yield to the Senator.

Mr. NEWLANDS. The Senator has alluded to an item in this bill providing for an investigation of the question of floods in Kansas. Is the Senator aware that last fall there was a conference held at the office of the Governor of the State of Kansas, which was attended by representatives from all parts of the State, some of the most prominent and distinguished men in the State participating in that conference, at which it was unanimously determined that broad treatment of this subject was required, that it embraced the study of every watershed in the country, and the promotion of the use of the flood waters for beneficial purposes in such a way as to make them agencies in the creation of wealth and prevent them from being made agencies for the destruction of wealth, and that it was the unanimous judgment of that conference, composed of over 100 men, that the bill which I have been urging for many years, and which is commonly known as the Newlands-Broussard bill, was best adapted to that purpose?

Is the Senator also aware that in the consideration of the so-called Humphreys bill, recently reported by the Committee on Flood Control to the House of Representatives, when the matter was under consideration as to what the form of legislation should be, and when this administration, through four department chiefs, the Secretaries of War, Interior, Commerce, and Agriculture, had expressed their view to the President that the form of coordination called for by the so-called Newlands-Broussard bill and providing for a council consisting of these four department chiefs was the best method of organization with a view to a comprehensive treatment of this subject, the House committee refused on that bill to present that scheme of coordination and left the measure simply a measure for the development of the lower Mississippi with simply the power to the Secretary of War, at his discretion, to call on other scientific services of the Government for information, and with the power to them in their discretion and to furnish such information, and that that bill is coming to the Senate, notwithstanding the vast experience that we have had with reference to the failure of the present system, absolutely rid of every suggestion of a method for meeting in a broad and comprehensive way the requirements of the country?

Mr. KENYON. I did not know that.

Mr. CURTIS. I should like to state that it is true that there was such a meeting held at Topeka, Kans., and they did endorse a broad plan covered by the bill suggested by the Senator from Nevada.

Mr. KENYON. That was after the Senator from Nevada had addressed them, was it not?

Mr. CURTIS. I think perhaps it was, but when the bill was introduced——

Mr. NEWLANDS. If the Senator will permit me, as the Senator from Iowa suggested that that was after the Senator from Nevada had addressed them, I will state that in the first place I received a communication from Governor Capper, of Kansas, asking me to be at this conference, and stating that they had had a previous meeting and had studied this bill and felt that it met their requirements, and that that conclusion they came to without the presence of the Senator from Nevada.

Mr. KENYON. I had noted in the papers, as I remember, that a meeting had been held there and the Senator from Nevada had addressed it, and after his address they had adopted the resolution.

Mr. CURTIS. The Senator is correct. He was invited there by the governor of the State and other citizens.

But what I was going to say is that the amendment was not proposed until after it was ascertained that the House bill was limited to the lower Mississippi and probably the California stream. The committee having charge of this matter requested me to propose this amendment, and it was offered as an amendment to the river and harbor appropriation bill because of the fact that the other bill had been limited. We thought the Missouri and its tributaries would not have any consideration if the House measure should become a law. Our people believe, as does the Senator from Iowa, that much good can come from controlling the flood waters, and if the flood waters were controlled, there would not be such large appropriations required to prevent destruction on the lower Mississippi, the Missouri, and other rivers.

Mr. RANSDELL. Will the Senator from Iowa yield to me for a moment?

Mr. KENYON. I yield.

Mr. RANSDELL. I should like to say, Mr. President, that I do not think the Senator from Nevada [Mr. NEWLANDS] has correctly stated the bill which he designates the so-called Humphreys bill, now pending in the House of Representatives. That bill not only provides for flood control on the lower Mississippi in a very comprehensive way, carrying out the plans of the Mississippi River Commission, which they have been evolving through 35 years of continuous study, but it also provides for a very businesslike, comprehensive plan of flood relief on the Sacramento River, in the State of California, and for a study and report on flood problems in various parts of the United States, without specifically designating them, however; said investigation and report to be made by United States Army engineers, and the only machinery——

Mr. CURTIS. Mr. President, let me ask the Senator a question.

Mr. RANSDELL. Pardon me; let me make my statement. I will be through in a moment.

The only machinery we have ever had in this country for carrying on great works of Government expenditure on waterways, unless you call the irrigation work in the West waterworks; they are in a way connected with water, but the only

machinery which has developed in this country during our long history for flood control and for the improvement and development of our waterways is the Engineer Corps of the Army, with some slight assistance in additional members of the Mississippi River Commission from civilians, and some members of the Panama Canal Commission, who were not members of that corps. The flood control bill now pending provides that the investigation shall be carried on by this corps of the Army. It does not say specifically just what project it shall investigate. I assume that the corps will be directed to make investigations of a great many projects in this country, or a great many flood problems, not alone those in Kansas and on the Colorado or the upper Missouri or the Savannah or a number of other rivers.

I might mention that the Allegheny presents a tremendous flood problem. I know the thought of the Flood Control Committee is to develop the very best possible machinery for looking into the question of flood control in every part of the United States, and for that purpose using this corps and the very best trained hydraulic engineers that we have.

Personally, I would have been entirely willing to have had some civilians added to the corps in a commission; and I so stated to some of the members of the other House when they were working on the bill; but after a complete study of the question, they concluded that the best machinery we could adopt or devise was that which we already have; and that is provided in the bill. I now yield to the Senator from Kansas.

Mr. CURTIS. Mr. President, I want to state, if the Senator from Iowa [Mr. KENYON] will permit me, that since the great flood of 1903 the Government, at the request of citizens of Kansas, has been studying the flood conditions on some of our rivers. The State has employed outside engineers to study the question with our local engineers. We hope that something may be done that will aid and assist in putting through a general plan that will not alone take care of the floods on the lower Mississippi and in California; but which will take care of flood conditions all over the country. In other words the people of Kansas would like to see a broad and workable plan adopted by Congress.

Mr. RANSDELL. Let me say to the Senator from Kansas that that is the idea back of this flood control bill. My understanding is that the Flood Control Committee of the other House was created for that purpose. It certainly was not created for the benefit of the Mississippi River alone. It has general jurisdiction; it will look into flood problems everywhere, and will try to work out just as comprehensive a plan as is possible.

Mr. President, I may say to the Senator from Kansas [Mr. CURTIS] that I sympathize with him deeply. The Senator has alluded to the flood of 1903. I wish to say that I was personally a sufferer by the flood of 1903, which did so much harm in his State. I myself lost at least $8,000 or $10,000 in Louisiana by that flood, because of a break which occurred in the levees early in the spring of that year. We were unable to close that break before the second rise in the river came; and when it came in the Senator's State, and did such awful damage there—I think it was estimated to be between $30,000,000 and $40,000,000 in the vicinity of Kansas City, Kans., and Kansas City, Mo.—those flood waters swept on down the Missouri, down the Mississippi, and down on to Louisiana, where all those floods have to come, and they poured through the gaps in the levees caused by the break in the spring; and I, individually, lost the second crop which I had planted that year, and I could not make another crop, because it was too late for me to do so. I may say to the Senator that I sympathize with him and his people.

There are big flood problems in many other places in this country besides those on the Mississippi. There is a tremendous flood problem in my own State on the Red River. We are not asking anything for it now, but we should like that flood problem studied. There are flood problems in Texas; there are flood problems in every portion of the country, so far as I know. There are immense flood problems at Pittsburgh. Every few years we read of losses to the extent of ten or fifteen million dollars at Pittsburgh. I repeat that the purpose of the flood-control bill now pending in the House of Representatives, and which I hope will be passed to-day, is to provide the machinery—and the most comprehensive machinery—for looking into all these matters and reporting to Congress from time to time. We can not do it all in a moment, Senators, but, as we get reports, we can act upon them; and I hope we shall act upon them in the very best manner.

Mr. CURTIS. Mr. President, if the Senator from Iowa will pardon me I would like to place in the RECORD a statement of the losses incurred by the flood of 1903. I wish to state that the flood of 1903 caused very much greater damage than twenty or thirty or even forty million dollars in and about Kansas City. In and around Topeka alone the damage was over $20,000,000, and a number of lives were lost, and there have been great and damaging floods in Kansas every two or three years since that time.

Mr. RANSDELL. I am glad to have the correction which the Senator from Kansas has made. I was basing my statement merely on what I had read in the newspapers at the time.

Mr. KENYON. Mr. President, I think it is very unfortunate for the great question involved that there is this disagreement between the Senator from Louisiana [Mr. RANSDELL] and the Senator from Nevada [Mr. NEWLANDS]. I have been hoping that they could get together on some proposition. Without committing myself to any particular bill or to any particular proposition, I wish to say that I have very great sympathy with the people of Louisiana in the struggle which they have made against the ravages of the Mississippi River. It has never seemed fair to turn the water from the North, from my State and from Illinois and Ohio, and to focus it all down the Mississippi River, without taking some means to protect the people who are there. While I do not know as to just what bill I may support, and while I want to study the bill that comes from the other House very carefully, I will say that I am anxious to support some measure that will give relief to those people.

I want to revert just a moment to the subject which I was discussing when interrupted. I have been taken away somewhat from my train of thought. When the river and harbor bill was here some two or three years ago, I remember the Senator from Ohio [Mr. POMERENE] producing at that time in the discussion a letter from business houses urging him to assist in hurrying along the passage of the bill because it was hurting their business and stopping the sale of their clamshell buckets; and that was a part of the general kind of campaign that existed all over the country.

Mr. President, a large number of important questions arise, and I am glad that we have such a large attendance here to take them up, in this voting away of $42,000,000 of the people's money. It shows a remarkable interest in the project, and I do not take it at all as complimentary to myself or to what I am saying that the seats here are not so crowded.

Are we going to give up all river improvement? Why has traffic decreased on rivers? Are we to build waterways to regulate freight rates? If so, why not build railways to regulate freight rates? Is transportation by water cheaper than by rail? In the final analysis, can waterways and expenditures thereon be justified on any other theory than making them actual carriers of traffic? Are the building of waterways and the canalization of rivers too expensive a method of regulating railroad rates? Would the power to fix a minimum rate help in preventing railroads destroying waterway traffic? Can plans be devised and worked out for coordination between rivers and other waterways and railroads?

The countries of the Old World, I think, solve the problem, and can do so much easier than can we, for they compel the waterways and railroads to cooperate and prevent one from destroying the other. These are all questions of interest and of importance.

I believe there are very few candid people who are willing to contend that our system of appropriations as at present carried on for rivers and harbors is altogether satisfactory. One of the great objections, it seems to me, to our present method is what is known as the "dribbling" policy. This policy has resulted in very great loss and very great waste. It has always seemed to me as if there should be a smaller number of projects undertaken, and then have the bill provide sufficient funds for their completion. That is important not only as saving waste, but because of the effect upon the community and because of the investments that may be made by boat lines and capital in the development of the traffic upon the rivers.

We have in this country an examination of projects by the Corps of Army Engineers. I do not wish to be critical of the Army engineers, but I think they feel that they must carry out the wishes of Congress and execute the congressional desires, and that, if Congress starts out on a policy of waste and extravagance, it is not for them to question it.

Piecemeal appropriations and the dribbling policy delay the use of the streams. We have projects under way now which I think it would require, if work on them is pursued at the same rate with which it has been pursued in the past, from 15 to 30 years to complete. How is it possible to get any development with that kind of a system?

President Taft in his veto message of 1910, on this subject, said:

> The chief defect in the bill is the large number of projects appropriated for and the uneconomical method of carrying on these projects by the appropriation of sums small in comparison to the amounts required to effect completion.
>
> The figures convincingly establish the fact that this bill makes inadequate provision for too many projects. The total of the bill,

$52,000,000, is not unduly large, but the policy of small appropriations with a great many different enterprises without provision for their completion is unwise. It tends to waste, because thus constructed the projects are likely to cost more than if they were authorized to complete the whole work within a reasonably short time. The appropriation of a small sum lessens the sense of responsibility of those who are to adopt the project and who do not therefore give to their decision the care that they would give if the appropriation or contract involved the full amount needed for completion.

Mr. RANSDELL. Mr. President, will the Senator permit me there to interrupt him, to make a slight correction?

The PRESIDING OFFICER (Mr. THOMPSON in the chair). Does the Senator from Iowa yield to the Senator from Louisiana?

Mr. KENYON. I yield.

Mr. RANSDELL. The Senator stated that the matter which he is reading is from the veto message of President Taft. The Senator, I presume, meant to say President Taft's message on the bill.

Mr. KENYON. President Taft's memorandum.

Mr. RANSDELL. He did not veto the bill.

Mr. KENYON. The Senator is correct.

Mr. RANSDELL. I merely wanted the Senator to make that correction.

Mr. KENYON. I thank the Senator for calling my attention to it. President Taft used this language in his memorandum accompanying the bill. He continued:

Moreover, the appropriation of a comparatively small sum for a doubtful enterprise is thereafter used by its advocates to force further provision for it from Congress on the ground that the investment made is a conclusive recognition of the wisdom of the project, and its continuance becomes a necessity to save the money already spent. This has been called a "piecemeal" policy. It is proposed to remedy this defect by an annual river and harbor bill, but that hardly avoids the objections above cited, for such yearly appropriations are apt to be affected by the state of the Treasury and political exigency.

If enterprises are to be useful as encouraging means of transportation, they ought to be finished within a reasonable time. The delays in completing them postpone their usefulness and increase their cost. The proper policy, it seems to me, is to determine from the many projects proposed and recommended what are the most important, and then to proceed to complete them with due dispatch, and then to take up others and do the same thing with them.

He declined to veto the bill because he considered the projects under way were in urgent need of further appropriation for maintenance and continuance.

In this bill, for instance, there are piecemeal appropriations for projects which will run on for years and years, and in regard to some projects there is absolutely no time at which they shall end. Some of them have been running for, I think it is safe to say, 30 years.

I desire to place in the RECORD a comparative statement of appropriations in the present bill and the cost for completion. The East River and Hell Gate project will require for completion $13,400,000.

Mr. MARTINE of New Jersey. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from New Jersey?

Mr. KENYON. I yield.

Mr. MARTINE of New Jersey. I desire to ask whether the Senator deems that an improper bit of work?

Mr. KENYON. I do not.

Mr. MARTINE of New Jersey. I am very glad to hear the Senator say that. Hell Gate is a most remarkable point along the East River. It being very narrow, the formation being rocky, and an immense amount of shipping going through there, in the interests of commerce and general transportation, it seems to me a prime necessity that that passageway should be made as deep as the engineers have recommended.

Mr. KENYON. Of course, it may be, generally speaking, that Hell Gate entrance ought to be made less difficult; but in this case I agree with the Senator that it is a good project.

Mr. MARTINE of New Jersey. It would be difficult to overestimate the immense value and importance to trade and commerce of the particular passageway known as Hell Gate, across from the city of New York. As I have said, it is very narrow and a torrent rushes through there, but it floats an immense amount of commerce for Brooklyn and the great city of New York.

Mr. KENYON. It is some comfort to know that Hell Gate is narrow. [Laughter.] I am simply contending that that is a great project that ought to be completed, and completed soon, and not carried on by a dribbling policy for years to come.

Mr. MARTINE of New Jersey. I should think that would be a proper method; and yet I feel that I can say, without in any way reflecting on the Senator, that neither he nor I are scientific engineers, and, when the engineers have reported upon this project, I have so much faith in the wisdom and honesty of our Engineer Corps that I believe it would be safe to take their recommendation.

Mr. KENYON. Mr. President, if the Senator feels that way, there are projects in this bill that he will vote to eliminate, because there are projects in this bill that have been condemned by the Board of Engineers.

Mr. MARTINE of New Jersey. I will stand with the Senator on that. I have no partisanship in the matter. I am radical in my ideas, but I have no partisanship in the matter of the improvement of the great rivers and harbors of our country. I do not care whether their improvement is advocated by Republicans or by Democrats, if a project is wrong and if it is robbing the people of their money, without any beneficial results to be accomplished, I am irretrievably against it.

Mr. KENYON. I know the Senator is generally right about everything. I have very little difficulty in agreeing with him in regard to almost anything, except some of these water questions.

The Delaware River is another great project. This bill carries $2,165,000 for the Delaware River. I do not believe anybody is objecting to that. It has a great commerce.

Mr. MARTINE of New Jersey. I think we should realize the fact that this formation at Hell Gate, as well as in the Delaware, is an exceedingly rocky formation, and there is much of that work, in order to deepen and correct the channel, that involves a process of blasting. It is not a matter of scooping out silt and depositing it on the banks, as it is in the case of the Mississippi. The situation is widely different, and naturally it would take a little larger expenditure. But there is a very great and important commerce there. I do not know just how far they go up above the city of Trenton or up to the city of Trenton. The improvement of the Delaware there would accrue immensely to the general welfare of the country, I think, in the matter of lower rates of freight.

Mr. KENYON. I agree with the Senator about that.

In the case of the Galveston Channel, Tex., the bill carries $200,000. The cost of completion of that is $1,185,000. I believe that is a project that every one would recognize as a perfectly proper project and one that ought to be completed.

The Brazos River carries in this bill $215,000, and that is indefinite as to the time of completion.

The Trinity River carries $300,000, and that is indefinite.

The Cumberland River above Nashville carries $5,000. Below Nashville the bill carries $705,000, and the cost for completion will be $1,615,000.

The Ohio River carries in this bill $5,000,000. The cost for completion is estimated at $51,057,000, which is doubtless too low.

The Mississippi River between the mouth of the Ohio and the mouth of the Missouri carries $350,000, and the cost of completion is $17,250,000.

I want to say, about that, that in 1880 the traffic on the Mississippi was at its maximum. The Senator from Nebraska [Mr. NORRIS] has asked me as to the tonnage, and I have tried to give it to him; but at that time 44 per cent of the shipments out of St. Louis were by boat. That has changed, until in 1909 only, I think, one-half of 1 per cent went by boat. In that strip of the river on which we are to spend $17,250,000 there has been generally a channel of 8 feet. That is a deeper channel than the average depth of the Rhine, which carries a traffic of 40,000,000 tons a year. Yet we have spent, and will spend, on that strip of the river, more money than the Prussian Government has spent on the Rhine; and if any water system in the world can be considered a success, it is certainly the Rhine, with its tremendous commerce. But of course the Rhine has many things in its favor. It is nearly a straight stream. It has cities developed around it. It passes through the great Westphalian coal fields, and it has the great port of Rotterdam at its mouth.

So that the proportion of shipments by the Mississippi River in 1880 was 88 times as large as in 1909. Apparently, therefore, the more money we spend on this dribbling policy on the Mississippi, the farther away we seem to be from results.

In the upper Mississippi the bill originally carried $1,200,000. That has been increased by the committee to, I think, $1,500,000. That question, in its general relationship, I propose to discuss when I reach the Mississippi River proper.

In the bill of 1907 the policy of this continuous dribbling was ended, and now Congress appropriates merely enough to finish a part of the stream, and sometimes before the waters near the mouth of the stream are made navigable and that portion of the river improved, we are improving the waters far up and away from the mouth of the stream.

We have also pursued a practice—perhaps I should not call it a practice, but we have done it, at least—of improving branches before the main stream is improved. Senator Burton said here, with respect to the Ohio, that there is not a stream

emptying into it which is improved with locks and dams but which, for seasons of the year, continuing sometimes for months, has higher water in the tributaries than there is in portions of the Ohio River itself.

Mr. CLAPP. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Minnesota?

Mr KENYON. I do.

Mr. CLAPP. I just wanted to suggest that in some kinds of work in the rivers where there is more or less of a disturbance of the soil, loosening, and consequent drifting, no doubt the reason they begin farther up is that the soil there, when it is once taken out, is out forever, instead of beginning nearer the mouth, and having it fill from the work which is done above.

Mr. KENYON. Of course, that would be a perfectly good and feasible reason, and that may be true in many instances.

There are works carried on which were started years ago, and which it would require as much as 60 years, at the present rate of progress, to complete. I think the James River, Va., project has been in progress about 30 years, and it is possibly 42 per cent completed. This bill carries $190,000 for the James River, and it will cost about $3,000,000 to complete the project. Having been in progress 30 years, it will require 14 years more, or 44 years to complete one project.

President Elliott, in an article in the Atlantic Monthly some years ago, called attention to a lock on the Columbia River in building which 25 years were used.

On the Lookout Harbor we have spent over $3,000,000, and it is nowhere near completion anywhere along the line. Col. Kingman said of Lookout Harbor in 1910:

> It is dear at any price.

But he was overruled.

On the Sandy Bay Harbor we have spent millions. Something like 60 years, at the rate of progress that has gone on there, would be required to complete it, or something like 120 years according to the biennial system of appropriations.

There has been appropriated for the Harbor of Refuge at Cape Lookout $800,000. It will require $2,726,000 more to complete that Harbor of Refuge, but I think that item is not included in this bill.

In the river and harbor act of 1907 the policy was established of not starting new projects unless provision was made for their completion. It was departed from in 1910, and so we have built up our present system; and it has been estimated by competent engineers that the cost of the piecemeal system is from 5 to 30 per cent more.

The piecemeal system has been condemned by the Army engineers. Gen. Marshall, one of the Army engineers, said about it:

> Few, if any, of the larger works have ever been prosecuted at a rate sufficiently rapid to realize the fullest efficiency and economy.

Mr. President, no private enterprise would ever be or could ever be carried on in this dribbling-policy fashion. Some of these projects, as I have said, involve canalization schemes of 37 locks and dams, and absolutely no time is fixed for their completion. They are not located, in most instances, for the best benefit of navigation, but are spread out along Congressional districts, in order, I assume, that the people may think that they are securing something.

I think I have perhaps sufficiently called attention to and spent enough time on this objection to the dribbling policy; and I will finish what I have to say as to that by reference to the Sandy Bay harbor of refuge, where the estimated cost of completion is $4,954,925.25. Work has been in progress since 1885, for a period of 30 years, at a cost of $1,767,174.15; but no appropriations whatever have been made for that harbor since 1909.

On the Columbia and lower Willamette rivers below Portland work was commenced in 1877, and the total amount expended on the original and modified projects is $2,769,260.45. It is estimated that $2,315,000 will be required to complete the project. That is a project that has been going on for 30 years.

Mr. LANE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Oregon?

Mr. KENYON. I do.

Mr. LANE. The Senator from Iowa is getting over into my country now.

Mr. KENYON. I would not do anything against the Senator's country.

Mr. LANE. I do not know whether he knows the fact to exist or not, but on the lower Willamette and the Columbia the people themselves have expended several millions of dollars in assisting the Government to make the improvements.

Mr. KENYON. I want to ask the Senator why it is that the project has not been completed? Why has it run so long?

Mr. LANE. I think that is due to changing conditions. In the early days we made provision for lighter draft boats than we now use, for one thing, and I do not think a comprehensive plan was made in the first place to fit the conditions as they exist now. In the days when they began the work, the city of Portland was a city of seventy or eighty thousand people. Now it has about 250,000 people. Conditions have changed.

Mr. KENYON. I will ask the Senator how near completion the project is?

Mr. LANE. It is not more than half completed, I should judge. It will require about 40 feet of water, and that will take a great deal of money.

Mr. KENYON. It will require about 30 years more at the present rate of progress.

Mr. LANE. Well, probably not so much as that. If they had gone about it in a systematic manner, and started in for a 40-foot channel, which was not considered necessary in the days when we had boats running in and out that only drew 20 feet, much of this money would have been saved; and had they adopted the plan of throwing the silt behind bulkheads up and down the river, it would not have been again washed into the channel to make sandbars which have to be dug out again. But the State of Oregon and the city of Portland have put up millions of dollars which have been expended upon that project.

Mr. JONES. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Washington?

Mr. KENYON. I do.

Mr. JONES. I just wanted to ask the Senator from Oregon if it is not a fact that that is largely a dredging project?

Mr. LANE. It is.

Mr. JONES. And that the depth originally was, as he has suggested, to accommodate vessels of a light draft, but that as the commerce has increased the size of the vessels has increased, and that has necessitated dredging out to an additional depth?

Mr. LANE. That is the fact, Mr. President, to which I call the attention of the Senator from Iowa. The fact is that the work has been carried on in large part by the people, and it has not been a wasteful expenditure. It has been expensive, but that has been due, as I have already said, to changing conditions and circumstances. In the early days the boats that came in and out of the Columbia River and navigated the lower Willamette and Columbia were deep-sea craft, not of over 15 feet draft; the tonnage was small. I think when I first moved to Portland nobody suspected that the city would ever have a population to exceed 10,000. It had 3,500 then.

Anybody who would have come in and proposed a 40-foot channel to the sea or a 30-foot channel to the sea from the city of Portland would have been considered an insane person. If a man in those days made the assertion that some day we would have electric lights or electric power for street cars, it was considered idle talk. I heard statements made in those days that some day we would have electric lights and some day we would also have electric power for street cars, and the man who made such statements was considered to be an idle dreamer, little short of insane.

So it could not have been provided for at that time. The same conditions existed at Seattle. I remember the day when Seattle was nothing but the Yessler wharf and a few inhabitants on the hill. I was there at the time, and if anybody had said that some day Seattle would be a city of two or three hundred thousand or three hundred and fifty thousand people and a port of any importance whatever they would have looked at him as a dreamer.

This work has been carried on, I think, consistently, but I have no doubt somewhat extravagantly; I have no doubt the Senator is quite right in that respect, but the people of Oregon have borne the cost of it.

Mr. JONES. Do you not levy taxes in Portland to carry on the improvement?

Mr. LANE. We levy taxes.

Mr. KENYON. The point I was trying to make was simply this, not so much the extravagance perhaps in this particular project, but going ahead year after year and not finishing a project, that it was an extravagant method of bringing it about.

I take it possibly from what the Senator says that it may have been fortunate that the project was not earlier completed because it would have been inadequate for the purpose.

Mr. LANE. It would all have had to be done over again. No man then knew the requirements that exist to-day. They could not have foretold it.

Mr. KENYON. No man of course on that theory can foretell what the requirements will be 20 years from now.

Mr. LANE. It will perhaps never require over a 40-foot channel.

Mr. KENYON. That is the project now.

Mr. LANE. That is the estimate. I do not think the project calls for that much.

Mr. JONES. There are 25 or 30 feet now.

Mr. LANE. No result can be accomplished in such matters until a comprehensive method is begun, a system following from the primary drainage down to the mouth of the river into the ocean. The method suggested by the Senator from Nevada or some such plan will economically accomplish the result, but even then it will take a farsighted engineer, an imaginative person who can look ahead and see what the future needs will be to accomplish final and full improvements.

Mr. KENYON. I think the Senator is exactly correct. I ask leave to insert, Mr. President, as a part of my remarks a table showing the cost of the completion of a number of projects and the appropriation for projects in this bill, without taking the time to read it.

The PRESIDING OFFICER. Without objection it is so ordered.

The statement referred to is as follows:

| | Appropriation in present bill. | Cost for completion. |
|---|---|---|
| East River and Hell Gate | $200,000.00 | $13,400,000 |
| Improving Harlem River, N. Y | 250,000.00 | 1,628,000 |
| Delaware River, Pa., N J., and Del., cash and continuing contract | 21,65,000.00 | 6,809,200 |
| Chesapeake & Delaware Canal | | 8,000,000 |
| Harbor at Norfolk, Va | 1,000,000.00 | 1,114,000 |
| Cape Fear River above Wilmington | 83,000.00 | 416,000 |
| St. Johns River, Fla., to ocean | 300,000.00 | 777,000 |
| Channel from Pensacola Bay to Mobile Bay | | 432,435 |
| Waterway, Mississippi River to Bayou Teche, La | 10,000.00 | 1,655,500 |
| Galveston Channel, Tex., by the construction of a sea wall | 200,000.00 | or 2,062,900<br>1,185,000 |
| Brazos River, Tex. (locks and dams) | 215,090.00 | Indefinite |
| Trinity River, Tex. (locks and dams) | 250,000.00 | Do. |
| Cumberland River below Nashville | 705,000.00 | 2,201,882 |
| Cumberland River above Nashville | 5,000.00 | 4,500,000 |
| Ohio River | 5,000,000.00 | 51,057,000 |
| Mississippi River between Ohio and Missouri | 350,000.00 | 17,230,000 |
| Mississippi River between Missouri River and St. Paul | 1,200,000.00 | 13,500,000 |
| Fourth Lock, St. Marys River | 800,000.00 | 2,475,000 |
| Missouri River, Kansas City to the mouth | 1,500,000.00 | 15,600,000 |
| Sacramento and Feather Rivers, Cal | 115,000.00<br>75,000.00 | 5,860,000 |
| Inland waterway from Norfolk, Va., to Beaufort Inlet, N. C | 1,000,000.00 | 4,000,000 |

Mr. SHEPPARD. Mr. President——

Mr. KENYON. I yield to the Senator from Texas.

Mr. SHEPPARD. The Senator speaks of piecemeal appropriations and long periods of time required to complete various projects. I wish to say to him that the United States is not the only country subject to that criticism and experiencing that difficulty.

For instance, the Prussian Government has been making appropriations for the Rhine throughout a period of 90 years—from 1826 to 1916.

The River Marne, in France, has been improved for a distance of 115 miles from its mouth and has 19 locks and dams. It required 78 years to finish that project—from 1822 to 1900.

The River Yonne, in France, has 26 locks and dams, and it took 62 years to complete that project.

The River Seine, in France, on which Paris, the capital, is located, has been improved with 34 locks and dams, and it took 63 years to complete that improvement.

The River Saone, in France, has 30 locks and dams, and it took 18 years to finish that improvement.

The Vistula, in Germany, is improved for a considerable distance from its mouth, and it took some 75 years to complete that improvement.

The River Oder, in Germany, was in process of improvement for 90 years by the German Government.

So I simply wish to make the point that the United States is not alone in this matter of piecemeal and long-drawn-out appropriations.

I agree with the Senator that something should be done on this line, that better and more expeditious methods should be adopted.

Mr. KENYON. I am obliged for the suggestion of the Senator. I have not seen his figures.

Mr. SHEPPARD. These figures are taken from an official report by a British commission which made an investigation of the German and French rivers a few years ago.

Mr. KENYON. I do not question the figures at all, but I have labored under the thought, perhaps mistakenly, that the German Government and the French Government made their investigation of the projects before anything was done and then appropriated sufficient to carry through the project.

Now they may have appropriations that run a long term of years, but if that is the fact then my information is not correct.

I wish to leave the question of a dribbling policy and take up a few instances of the waste and extravagance. We have expended in the last 40 years on rivers and harbors approximately—I have not the exact figures—$850,000,000. Of course a great deal of that money has been properly expended, and just as surely has a considerable portion of that money been absolutely wasted.

I do not know how far we are ready to go, Mr. President, in building canals and deepening rivers in order to regulate railroad rates. That is a very vital question.

I had some years ago a good deal of experience in studying the proposition of railroad rates, as I was counsel for a railroad company and wanted to get at the philosophy, if I could, of railroad rates. We have the Interstate Commerce Commission with power, and if it has not sufficient power we should give it sufficient power, it seems to me, to regulate that question, because if we have spent a large part of this money merely to regulate railroad rates we confess our incompetency to handle that question. I am not ready to concede that we can not by law regulate railroad rates and compel the railroad not to charge discriminatory or excessive rates. To admit that we must carry on these great canalization enterprises merely to regulate railroad rates is to admit that they are so powerful and enjoy such a monopoly in this country that they are more powerful than Congress.

We have spent on the Mississippi River $150,000,000, with a constantly decreasing traffic. One of the Army engineers at one time took the position that we could afford to spend money on rivers if there was absolutely no navigation on the river because it would regulate railroad rates, and a good many people have that idea. Perhaps they are right, but we could, if we wanted to regulate rates, take the money we have spent on the Mississippi River and build a railroad from New Orleans on both sides of river and regulate railroad rates in that way, if that is the proper way to do it.

If the canalization work cost more than the construction of the railroad—it does not in every case—if it does, however, in a given instance, is it not folly to spend more money canalizing the rivers than it would to build the railroads and in that way hold railroads to reasonable rates? But I refuse to acknowledge that Congress has not the power, the ability, the efficiency, to grapple with the railroad problem as it affects rates.

The Big Sandy River is a sample of some of our extravagance.

The Hennepin Canal is another. We have spent on the Hennepin Canal $7,597,781. There are 33 locks. In 1914 there were 5,868 tons of grain carried. I can remember when I was a boy the people of my State were told that the Hennepin Canal was going to save the farmers of Iowa $20,000,000 a year in freight rates. I was attending college in the district, and there were great congratulations from the towns about Hennepin Murphy getting the Hennepin Canal for the farmers of Iowa. The commercial tonnage on that canal as I remember it for the year 1914 was about 12,000 tons. If we take the money that it cost, the interest on it, and the cost of maintenance, it has been figured out that every ton of commercial freight that went through that canal in the year 1913 or 1914 cost the Government $36.75, or the Government would have been ahead, as some one stated concerning the tonnage of the Muscle Shoals Canal, if it could have bought the freight and burned it up.

Did the Hennepin Canal regulate railroad rates? There may have been some effect here and there upon railroads; I am not prepared to say there was not, but it was trivial if at all. At an expenditure of nearly $8,000,000 there were 12,222 tons of commercial freight.

On the Big Sandy it was claimed a dozen years ago when that project was established that by the canalization process in that river a million or more tons of coal a year would be floated down the river. We have spent on the Big Sandy River $1,626,125 and in 1913 12 tons of coal were floated 20 miles on that river, and that coal was for Government use. If that expenditure is figured out it will be discovered that it cost the Government about $350 per ton for that year. That is not in this bill. I do not want to make any mistake about that. We have stopped apparently appropriating for that, and I hope so.

Mr. President, such projects have been going on in this country. It is said there is no politics in this, but of course they are charged up to the Republicans. They were in power at the time. So our mouths are supposed to be closed from

arguing against a system of appropriating that can bring about such criminal waste as that. If a thing is wrong, why not stop it? This is wrong.

Some of the notions that get into people's minds about appropriations are pretty well illustrated by the facts surrounding the Crystal River in Florida. There was a booster proposition. It was in one of the preceding bills. Crystal River City, a beautiful little city, was interested in having an appropriation, and naturally so. They had a committee and a board to importune Congress. Here were some of their reasons and it illustrates the vice of the whole system. In this communication, which is made part of a public document in the hearings of the Crystal River, they say:

Our people are alive to their interests, and mean to forge onward. They mean to have deep water. If 100 by 6 feet will not answer the purpose, they propose to have sufficient dimensions.

You will recall that Capt. Spalding, on his visit here with you, without reserve favored the project. We feel that when Capt. Slattery goes over the route with you, as he indicates his willingness to do, he will also favor the scheme. We will at least try to not let him regret having come among us.

Kind Providence has endowed us with almost inexhaustible beds of phosphate, timber, valuable hard rock, sea food, fertile lands, beautiful waters, and landscape scenery—every natural advantage except a sufficient channel. We can not get on the pension list nor profit by the public buildings appropriation.

Mr. President, that is a most candid, frank statement from good people who seem to think that they are entitled to some*thing out of the* public Treasury.

The Sabine River is a proposition that has received some consideration by the engineers, and while I do not have the record of Sabine River apparently before me at this time, there the engineers' report shows that they actually recommended selling the logs out of the river which they said they could sell for sufficient to do the work of making the river navigable. I shall refer to that later.

Mr. President, we are always admonished that we must not question what the Army engineers do or what they say. It seems to be a rule that does not work both ways. The Army engineers have made as to certain projects certain recommendations. The district or division engineer has decided against certain propositions. Then Members of Congress have appeared before them—in one instance, I think 11 Members of Congress—and argued out the propositions until they reversed their judgment upon it. There is not any use of saying that Army engineers, being human, are not influenced by arguments presented by Members of Congress. It would take a very strong character to resist the ordinary arguments of Members of Congress. They are surrounded with such an atmosphere that they would like to do what they think Congress wants done. So we read hearing after hearing on these projects before the Army engineers where Members of Congress appear and argue the proposition. I am not prepared to say that that is an improper thing at all, but I refer to it as one of the things that does to some extent either consciously or unconsciously influence Army engineers.

There ought to be some board of review of this whole question. Army engineers may well be questioned as to their judgment even by those who have no scientific knowledge, when they recommend some appropriations that they have as to this bill and other bills that have gone before it.

They have noted these wild schemes. They have thought they were approved by the country. They wanted to execute the designs of Congress. They have been flooded with speeches and letters of Senators and Representatives, and why should they not believe that they are there to carry out these ideas? The Army engineers distributed last year over $5,000,000 for I think 10 projects where a resurvey had been ordered by Congress. While that resurvey possibly was not a condemnation of the project it would have seemed that when Congress believed that one of those projects should be resurveyed it at least should have curbed the enthusiasm of the Army engineer until that resurvey was made.

The dredging contracts of the Beaufort Canal carrying 80 per cent profit are approved by the Army engineers, and I have here somewhere a copy of a letter in which they take the position that those contracts are not disadvantageous to the Government, although the testimony of Col. Taylor before the House committee showed that the Government did the work itself for less than one-half what the private contracts were as to that particular piece of work.

We place these Army engineers in positions of trust, and then unconsciously perhaps seek to break down that barrier. They can not be independent. Political pressure on the Army engineers ought to cease. That is one of the things that has broken down this system.

Concerning this limitation in dredging contracts I have a part of Col. Black's letter now to Chairman Sparkman. He said:

At the present time it is believed that the contracts are let at prices which are as low as will permit the contractors to maintain their plants and make any profit whatever.

Col. Black is the man who overruled Col. Deakyne on the Missouri River proposition.

The Trinity River was thoroughly exposed and condemned in both Houses of Congress. The Army engineers on October 8, 1914, gave $203,000 to the Trinity River. March 2, 1915, Congress demanded a resurvey. April 1, 1915, the Board of Engineers gave $35,000 more to the Trinity, and further surveys were ordered by Congress. They did not wait to apportion any large sums of money at their disposal.

I want to refer for just a moment to the interesting Sabine River and the recommendation of the board there and what they said about this river on page 3 of the Army engineers report.

The channel is greatly obstructed by drift, snags, etc., the principal source of supply being saw logs, which become water-logged and sink. Caving banks, however, add drift and trees to the obstructions. The channel is a series of pools and shoals, the latter varying from a few inches in depth to a few feet.

The river is so full of logs that objection was made even to taking out the logs, because the water would then flow out of the river. That is one of the propositions on which we have been spending money all these years.

I have referred to Sandy Bay Harbor in passing; and will not take up any more time with that.

The Muscle Shoals Canal was a project which was adopted in 1868. We have expended some $3,191,726.50 on it. In the year 1912, as shown by the engineer's report, the freight carried through the canal was 5,520 tons. That had increased in the year 1914 to 8,585 tons. It has been figured by experts that the cost to the Government of the freight through that canal was $41.76 per ton for the year 1912.

The Colbert Shoals Canal is a canal on which the Government, I think, has expended over a million dollars. I am not certain as to the amount, and may be wrong as to that; but anyway a very substantial sum of money has been expended upon it. In 1912 the tonnage transported through that canal was 31,943 tons. Of that, lumber constituted 30,518 tons; so the commercial tonnage was almost nothing. Eighty-one tons of cotton were transported; live stock 1, of an estimated value of $135.

So with many instances that might be cited of large expenditures of money and absolutely ridiculous commercial tonnage on the stream or through the canal.

The Ohio and Monongahela Rivers have proven more of a success commercially. The Monongahela has had a very large commerce; and while we have expended $150,000,000 on the Mississippi, and it has lost 90 per cent of its commerce and the Missouri River has become practically deserted, after an expenditure of nearly $20,000,000, the Ohio River has had some commerce after an expenditure of nearly $50,000,000, and with some 53 million to 60 million dollars yet to be spent.

The Tennessee River, as the records of the engineers and the analysis of the freight will show, has lost most of its river trade of 50 years ago, although something like $11,000,000 has been appropriated for locks and dams.

So we can go on in the years to come and spend another $850,000,000, and secure nothing more than we have secured, unless some different plan is adopted.

I ask, Mr. President, the privilege of inserting in the RECORD excerpts from the veto message of the river and harbor bill by President Jackson, the veto of the river and harbor bill by President Cleveland, the veto of President Arthur, and the statement of President Taft, who signed the river and harbor bill of 1910, after making some observations regarding it.

The PRESIDING OFFICER. Without objection, permission to do so is granted.

The matter referred to is as follows:

[From President Jackson's veto message.]

After the extinction of the public debt it is not probable that any adjustment of the tariff upon principles satisfactory to the people of the Union will until a remote period, if ever, leave the Government without a considerable surplus in the Treasury beyond what may be required for its current service. As, then, the period approaches when the application of the revenue to the payment of the debt will cease, the disposition of the surplus will present a subject for the serious deliberation of Congress; and it may be fortunate for the country that it is yet to be decided.

Considered in connection with the difficulties which have heretofore attended appropriations for purposes of internal improvement, and with those which this experience tells us will certainly arise whenever power over such subjects may be exercised by the General Govern-

ment, it is hoped that it may lead to the adoption of some plan which will reconcile the diversified interests of the States and strengthen the bonds which unite them. Every member of the Union, in peace and in war, will be benefited by the improvement of inland navigation and the construction of highways in the several States. Let us, then, endeavor to attain this benefit in a mode which will be satisfactory to all. That hitherto adopted has by many of our fellow citizens been deprecated as an infraction of the Constitution, while by others it has been viewed as inexpedient. All feel that it has been employed at the expense of harmony in the legislative councils.

* * * * * * *

The bill before me does not call for a more definite opinion upon the particular circumstances which will warrant appropriations of money by Congress to aid works of internal improvement, for although the extension of the power to apply money beyond that of carrying into effect the object for which it is appropriated has, as we have seen, been long claimed and exercised by the Federal Government, yet such grants have always been professedly under the control of the general principle that the works which might be thus aided should be "of a general, not local; National, not State" character. A disregard of this distinction would of necessity lead to the subversion of the Federal system. That even this is an unsafe one, arbitrary in its nature, and liable consequently to great abuses is too obvious to require the confirmation of experience. It is, however, sufficiently definite and imperative to my mind to forbid my approbation of any bill having the character of the one under consideration. I have given to its provisions all the reflection demanded by a just regard for the interests of those of our fellow citizens who have desired its passage and by the respect which is due to a coordinate branch of the Government, but I am not able to view it in any other light than as a measure of purely local character; or, if it can be considered national, that no further distinction between the appropriate duties of the General and State Governments need be attempted, for there can be no local interest that may not with equal propriety be denominated national. It has no connection with any established system of improvements, is exclusively within the limits of a State, starting at a point on the Ohio River and running out 60 miles to an interior town, and even, as far as the State is interested, conferring partial instead of general advantages.

* * * * * * *

From the official communication submitted to you it appears that, if no adverse and unforeseen contingency happens in our foreign relation and no unusual diversion be made of the funds set apart for the payment of the national debt, we may look with confidence to its entire extinguishment in the short period of four years. The extent to which this pleasing anticipation is dependent upon the policy which may be pursued in relation to measures of the character of the one now under consideration must be obvious to all, and equally so that the events of the present session are well calculated to awaken public solicitude upon the subject. By the statement from the Treasury Department and those from the clerks of the Senate and House of Representatives herewith submitted it appears that the bills which have passed into laws and those which in all probability will pass before the adjournment of Congress anticipate appropriations which, with the ordinary expenditures for the support of the Government, will exceed considerably the amount in the Treasury for the year 1830. Thus, whilst we are diminishing the revenue by a reduction of the duties on tea, coffee, and cocoa the appropriations for internal improvement are increasing beyond the available means of the Treasury. And if to this calculation be added the amounts contained in bills which are pending before the two Houses, it may be safely affirmed that $10,000,000 would not make up the excess over the Treasury receipts unless the payment of the national debt be postponed and the means now pledged to that object applied to those enumerated in these bills. Without a well-regulated system of internal improvement this exhausting mode of appropriation is not likely to be avoided, and the plain consequence must be either a continuance of the national debt or a resort to additional taxes.

* * * * * * *

Through the favor of an overruling and indulgent Providence our country is blessed with general prosperity and our citizens exempted from the pressure of taxation, which other less-favored portions of the human family are obliged to bear; yet it is true that many of the taxes collected from our citizens through the medium of imposts have for a considerable period been onerous. In many particulars these taxes have borne severely upon the laboring and less prosperous classes of the community, being imposed on the necessaries of life, and this, too, in cases where the burden was not relieved by the consciousness that it would ultimately contribute to make us independent of foreign nations for articles of prime necessity by the encouragement of their growth and manufacture at home. They have been cheerfully borne because they were thought to be necessary to the support of government and the payment of the debts unavoidably incurred in the acquisition and maintenance of our national rights and liberties. But have we a right to calculate on the same cheerful acquiescence when it is known that the necessity for their continuance would cease were it not for irregular, improvident, and unequal appropriations of the public funds? Will not the people demand, as they have a right to do, such a prudent system of expenditure as will pay the debts of the Union and authorize the reduction of every tax to as low a point as the wise observance of the necessity to protect that portion of our manufactures and labor whose prosperity is essential to our national safety and independence will allow?

* * * * * * *

What a salutary influence would not such an exhibition exercise upon the cause of liberal principles and free government throughout the world: Would we not ourselves find in its effect an additional guaranty that our political institutions will be transmitted to the most remote posterity without decay? A course of policy destined to witness events like these can not be benefited by a legislation which tolerates a scramble for appropriations that have no relation to any general system of improvement and whose good effects must of necessity be very limited. In the best view of these appropriations, the abuses to which they lead far exceed the good which they are capable of promoting. They may be resorted to as artful expedients to shift upon the Government the losses of unsuccessful private speculation, and thus by ministering to personal ambition and self-aggrandizement, tend to sap the foundations of public virtue and taint the administration of the Government with a demoralizing influence.

* * * * * * *

I will not detain you with professions of zeal in the cause of internal improvements. If to be their friend is a virtue which deserves commendation, our country is blessed with an abundance of it, for I do not suppose there is an intelligent citizen who does not wish to see them flourish. But though all are their friends, but few, I trust, are unmindful of the means by which they should be promoted; none certainly are so degenerate as to desire their success at the cost of that sacred instrument with the preservation of which is indissolubly bound our country's hopes.

[From President Cleveland's veto message.]

A more startling feature of this bill is its authorization of contracts for river and harbor work amounting to more than $62,000,000. Though the payments on these contracts are, in most cases, so distributed that they are to be met by future appropriations, more than $3,000,000 on their account are included in the direct appropriations above mentioned. Of the remainder, nearly $20,000,000 will fall due during the fiscal year ending June 30, 1898, and amounts somewhat less in the years immediately succeeding. A few contracts of a like character authorized under previous statutes are still outstanding, and to meet payments on these more than $4,000,000 must be appropriated in the immediate future.

If, therefore, this bill becomes a law, the obligations which will be imposed on the Government, together with the appropriations made for immediate expenditure on account of rivers and harbors, will amount to about $80,000,000. Nor is this all. The bill directs numerous surveys and examinations which contemplate new work and further contracts, and which portend largely increased expenditures and obligations.

There is no ground to hope that in the face of persistent and growing demands the aggregate of appropriations for the smaller schemes not covered by contracts will be reduced or even remain stationary. For the fiscal year ending June 30, 1898, such appropriations, together with the installments on contracts which will fall due in that year, can hardly be less than $30,000,000; and it may reasonably be apprehended that the prevalent tendency toward increased expenditures of this sort and the concealment which postponed payments afford for extravagance will increase the burdens chargeable to this account in succeeding years.

In view of the obligations imposed upon me by the Constitution, it seems to me quite clear that I only discharge a duty to our people when I interpose my disapproval of the legislation proposed.

Many of the objects for which it appropriates public money are not related to the public welfare, and many of them are palpably for the benefit of limited localities or in aid of individual interests.

On the face of the bill it appears that not a few of these alleged improvements have been so improvidently planned and prosecuted that after an unwise expenditure of millions of dollars new experiments for their accomplishment have been entered upon.

While those intrusted with the management of public funds in the interest of all the people can hardly justify questionable expenditures for public work by pleading the opinions of engineers or others as to the practicability of such work, it appears that some of the projects for which appropriations are proposed in this bill have been entered upon without the approval or against the objections of the examining engineers.

I learn from official sources that there are appropriations contained in the bill to pay for work which private parties have actually agreed with the Government to do in consideration of their occupancy of public property.

Whatever items of doubtful propriety may have escaped observation or may have been tolerated in previous Executive approvals of similar bills I am convinced that the bill now under consideration opens the way to insidious and increasing abuses, and is in itself so extravagant as to be especially unsuited to these times of depressed business and resulting disappointment in Government revenue.

This consideration is emphasized by the prospect that the public Treasury will be confronted with other appropriations made at the present session of Congress amounting to more than $500,000,000.

Individual economy and careful expenditure are sterling virtues which lead to thrift and comfort. Economy and the exaction of clear justification for the appropriation of public moneys by the servants of the people are not only virtues, but solemn obligations.

To the extent that the appropriations contained in this bill are instigated by private interests and promote local or individual projects their allowance can not fail to stimulate a vicious paternalism and encourage a sentiment among our people, already too prevalent, that their attachment to our Government may properly rest upon the hope and expectation of direct and especial favors, and that the extent to which they are realized may furnish an estimate of the value of governmental care.

I believe no greater danger confronts us as a Nation than the unhappy decadence among our people of genuine and trustworthy love and affection for our Government as the embodiment of the highest and best aspirations of humanity, and not as the giver of gifts, and because its mission is the enforcement of exact justice and equality, and not the allowance of unfair favoritism.

I hope I may be permitted to suggest, at a time when the issue of Government bonds to maintain the credit and financial standing of the country is a subject of criticism, that the contracts provided for in this bill would create obligations of the United States amounting to $62,000,000 no less binding than its bonds for that sum.

[President Arthur's veto message.]

EXECUTIVE MANSION, *August 1, 1882.*

*To the House of Representatives:*

Having watched with much interest the progress of House bill No. 6242, entitled "An act making appropriations for the construction, repair, and preservation of certain works on rivers and harbors, and for other purposes," and having since it was received carefully examined it, after mature consideration, I am constrained to return it herewith to the House of Representatives, in which it originated, without my signature and with my objections to its passage.

Many of the appropriations in the bill are clearly for the general welfare and most beneficent in their character. Two of the objects for which provision is made were by me considered so important that I felt it my duty to direct to them the attention of Congress. In my annual message in December last I urged the vital importance of legislation for the reclamation of the marshes and for the establishment of the harbor lines along the Potomac front. In April last, by special message, I recommended an appropriation for the improvement of the Mississippi River. It is not necessary that I say that when my signature would make the bill appropriating for these and other valuable national objects a law it is with great reluctance and only under a sense of duty that I withhold it.

My principal objection to the bill is that it contains appropriations for purposes not for the common defense or general welfare and which do not promote commerce among the States. These provisions, on the

contrary, are entirely for the benefit of the particular localities in which it is proposed to make the improvements. I regard such appropriation of the public money as beyond the powers given by the Constitution to Congress and the President.

I feel the more bound to withhold my signature from the bill because of the peculiar evils which manifestly result from this infraction of the Constitution. Appropriations of this nature, to be devoted purely to local objects, tend to an increase in number and in amount. As the citizens of one State find that money, to raise which they in common with the whole country are taxed, is to be expended for local improvements in another State, they demand similar benefits for themselves, and it is not unnatural that they should seek to indemnify themselves for such use of the public funds by securing appropriations for similar improvements in their own neighborhood. Thus as the bill becomes more objectionable it secures more support. This result is invariable and necessarily follows a neglect to observe the constitutional limitations imposed upon the lawmaking power.

The appropriations for river and harbor improvements have, under the influences to which I have alluded, increased year by year out of proportion to the progress of the country, great as that has been. In 1870 the aggregate appropriation was $3,975,900; in 1875, $6,648,517.50; in 1880, $8,976,500; and in 1881, $11,451,000; while by the present act there is appropriated $18,743,875.

While feeling every disposition to leave to the legislature the responsibility of determining what amount should be appropriated for the purposes of the bill, so long as the appropriations are confined to objects indicated by the grant of power, I can not escape the conclusion that, as a part of the lawmaking power of the Government, the duty devolves upon me to withhold my signature from a bill containing appropriations which, in my opinion, greatly exceed in amount the needs of the country for the present fiscal year. It being the usage to provide money for these purposes by annual appropriation bills, the President is, in effect, directed to expend so large an amount of money within so brief a period that the expenditure can not be made economically and advantageously.

The extravagant expenditure of public money is an evil not to be measured by the value of that money to the people who are taxed for it. They sustain a greater injury in the demoralizing effect produced upon those who are intrusted with official duty through all the ramifications of government.

These objections could be removed and every constitutional purpose readily attained should Congress enact that one-half only of the aggregate amount provided for in the bill be appropriated for expenditure during the fiscal year, and that the sum so appropriated be expended only for such objects named in the bill as the Secretary of War, under the direction of the President, shall determine; provided, that in no case shall the expenditure for any one purpose exceed the sum now designated by the bill for that purpose.

I feel authorized to make this suggestion because of the duty imposed upon the President by the Constitution "to recommend to the consideration of Congress such measures as he shall judge necessary and expedient," and because it is my earnest desire that the public works which are in progress shall suffer no injury. Congress will also convene again in four months, when this whole subject will be open for their consideration.

CHESTER A. ARTHUR.

[From President Taft's memorandum on signing the river and harbor bill of 1910.]

The chief defect in the bill is the large number of projects appropriated for and the uneconomical method of carrying on these projects by the appropriation of sums small in comparison to the amounts required to effect completion.

The figures convincingly establish the fact that this bill makes inadequate provision for too many projects.

The total of the bill, $52,000,000, is not unduly large, but the policy of small appropriations with a great many different enterprises without provision for their completion is unwise. It tends to waste, because thus constructed the projects are likely to cost more than if they were left to contractors who were authorized to complete the whole work within a reasonably short time. The appropriation of a small sum lessens the sense of responsibility of those who are to adopt the project and who do not therefore give to their decision the care that they would give if the appropriation or contact involved the full amount needed for completion. Moreover, the appropriation of a comparatively small sum for a doubtful enterprise is thereafter used by its advocates to force further provision for it from Congress on the ground that the investment made is a conclusive recognition of the wisdom of the project, and its continuance becomes a necessity to save the money already spent. This has been called a "piecemeal" policy. It is proposed to remedy this defect by an annual river and harbor bill, but that hardly avoids the objections above cited, for such yearly appropriations are apt to be affected by the state of the Treasury and political exigency.

If enterprises are to be useful as encouraging means of transportation they ought to be finished within a reasonable time. The delays in completing them postpone their usefulness and increase their cost. The proper policy, it seems to me, is to determine from the many projects proposed and recommended what are the most important, and then to proceed to complete them with due dispatch, and then to take up others and do the same thing with them.

It is now three years since a river and harbor bill was passed. The projects under way are in urgent need of further appropriation for maintenance and continuance, and there is great and justified pressure for many of the new projects provided for by the bill. It has been made clear to me that the failure of the bill thus late in the session would seriously embarrass the constructing engineers. I do not think, therefore, the defects of the bill which I have pointed out will justify the postponement of all this important work; but I do think that in the preparation of the proposed future yearly bills Congress should adopt the reforms above suggested, and that a failure to do so would justify withholding Executive approval, even though a river and harbor bill fail.

Mr. KENYON. Mr. President, I did not, in speaking of the Big Sandy a few moments ago, have the figures which I desired to place in the RECORD in reference to that river. I will now state that we have expended $1,700,000 in the construction of five locks and dams; the cost of maintenance has been $260,000; the total tonnage in 1912, excluding railroad ties, timber, and telegraph and telephone poles, was 500 tons. It has been estimated by experts that, after deducting the floatable timber which would float without the locks and dams, it costs the Government $100,000 annually to float 277 tons of commerce 33 miles, an average of $350 a ton per mile, or $11 per ton-mile. If any Senator can justify that kind of an expenditure of public money, I will yield the floor while he does it.

I think I shall put into the RECORD the accurate figures as to the Hennepin Canal. I gave them from my recollection previously. The total cost of construction to June 30, 1913, of the Hennepin Canal was $7,576,496.56; operation and care to June 30, 1913, was $1,166,851.39; or a total of $8,743,347.25. In 1913 there were 11,962 tons of commercial freight transported through the canal. The tonnage was about 35 per cent less than that of the previous year, the shrinkage being due to the smaller quantities of rock, earth, and gravel carried by Government boats.

There have been influences at work to secure large appropriations for rivers and harbors besides those I have enumerated. The Dredgers' Association has been somewhat busy. The Atlantic and Gulf Coast Dredge Owners' Association had some proceedings some years ago, in which they made certain assessments upon their members, according to their records, for the entertainment of prominent and influential people at banquets. While Members of Congress are not to blame for being included in the records as among those whom they desired to entertain, that association had the exceeding nerve to state in their records that this amount which was levied should be cheerfully paid for the purpose of entertaining influential people, including Members of Congress. So the Dredgers' Associations, with their contracts, as has been shown—or as I have tried to show, and as Colonel Taylor showed before the House committee—for double the amount, and more in some instances than it cost the Government, have felt that they could influence river and harbor appropriations.

We hear a good deal about the railroads being opposed to river and harbor appropriations. I have had it insinuated to me that, because at one time I had been counsel for a railroad company, I had become prejudiced as to waterways. Well, of course, any one having that opinion is entitled to keep it; but it is interesting to note that the railroads have contributed to the Mississippi Levee Association. I have said before that I believe it has been true that the railroads have tried in the past to injure water transportation, just as they have tried to injure anything or anybody who stood in their way; but evidently that has not been a serious thing with them in the last few years, because they have contributed to this association, of which Mr. Fox was secretary and manager; and those contributions were set forth in the New Orleans Item of October 21, 1913, a very influential and truthful paper. Those contributions were as follows: The Southern Railway Co., $1,000; the Mobile & Ohio, $1,000; the 'Frisco, $1,000; the Missouri Pacific, $1,000; the Chicago, Rock Island & Pacific, $1,000; the St. Louis & Southwestern, $1,000; the Illinois Central, $1,000; the Yazoo & Mississippi Valley, $1,000; the International Harvester Co., $1,000. That is not a railroad, of course. So the railroads at that time did not seem to fear water transportation.

We have had a good many waterway conventions and pamphlets and papers. These conventions have met at New Orleans; they have met at Washington. They have borne the following names: "Lakes to Gulf," "Upper Mississippi Improvement Convention," "Interstate Waterway Trans-Mississippi Irrigation Congress," "Celebration of the Opening of the Hennepin Canal"—that should have been a great celebration—"Atlantic Deeper Waterway Conference," "Drainage Congress." Some of these associations, I think, have consisted largely of letterheads. The "Seaboard Waterway Convention" in 1909 was probably the crowning effort. President Taft floated down the Mississippi River at that time—which is sufficient indication that there was then ample water in the river [laughter]—and Gov. Ansell, of South Carolina, wired the convention:

We want water, more water, and deeper water.

Resolutions were drawn up at that convention demanding certain things of Congress, pledging that they would support no candidate for Congress who would not unqualifiedly indorse and maintain their policies.

We have had other commissions visiting Europe, one in 1909. President Taft in 1911 in his message to Congress expressed himself as favorable to the Lakes-to-Gulf project, a project that the booster clubs and commercial clubs have been advocating for years. I do not know much about it; it may be a perfectly good project, but all these things combine to add a certain force and impetus to the movement, not a movement to regulate the water question on any scientific basis, but merely, as a general thing, to get something for local interests and local conditions.

Robert Toombs once said that it had become a national disgrace for Congress to engage in a miserable scramble for a slice from the Public Treasury. The distinguished Senator from South Carolina [Mr. TILLMAN] once stated on this floor something I would not want to say, but he said it and, as I remember his language, it was that—

> The Mississippi itself has quit having any steamboats on it almost, and the whole scheme of river improvement is a humbug and a steal, but if you are going to steal, let us divide it out, and do not go to complaining.

I would not like to believe, and I do not believe, that that represents the sentiment of Congress. It may be the spirit of some people in this country who continually hammer their Congressmen to get more, but the time will come, I believe, when the people of this country are going to insist that their Senators and Representatives shall stand for the proposition that this Government shall be conducted as a great business, and that a public dollar shall be appropriated and spent with the same care and honesty and fidelity as a private dollar. When that day comes, it will be possible to cut down some of these useless expenditures; but, Mr. President, in the meantime what will be the outcome if this waste and extravagance is to go on and appropriations are to continue piling up and piling up, not only in this bill, but in every other bill, and local influences are permitted to intrude into Army bills and Navy bills?

The creation of Army posts has been urged all over this country. There is one in my State, for which there is no more justification, in my opinion, than there is for any of the others. I do not mean by that that they should all be abolished, but from the list of Army posts in this country sent to Congress in response to a resolution adopted, while I do not remember the figures, it seems to me that that document showed we had spent over a hundred million dollars on Army posts. Do you tell me that those Army posts were in every case located for the benefit of the people of this country? Did they not rather result from some system operating on the principle of "You give me an Army post and you can have a navy yard," or something of that kind? When I was a member of the Committee on Military Affairs, I remember having seen the committee start in to ask the Secretary of War about these Army posts, and he would laugh; and while I am not at liberty to say what he may have said privately—I do not mean the present Secretary of War—he knew that he could not change the system; he knew that when you started to take an Army post away from a man he would say, "That is my Army post," just as I have heard it said in the Commerce Committee, "This is Senator So and So's river, and Congressman So and So's creek, and somebody else's harbor."

The same thing is true of navy yards. I imagine there are navy yards in this country where you could not find enough water to float any kind of a battleship. That is the trouble with the whole thing. It enters into this bill and every other appropriation bill.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from California?

Mr. KENYON. I do.

Mr. WORKS. The Senator has expressed the belief that the people of this country will demand that the affairs of government shall be managed with integrity and honesty and economically. I hope the Senator is right about that; but what evidence has the Senator just now of any change of sentiment on the part of the people in that respect? I have been impressed with the idea all along that the foundation of this evil is with the people themselves; that they are demanding from their Senators and Representatives just such things as the Senator is commenting upon, and that they measure their usefulness as servants of the people by what they can get for their people at home. If we could so educate the public mind as to condemn that sort of thing instead of insisting upon it, we might reach results.

Mr. KENYON. Well, I will ask the Senator what are we going to do? Sit still and do nothing or say nothing because of the sneers that are leveled at anybody who attempts to say anything about it?

Mr. WORKS. Not by any means; but I think the thing that will have to be done will be to educate the people up to a better sense of things; and until you do that, you are going to have just this sort of service from Senators and Members of the other House. I am not criticizing the attitude the Senator has taken in this matter—not by any means; I sympathize with him entirely.

Mr. KENYON. I have no objection at all to the Senator criticizing me.

Mr. WORKS. We must get at the root of this evil if we are going to accomplish anything, and I think the root, the bottom of it, is the sentiment that exists on the part of the people themselves that brings about this sort of legislation.

Mr. KENYON. Take a little thing. We have in the Senate twice stricken from the agricultural appropriation bill the free-seed provision, but it has been put back in conference. The free-seed proposition, I understand, costs this Government something like $250,000 a year. Of course, that is not a great amount of money in the running of a government. I do not know that the Senator can remember such an incident, but I can remember when we used to get a package of those seeds when I was a boy, with the name of a Senator or a Representative in the corner. That was really a great event in our home. We had a feeling that we were highly honored by the Member of Congress. I used to plant the seeds, but never had such a high regard for the Congressman after they grew. [Laughter.] However, that little thing, the sending out of free seeds, which are nothing but political seeds, is an illustration of the manner in which the system works. It is not fair to the man outside who is running against the man inside, and the sending of seeds ought to be listed as a political campaign expenditure, and ought not to be put upon the Government.

Mr. WORKS. Mr. President, that is precisely what I am talking about. The Senator and his family wanted the seeds; they thought it was a nice thing to get them. The Member of the House of Representatives perhaps argued from that that probably he would get votes from the family which prized the receipt of the seeds. I have been opposed to the free distribution of seeds; I myself think it is an unmitigated fraud; and whenever I have had an opportunity I have voted against it; but the reason why it is retained is just as I have mentioned, that the people themselves want to get from the Government those things and everything else they can. Of course there are honorable exceptions to that rule. There are a great many people who protest against the receipt of seeds when they get them. They appreciate the fact that the seeds ought not to be sent out, but I am talking about the general idea upon that subject as evidenced by the desire upon the part of the people to get anything they can out of the National Treasury.

Mr. KENYON. To get something for nothing.

Mr. WORKS. Yes.

Mr. KENYON. But I am glad to learn that a good many people who are getting the seeds are sending them back; and when the people begin to do that it will be found that we will not hear all these tearful stories on the floor about the poor fellows upon the mountain side who want to have some of these seeds in order to grow vegetables and flowers.

Mr. MARTINE of New Jersey. Mr. President, will the Senator allow me to interrupt him?

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from New Jersey?

Mr. KENYON. Certainly.

Mr. MARTINE of New Jersey. I voted for the free-seed provision, and I have no regrets for doing so. I do not believe that the animating motive of all those who desire seeds is simply to obtain them because they can get something for nothing. There are very many men who are prompted by as lofty motives as is the Senator from Iowa—and they are very high motives, indeed, and I say that most earnestly—or as is any other Member of this body. They feel that, in asking for seeds from the Government, they are getting something novel and at the same time something better than they would get at a seedsman's store. It may be that the Government seeds are not any better than his, but, in the main, they are very good seeds, and infinitely good results have accrued to the people from the dissemination and distribution of the seeds. I am well satisfied of that. I believe that the Government can not go very much astray in the matter of the distribution of seeds or plants, whether they may be of the blooming variety or of the fruitful variety. I believe all those things accrue to the well-being of the country as much as does the dissemination of literature.

The Senator perhaps does not find much fault—I do not—with the dissemination of Government literature to our people. I believe many Government documents which are sent out are blessings, and the same thing may be said of the addresses which are being made here. They are of great value to the people.

There is another class to whom they do not quite so much appeal; but I believe the distribution of seeds should be continued to those who may desire them and who will take care of them, as many of them do, making brighter and prettier spots around their homes and blessing the community in the promotion of vegetation. I believe that by such means we are advancing the public good.

Mr. KENYON. I have had, I think, about 20 letters from my State protesting against the sending out of the Senator's speech aganist woman suffrage.

Mr. MARTINE of New Jersey. Well, I think probably they may have been absolutely justified in sending out those protests. I have not been directly the means of disseminating them. It is true that I did make some remarks against woman suffrage, and I have no regrets for that. I say to the Senator now that if I thought woman suffrage would advance the well-being of our country and elevate woman, God knows I would be the most radical advocate of it; but because of the fact that I believe these two results would not occur, I have opposed it.

I have no apology to make for what I said, though I did not send out the literature. Somebody else did.

Mr. KENYON. The women, perhaps, do not need elevating as much as the men. Woman suffrage may elevate the men. I do not want to get into any discussion of the woman-suffrage question, however.

Mr. MARTINE of New Jersey. Well, I will not argue it. God knows if there is any man in the world who has a warm place in his heart for woman, I am the individual. [Laughter.]

Mr. KENYON. Then the Senator had better let them vote. But I hope this appeal of the Senator for free seeds will be read by his constituents, and that they will write to him for the seeds, and that it may very materially aid in bringing about a result which I am anxious to see accomplished, namely, the re-election of the Senator, although I do not belong to his party; and if the seeds will do him any good, I will turn over a large part of my allotment to him.

Mr. MARTINE of New Jersey. That is very nice. I think I would like about a thousand packages at once. [Laughter.]

Mr. KENYON. This is one of the occasions when seeds ought to be used.

Mr. MARTINE of New Jersey. That may be the animus with a good many, but I will say that I have been as free from any such thought or purpose as any man could be. I am a candidate for reelection, and I am vain enough to believe that I am going to succeed, notwithstanding the Republican community in which I live. But I will say that I have been as free from any prompting or animus of that kind of self-laudation or of assisting in my reelection as the remotest thing in the world.

Mr. KENYON. And I am not enough of a partisan to want to see any harm come to the Senator.

Since we have disposed of woman suffrage and the seed question, I want to go back to the subject at issue. There is very little objection, I think, raised generally to the improvement of our harbors. They perform a wonderful service. Of course there are different standards to determine their importance. If we took the value of imports and exports, or receipts and shipments, that would be one standard that many would follow. Others would want to measure our harbors by the proportion between foreign and domestic trade. Others would want to rate our harbors by the net tonnage of boats entering and clearing, and others by the quantity of freight or the tonnage received and shipped. I think probably the latter would be the wise standard. Under this standard the harbors of relative importance are, of course, first, New York City; second, the Duluth-Superior Harbor; third, Philadelphia; fourth, Buffalo; fifth, Cleveland; sixth, Baltimore; and it seems to me that New Orleans and Galveston must be very close to those harbors. The vessels going to Galveston now can carry a draft of 30 feet into that harbor.

Those harbors ought to be improved; they ought to be kept up. There is not any doubt about that. We have certain rivers that connect cities of considerable size with the sea, tidal streams that enable ships of a draft of 15 feet or more to go from the sea to the cities. Those are very important. The Mississippi to New Orleans would be such a stream; the Deleware to Philadelphia, and the St. Johns to Jacksonville, and the James River to Richmond. These are all important rivers. I have not heard any complaints from people about rivers of that character, which are substantial and which amount to something.

There is a class of rivers affording passage for boats of smaller size and of less draft. The Connecticut River to Hartford, or the Kennebec River to Augusta, would come under that class of rivers. Little complaint is made about these rivers.

Then we have the rivers used for traffic between inland points. The Mississippi and the Ohio and the Hudson possibly are in a class by themselves. They have a very great and substantial commerce, national in its scope. No one is raising particular objection to those. I do think the plan of spending $63,000,000 on the Ohio River—without including terminals, which would run the matter up to $70,000,000, I should say—is a wise experiment. It is somewhat of a doubtful one; but if any experiment is to be tried, that is perhaps the best.

As to these harbors, in the harbor appropriations there ought to be some plan whereby, when the railroads own all the terminals, they will contribute to the improvement. The Commissioner of Corporations a few years ago made an investigation of the question of transportation by water in the United States. That is a most interesting document, consisting of three volumes; and it has been amazing to me, in a study of that document, to discover that in very nearly all of our harbors the railroads seem to own the entire shore. Mr. Herbert Knox Smith, the then Commissioner of Corporations, says, on the first page:

> Our harbor organization, as a rule, is faulty. A harbor has two prime features, "commercial" and "industrial." The commercial function deals chiefly with "through" freight, with the transshipment between rail and water lines (or between water lines) of freight not destined to or originating at the harbor itself. The industrial function, on the other hand, deals with local freight. It affords railway connection and wharf storage for local industries and distributing houses. It affects local interests far more deeply than the mere passage of through traffic. * * *
>
> * * * Private interests control nearly all of our active water frontage. Public control exists in considerable degree only at New Orleans, San Francisco, Baltimore, and New York, and is greatly modified at New York by exclusive private leases for long terms. Out of fifty of our foremost ports, only two, New Orleans and San Francisco, have practically complete public ownership and control of their active water frontage; elght have a small degree of control, and 40 none at all. Out of 37 ports for which data are available (excluding New Orleans and San Francisco), only 14 have any publicly owned wharves (about 260 such wharves in all, many practically controlled under long leases). Out of 25 ports with available data (excluding New Orleans and San Francisco), only 10 have wharves "open" to general traffic, with a total of only 49 such wharves, the majority insignificant and antiquated. Out of 46 such ports (excluding the same two cities), a majority of the active frontage is privately owned in 40, and in 6 a small amount is so owned. Out of the 50 foremost ports above mentioned, there are 21 in which railroad ownership and occupancy covers over 50 per cent of the active frontage, and 12 more between 25 and 50 per cent. It is our theory that the waterways are public highways. In fact, their essential terminals are largely under private control.

Mr. WORKS. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). Does the Senator from Iowa yield to the Senator from California?

Mr. KENYON. I do.

Mr. WORKS. I wish to ask whether the harbors are enumerated that are not under city or county or State control?

Mr. KENYON. I can not say that those are enumerated that are not. Those are enumerated that are.

Mr. WORKS. I do not know what he regards as the principal harbors of the country. I know that at Los Angeles and San Diego, both, the two cities have absolute control of their harbors.

Mr. KENYON. Yes; he speaks of that. Did the Senator say San Diego?

Mr. WORKS. Los Angeles and San Diego.

Mr. KENYON. He does not speak of Los Angeles, but he does speak of San Francisco. He says:

> Two ports only, New Orleans and San Francisco, are noteworthy for their high degree of public ownership, control, efficiency, and equipment. * * * At San Francisco there is an excellent system of wharves under State control, kept open for general traffic. The water terminal situation in these two cities is by far the best in the country.
>
> * * * * * * * * *
>
> At four of the most important Lake ports there is a total front of about 12 miles protected by breakwaters. On this entire 12 miles there are only about ten active wharves, nearly all under railroad control. Of this frontage, railroads own about 7 miles, other private parties about three, and the cities about two.

He says, further:

> Terminal charges are a considerable factor in water traffic, especially "dockage," a charge on the vessel, and "wharfage," a charge on the freight passing over the wharf. Particularly on the Mississippi system excessive landing charges have hindered traffic. * * * The Government's enormous expenditures on channels are in many cases largely neutralized by the action or nonaction of the local authorities on terminals. * * * Localtites should, as a rule, be required to furnish and keep open adequate terminals as a condition precedent to channel improvement by the Federal Government. It is their fair share of the work, and they alone can do it effectively.
>
> There are thus five salient facts: First, that terminals are as important as channels; second, that our harbors have not fully developed their terminal frontage, nor are they properly organized or controlled; third, that railroads largely control water terminals, often to the disadvantage of general water traffic; fourth, that there is almost no linking-up of the rail and general water systems at the water's edge, but rather the opposite tendency; fifth, that there is little cooperation by localities with the Federal Government which improves their channels.

Along the same line he sets forth, on page 3, some matters which I should like to put in the RECORD. I will read this part of it; I will not read it all:

> Private control of terminal facilities may seriously impair or practically destroy the real public character of the channel. For example, this part—

That is, this part of the report—

> shows that a surprisingly large proportion of the most available water frontage and terminals is controlled by railroads. It is only proper to add, however, that in order to serve the proper needs of transportation,

railroads must have the continued use of a certain amount of water terminals; also, that much of the railroad-owned water frontage is merely rights of way, and not in any sense active terminal property.

In New York he shows how, between ownership and long systems of leasing, the railroads practically control all of the frontage.

In Jersey City most of the frontage was originally granted in perpetuity to private parties many years ago, at very low rental rates. The city has only one "open" wharf.

In Boston there is some rail and water coordination, but—

It is represented mainly by the so-called Union Freight Railroad, controlled by the New York, New Haven & Hartford Railroad Co., connecting also with all the other railroad systems there, but running along only a small fraction of the water front. * * *

The ownership of the Boston water front is chiefly private, consisting of a large area of railroad holdings, about eight important wharf companies, and much industrial frontage. The city owns a few scattered and unimportant wharves, but most of its frontage is used for park, municipal, and ferry purposes. The State has an undeveloped tract, known as the "Commonwealth Flats," with large possibilities for terminal use. Most of the trans-Atlantic lines use railroad piers.

In Philadelphia—

A considerable proportion of the most active water front is controlled and occupied by railroads, to the extent that such commercial use for through traffic unduly hampers the proper local and industrial use. * * * The city owns less than 8 per cent of the developed Delaware frontage, and its holdings are mainly narrow and practically unavailable street ends.

The railroad holdings are very large. Of nearly seven miles of the most highly developed part of the Delaware River frontage, railroads own over 45 per cent and occupy still more. * * *

The attitude of the railroads as to their frontage holdings has been highly exclusive and adverse to general water traffic. Railroads, as a rule, refuse any use of their piers for freight not going over their particular lines and oppose independent lighterage. Thus, lighters can not come to a railroad pier to get freight for independent water or rail lines. The results are important, in view of the extensive railroad control of water terminals. * * *

The Philadelphia situation has long been one of almost complete absence of public control of the water terminals.

In Baltimore—

Of the entire harbor frontage, the city now owns 9 per cent, the railroads 17 per cent, and other private interests 74 per cent.

And so it goes on.

At Portland, Me., the water front is all private, about one-half of it owned by railroads. At Bangor the frontage is nine-tenths private, and much of it railroad holdings. * * * Most of the important New Haven frontage is railroad owned. * * * At Trenton, N. J., the city owns none of the frontage on tidewater. * * * Richmond, Va., is exceptional, in that none of its frontage is owned by railroads. The city owns about 11 per cent of the frontage. * * *

At Charleston, S. C., practically all the best frontage is controlled by the Charleston Terminal Co., which concern is controlled jointly by the Atlantic Coast Line and the Southern Railway. At Savannah, Ga., the frontage is mostly private, the best of it being owned by railroads. At Augusta, Ga., the city owns all of the Georgia frontage. Jacksonville, Fla., is an important port, and at present is considerably congested. The city owns only street ends, and there are important railroad terminals and holdings here.

And so the whole story goes on. At Mobile—

Railroads own a large part of the frontage.

At Galveston the city owns some stock in the Galveston Wharf Co., which owns considerable of the dockage space.

San Francisco is noteworthy, the report says:

By reason of its advanced policy of public ownership and control of the water front and its policy of public construction, maintenance, and regulation of the vast majority of the wharves; also because very few of the public wharves are under long leases, and most of the wharves are practically "open" or can be made "open" at need.

Both the commercial and the industrial functions are important, with a fair degree of harbor organization. * * * There is an unusually good equipment of modern wharves, built by the State Board of Harbor Commissioners, with considerable warehouse space and with some transshipping machinery.

I think the harbor of Los Angeles is not given.

At Tacoma—

The Northern Pacific Railway owns about 16,000 feet of the city water front.

At Portland, Oreg.—

The frontage is all privately owned, mainly by railroads.

In the case of the Great Lakes harbors——

Mr. WORKS. Mr. President, may I ask the Senator what is the date of that report?

Mr. KENYON. The date of the report is September 26, 1910.

Mr. WORKS. Since the making of that report, Los Angeles has acquired title to the harbor frontage, partly through litigation that has just been terminated in the Supreme Court of the United States.

Mr. KENYON. That is probably why the report does not cover it.

Mr. WORKS. That may be so. The difference between San Francisco and Los Angeles is that the San Francisco frontage is owned by the State, while in the case of Los Angeles it is owned by the city of Los Angeles, and is under the complete control of the city, and the city has constructed its own wharves; and the same condition exists in San Diego.

Mr. KENYON. What does the city do, I should like to ask the Senator, about toll at the wharves?

Mr. WORKS. They have a regular system of tolls, fixed by the city authorities.

Mr. KENYON. San Francisco is evidently rather advanced over the other harbors of the United States in that respect. The point I was trying to make was this, and I do not know whether it is sound or not: That where we are appropriating these large sums for harbors where the water front is practically all owned by railroads, there ought to be some plan of cooperation by which a portion of the sums necessary to improve these harbors shall be paid by the railroads.

Mr. WORKS. Does the Senator know that under the system that is now in force cities like Los Angeles, for instance, are compelled to pay one-half of the expense of improving the harbors?

Mr. KENYON. The cities pay one-half? I did not know that.

Mr. WORKS. Almost invariably, where an appropriation is made, it is required that the city shall contribute the same amount that is contributed by the Government. That has been true in some instances, I know—in Los Angeles and San Diego, both.

Mr. KENYON. There have been provisos in river and harbor bills, where certain appropriations are made, that certain local interests shall contribute the same amount. There is a benefit connected with that. Take the case of New London Harbor: There the people have taxed themselves a million dollars for that harbor and have asked the Government to assist them to the extent, I think, of some three hundred and odd thousand dollars. When the people themselves have enough faith in a proposition to tax themselves for it, they are not going to try to get up propositions that are lacking in merit; and there will be a very restraining influence, as there was in the project for a part of the Cumberland River. When the Board of Army Engineers took the position that the State of Kentucky—I am not certain about Tennessee, but I am certain about Kentucky—should contribute part of the cost of the improvement, the enthusiasm very quickly diminished.

Mr. JONES. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Washington?

Mr. KENYON. Certainly.

Mr. JONES. I just wanted to suggest here that practically all of the harbors along the Pacific coast, especially those of any size, have contributed toward their improvement. That is almost the universal rule on the Pacific coast. They have contributed to a greater or less extent. Many of them have formed what they call port or harbor commissions, and have imposed taxes upon the people to assist in the prosecution of the work or the maintenance of it.

Mr. WORKS. Mr. President, may I call the Senator's attention, as an illustration, to the case of San Diego?

Mr. KENYON. Yes.

Mr. WORKS. There is an appropriation in this very bill, I think, of $220,000 for the improvement of San Diego Harbor by increasing the depth of one of the channels. The people of San Diego have expended a million dollars in putting up a sea wall, to begin with. It was done at their own expense, without any contribution by the Government. They have already expended on this very channel $300,000 of the city's money. They are simply asking that this additional amount shall be contributed by the Government; and in addition to that—and it is provided for in the bill—the city conveys to the Government a tract of land near by which will be used for training grounds, a naval station, or anything of that sort—land that is estimated to be worth half a million dollars. So the city is getting $220,000 for all of that contribution on its part.

Mr. KENYON. Does not the Senator believe that the plan of cooperation in all of these matters is an exceedingly good one?

Mr. WORKS. Yes; I think it is, for the very reason suggested by the Senator, that appropriations will not be readily asked for if the people have to contribute their share of the expenses. Otherwise, I should say not, because it is a Government improvement. Strictly speaking, the harbors should be improved by the Government; but there is a local interest attached to it, so I am not complaining of that.

Mr. KENYON. If the shore line of a harbor is entirely owned by private interests, then the improvement of that harbor works a great benefit to those private interests. Now, why should not the private interests contribute some part?

Mr. WORKS. I think they should.

Mr. KENYON. I desire, as a part of my remarks on this subject of cooperation, to suggest for the RECORD that in the case

of the James River proposition the city of Richmond has spent $1,044,000 in the improvement of the channel and the construction of public terminals.

In the case of the harbor at Oswego, while no conditions were imposed at the time of the adoption of the project, the work for the benefit of the public has been aided with funds supplied by other sources than Congress, on the theory of all interests being benefited by the improvement.

Cold Spring Inlet, N. J., is a sample of cooperation, where $100,000 was contributed by local interests.

In the Coquille River project, in Oregon, there was also local cooperation. Local interests spent $43,000 for dredging the channels and $500 for repairs of pile jetties; and I have hope that in any general plan that may be eventually worked out this question of cooperation may be taken care of.

The Senator from Oregon referred to the city of Portland contributing—I do not know that he mentioned the amount; my recollection is that it was $5,000,000—in cooperation with the improvement of the Columbia River.

The city of Cleveland has contributed very large sums for the purpose of cooperating in maintaining the inner harbor; and that has been true of Boston and other points.

Before taking up the projects specifically I want to refer to one more general question, and that is the general project of waterways versus railways. Mr. President, what is the matter and why is it that water traffic has decreased on our rivers? Is it going to be possible to bring it back, and if so, how? Is it advisable from the economical standpoint to expend the money that might be necessary to bring it back?

I hope Senators will read the report, when they have leisure, if Senators ever do, of the National Waterway Commission. It is a most interesting document dealing with these questions, which questions must certainly attract the serious attention of Congress. It deals with all subjects concerning waterways, and this commission, consisting of a number of Senators, I think the present chairman of the Committee on Commerce, former Senator Burton, the Senator from North Carolina [Mr. SIMMONS] and others, dealt very exhaustively with this subject and they attempted to find the explanation for the diminished use of inland waterways. They discussed the relation between these two agencies of transportation, the inherent and fundamental differences based upon current conditions that the railways may have, the increasing importance of terminals, which they give as some of the reasons why railway traffic has supplanted waterway traffic, the cost of hauling freight, the facilities for unloading freight, the readier transfer of traffic from one road to another as compared with the transfer from water to land, the through haul of cars without break of bulk, all helping the railroads, the higher speed, the more reliability of schedule, the right of railways to charge lower rates between points in competition with water lines, the power to acquire steamboat lines for the purpose of stifling water-borne traffic, the refusal to pro rate, the great attention given by railroads to provision for warehouse terminals and equipment for handling freight, the question of a minimum rate, the canal question, the relation of waterways to bank protection, flood control, the policy relating to harbors, the ownership of docks, the relation of the waterway improvements to water power in comparison with European waterways.

That commission was composed of 12 Members of the Senate and House of Representatives and was created by act of Congress of March 3, 1909. It is interesting to note, as set out by that commission, a portion of the constitution of the Confederate States framed at Montgomery in February, 1861, on this question, and there the Confederacy adopted this provision in their constitution:

> To regulate commerce with foreign nations, and among the several States, and with the Indian tribes, but neither this, nor any other clause contained in the constitution, shall ever be construed to delegate the power to Congress to appropriate money for any internal improvement intended to facilitate commerce except for the purpose of furnishing lights, beacons, and buoys, and other aids to navigation upon the coasts, and the improvement of harbors and the removing of obstructions in river navigation, in all which cases such duties shall be laid on the navigation facilitated thereby as may be necessary to pay the costs and expenses thereof.

They also discussed the question to which I have tried to draw attention, of cooperation between the communities interested and their duty to bear a part of the burden, the question of the improvement of rivers for the protection of land and of these matters of coordination, the question of construction of waterways to regulate freight, even when there is no commerce in the waterways, and the question of suitable boats.

Mr. President, the railroads outside of the question of unfair competition with waterways have had certain advantages in the race for commerce. Any unprejudiced thinking man knows that to be true. One of the greatest difficulties about restoring water transportation on our rivers is that ofttimes you merely have the trip, the freightage, in one direction. Take the Ohio River. The Ohio River has a very large commerce in barging coal floating down the river. You must have something to come back or you can not have successful river commerce. The railroads have that distinct advantage.

They have the advantage too that they serve different cities and towns, while the water transportation serves only those places that are located along the river. They have a great advantage in their terminal facilities in bringing their tracks to the side doors and the back doors of the places of business, in avoiding transshipment and the expense of hauling. They have a great advantage in their bill of lading, because the shipper can take his bill of lading with draft attached and go to the bank and secure his money. It would be rather an unusual case when he could do that with river transportation.

Rivers and canals are impeded portions of the year in northern climates with ice, and that is a very material factor. The railroads are faster and safer, though I have read an address of the distinguished Senator from Louisiana [Mr. RANSDELL], delivered some years ago before a political economy society, in which he contended that boat traffic like the hare and the tortoise eventually was the fastest because it kept on. But I believe that if the figures were taken, and you should include all the cars that are on sidetracks in getting your proportion and your amount to divide, you ought also to include boats that are not in use. However, I do not know how the Senator figured it. The paper may have misstated it.

Then the railroad has had more improvement in engines and equipment. The water-craft boat has not kept pace with the development of the railway equipment. The railways have had more passenger traffic, which has been more profitable to them I assume, which the boat does not have to any marked extent.

All these things enter into the problem of whether or not water transportation on our great waterways can ever be restored. I have always believed there should be a minimum rate, and I introduced a bill the first session I was here to give to the Interstate Commission the power to fix a minimum rate. They ought to have that power just as much as the power to fix a maximum rate. If they had had that power in the past and had applied it, it may be that there could have been a prevention of the unfair methods at times that the railroads have used toward water transportation.

The National Waterways Commission do not in words, but I think it a fair inference from their report, conclude that there must be some kind of cooperation between the railways and the waterways to bring back this commerce.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER (Mr. OVERMAN in the chair). Does the Senator from Iowa yield to the Senator from Colorado?

Mr. KENYON. I yield.

Mr. THOMAS. I have no doubt the Senator is more familiar than I am with the fact that that is the plan which has long been in operation in Germany and which has resulted in the remarkable increase of river traffic in that country.

Mr. KENYON. I intended to refer to that. That is a fact.

Mr. THOMAS. I have no doubt of it. I anticipated the Senator.

Mr. KENYON. I am very glad of it.

Mr. THOMAS. It is my judgment that without such cooperation all the improvements which are susceptible to engineering and to finance will be powerless to increase the traffic of our navigable rivers; and unless the Government acts, either by Government control or by enlarging the powers of the commission, as the Senator suggested, coupled with the power to enforce its orders, there will be no restoration of our water traffic in this country.

Mr. KENYON. Of course, the Senator realizes that Germany owning and controlling its railways compels the railroads to treat the waterways fairly, and compels certain kinds of traffic to be carried on the waterways, the heavy, bulky traffic, so that the finer and more expensive traffic can be carried on the railroads. That system of cooperation has made the waterways of Germany a success—yes, a success, because I think it must be considered that the German waterways are a success.

Now, some writers have said of the waterways and the railway cooperation in Germany that the railways have made the waterways profitable because of the bringing of this heavier freight and the carriage of it by water.

Mr. RANSDELL. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Louisiana?

Mr. KENYON. I do.

Mr. RANSDELL. I wish to ask the Senator if he does not regard the Germans as a very wise, far-seeing race of people, probably as good business men as there are in the world?

Mr. KENYON. I regard them as the most efficient people in the world.

Mr. RANSDELL. And you also agree, I believe, with me in the statement that Germany has spent very large sums for the improvement of its waterways, has connected nearly all its streams by transverse canals, and that it has used those waterways to a very, very great extent.

Mr. KENYON. Yes. I do not know that I could agree with the Senator that that would be true as to all the waterways of Germany. I would agree that it is true as to the Rhine. I think there are waterways in Germany that have not been anywhere near the success that the Rhine has been; but as a general proposition I agree with the Senator that their waterways have been a success.

Mr. RANSDELL. Then, if the improvement of the waterways in Germany has been such a marked success, and if the Germans are a very wise and businesslike nation and race, do you not think we might fairly conclude therefrom that it would be wise and beneficial for us to improve our waterways, provided we would do it in a businesslike way?

Mr. KENYON. In a businesslike way. That is what I am contending for. Then, I want to ask the Senator, because we must consider these in like condition, does not the Senator believe that governmental ownership of railroads by Germany is what has in fact made their waterways a success?

Mr. RANSDELL. To some extent that is true.

Mr. KENYON. Does not the Senator believe that that is the solution of this problem?

Mr. RANSDELL. I do not understand that they have government ownership of railways in France.

Mr. KENYON. In Germany?

Mr. RANSDELL. They do have more or less government control; they do protect their waterways. My understanding is that in France there is a law which prohibits the railroads from charging within a certain per cent of the water rate.

Mr. KENYON. In France, 80 per cent.

Mr. RANSDELL. I would distinctly favor a reasonable control of our railroads. I have been advocating that for years and I have pending at this moment before the Senate a bill providing for giving the Interstate Commerce Commission the right to fix the minimum as well as the maximum rates, which they now do.

Mr. KENYON. I am glad the Senator has a bill here. I have had such a bill here for five years. It has never seen the light of day from the committee. Has the Senator had any success in getting his bill out of committee?

Mr. RANSDELL. No; I have not had any success with it.

Mr. KENYON. Strange!

Mr. RANSDELL. I have been doing my utmost, I may say, for a number of years in trying to get the waterways of this country protected from what I conceive to be very unfair rail competition, and I will say unless we are going to reasonably protect them against unfair rail competition it is unwise to spend all these sums in improvement. I agree absolutely with the Senator on that.

Mr. KENYON. We have gotten on common ground.

Mr. RANSDELL. We have always been on that ground as far as I am concerned. Perhaps the Senator does not know my position. That has been my ground always.

Mr. KENYON. Then I am ready to unite with the Senator, and I know others are, in some plan to do that very thing. Is not this Congress powerful enough or able enough to solve that problem?

Mr. RANSDELL. It looks like we ought to be able to do it, but we have been trying to do it without very great success for some time. We had a National Waterways Commission created several years ago, with which the Senator is familiar. The president of it was Hon. Theodore E. Burton, of Ohio, one of the greatest students of waterways we ever had in this country. They made a most elaborate study of this subject, visiting many countries of Europe, studying the waterways systems over there and the laws regarding the waterways in Europe. They made a number of recommendations to Congress, most of which were practically carried out by section 11 of the Panama Canal act. You are familiar with it, of course. It was thought under the administration of section 11 of the Panama Canal act we probably would be able to navigate our waters, and I want to say to some extent there has been a revival, a considerable revival, in water transportation since that time. I believe we are getting along better. Everything practically that was suggested by it at that time was done. I think we have to go further, and I would be very glad to cooperate with the Senator in any wise law that will enable our waterways to be used.

Mr. KENYON. Does not the Senator believe that until we reach that point we are simply going on and wasting money here by millions?

Mr. RANSDELL. I do not think we are wasting money by millions. I can not agree with the Senator on that proposition. I believe that water transportation is much cheaper than rail, and even without all this control, if we will improve the waterways properly we will get very great benefit from their improvement. I can cite to you some cases where we spent considerable money in improving waterways, and I believe it will be of remarkable benefit. I refer to the Great Lakes system.

Mr. KENYON. Oh, yes.

Mr. RANSDELL. Pardon me.

Mr. KENYON. You can not compare that with a river.

Mr. RANSDELL. Let me make my statement. We have spent on the Great Lakes in round numbers $100,000,000. A large portion of that was spent in digging out the channels of the Detroit and St. Marys Rivers. They have harbors so that deep-draft boats can run there, and the rate of the water-borne commerce on the Lakes is ridiculously small compared with the rail rates. It is only about one-ninth of the average rail rate. Last year there were about 80,000,000 tons of commerce carried over those improved waterways.

I grant you it is not absolutely comparable to a river, but I can cite you to a big commerce of a certain character on the Ohio River, according to testimony of men like the leading member of the Panama Canal Commission. He was a member of the Panama Canal Commission for years and was stationed on the Ohio River. He made an elaborate study of the transportation system of that river and stated in a report to Congress, which I think I can furnish you, that coal was carried in enormous quantities on the Ohio at about one-third of 1 mill per ton per mile. There is very large commerce there.

There is no doubt, in my judgment, that if you had a dependable channel on the Ohio, if you had a channel that when you started a boat out you knew it was going to get somewhere, that it was not going to be stopped by shoal water, and there is shoal water sometimes as much as 11 months in the year because there are records where it has been shoaled for 11 months, you could get very cheap freight on the Ohio River and down that river to New Orleans. New Orleans is a big consumer of coal. It uses about 3,000,000 tons annually and they ought to get all the coal from Pittsburgh. We never know when we can depend on the Ohio. You have your load in a ship, but when you start out with a load you do not know how long it is going to take that boat to get to its destination. It is so unsatisfactory that we do not want to depend upon it.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Utah?

Mr. KENYON. I do.

Mr. SMOOT. The Senator just stated, and he has on one or two other occasions, that water transportation is much cheaper than rail transportation. I know that that is commonly accepted, but I believe the Senator must admit that in Germany rail transportation would have driven the water transportation companies out of business if it had not been for the action of the German Government. Take the great River Rhine. From its mouth to the head of navigation, paralleled with a railroad running on both sides of it, and the railroads controlled the business of that great river. It would control it to-day if the German Government did not make the freight rate for the railroads and also the rate for water transportation, as well as the classification and the kind of products to be transported by rail and by water.

I say it is my belief that a railroad can be constructed through the Mississippi Valley with terminals at Chicago and New Orleans, say four tracks, can carry general freight from New Orleans to Chicago and vice versa cheaper than by water even if the Mississippi River was in a condition for water transportation. I believe the railroads could drive the shipping off the Mississippi River with the exception of exceedingly heavy products such as coal and grain.

Water transportation will never be a success in handling light articles for short distance transportation. It never will be a success for the reason that distances to the interior are so great in this country that it takes too long a time to transport and deliver articles purchased for commerce, and particularly does this apply to the remote districts of the United States. It never will be able to transport successfully perishable articles.

In Germany where the distances are short, in fact you could put the whole country inside one of our States, even there with the great river Rhine it is impossible for water to compete with rail transportation.

The Senator will claim that this is on account of unfair competition. It was not brought about by unfair competition in Germany. The German Government regulated the railroad rates at the time the railroads drove the commerce off the rivers in that country, and the only way that it was ever restored was by allowing water transportation companies to charge a less rate than the railroads. Water transportation companies could not survive to-day if that preference was not given them, as every one knows.

If I speak on this subject later, I will call attention to the amount of money that it will require to place rivers of the United States in a condition so that it will be possible to use them successfully for water transportation. When we take the cost of improvement into consideration and figure the amount of interest on the money that it will take to put our rivers in proper shape for water transportation, I believe that anybody who will stop to figure it will say that the cheapest mode of transportation in this country, distances and cost taken into consideration, is by rail rather than by water.

Mr. RANSDELL. Will the Senator yield to me for a moment?

Mr. KENYON. I yield.

Mr. RANSDELL. Mr. President, I think the Senator from Utah practically admits the refutation of his own statement in regard to Germany. It is probably true that if there were no regulations of the German railroads which go away into the interior and serve a vast number of points far back from the rivers as well as points adjacent to the rivers, and if they were allowed to destroy water competition and then could operate as they have done in this country repeatedly, they might drive the commerce off the Rhine, just as they have driven it off the rivers in this country.

Mr. SMOOT. Mr. President——

Mr. RANSDELL. I decline to yield until I have answered your question. Then I will yield.

Mr. SMOOT. I did not want the Senator to put me in a false position.

Mr. RANSDELL. I decline to yield at this moment.

The PRESIDING OFFICER. The Senator from Louisiana declines to yield.

Mr. RANSDELL. I believe the Senator will admit, just as the Senator from Iowa did, that there is no better business race in this world than the German.

Mr. SMOOT. I admit it.

Mr. RANSDELL. Then, sir, if you admit that, why do they spend these enormous sums of money to improve the Rhine?—because they have spent enormous sums.

Mr. SMOOT. I will tell the Senator when I secure the floor.

Mr. RANSDELL. They are spending enormous sums now, in spite of the war.

You talk about preparedness in this country, and the Germans in the midst of the greatest war in the world's history are carrying on improvements in the waterways right at this moment, because they know that that is the cheapest transportation and they know it is the best transportation. Does any sane man contend that that wise race would spend a great many million dollars to improve those rivers if the water-transportation agent was a more expensive agent than the rail? Why not abandon them entirely? If water is not a better agency to convey freights than rail why do those wise people resort to the water? The mere statement of the question answers itself. They do it because they know that the frictional resistance of the fluid we call water is very much less than the frictional resistance of a steel rail; they know that a given amount of force can transport a much greater quantity of freight over that fluid, water, than it can possibly do over a steel rail. All those who have studied the subject carefully admit that it is less expensive to convey over water than it is to convey over rail. The freight rates on the ocean are so ridiculously small, as compared with the rates on land, that no one would make the comparison. The rates on the Great Lakes, as admitted by the Senator from Iowa just a few moments ago, are very much less than those on land. I assert, and I can produce from Government reports the actual figures to prove my statement, that the average cost of the transportation of freight on the Great Lakes is only about one-ninth as much as is the cost of transportation on the railroads of this country. If the freight rate be so much less on the ocean and so much less on the Lakes, why is it not less on the rivers? It is less on the rivers; but the rivers of this country have not been protected; the rivers of this country have not had terminals; the rivers of this country have not had facilities for handling freight in competition with the railroads.

Bear in mind, Senators, that the railway serves not only the people adjacent to the river, but it goes 5 miles back, 10 miles back, 50 miles back, 500 miles back, and it can serve them all. Its opportunities are very much greater than are those of the rivers. If it charges rates which cause it to suffer a loss on the points adjacent to the river, it can recoup the loss in the interior; and, as a matter of fact, the railroads have been doing that for many years. They did that until they drove the boats off the river. Those are facts which can not be denied.

I admit that there has been an improvement since the Panama Canal act was passed, but I want to cite you to one big river, as to which an exhaustive study was made within a very few months. I refer to the Missouri River, which has been criticized and which is going to be further criticized. I ask all Senators to read the report made by the Board of Engineers for Rivers and Harbors on the Missouri River. There is a river on which a boat company has been organized and is doing business in a businesslike way. That company is now carrying freight from Kansas City to St. Louis, with terminal facilities at both ends; they are giving through bills of lading; they are handling freight from the cars at one end to the cars at the other end. They are taking that freight to any point where the shipper desires it to go; and their charge, which includes insurance and everything else, is but 80 per cent of the average railroad rate. If that rate is 80 per cent, it is a very decided cheapening. A report on that subject, which is accessible, came out in the last few weeks, as to a river which is in a most unimproved condition; a river on which there are a number of shoals, so that boats can not depend on doing their work quickly, promptly, efficaciously, with a big load; they are held back; but on that unimproved stream, with a number of shoal places, they are at this moment carrying freight at 80 per cent of the average rail rate. On the Ohio River they are carrying it a great deal cheaper than that.

Mr. SMOOT. Mr. President, will the Senator yield for just a moment?

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Utah.

Mr. SMOOT. I assure the Senator that I will take only a moment.

Mr. KENYON. I have no objection to the Senator taking all the time he desires.

Mr. SMOOT. The Senator from Louisiana (Mr. RANSDELL), in answer to my statement as to conditions existing in Germany, intimated that they existed because the railroads were not controlled as to the rates they could charge; and because of that drove water transportation off the rivers. The Senator must know that the German Government fixes the railroad rates; and the railroad rates fixed by the German Government, the rates so fixed being the same as water rates, drove the water transportation companies out of business. At that time it was impossible for water transportation to compete with railroad transportation at rates made by the German Government. The only reason the water transportation companies remained in business was because the German Government advanced the rates to be charged by the railroad transportation companies, and allowed a lower rate for water transportation than was allowed for rail transportation from the same place of shipment to the same destination.

Mr. RANSDELL. I was going to ask the Senator if the rates were not lower by water than by rail?

Mr. SMOOT. The only reason they were so was because the German Government fixed them so.

Mr. RANSDELL. Why did the German Government say so?

Mr. SMOOT. Because the German Government wanted the river Rhine utilized in transporting the heavy products out of Germany for transportation to foreign countries. Germany concluded it was wiser to classify her freight and use water transportation as well as rail transportation; and water transportation was saved by an act of the German Government in maintaining the rates that were in existence at the time rail and water rates were equal and advancing the rail prices so that the water transportation companies had a preference. That could not be done in this country without further legislation or further power being conferred upon our Interstate Commerce Commission, as the Senator from Louisiana well knows and as the Senator from Iowa stated but a short time ago.

I admit that Germany is wise in her economic policies. I admit the thrift and the wisdom of that great people. In the past she has taught the balance of the world lessons in enterprise, in invention, in efficiency, but Germany does not spend money upon her rivers and harbors as it is spent in the United States. The river and harbor appropriations made by Germany are not distributed so much in this part, so much in that part of

the country, and so much in another part of it. The appropriations are not distributed to secure votes for the passage of a river and harbor bill. The German people are too intelligent for that kind of legislation. When they appropriate money it is for a specific project, without reference to any other project. I think, Mr. President, before the improvement of rivers and harbors of this country is a success, we shall have to follow some such policy as that which has been adopted by Germany.

Mr. RANSDELL. Will the Senator from Utah yield for a question?

Mr. SMOOT. I am through.

Mr. KENYON. I will yield in order that the Senator from Louisiana may ask a question.

Mr. RANSDELL. Does the Senator from Utah mean to say that river and harbor bills as passed in this country are framed to get votes for their passage?

Mr. SMOOT. I know, Mr. President, and I have noticed it ever since I have been in the Senate, that wherever there is an item put into the river and harbor bill which confessedly should not be there and whenever a vote has been taken upon it, no Senator or Representative who is greatly interested in items in the river and harbor appropriation bill has voted against such an item, though I have heard them say that the appropriation never should be allowed; I have heard them say that the project was not a worthy one, and never ought to be in a river and harbor appropriation bill, and so I can not draw any other conclusion than I have already drawn, when such items as those appear in river and harbor appropriation bills.

Mr. RANSDELL. Mr. President, the Senator from Utah makes a very serious arraignment against his colleagues in this body and in the other branch of Congress when he says that items are placed in the river and harbor bill to secure votes. That means that we are a set of grafters; that means that we are dishonest. Now, I for one repel any such insinuation. I know that it is not a truthful statement, Mr. President.

I was a member of the Rivers and Harbors Committee of the other House for many years. I know that before an item could get on a river and harbor bill it had to run the gantlet of the most careful and painstaking investigation; it had first to be examined by the engineer in charge of that district; it then had to be sent to the Board of Engineers for Rivers and Harbors, a board composed of seven able, honest men, just as honest as are we—the honor men of West Point. Then it had to be approved by the Chief of Engineers. There is not such a system of checks and balances anywhere in our Government as there is as a condition precedent for an appropriation for rivers and harbors. We have no such system anywhere else.

Mr. KENYON. Mr. President, I want to ask the Senator from Louisiana, in my own time, if it is not true that in the Commerce Committee—the Senator has been a member of that committee much longer than have I—when any member of that committee says "I have a survey which I want to put on here," it is a rule of the committee to merely let him or any other Senator put on the bill any survey which he pleases?

Mr. RANSDELL. It is a rule of the Commerce Committee as to these things——

Mr. KENYON. Why is it that there are——

Mr. RANSDELL. Wait, now, if you please. You have asked me a question, and I am trying to answer it. A Senator of the United States asks for a survey—and a survey usually is not a very expensive thing. The process is this: A Senator, by senatorial courtesy, asks that a survey be put on the bill, and it is put on. Under our system, which is written into law, the engineer makes what is called a preliminary examination. He does not go to any expense. He gets into a boat and rides up and down the stream.

Mr. KENYON. Not in all of these instances.

Mr. RANSDELL. I am going to answer that part of it. If the stream is not big enough, he will go in his skiff, and if it is not big enough for a skiff—and sometimes Senators ask for a survey where a stream is not big enough for a skiff—the engineer will ride on horseback.

Mr. KENYON. Or go in a buckboard?

Mr. RANSDELL. Or go in a buckboard; probably so; but he makes a preliminary examination, ascertains all he can about it, and submits his report on that preliminary examination to the Board of Engineers for Rivers and Harbors. That board examines the report carefully, and if they say it is all right, if they believe it is a good idea to have the survey made, that it is possibly a good project, but they do not know until it is all surveyed elaborately, and then it is possibly all right; they examine it with great care, and then send their report to the Chief of Engineers. If the Chief of Engineers finds that on the preliminary examination, which has been a very inexpensive one and costs but a few dollars——

Mr. KENYON. I notice that we raised the sum appropriated for such surveys $100,000 over the House bill.

Mr. RANSDELL. If the project is approved by the Chief of Engineers, he then provides for an accurate survey. When it goes back, there is a survey made in the field, and that survey sometimes costs a good deal of money; but is it not a good idea to spend a good deal of money to find out about a project, to secure all the facts concerning the physical characteristics of the stream, the actual commerce on the stream, the prospective commerce, and every other fact that can be ascertained about it, before Congress is asked to make an appropriation? That is what is done with every item in a river and harbor bill, and I wish some Senator would tell me of any other appropriations made by Congress where that is done.

Mr. THOMAS. Mr. President, will the Senator allow me to interrupt him?

Mr. RANSDELL. I will be delighted if the Senator from Iowa has no objection.

Mr. KENYON. I yield.

Mr. THOMAS. I should like to ask the Senator from Louisiana a question right here.

Mr. RANSDELL. If I may be permitted, I will be glad to answer the question.

Mr. KENYON. Mr. President, I understand the rule in regard to a Senator yielding is not being enforced, and that I will not lose the floor.

Mr. THOMAS. I find on page 54 of this bill the following amendment:

State of Kansas, floods in: Investigate the flood periods of the waters of the State of Kansas by an examination of the territory and from data already gathered by governmental, State, and private efforts by the Board of Engineers of the War Department, and to devise some general plan which will best guard against the recurrence of such floods and diminish their damaging effects upon the lower valleys of the Kansas, Arkansas, Missouri, and the Mississippi Rivers.

I should like to ask the Senator from Louisiana why this amendment to make an investigation regarding flood periods and to prevent flood damage by waters in the State of Kansas should be inserted in this bill, and whether that has ever been investigated by the War Department?

Mr. KENYON. I should like to know if that was ever voted on in the committee?

Mr. RANSDELL. I do not know anything about whether or not it was voted on; I presume it was; it would not be in the bill unless it was voted on.

Mr. KENYON. Every survey asked for was just thrown into the bill.

Mr. RANSDELL. I understand that was an amendment offered by the Senator from Kansas [Mr. CURTIS], but in our river and harbor system we have a certain amount of investigation of flood damage. The Senator from Colorado will recall that in 1913 there were terrible floods in the States of Ohio and Indiana and that a great many lives were destroyed by those awful floods at Dayton, Columbus, and other points, and an enormous property loss incurred, running into a great many million dollars. But in the next Congress——

Mr. THOMAS. I remember that, but——

Mr. RANSDELL. Wait a moment.

Mr. THOMAS. We now have a flood-control bill.

Mr. RANSDELL. In the next Congress we passed a provision requiring the Engineering Corps to make an examination of the floods on the rivers which brought about this awful destruction to life and property in Ohio and Indiana. We have had that done in several cases in the United States. It is not unique; this is not the first time it has been done; but I call the Senator's attention to the fact that making a survey is one thing and making an appropriation to carry out the project is an entirely different one.

I remind the Senator that there has been more or less investigation of floods on the Sacramento River. For a number of years that project has been under investigation—I would say at least for 10 or 15 years. The State of California has had investigations made; the reclamation districts out there have had investigations made; I know the Government has had several investigations made, and in the flood-control bill now pending in the House of Representatives they are going to make an appropriation, if that bill becomes a law, for assisting in this reclamation work on the Sacramento River.

Continuing to answer the Senator's question, I will say that that provision, if enacted into law—I do not know whether the House is going to accept it, and I do not know, even if we pass it, whether or not it will be agreed to by the conferees—would simply instruct the Engineer Corps to look into the flood problem in Kansas and make a report to Congress, just as they will look into navigation problems in other places and make a report to Congress.

The Senator knows that there have been terrible floods in Kansas at times. The Senator from Kansas [Mr. CURTIS] made a statement an hour or two ago on the floor here, that in 1903 the damage from floods around Kansas City amounted to a great many million dollars. I said $20,000,000 or $40,000,000, but he said "You are wrong; the damage was a great deal more than that." It was stated that last year the floods in Kansas caused a great many million dollars of damage. So, it is not such a vicious thing to ask for an investigation of something that causes many million dollars' loss to the American people.

Mr. THOMAS. Mr. President, I have not suggested that this was a vicious matter. I simply wanted information about it. To my mind it is unique. The Senator says it is not.

Mr. RANSDELL. There are precedents for it.

Mr. THOMAS. I will accept his statement, as a matter of course; but I think such a provision has no business whatever in a river and harbor bill. This bill is an omnibus bill, whatever the motive behind it may be, and if it has heretofore or will hereafter be enlarged so as to include investigations of every flood that occurs in the country, I see a splendid opportunity for my State after awhile to get in on this river and harbor bill.

Mr. KENYON. The Senator from Colorado will notice that, whereas the Senator from Louisiana says these matters do not cost anything——

Mr. THOMAS. I am aware of the fact that they all cost something.

Mr. RANSDELL. I did not say that they cost nothing. I said the preliminary examinations cost very little. The investigation to which the Senator from Colorado refers may cost considerably more than most surveys.

Mr. KENYON. The Senate committee raised the amount appropriated in the House bill for surveys from $250,000 to $350,000.

Mr. THOMAS. Yes.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Utah?

Mr. KENYON. I do.

Mr. RANSDELL. Will the Senator allow me to say there, in answer to the point just raised by the Senator from Iowa, that that covers surveys for all the United States. There are a great many of them, not only preliminary surveys, but final surveys. A number of these will be final surveys.

Mr. KENYON. The $100,000 which the committee added to the bill, I assume, is to cover items that the Commerce Committee of the Senate placed in the bill, because I assume the House appropriation would cover the rest of the surveys. I now yield to the Senator from Utah.

Mr. SMOOT. I was led to believe, Mr. President, by what the Senator from Louisiana has said that there was no project appropriated for in this bill unless it had been approved by the Board of Engineers.

Mr. RANSDELL. The Senator misunderstood me. I said that that was the general rule. There are some very few exceptions; but that is the general rule.

Mr. SMOOT. I was led to believe from what the Senator said that that was the rule. Now he admits that there are a few exceptions; and, so long as he does that, I am not going to call attention to the number in the bill at this time.

Mr. KENYON. It is the theory that "exceptions prove the rule."

Mr. SMOOT. I was going to say that there was no lack of exceptions, Mr. President. Every river and harbor bill that I have examined contains such items, and there is no lack of them in this bill.

Mr. JONES. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Washington?

Mr. KENYON. I yield.

Mr. JONES. In reference to that point, I do not understand that there are items in the bill that have not been approved by the engineers.

Mr. KENYON. There are, I will say to the Senator.

Mr. JONES. I should like the Senator to point out one.

Mr. KENYON. I am going to point them out. The Arkansas River is one.

Mr. JONES. I notice the Senator has in his hand a pamphlet which appears on our desks, the figures in which I was looking over just a little while ago, and I wish to call attention to one item that may mislead the Senator. There are other items of the same character.

Mr. SMOOT. I will refer, I will say to the Senator, to the hearings upon each item that I have reference to.

Mr. JONES. I want merely to call attention to one item. It may be that the Senator is right, but I do not know that to be the case. On page 7, under the items for the State of Washington, appears the item "Willapa Harbor and River," and then in the column "Engineers recommended" there is a blank. That is not correct. The engineers have recommended it, and I have the report here. This document is simply printed as a separate report, and is not the regular, full Engineer's Report. There are a good many of the items in this little document concerning which it is indicated that there has been no engineers' recommendation, although they have been really recommended.

I will say that I did not know that there were any items put on this bill by the Senate committee without the indorsement of the engineers, and, if there are any such, I am absolutely opposed to them.

Mr. KENYON. The Senator says "put on by the Senate committee."

Mr. JONES. Yes.

Mr. KENYON. I would not want to have the Senator understand my statement as covering that. I do not know as to that. I know there are items in this bill that have been condemned by the district engineer, the division engineer, and the Board of Engineers; but I think they came from the House.

Mr. JONES. Even if such items were included in the bill by the House, I am in favor of cutting them all out. I do not think that any appropriation ought to go into this bill which has not at least had the approval of the engineers. We do not put in all the items that have their approval, but we certainly ought not to put any in the bill against their approval.

Mr. SMOOT. Mr. President, I want to say to the Senator from Washington that, if the Senator from Iowa does not cover them, I shall call attention to them when the Senator from Iowa shall have concluded.

Mr. KENYON. I had intended to cover them, but I hope the Senator will cover them also.

Mr. President, the discussion as to the destruction of water traffic by the railroads has been, I think, valuable and enlightening. Section 4 of the act to regulate interstate commerce, in the judgment of the National Waterway Commission, has had a good deal to do with enabling the railroads to injure water transportation. That section of the act provides:

SEC. 4. That it shall be unlawful for any common carrier subject to the provisions of this act to charge or receive any greater compensation in the aggregate for the transportation of passengers, or of like kind of property, for a shorter than for a longer distance over the same line or route in the same direction, the shorter being included within the longer distance, or to charge any greater compensation as a through route than the aggregate of the intermediate rates subject to the provisions of this act; but this shall not be construed as authorizing any common carrier within the terms of this act to charge or receive as great compensation for a shorter as for a longer distance: *Provided, however,* That upon application to the Interstate Commerce Commission such common carrier may in special cases, after investigation, be authorized by the commission to charge less for longer than for shorter distances for the transportation of passengers or property; and the commission may from time to time prescribe the extent to which such designated common carrier may be relieved from the operation of this section: *Provided further,* That no rates or charges lawfully existing at the time of the passage of this amendatory act shall be required to be changed by reason of the provisions of this section prior to the expiration of six months after the passage of this act, nor in any case where application shall have been filed before the commission, in accordance with the provisions of this section, until a determination of such application by the commission.

Whenever a carrier by railroad shall in competition with a water route or routes reduce the rates on the carriage of any species of freight to or from competitive points, it shall not be permitted to increase such rates unless after hearing by the Interstate Commerce Commission it shall be found that such proposed increase rests upon changed conditions other than the elimination of water competition.

Under that section actual water competition is a circumstance that is sufficient to relieve the carrier otherwise from the operation of the law, and actual water competition has resulted in rates being cut to a very great degree upon the railroads, and undoubtedly has injured the particular system of water transportation which a railroad was trying to destroy. I desire now to read just a word from the Waterway Commission on this subject:

The words "under substantially similar circumstances and conditions" found in this section have been interpreted to mean that the existence of actual water competition constitutes a circumstance sufficiently dissimilar to relieve the carrier from the operation of the law. Under this interpretation the cutting of rates, where water competition exists, has been carried to an almost unlimited extent. It is now a question whether the right to lower competitive rates has not been exercised to an extent much in excess of what was intended when the act was passed and, it may be added, to a degree quite inconsistent with the most salutary policy for the commercial and industrial interests of the country.

As has been pointed out here, Germany has handled the matter because it has compelled the railways to maintain such rates as would enable the waterways to live. I believe the Senator from Utah is exactly right—and the Senator from Louisiana squints a good deal in that direction, too—that we must do that in this country, if it is feasible, if we ever expect to bring traffic back upon the rivers.

Mr. SHEPPARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Texas?

Mr. KENYON. I do.

Mr. SHEPPARD. In this country the Interstate Commerce Commission may authorize and does authorize the railroads to lower their rates on account of waterway competition, either actual or potential.

Mr. KENYON. Does not the Senator think that a mistake?

Mr. SHEPPARD. I do; I think the section of the interstate commerce act permitting such reduction ought to be repealed, or fundamentally modified.

Mr. KENYON. It is undoubtedly a mistake if we are going to develop water transportation.

Mr. SHEPPARD. That is true.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Minnesota?

Mr. KENYON. I do.

Mr. NELSON. I want to call the Senator's attention to the fact that in the case of Germany nearly all the railroads are owned by the Government.

Mr. KENYON. They are all owned by the Government.

Mr. NELSON. Well, practically all. There is a little mileage in private control.

Mr. SMOOT. All the railroads are government-controlled, except a little mileage in Bavaria.

Mr. NELSON. Practically all the railroads in Germany are owned by the Government and the water courses are controlled by the Government, so that it is a very easy proposition there for the Government to regulate railroad transportation and water transportation side by side, but we are not in such a fortunate condition as that in the matter of railway regulation.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Florida?

Mr. KENYON. I do.

Mr. FLETCHER. While on that subject, perhaps it would be well to suggest to the Senator that, whereas there may be reductions in railway rates allowed in case of water competition, it would appear that the other provisions of that act would correct any harm in that respect, for it is provided that once rates are lowered by railway companies they can not be raised again without the permission of the Interstate Commerce Commission on a proper showing. Does not the Senator think that that ought to correct any harm that can possibly come from the other provision alone?

Mr. KENYON. It is certainly helpful. I should like to ask the Senator, so that it may appear in the RECORD, when that amendment was passed? I tried to find it, but did not do so, although I knew an amendment had been passed. It was some time after the passage of the original act, was it not?

Mr. FLETCHER. My recollection is that it was in the Panama Canal act.

Mr. KENYON. That provision has undoubtedly been helpful, but it does not seem to have accomplished the full measure desired.

Mr. SHEPPARD. Mr. President, the harm comes from the fact that the railroad may proceed to reimburse itself at the expense of interior points.

Mr. KENYON. There is another difficult proposition. Here is one community which has a competitive water point and a potential commerce. It secures a reduction of rates. That may be by a canalized river. All the people have contributed to that. Along that river, as a basic point, they secure their reduction. Then the people in the interior have to make that up; and it is a pretty serious question as to just where justice dwells in a matter of that kind.

Mr. SHEPPARD. Mr. President, in order to keep boats off a river, a railroad will frequently reduce its rates to river points to a degree below the line of profit.

Mr. KENYON. I agree with the Senator; and then the people of the interior have to make it up.

Mr. SHEPPARD. Exactly.

Mr. KENYON. Then, if you build another canal somewhere to help the people in the interior, that will reduce rates some more, and then the people in the rest of the interior have to make that up; and where is the thing going to end, unless the Government takes over the whole thing?

Mr. MARTINE of New Jersey. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from New Jersey?

Mr. KENYON. I do.

Mr. MARTINE of New Jersey. I am prompted, from that which I see in Report No. 420, which embodies the report of the engineers, to state a few facts with reference to my own little State. There has been some little money expended there; and I find, in looking over these engineering reports, that in every one of these cases the result has been the lowering of freight rates.

I see here, with reference to the Raritan Bay improvement:

It appears from statements of the shipping interests of the great railroad terminals that the improvements have resulted in a reduction of towing rates and a proportionate reduction of freight rates, owing to the greater quantity of freight that can be carried and towed through these channels over that which was carried before the improvement was made.

I find that to be true in every one of them, I think.

I find that at Absecon Inlet—

The steamship *Atlantic City*, intended for the regular line between Atlantic City and New York, is now making three trips a day.

With the result of reduced rates.

Then I find again at Cold Spring Inlet, which I heard the Senator mention a little while ago, that the effect of the improvement has been—

increased use by commercial and fishing interests and as a harbor of refuge,

And a reduction in rates.

Then in the instance of the Newark Bay and Passaic River improvement, the effect of the improvement is stated as follows:

This improvement has reduced freight rates $1 a ton on coal and building materials, and its continuance is necessary to the successful operation of the business in this locality.

Then I find that in the case of the Hackensack River, where some improvement has been made—

Freight rates have been lowered 50 cents per ton in some localities, and a large increase in commerce is anticipated.

I find that at Woodbridge Creek the effect appears to be that—

Freight rates have been reduced as a result of this improvement.

Then I find again, at Keyport Harbor, that the effect of the improvement, according to the testimony of the engineers—

has been to greatly reduce freight rates, especially in the marketing of farm products.

And at Shoal Harbor and Compton Creek, N. J.—

It appears from statements received from shippers that there has been a reduction of freight rates from 20 to 50 per cent.

In the case of the Shrewsbury River, it appears that—

Freight rates have been lowered and maintained as results of the improvement by the United States, also that the commerce has increased.

That seems to be the case in every one of these little inlets, where expenditures of money, though not large ones, have been made.

So, unlike the German situation, while unfortunately we do not own the railroads, too, yet, even with the railroads standing out in competition with their great power, the result has been that in every one of these instances there have been reductions of rates, in some instances a dollar a ton and in many other instances 50 cents per ton.

Mr. KENYON. Mr. President, I should like to ask the Senator a question. Of course there have been Federal appropriations to improve those rivers and harbors.

Mr. MARTINE of New Jersey. Yes, sir.

Mr. KENYON. And the whole country has contributed to that, evidently.

Mr. MARTINE of New Jersey. That is unquestionably true.

Mr. KENYON. And those people, by the contribution of the whole country, have secured lower rates.

Mr. MARTINE of New Jersey. That is undoubtedly true.

Mr. KENYON. And the railroads are entitled, under the law, to a reasonable return upon their investment.

Mr. MARTINE of New Jersey. Well, they have that.

Mr. KENYON. Now, the railroads make that up on other people who are not so fortunately located. Is that just?

Mr. MARTINE of New Jersey. That may be true, Mr. President; and I do not know how it will ever be corrected until the Government's strong arm shall control and own the railroads; but of course that is a big proposition. I realize the fact that you can not impose these benefits on some locality by the improvement without, of course, taxing the rest.

Take the great port of New York that we talked about this morning. While it is the port of New York, it is also the port of the Nation. That is the truth of it. Practically everything that comes to this country enters the great port of New York; so that, while not directly, yet intangibly the whole country does receive the benefit of these great improvements. I feel that that is true very generally in all legislation. I do not know how it can be different.

Mr. KENYON. The Senator believes in the doctrine of "special privileges to none"?

Mr. MARTINE of New Jersey. Yes; I do.

Mr. KENYON. When the country contributes to the improvement of these rivers and creeks and inlets in the Senator's State, and thereby the people living on those streams secure less than a fair freight rate, the railroads make that up in some other part of the country. For instance——

Mr. MARTINE of New Jersey. I will not admit with the Senator that it is less than a fair freight rate. The rate that has been in vogue heretofore has been beyond a fair freight rate.

Mr. KENYON. The railroads would make less than a fair freight rate, would they, to drive out water traffic?

Mr. MARTINE of New Jersey. Oh, yes; the railroads would be willing to do almost anything.

Mr. KENYON. You can ship freight by rail from the Senator's State right through to California for less than you can ship it from the Senator's State to the State of the Senator from Utah [Mr. SMOOT], or the State of the Senator from Colorado [Mr. THOMAS], and the cars go right through those States. Somebody makes that up.

Mr. MARTINE of New Jersey. I do not know whether that is true or not.

Mr. SMOOT. Mr. President——

Mr. KENYON. I yield to the Senator from Utah.

Mr. SMOOT. In order to assure the Senator from New Jersey, as I understood him to say that he did not know whether that was true or not, I will state that a merchant in San Francisco can buy a carload of denims in New Jersey, we will say, or New York, and he can ship that carload of denims to San Francisco, passing through Salt Lake City, for $400 a car less than the amount paid by a merchant in Salt Lake City who buys the same kind of merchandise from the same merchant in New York and ships it from New York to Salt Lake City.

Take the Utah Hotel in Salt Lake City: If the steel that was put into the Utah Hotel had been purchased at Pittsburgh, as it was, and shipped to San Francisco, instead of Salt Lake City, passing through Salt Lake City on the way to the coast, it would have cost the San Francisco merchant over $20,000 less than it cost the purchaser in Salt Lake City.

Mr. MARTINE of New Jersey. I am perfectly conscious of the method pursued on the part of the railroads. I live 24 miles from the city of New York, or about 23 miles from the water front, and coal is shipped from the Pennsylvania mines and sold 23 miles beyond my home at a lower rate than it is sold at my home. When we arraign the coal dealers, they say it is the fault of the railroads. I ask the railroads, and the railroads say that it is because of the fact that they have to stop their trains and break bulk. But all of these arguments converge to the one point—that we have the hand of the railroad monopoly at our throat, and that our only hope and salvation for equity, fairness, and justice to the people is the ownership and control of these great transportation lines throughout the length and breadth of our country. I still insist upon that. I believe that will be our only salvation.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Colorado?

Mr. KENYON. I yield to the Senator from Colorado.

Mr. THOMAS. I think it is appropriate, perhaps, to give the Senator from New Jersey another illustration of the benefit which his section of the country derives through these increasing freight rates, because they must increase in order to compensate for the decrease in such favored sections as his.

The rate upon oranges and lemons from California is 84 cents a box to New York in carload lots, and also to the Senator's State. The rate is also 84 cents a box to my State and to all intervening points. The rate from the eastern coast to my city is about $1.36 a box in carload lots. The Senator's constituency gets these oranges and lemons and citrus fruits upon the payment of 84 cents freight. My constituents have to pay that 84 cents freight plus the $1.36 from the eastern coast back to my section of the country. In that way the Senator can easily perceive how the general problem operates and why his section is favored through these appropriations.

Let me say, before I take my seat, that I fully agree with the Senator that the only solution of the question is going to be the absolute control or ownership of these lines of transportation by the Government and their cooperation with our lines of waterway, as has been done by Germany for so long, and as is done to some extent in France.

Mr. MARTINE of New Jersey. I know that that condition prevails, and I realize the difficulty of correcting it. Of course the impossibility of fixing a system of taxation—and this is a process of taxation—on all people absolutely equitably all over the length and breadth of the land presents almost a staggering problem, and I do not know just how it may be accomplished. But take your great developments in the West in the way of irrigation schemes: A man in my State asks what benefit he gets from them, and he holds up his hands aghast at the appropriations. But, after all, we have to look at this proposition from other than simply a selfish standpoint, and do that which will best enhance and advance the well-being of our whole land.

I believe our purposes are all right; but I can not join with the Senator in his denunciation of waterways wholesale and generally. I believe they are great blessings to this land, and I believe that if properly improved and looked after they will result in a great blessing.

Mr. KENYON. Mr. President, I think this general discussion has developed one fact, at least, and that is that the economical carriage of freight in most instances involves the use or cooperation, in any event, of our railways and waterways; and if we can not have voluntary cooperation, the time is coming when we must have compulsory cooperation.

A great deal has been said about Germany and its waterway system, and that country is always referred to as a country that has perfected its water transportation system. I want to put just an observation or two into the RECORD concerning that matter.

Germany in 1900 completely reorganized her waterway system. She has spent enormous amounts of money; but I do not think Germany has spent as much money on her waterways as we have spent in this country, and her waterways possibly have not reached the high point that we are always willing to concede as to successful waterways. Of course Germany is a smaller nation. Her rivers are shorter. Her population is more dense. Wages are lower. Her factories and manufacturing concerns have been developed along her rivers. Her traffic has increased immensely by rail, as it has by water; and since the formation of the German Empire the world has never known such a remarkable growth. Since 1871 the population of Germany has practically doubled. Her business has increased tremendously in all lines of development and inventive genius. Germany has set a mark along those lines for the world.

The Elbe and the Rhine carry about 70 per cent of all Germany's water traffic. The length of the Rhine within German territory is 355 miles, and the length of the Elbe is about 386 miles. The Rhine, which is always pointed to as the most successful river along the lines of waterway traffic, carries fully 50 per cent of the entire water commerce of Germany. The Rhine has an industrial and economic advantage. It carries a great commerce from the Westphalian coal region. Another factor that I have referred to before is the great port of Rotterdam, situated at the mouth of the Rhine, and the fact that the Rhine is a remarkably straight stream. The current is not strong, its descent being a foot and four-tenths, I think, per mile, with very few interruptions on account of ice. It is largely fed by the melting of the glacial ice of the Alps. The cities have developed harbor facilities all the way along. The rates charged for the use of the harbors are very low.

In counting the cost of our waterways we seldom pay any attention to the harbors and wharves. The other canals in Germany we seldom pay much attention to. What are known as the Mark waterways give Berlin several waterway connections with the sea. Coal on the rivers of Germany is the main commodity, as is generally true of waterway traffic. It is certainly true of the Ohio in this country. Then Germany has a great inland canal, the Berlin-Danzig Canal.

Mr. OLIVER. Mr. President, I should like to ask the Senator if it is not also a fact that there are two other matters in favor of the success of traffic upon the German rivers? One of these is the fact that as a rule the rail rates are higher per ton per mile than they are in this country, and the other the fact that on account of the enormously increased tonnage of the German Empire the railroads are not equipped to take care of and actually could not take care of the increased tonnage, their cars being smaller, their rails lighter, and their whole equipment not calculated for the hauling of heavy tonnage, as is the equipment of the railroads in our country.

Mr. KENYON. The Senator, I know, has traveled in that country and has had a better opportunity of observation than I have, but is it not also true that the bulky freight goes by water and the higher-class freight is carried more largely by rail?

Mr. OLIVER. Yes; the freight which would not stand a high rate per ton goes by water and the light, high-class freight—what we call the high-class freight in this country—naturally would be hauled by the railroads. But as a matter of fact, although I have not the statistics at hand, I should say that the railroads of Germany could not take care of this heavy freight even if they were disposed to compete for it.

Mr. KENYON. I am very much obliged to the Senator for his contribution to the discussion.

In the seventies the Government of Germany assumed the entire control, I think, of waterways and railways. At that time the railways were getting the best of the waterways, and this action was essential to save the waterways; but at the present time of course there is no competition between railways and waterways, and the waterway traffic in Germany has increased enormously. It is probable that the railway traffic has increased faster than in any other country in Europe. So that Germany is developing the railways and the waterways as a single system, and many of the railways are merely feeders of the waterways. Then the transshipment charges are lighter. As has been suggested by the Senator from Illinois, the wages are less, so that the transshipment charges can be less.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Minnesota?

Mr. KENYON. I do.

Mr. NELSON. I want to say to the Senator that I think the figures will show that if you take mileage into account, the railroad rates are many times higher in Germany than they are here, and even water rates are higher, because they move in harmony with the railroad rates in that country. If you bear that in mind, you must never overlook the fact that whatever else has been accomplished by our improvement of water transportation, it has had a tendency to reduce railroad rates, and give us cheaper railroad transportation in this country than they have in any other country on earth. If you take it even in the case of passengers, except in the one case of third-class passengers, both in respect to passengers and freight we are much below any other country on the face of the earth.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Utah?

Mr. KENYON. I do.

Mr. SMOOT. I will say to the Senator that even in the case of third-class passenger rates in England the rate is 2 cents a mile—a penny a mile—but in this country the first-class rate between Chicago and New York is less than 2 cents a mile.

Mr. NELSON. Not now; not since the railroads were allowed to raise their rates last fall. The Senator is mistaken about the rate since that time.

Mr. KENYON. It is about 2 cents now, I think.

Mr. NELSON. I want to say to the Senator that the effect of the increase granted by the Interstate Commerce Commission last year was to raise the rates on passengers between here and Chicago a dollar a head. I know that I first came to Washington in 1883 as a Member of the House, and in coming through here from Chicago to Washington last fall I had to pay a dollar more for my ticket than I did in 1883. I inquired why it was, and they said it was owing to the increase granted by the Interstate Commerce Commission. The rate is more than 2 cents a mile between Washington and New York on the railroads to-day, and they will not sell round-trip tickets.

Mr. KENYON. Two cents and a half.

Mr. OLIVER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Pennsylvania?

Mr. KENYON. I yield to the Senator from Pennsylvania.

Mr. OLIVER. I will say that the regular passenger rate is two and a half cents a mile, but mileage tickets are sold at the rate of two and a quarter cents.

Mr. SMOOT. I will say to the Senator——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Utah?

Mr. KENYON. I do.

Mr. SMOOT. I will say to the Senator that I have bought many a ticket from Washington to Chicago for $18.

Mr. NELSON. The Senator has not done it this year.

Mr. SMOOT. I have not tried. I have bought a through ticket whenever I have left Washington. At that time, when it was $18, the rate was a little less than two cents a mile. It may be higher now.

Mr. NELSON. It was raised last fall.

Mr. KENYON. I want to add, in this comparison about Germany, that Germany has only one-fifteenth the area of the United States, and possesses about a third of her river mileage.

Another matter as to water travel which has not been mentioned is the matter of travel at night. The canals must be lighted on both sides in order to carry on night traffic. Germany does that with the Kiel Ship Canal.

The question of accidents on canals is another impediment. Dr. Sympher, who is the head of the waterway division of the department of public works, I think at Berlin, claims that the waterways have been the cause of the railways' prosperity. German waterways have helped, of course, in her military policies; and waterways in our country might be of great service in time of war, in relieving the railway of the ordinary traffic, leaving the railways free to transport troops and munitions, as they can do in Germany. But the fact remains that the success of waterway traffic in Germany is only because of governmental aid and regulation. Owning the railroads, of course, she does not need waterways as a means of regulating railroad rates.

Another thing: Germany requires of interested districts either definite contributions for the building of waterways or else an absolute guaranty of the defrayal of the annual deficit; and in that way no money is spent in a community unless that community has enough faith in the plan to pay something itself. That is a good principle, which we ought to adopt in our river and harbor matters.

Now, there will always be handicaps.

Mr. NELSON. Mr. President, will the Senator allow me to interrupt him?

Mr. KENYON. Certainly.

Mr. NELSON. Speaking about water navigation, I want to call the Senator's attention to another respect in which we are deficient. On the Rhine, for instance, they have a special class of boats for their traffic. They call them the Rhine boats. When freight reaches Rotterdam, for instance, on ocean-going vessels, it is transshipped to a special class of boats—long, low, flat boats drawing only a few feet of water—called the Rhine boats; and most of the freight carried on those boats is iron ore and coal. That is the chief freight that is carried on them; but it is carried at much higher rates than the rates for our water transportation here.

Another thing to which I want to call the Senator's attention is that we sometimes overlegislate. In our great zeal to effect reforms, we sometimes go beyond all limits. In our Panama Canal legislation we provided that no railroad company could own or navigate any water craft in connection with their railroad lines. That seemed to be a good thing for the canal, but we unfortunately found ourselves in an awful fix on Lake Superior. The railroads, under that law, sold out their steamboats, as they could not navigate them any more—the steamboats that they had run in connection with their railroad traffic from Duluth to Buffalo—and there was a standstill. Merchants wrote me from Minneapolis and St. Paul. They did not know what to do. They finally had to go to work and organize steamship companies and buy the steamships from the railroad companies, and it is only lately that they have gotten it into that condition, owing to our overzealous legislation in connection with the Panama Canal.

Mr. WADSWORTH. Will the Senator yield?

Mr. KENYON. Certainly.

Mr. WADSWORTH. May I ask the Senator from Minnesota if that legislation has not operated to the distinct advantage of the Canadian Pacific Railroad which now is permitted under the Canadian law to operate steamers through at the expense of the American transportation companies?

Mr. NELSON. That was charged then and, I suppose, it is the charge now, but I am not prepared to say that it is the case because the Canadian railroads in summer have the same facilities on the Great Lakes that we have. The Grand Trunk Pacific, the Canadian Pacific, and the Canadian Northern Pacific have terminals on Lake Superior, the one at Fort William and the other at Fort Arthur, and when navigation is open on the Lakes they have the same transportation facilities that we have.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Colorado?

Mr. KENYON. I yield.

Mr. THOMAS. I wish to suggest that a fleet of the Canadian Pacific Railway can not use the Panama Canal any more than boats belonging to American railways.

Mr. NELSON. That is true.

Mr. KENYON. Mr. President, I wish to submit an observation or two as to England's method of handling this question. England had a river commission in 1906 to inquire into the canals and inland navigation of the United Kingdom. This commission collected a large amount of evidence from various companies, heard witnesses, and their report filled some 11 volumes, and probably the most reliable data on the British waterways to be found came from that investigation.

A writer in the Fortnightly Review said, concerning the royal commission, that it had expended time and labor on a forlorn hope, and had only succeeded in recommending, and that in a half-hearted way, to the public a project for the expenditure of millions which no responsible government would ever dare to lay before the House of Commons.

The great English canal is the Manchester Ship Canal which connects Manchester with the sea at Liverpool. Its commerce is tremendous, that is, it was in 1907, when it reached its high-water mark and since that time it has somewhat declined.

In our country we have been somewhat in the habit of developing waterways by States without regard to national questions and our development must be placed on some systematic basis.

I was going to speak of the French system, but I think I will not. I only want to say that the solution of all our troubles along this line would be government ownership of railways if that ever comes, and then there would be no difficulty in taking care of the waterway proposition. But it might entail more momentous difficulties.

*Thursday, May 11, 1916.*

Mr. KENYON. Mr. President, I have submitted a few preliminary observations with reference to this river and harbor bill, and I want to-day to take up some of the projects. I do not believe that I could be particularly criticized for taking plenty of time for a full and free discussion of this bill, especially in view of the fact that we were told a day or two ago that the war measures were not ready, even though the President three months ago advised Congress that we were in a very critical situation. We have sat here and done nothing as far as preparedness is concerned except to pass an army reorganization bill, which is in conference and seems to have a poor show of getting out very soon.

But of course it is important that this particular bill should be passed, whatever may become of the army appropriation bill or the naval appropriation bill. I prophesied a couple of days ago, and I have been called somewhat to account for it, because of the injection of politics into this otherwise very illuminating debate, in saying that the country was going to call the Democratic Party to account for its wasteful expenditure of public money. You Democrats have heard the first call where in an election a couple of days ago in the State of West Virginia a Republican was elected from a Democratic district, and that is the fate that is going to befall your party. It ought to befall it.

I wish to take up a number of these projects. I can not discuss all of them. Some of them would not be subject to criticism if a policy of river and harbor improvement was to be carried out that covered the expenditure of money for the smaller streams of the country; and the question always will remain as long as this method of river and harbor appropriations is carried out as to how large a stream must be to warrant any large expenditure.

There are a number of creeks in the State of my good friend from New Jersey [Mr. MARTINE] that he referred to on yesterday. They illustrate to some extent the system that has been in vogue. He stated that the engineers' reports shows that in practically all these streams, or by virtue of the water competition from the streams, inlets, and creeks, railroad rates had been reduced. That led to a somewhat interesting discussion as to just how far Congress was warranted in voting money of all the people in order to create a situation of favoritism to a few people.

Absecon Creek is one of the creeks referred to by the distinguished Senator, and also Absecon Inlet, which is a distant relative of Absecon Creek. Absecon Creek does not receive a very large appropriation and has not very much commerce.

Mr. MARTINE of New Jersey. Mr. President, I hear the Senator making reference to Absecon Creek and Absecon Inlet. I know the Senator realizes that Absecon Inlet is within the city of Atlantic City, and I need not state here in this presence what Atlantic City is, because I think if the Senators from some of the dry and arid States of the far West could come over and get some of the blessings and benedictions from Atlantic City and our wonderful seacoast they would feel a little more liberal.

I want the Senator to realize that Atlantic City has a population of about 50,000, and a great portion of the year over 150,000 people. It is more than simply a seashore resort. Investments in hotels, mercantile interests, and other enterprises run into the millions.

I made some remarks yesterday regarding this matter, showing the effect of the improvement. While it is, in a degree, we will say, selfish, so with every one of the great improvements. A roadway is selfish in a degree. Yet, after all, I feel that we were elected for a bigger and a broader purpose than to simply stand for that which helps ourselves individually. I believe the effect of the ramifications and the improvements of these bays, waterways, and inlets accrues to the well-being and prosperity of the whole country, as does a roadway running through a country. Property immediately fronting it gets more benefit than the man who owns property behind it, and yet it is a blessing to the whole country.

Mr. KENYON. I am very glad to have the remarks of the Senator from New Jersey interpolated into my rather dry remarks. It gives them more of a zest and flavor. I was only referring to this to show how we had been spending money, not, perhaps, in any criticism of this project, because I wanted to put in the RECORD what the engineers have said about these various projects, in order that the thinking people of the country may in time wake up and smash this whole system of river and harbor appropriations and insist on some better plan, if it is possible to devise one.

Whatever case I make, I want to make from the Army engineers' report. The report on this creek, page 355 of the report for 1915, says:

This creek rises in and flows easterly through Atlantic County.

* * * * * * *

The creek was very crooked, obstructed by numerous shoals, and near its head by the ruins of an old dam. There was an available depth of 3½ feet in the creek and about 1 foot across Absecon Bay. The head of navigation is Absecon village, two miles above the mouth.

We had spent on the creek and on the inlet something like $320,000 up to 1915. That project originally was reported against by Chief Marshall but overruled by Chief Bixby. The commerce last year on the inlet was 13,413 tons. There has been no local cooperation. The engineers say as to Absecon Creek:

In addition to the above—

That is, seven motor boats—

there are a number of small boats that ply over this stream for pleasure purposes.

It is of course a very enjoyable thing to spend the public money in order that a few motor boats may ply along the stream for purposes of pleasure.

Another New Jersey creek is Mantua, a project that is 85 per cent completed, on which a considerable amount of money has been spent. The engineers say, page 2215:

No operations were in progress during the year as no dredging was necessary for maintenance in the portion of the improvements completed nor any repairs to the jetty, and the remainder of the project is unimportant.

This seems to be a proposition to put a channel of 12 feet up to some phosphate works. The engineers' report shows a loss in commerce of 45 per cent in the last two years.

Cold Spring Inlet is another proposition to which I invite the attention of the Senator from New Jersey. That is near Cape May. The engineers, as I understand their record, only recommended $20,000 for this project, but I think the bill carries $40,000. I will look at that and make certain.

That is a $1,311,000 project, of which $905,000 has been expended. The commerce in 1914 was 6,193 tons. It was estimated, when that project was originally in the river and harbor bill, that the valuation of the commerce would run up to $2,226,000. Capt. Lockwood, in an official document, said:

The project of improvement, if carried to completion, will be of material benefit to the city of Cape May as a pleasure resort by filling the adjacent swamp lands, obliterating mosquito-breeding beds, and furnishing opportunity for expansion of building sites.

That is a laudable purpose.

Mr. MARTINE of New Jersey. That certainly will be desirable.

Mr. KENYON. Certainly, if you could eradicate the New Jersey mosquitoes it would be worth the appropriation.

In that event a real estate company seems to have expended $100,000. Document No. 388, which is an official document, on page 5, states that that—

would also permit a resumption of the yacht races that were at one time sailed at Cape May and formed the most attractive event of the season.

The Cape May cup, an international trophy, I am informed, is now sailed at New York.

Mr. HUGHES. What is the Senator reading from? I am trying to follow him.

Mr. KENYON. I am reading from page 5, Document No. 388. It is a House document—a report on this project made some years ago.

Of course, Mr. President, since we have stricken out of this bill the improvement of the East River——

Mr. THOMAS. For trading purposes.

Mr. KENYON. For trading purposes, it will perhaps be a good thing to fix up Cold Spring Inlet so that the yacht races can take place there. And again:

Together with the project of real estate improvement at Cape May, the establishment of a secure harbor would, I am sure, largely increase the present patronage of summer visitors at this locality.

That is one of the things that no one must call attention to or say a word against or he is very unpatriotic.

The commerce is about 6,000 tons and there were a large number of passengers in and out.

The engineers' report states the general character of commerce for the current year to be fish, oysters, clams, agricultural products, coal, and general merchandise. I do not know why the bill carries as to this item more than the engineers have recommended.

I only refer to Oldmans Creek in passing. On that the commerce has gone down from 88,000 short tons in 1913 to 25,000 tons in 1914. That is true of almost all of these various creeks and rivers.

Tuckerton Creek: The short tons have decreased from 16,755 in 1913 to 8,818 in 1914.

Tyaskin Creek: Navigable portion about three-fourths of a mile. The Government has expended $27,000 on that creek. Commerce has gone down from 10,000 tons in 1912 to 3,987 tons in 1914. Another creek that the Senator referred to yesterday was Woodbury Creek.

Mr. MARTINE of New Jersey. I beg pardon. What is the name of that creek?

Mr. KENYON. Woodbury Creek.

Mr. MARTINE of New Jersey. Woodbridge Creek, was it not?

Mr. KENYON. There is a Woodbury Creek and also a Woodbridge Creek. I understood the Senator to say "Woodbury Creek." I call attention to that only as to its commerce. In 1912 there seemed to be no statistics as to the commerce, nor in 1913, but in 1914 there were 11,279 short tons. If this improvement is for commerce, it has not been a great success, although the expenditures have not been large in comparison with the expenditures for other creeks and rivers. So I do not offer serious criticism as to that. I merely cite it to show the decline of commerce.

Mr. MARTINE of New Jersey. Mr. President, I can not understand just what the Senator from Iowa is reading. I have here Calendar No. 384, river and harbor appropriation bill, being the report made on May 5, 1916, by Mr. CLARKE of Arkansas, from the Committee on Commerce, and so forth, and I read from it with regard to the effect of the improvement of Woodbury Creek, as follows:

> Effect of improvement.—The improvement, although not completed, has already facilitated the movement of vessels. It is reported that upon the completion of the work a steamboat line for both passengers and freight will be established between Woodbury and Philadelphia.

Mr. KENYON. Now, if the Senator will just run his eye down that page, he will find the statement as to commerce, from which I have been briefly quoting on the same page.

Mr. MARTINE of New Jersey. It says:

> Commercial statistics. The general character of commerce for the current year was coal, manure, agricultural products, building material, and miscellaneous merchandise.

Mr. KENYON. Now, read just below that.

Mr. MARTINE of New Jersey. I find this further:

> The commerce for 1914 amounted to 11,279 tons, valued at $3,839.

That is doubtless true, for the creek was in an almost impassable condition.

Mr. KENYON. What was the matter with the creek?

Mr. MARTINE of New Jersey. If the creek had been improved, the commerce would have been multiplied.

Mr. KENYON. What was the matter with the creek which made it impassable—lack of water or lack of appropriations?

Mr. MARTINE of New Jersey. It was not necessarily the lack of water. We have got more water in that section than anything else except air. The impassable condition of the creek was due to the silt, the sand, if you choose, which formed a bar in the creek. I know the Senator from Iowa holds these little creeks up to ridicule, but I wish to say that that section is a veritable hive and is inhabited by a populous and busy mass of people. There are many factories located there, and, of course, there is much of agriculture. These highways facilitate trade and commerce and make cheaper the transportation of coal; they make cheaper the transportation of freights of all kinds to the average householder and builder and farmer, and in the opposite direction afford cheaper freight and cheaper produce to be sent to the great marts of New York and Philadelphia.

Mr. THOMAS. Mr. President——

Mr. KENYON. I yield to the Senator from Colorado.

Mr. THOMAS. The Senator from Iowa has perhaps given more study and more attention to this bill than has any other Member of this body. I speak, of course, with regard to its details. I am curious to know whether there are any of these projects outside, of course, of the great harbors and highways like New York and the Sault Ste. Marie Canal—whether there are any of these projects which show an increase in their traffic instead of a decrease of the tonnage?

Mr. KENYON. I think there are one or two that show a slight increase, but they are very few.

Mr. THOMAS. Merely one or two?

Mr. KENYON. I would say not over five of all of them, and I think that would be a perfectly safe estimate.

Mr. THOMAS. The others showing a tendency——

Mr. KENYON. To a constant decrease.

Mr. THOMAS. To a constant decrease. Then is it not true, generally speaking, that as the appropriations for the improvement of these projects increase the tonnage which passes through them seems to decrease?

Mr. KENYON. That seems to be true.

Mr. THOMAS. Well, I should like to inquire if the Senator has made any estimate as to what the amount of our appropriations will have to be to bring about a total cessation of business?

Mr. KENYON. To bring about a condition where there will be no commerce?

Mr. THOMAS. Yes.

Mr. KENYON. We have appropriated about $850,000,000 in the last 40 years. I suppose the river traffic has gone down now 80 per cent; and if the Senator will take those figures—he is as good a mathematician as am I—he will find, I suppose, that in 20 years more we shall not have any tonnage.

Mr. THOMAS. That we shall not have any?

Mr. KENYON. And also that in 20 years more we shall not have much money left in the Treasury at the rate we are going. I do not know, indeed, whether the statue of Freedom will be left on the dome of the Capitol.

Mr. THOMAS. Or the dome, either.

Mr. KENYON. Matawan Creek is another New Jersey project. I see my friend (Mr. MARTINE of New Jersey) has gone, and I am sorry for that. This creek has a little more water and a little more commerce than some of the others. If any of the projects for these creeks are justifiable, possibly this one is. We have spent some $90,122.99 on it, and the commercial statistics as to that show that it has been a decreasing commerce.

I only want to refer to one more river in New Jersey, and that is Toms River. I do not know Tom who, but it is Toms River. Most of these rivers, I have understood, in the Committee on Commerce, were some Senator's rivers or some Representative's rivers; but this is Tom's River. That river at some places has a depth of two and a half feet, according to the engineers' report, and they recite:

> Increased transportation facilities are afforded, resulting in a large increase of traffic, particularly of pleasure craft, and passenger business. No effect on freight rates is shown, as there is no competition.

Last year there were 92 tons of commerce, valued at $2,714. In 1912 there was no commerce, so far as the records of the engineers show; in 1913 there was no commerce. Possibly I should revise my statement to the Senator from Colorado. This mighty stream in 1914 had increased in commerce to 92 tons.

Mr. THOMAS. What was the appropriation?

Mr. KENYON. We have made for that river not heavy appropriations—$10,171.73.

Mr. THOMAS. That is encouraging.

Mr. KENYON. There were two railroads there in 1907. These railroads carried from fifteen to twenty thousand tons of freight. Maj. Flagler said in the document upon that subject—and this is very important—

> Toms River is located upon one of the three principal automobile lines of travel and has a large and increasing business from this source. Stable depth in the river would increase this traffic, owing to the ease with which owners could communicate with their yachts at this point.

The enterprising engineers have thus given us a new reason for river and harbor improvements, and let no one in the future be heard to question the Toms River project. Tom may come to Congress some day. [Laughter.]

Now, Mr. President, I pass to a more important project, the Norfolk and Beaufort Canal. I rather dislike to discuss this project in the absence of my friend from North Carolina [Mr. SIMMONS]. This bill carries an appropriation of $1,000,000 for the Norfolk and Beaufort Canal. This is a $5,400,000 canal project. It is part of the great intercoastal waterway, which is to be constructed some time from Boston on down the coast, paralleling the ocean, and across the Gulf of Mexico to the Rio Grande, and I suppose on down to the city of Mexico.

Mr. SHERMAN. Including the Trinity River.

Mr. KENYON. Possibly this may be justified, on account of the present condition of affairs in Mexico, as a war preparedness measure.

This is part of a great dream and scheme to parallel the ocean with a series of canals. I wonder sometimes why it is that anybody wants to parallel the ocean with a canal. Why not transport the commerce on the ocean? We have been told—and I think the engineers discuss that feature—that this canal will

be valuable in times of war, although it is not deep enough yet for that; but when one of these canals is once started with a 6 or a 9-foot depth, it does not take long or require many dinners or banquets to get people thinking it ought to be a 15-foot or a 35-foot waterway. The Norfolk and Beaufort canal project is a part of the great scheme, which is held in abeyance for a while, of canalizing the whole country, paralleling the ocean, and to cost some $300,000,000.

Col. Taylor stated to the committee of the House that private contractors who had been doing the work charged nearly double what it cost the Government for the dredging. Further, he said that $200,000 would keep the Government dredging crews busy during the year; but we are appropriating in this bill a million dollars for that project. If we can not save anywhere else a little money, why would it not be a good idea, if the whole project is not abandoned, to cut the appropriation to $200,000? We have already cut out of this bill, as I understand, $3,000 for the Cache River, and if we could cut a little more out we would not feel that we had wasted all our time.

In Document No. 1478, Sixty-third Congress, $2,000,000 more is asked for, and $40,000 for maintenance for Pungo River and Goose Creek Canal somewhere in that same section of the country.

The excavations of which Col. Taylor speaks have cost, when carried on by the Government, about $0.043 per cubic foot, while under private contract it has cost practically twice that ($0.0752).

According to the report of the engineers for 1915, the total commerce through this canal was 229,047 tons. Of that there were 48,900 tons of logs, 34,178 tons of lumber, 44,000 tons of piling, 29,000 tons of wood, 1,000 tons of ties, and 3,000 tons of staves, making a total of 163,000 tons of that class of commerce, which does not need any canal or any locks or dams. Take that away from the total of 229,047 tons, and it leaves 66,000 tons of commerce through that canal last year.

In 1914, according to the engineers' report, there was $647,000 worth of work done on this canal, and there was a decrease of tonnage compared with 1913 of over 29,000 tons. This is a $5,400,000 project, to which the engineers last year allotted $400,000.

Col. Black, on page 27 of House Document No. 391, Sixty-second Congress, shows that the depth from Norfolk to Beaufort is sufficient for navigation, and that for the movement of troops water transportation affords many advantages over rail, and he says that to move a division of troops it would take 12 ships of 20-foot draft or 22 ships of 16-foot draft, and, of course, that is what is proposed for this canal.

On page 117 of the same document I find this:

> The possible danger of interruption to traffic via the Albemarle & Chesapeake Canal route by the forces of the enemy has been suggested as a reason why this route should not be chosen. At its nearest point this route is distant fully 6½ miles from the seashore, and some 8 miles from the 6-fathom curve in the ocean.

What a ridiculous proposition to build a canal 6½ miles from the ocean. Why have an ocean? We have spent now on this project $1,800,000, approximately, and it is claimed that the million dollars provided for in this bill will complete the section from Norfolk to Albemarle Sound, leaving $2,000,000 to be hereafter appropriated.

I hold in my hand a report on the Intercoastal Waterway. That portion of it from Beaufort to Key West, Fla., with a 10-foot depth is to cost $31,054,000, while for a 7-foot depth the cost will be $18,995,063.46.

It is somewhat interesting to note the hearings and the arguments that were advanced at the hearings concerning this great canal scheme—this wild canal scheme. The Boston to Narragansett Bay section, with a depth of 25 feet, is to cost $43,000,000; the Narragansett Bay-Long Island Sound section, with a depth of 25 feet, is to cost $24,736,635.

New York Bay and Delaware River section, 25 feet, cost $45,000,000.

Delaware River and Chesapeake Bay, cost $9,910,000.

Norfolk and Beaufort Inlet——

Mr. THOMAS. Mr. President, does that include the purchase price of the Delaware & Chesapeake Canal?

Mr. KENYON. It could not.

Mr. THOMAS. Or is that designed merely for its improvement after we purchase it?

Mr. KENYON. Its improvement after we purchase it. It could not include the purchase price of the Delaware & Chesapeake Canal, because, as I understand, the plans for the purchase of the canal contemplated the expenditure of $20,000,000.

Mr. THOMAS. Something like that amount, as I remember.

Mr. KENYON. Yes; but that is a part of this great general plan.

Mr. THOMAS. I know it is. That is the reason for my query.

Mr. KENYON. Norfolk and Beaufort Inlet—which is the proposition before us now—estimated cost, $5,401,580. The Army engineers recommended that the Delaware River and Chesapeake Bay section, which carried an estimated cost of $9,910,210, should be started and pushed to a termination at the earliest practicable date.

There seems to have been an investigation as to the projects of the Albemarle & Chesapeake Canal Co. and the Dismal Swamp Canal Co. The Albemarle Canal route was offered for $500,000 and the Dismal Swamp route for $1,750,000. As I understand, the project was adopted by Congress, and the Albemarle & Chesapeake Canal was purchased for $500,000. The Dismal Swamp advocates laid great stress on their route, owing to the fact that it would drain a great many thousand acres of land and increase its value. In this document of the hearings, at page 112, they show that while the Albemarle & Chesapeake is the longer of the two, it was the route which the Army engineers decided it was best to improve. They claim that the excavated channel would be exposed to cross winds and currents.

Mr. Calvin Tompkins, who is commissioner of the department of docks and ferries, city of New York, as appears on page 228 of House document 391—which is the document to which I have been calling attention—construing terminal facilities to mean such facilities as are afforded by car floats, transfer bridges, and railroad connections, practically showed that there was nothing of that kind at New York; and it was also shown, from the Board of Trade of the City of Newark, that all of the available frontage on the Passaic River was occupied by private corporations. I am not quite clear as to why that was presented with reference to this canal, and I will not spend any time on that.

I just want to call attention in passing, in order that I may place them in the RECORD, to some of the arguments that were made at that time against the particular canal route that was established and in favor of the Dismal Swamp route.

Mr. Lamb, of Elizabeth City, made a strong argument against the Albemarle & Chesapeake Canal, and in favor of the Dismal Swamp Canal. He says on page 257:

> The Dismal Swamp Canal was the keystone to the arch upon which we built. Since the ditch that first floated the logs that were used by the Government to construct a Navy, we have drained the lands, shipped the timber, builded cities and villages, and established homes that vie in comfort and elegance with the best settlements of North Carolina and Virginia.
>
> All of which was made possible by the use of the Dismal Swamp Canal. The Dismal Swamp Canal is ours by right. * * *
>
> Our enemies they are who charge that we are delaying this great project that has been the dream of legislators for years. That charge is a stab from the hands of a Brutus who has fed at our breast.
>
> Take hold of this canal—

Says another—

> and maintain it, for its services are needed not only to develop this wonderland but to assist in bearing the "white wings of commerce" over peaceful waters through the inside route to pour their valuable cargoes in the lap of trade, escaping the tortuous Hatteras where death and destruction constantly await a victim.

And then this further argument is presented by Mr. Lamb:

> Our forest products handled in Elizabeth City during the past year foots up 242,990 tons. The farm products 55,079 tons. The water products 28,262 tons, giving credit to us for the contribution to the three great essentials of life—food, shelter, and raiment—the sum total of 326,336 tons. May it please the court, I can not omit to add, we have 400 tons of holly and mistletoe to our credit, and that we are contributing our share to the joys and pleasures of our fellow man and to the happiness of the children of this great country, to whose welfare you have devoted your lives.

I do not know how they resisted such a powerful argument as that and decided on the other canal.

Mr. Lindsey also says—I will only refer briefly to these arguments:

> I represent the community of Deep Creek, with a population of about 100 thriving and thrifty farmers, people representing 10,000 acres of cultivated land.

He said that if the canal is built—

> It will bring under cultivation a great quantity of land and reduce the cost of living one-half; it will bring into cultivation the greatest garden spot of the word—not of America, but of the world. I can state that at my own expense I have built a dredge to drain my land to act in conjunction with the Dismal Swamp Canal Co., and this year's increase will pay for it. That is based on the present level of the land, by lowering the water in my ditches.

This man is a great find. He can reduce the cost of living by these canals one-half. He ought to be commended to our good

Democratic friends and brought to Washington at once, because I omitted the other day, in discussing the platform, to refer to that part of your platform where you are going to reduce the high cost of living. Mr. Lindsey can do it, so he says, by the construction of these canals. Of course it ought to be said in your favor that you have reduced the high cost of living on certain things—golf balls and Edam cheeses, but nothing else that anyone has ever been able to discover.

So we go ahead, now, with this million-dollar expenditure on this project of a decreasing commerce. I hope to present a motion at the proper time that will enable the Senate to go on record as to whether that appropriation should be made and whether, if the project should stand, the amount should not be reduced to that which Col. Taylor says can be spent by the Government in doing its own work.

I refer in passing, and hurriedly, to a number of smaller projects.

Mr. NORRIS. Mr. President, before the Senator leaves those projects I should like to ask him a question. I notice that in one of the projects he said that the engineers recommended $200,000, and the committee placed a million dollars in the bill.

Mr. KENYON. No; the Senator misunderstood me. I did not say that.

Mr. NORRIS. What were the facts?

Mr. KENYON. I said that Col. Taylor, before the House committee, stated, in substance, that $200,000 would cover the work which the Government could do with its own dredges, and that work is done for at least half the expense of the contract work. That led to an amendment on this bill which provides:

That no part of the funds herein appropriated shall be used to pay for any work done by private contract if the contract price is more than 25 per cent in excess of the estimated cost of doing the work by Government plant.

But there is no recommendation of the Army engineers to that effect.

Mr. TAGGART. Mr. President——

Mr. KENYON. Just a minute. Col. Black wrote a letter about this, which I have somewhere in my papers, that tended in favor of the contract system, and that said, in substance, that the profit was not too large a profit. I judge that is true, from the easy way in which the Army engineers can handle public money.

Mr. NORRIS. The point I wanted to have the Senator elucidate was, how did the committee arrive at the amount of $1,000,000?

Mr. KENYON. That is the recommendation of the Army engineers—a million dollars.

Mr. NORRIS. Oh, yes.

Mr. TAGGART. That was virtually the question I wanted to ask the Senator, except that I wanted to ask how the committee arrived at the various amounts under the various items. Was it through the advice of an expert engineer? How did they arrive at the conclusions and the amounts which they set opposite the items, as a rule?

Mr. KENYON. I think the Senator probably is familiar with the system.

Mr. TAGGART. No; I am not.

Mr. KENYON. We have a board of Army engineers to pass on these questions. There is a division engineer and a district engineer. They pass on these questions, and from them the matter goes to the Board of Army Engineers constituted for this purpose, consisting of men in the Army, of which Col. Kingman is now the chief. They pass on those matters and make the recommendations in their reports which are the basis for the committee's action.

Mr. TAGGART. Does the committee usually follow their recommendations?

Mr. KENYON. I think so, in most cases; though I will say to the Senator that there are some projects in this bill that have been condemned by the Army engineers.

Mr. TAGGART. That was the question I wanted to ask the Senator.

Mr. KENYON. I do not say there are very many of those. I think generally the plan of the Army engineers is followed.

I only refer in passing to a number of these smaller matters as bearing on this question of commerce.

The appropriation for the Meherrin River is not a large one, nor are the sums that have been appropriated particularly large. The commerce on that river is small, but the proposition would be justified if these smaller propositions are to be carried out. The commerce on that river has gone down from 27,258 tons in 1912 to 16,640 tons in 1914. The expenditures have been only about $10,000 on that stream.

One of the smaller projects, and one that has always seemed to me rather indefensible, is Fishing Creek, in North Carolina. The commerce on that stream has gone down from 2,763 tons in 1912 to 1,096 tons in 1914. The Government has expended about $30,000 on that project; and last year, under the act of 1914, the engineers allotted $1,000. I want to read just a little that the engineers say about that stream:

Before improvement the stream was badly obstructed by masses of fallen timber, overhanging trees, and snags, and was navigable by rafts only a few miles above the mouth. Depth, about 4 feet at ordinary stages; width, 40 to 100 feet. Coffields Bridge, 21 miles from the mouth, is the present head of navigation. Logging and rafting can be carried on for some distance above.

Present project: The original project, adopted by Congress under the river and harbor act approved September 19, 1890, * * * was to clear the stream of logs, snags, trees, etc., up to Bellamy's mill, about 50 miles above its mouth, so as to give a minimum low-water depth of 20 inches and a minimum width of 40 feet, at an estimated cost of $25,000.

Think of spending money to get a depth of 20 inches in Fishing Creek!

Mr. NORRIS. Would not that improve it for fishing, and make it a better place for the fish?

Mr. KENYON. I do not know just what kind of fish could exist in that amount of water. The commerce for the calendar year 1914 was 1,096 short tons; in 1912 there had been 2,763 short tons, and in 1913, 2,459 short tons.

Mr. NORRIS. Mr. President, can the Senator tell what effect this improvement did have, if any, on the production of fish?

Mr. KENYON. No; I do not know anything about that. It is one of the small matters to which we ought not to refer. If we do, it is a small piece of business, and all that; but it simply illustrates, if we are to go on with this system of appropriating where it is desired by certain communities to fix up certain creeks or small rivers, what it will lead to—taking the public money and using it to get 20 inches of water. Of course, 20 inches of water might be the salvation, at certain times, of certain places.

Pamlico and Tar Rivers are not subject, it seems to me, to particular criticism in themselves, just as a part of the general system, showing commerce has gone down from 354,000 tons in 1912 to 288,000 tons in 1914. I refer to only one thing in connection with them in the report of the engineers, and I am taking everything from those reports.

There were removed last year 608 snags, stumps, logs, and so forth, giving a unit cost of $6.33 per obstruction. The project is 99 per cent completed. I do not know why commerce has so decreased on these rivers.

The hoister *Contentnia* started active operations on Tar River on October 13, 1914, beginning at the twenty-third milepost and working up to the fifty-seventh milepost, the mouth of Fishing Creek. She discontinued operations on this stream on December 3, 1914, having removed from the channel 95 snags, 33 stumps, 37 logs, 7 saw logs, 23 trees, and one-half cord of small snags, besides having cut and hauled back from the banks 35 overhanging or leaning trees.

Then the snag boat *Trent* also seems to have been put on Tar River and Pamlico River, with a record of 42 snags and 266 stumps and 36 saw logs and 18 trees from the channel, cutting back from the bank 15 overhanging or leaning trees. I do not know, Mr. President, whether those kind of improvements are good or not, or whether they are justified.

I only refer to the Bay River to call attention to the commerce there. In 1912, the short tons were 17,733; in 1913, they were 16,047; in 1914, they were 8,089 tons; and there has been expended on this project $22,796.86. Of this commerce, a large portion of it was timber, also fertilizer, fish, groceries, hardware, and lumber.

Another one of these small projects that discredit the bill is Swift Creek. I want to read just a little to place in the RECORD from the engineer's report.

Mr. NORRIS. The Senator did not state what State the river is in.

Mr. KENYON. It is in North Carolina.

The hoister *Contentnia* started work on this stream on June 4 and completed her work on June 15, having snagged the creek from the mouth to the fifteenth milepost, removing from the channel 21 snags, 10 stumps, 9 logs, 36 saw logs, and 3 trees, as well as cutting and hauling from the banks 10 overhanging or leaning trees. The cost being $292.32, gives a unit cost to the United States of $3.28 per obstruction, or threatened obstruction, removed.

Now as to the commerce. Upstream, there were 3,656 short tons; downstream, 11,996 short tons, of which 11,600 were wood, lumber, and timber, leaving only a few hundred tons of what you could call traffic that ordinarily needed water improvement, unless we are to say that the floating of logs and lumber is such

as to warrant the expenditure of sums of money. The Army engineers assigned last year $500 to Swift Creek.

Cape Fear River above and below Wilmington has so far cost the Government, I think, in the neighborhood of $7,000,000. The project in the upper part of the river is an 8-foot project. There has been some modification, I think from an 8-foot project to a 4-foot project and from $1,350,000 to $615,000. The river and harbor act of 1910 provided for 8 feet of navigation to cost $615,000 with $85,000 for maintenance, and I think that $85,000 is the amount that is carried in this bill.

Above Wilmington up to last year we had spent $183,000 on the Cape Fear River. Seventy thousand dollars was allotted for locks and dams, and $175,000 was allotted under the act of either October, 1914, or March 4, 1915.

Below Wilmington there was allotted $115,000 in the act of October, 1914, and $150,000 below Wilmington. I am not certain as to those figures. The engineers say that $10,000 can be profitably spent.

I want to read a little about this project for the RECORD. The Engineer's Office of the United States Army, November 24, 1911, Document No. 1356 of the Sixty-second Congress, third session, on page 5, set forth some matters concerning this northeast Cape Fear River:

Northeast Cape Fear River rises in the extreme northern part of Duplin County, flows in a general southerly direction through Pender and New Hanover Counties, and empties into the main Cape Fear River at Wilmington. It has a total length of about 130 miles—70 miles in a straight line. In its upper portion it is about 12 miles distant from the Atlantic Coast Line Railroad; during the lower 90 miles it is never more than 6 miles away from this railroad.

At ordinary low water a draft of 8 feet can be carried to Rocky Point Landing, 35 miles above Wilmington; 6 feet to Smiths Bridge, 52 miles above Wilmington; and 3 feet to Crooms Bridge, 56 miles above Wilmington. The next 24 miles—from Crooms Bridge to Chinquepin—is navigable for boats drawing 3 feet for about eight months during the year, when the water is up. For the next 8 miles—up to Hallsville—the stream is narrow, shallow, and crooked, and is suitable mainly for the use of the pole boats and rafts, but steamboats drawing 3 feet occasionally reach this point during high stages. Between Hallsville and Kornegays Bridge, 103 miles above Wilmington, it is only suitable for pole boats and rafts during freshet stages. The minimum low-water depth to Rocky Point Landing is 8 feet; to Smiths Bridge, 6 feet; to Crooms Bridge, 3 feet; to Chinquepin, less than 1 foot; to Hallsville, 0.5 foot; and to Kornegays Bridge, about 0.1 foot.

It may be the proper expenditure of public money to improve streams in order to get one-tenth of a foot of water, and it may not be.

I want to refer now to the Great Peedee River in South Carolina. I believe I have no more observations to make concerning the North Carolina projects at this time.

Mr. SIMMONS. The Senator has finished the discussion of the North Carolina items. I have no dispositon to interrupt him and I shall not interrupt him, but at some time later I shall probably take occasion to discuss the various items he has discussed to-day.

Mr. KENYON. I have no more references, I will say to the Senator, to the North Carolina items.

Mr. SIMMONS. I just stated that I understood the Senator had finished them.

Mr. KENYON. I have.

Mr. SIMMONS. I would not now interrupt the Senator for the purpose of answering any of his arguments as against these projects, but at some time hereafter I shall probably discuss them.

Mr. KENYON. I assumed that possibly the Senator wanted to go out, so I was simply comforting him by saying that I was through and that he need not wait.

Mr. SIMMONS. I have been listening to the Senator.

Mr. KENYON. The work of improvement, the Army engineers say—

has consisted in snagging and dredging with Government plant and hired labor. The river had been cleared of snags from the mouth to the Wilmington, Columbia & Augusta Railroad bridge (now the Atlantic Coast Line Railroad), 103 miles, and between that bridge and Cheraw, 167 miles, a 3½-foot channel had been formed; but as there has been no navigation lately above Caines Landing (mile 86), the upper portion of the river is blocked again. About 9 feet can be carried to Smiths Mills and about 3 feet to Caines Landing, the present head of navigation.

The total amount expended on existing, which is also the original, project up to June 30, 1914, was $328,609.25, of which $183,712.41 was for original work and $144,896.84 for maintenance.

Now, what about the commerce on this stream where we have spent practically $330,000? For the year 1912 it was 20,094 short tons; for 1913, 13,945 short tons; in 1914, 17,461 short tons, with an investment of $330,000. There were removed from this river during the year 161 trees, 220 logs, 166 stumps, 247 snags, a total of 794 obstructions. What a tremendous river that must be, Mr. President.

Another instance, in order to secure very little commerce almost negligible.

Now, with the apportionments that have been made, $340,000. Of course those things are funny, jokes. The taxpayers of this country seem to be a good deal of a joke anyhow, as far as Congress is concerned, like the ultimate consumers who are declared to be a myth. But the myth will become a reality one of these times.

Santee, Wateree, and Congeree Rivers. The bill carries $55,000 for this aggregation. I should like to have somebody defend the expenditure of public money on those rivers. We have expended on the Santee now, approximately—I may be a few thousand out of the way, but approximately—$272,245.74; we have expended on the Congeree $599,029.01; on the Wateree, that has not water in it except in its name, $195,000, or practically $1,000,000 on these three affiliated propositions. Now let us see what they are. As to the Santee, I read from the engineers' report, volume 2, page 2397, reports of 1915:

Snagging was begun August 14, 1914, by the U. S. snag boat *Wateree*, and up to and including October 10, 1914, there were removed from the upper end of the river, between miles 120 and 143, 2,374 obstructions from the channel and 188 trees from the banks of the river. The U. S. snag boat *Pedee* on one day removed 31 obstructions and 7 trees.

Some day for the snag boat *Peedee!* The appropriations for the Santee have been, according to that report, $393,727.35, including one transfer of allotment of $15,000.

What has been the commerce on this great stream of snags and stumps? Fifty-five thousand six hundred and forty-two short tons. That seems a good deal, but of that there were 31,286 tons of logs, 5,000 of cordwood, leaving less than 20,000 short tons of freight.

Vessels going on this stream during the year were three steamers of 141 and 133 and 344 net tons, small sailing vessels, tugs, and gasoline tugs. How they ever got around the snags and stumps is not recorded.

The Wateree work was done during nine months, and for three months, January, April, and June, the snag boat worked for short periods only. In July and January much loss of time was caused by high water. The snag boat was laid up January 27. There were 6,584 obstructions removed from the channel and 821 trees cut from the banks. Many of these obstructions were very large trees. The narrowness and crookedness of the river necessitated cleaning out the usual width of the stream and removal of overhanging trees on both banks.

On the Wateree we have appropriated $204,600.44. I will have a little more to say of the Wateree in a moment.

Congaree. The dredge *Congaree* started to work April, 1913, at Gills Creek Shoals and was continued until June 15. A short cut was made at Seegers Shoal and this dredge was sent to the Southern Railway bridge. The U. S. snag boat *Wateree* worked until August, 1913, when it was sent to the Santee River. Work was resumed but was interrupted by working five days at the locks on the gates. During November only five days were spent in snagging. The snag boat *Peedee* worked a few days in August near the mouth of the river.

On the Congaree we have appropriated, according to these reports, $618,000, and in 1914 there were carried 6,077 short tons of freight—another joke.

Again, as to the Santee, on page 565 of the Engineers' Report, volume 1, it is stated—and I am reading this so that it may be in the RECORD for the people in the future to read, after these streams have completely dried up and blown away:

This river was originally much obstructed throughout its length by snags, logs, and overhanging trees. The width ranged from 200 to 500 feet, and the least depth was 3 feet. Its bar entrance was narrow, crooked, and shifting, and so situated as to be very difficult and expensive to improve. It had less than 5 feet of depth at low tide. The river was navigated by several small steamers (drawing 4 feet or less) from the sea to the junction of the rivers and thence to Columbia on the Congaree or to Camden on the Wateree River.

The original estimated cost of the present project was $350,000.

Again, as to the Wateree. I have here the commercial statistics for the Wateree on which we have expended $200,000 and on which we ought to have some commerce. What was it?

Commercial statistics: None reported for the year. A few logs were floated, and some shingles and staves were hauled by a gasoline boat.

Mr. President, that is a good deal worse than anything New Jersey ever had. I am glad to have the Senator from New Jersey [Mr. MARTINE] in the chair now, where he can not say anything back. But think of it! That is one of the propositions for which money, collected by taxation, goes; and anybody who says anything about it is a crank, a reformer, an uplifter, and is putting himself up as the only honest person in the country, for it seems almost to be a breach of senatorial

dignity or courtesy to question appropriations of that character.

Then, again, in reference to the Congaree:

Prior to Federal improvement, begun in 1886, this stream had a low-water depth of 3 to 4 feet from its mouth to the railroad bridge at Columbia; thence 1 foot low-water depth 2 miles farther to its head. Navigation of the lower 47 miles was blocked at all stages of water by the South Carolina (now the Southern Railway Co.) railroad bridge, 5 miles from the mouth, and by sunken logs, snags, and overhanging trees. The navigation of the remaining 2 miles was prevented by swift currents and numerous rock ledges and bowlders.

The present project provided for a 4-foot navigation over the lower 47 miles, at a cost of $54,500. Then, subsequently, under the river and harbor act of March 3, 1899, it was raised to $250,000. The total expenditures on the existing, which was also the original, project were $599,029.01. No change in freight rates has been made by the railroads. Complaints made by the Columbia merchants of discrimination have caused the Interstate Commerce Commission to order a reduction in certain rates, thus giving Columbia some advantage of water transportation.

So there has been some little advantage in the Congaree which I have not heretofore noticed. Now, what was the commerce of this mighty river on which we have spent half a million dollars? Six thousand and seventy-seven short tons in 1914; 4,307 tons in 1912; 3,631 tons in 1913. I must say to the Senator from Colorado that there is an instance of where commerce has increased, just as if you had at first one ton and then subsequently two tons on one of the rivers, it would be a tremendous increase. It increased there from 3,631 tons to 6,077 tons.

Here is House Document No. 805, of the Sixty-fourth Congress, first session, on the Wateree River, submitting some examinations. The engineer, Gen. Kingman, says:

Up to June 30, 1915, the total expenditures amounted to $195,343.99, of which $60,000 had been applied to new work, and the balance, $135,343.99, to maintenance. Since 1900 rafting has been the only business on the river, and since 1908 this commerce has practically ceased. The district officer states that there appear to be no prospects of any increase of commerce in the near future, and he is of opinion that neither existing nor prospective conditions warrant continuation of this project by the United States. The division engineer and the Board of Engineers for Rivers and Harbors concur in this opinion.

Says Col. Biddle, of the Corps of Engineers:

2. The river is very crooked and its banks generally low and subject to overflow. There are no towns and but few habitations visible from the river, and aside from the small amount of remaining marketable timber there is little to suggest possible commerce.

* * * * * * *

4. The commerce, which has consisted almost entirely of rafted timber and its products, decreased from 93,000 tons in 1900 to 3,400 tons in 1909, since which time there has been practically none, although there has been an average annual expenditure of about $5,700 in the removal of obstructions.

* * * * * * *

5. It will be seen that the commerce on this river declined as better railroad facilities were afforded and with the cutting of the best timber in the immediate vicinity of the river. At present there is no commerce, and the condition of the adjacent country is such that but little, if any, can reasonably be expected.

I do not believe that anyone in this Chamber will get up here and defend these three projects. The Army engineers allotted in 1914 $30,000 to these projects and in 1915 they allotted $15,000 to them. Are we going to keep on pouring money into streams of that character, with a commerce that is nil absolutely as to one of them and nearly so as to the other two?

Mr. President, is the business of taxing the people of this country, who have to work and toil and save, a cloakroom joke or is it a serious matter?

I pass now to another trinity that is as nearly as bad. I refer to the Altamaha, the Oconee, and the Ocmulgee Rivers. I hardly know how to pronounce the names of those rivers.

Mr. THOMAS. I can inform the Senator as to their pronunciation, for my mother's plantation was on the Ocmulgee, and I was born on the Altamaha.

Mr. KENYON. I hesitate to say anything about them since I have learned that the Senator was born on one of these rivers. That is the greatest distinction, I am sure, that any of those rivers has. [Laughter.]

Mr. THOMAS. That is my reason for being here to hear what the Senator has to say.

Mr. KENYON. Possibly, then, I will try to be a little milder in what I have to say about those rivers.

Mr. THOMAS. I hope the Senator will not do that on my account.

Mr. KENYON. I have such great regard for the birthplace of the Senator from Colorado that I should not want to say anything hostile to it.

Mr. President, we have expended on these three streams up to 1914 approximately $878,000. The engineers allotted $40,000 in 1914 and $40,000 under the act of March, 1915, to these streams, making approximately $958,000.

Now, let us see what these streams are, and then I wish to read after that a most interesting statement about these streams taken from the House committee hearings. First, the Altamaha. The report of the Chief of Engineers, 1915, on page 1815 says:

The first project for this river was submitted November 27, 1881 (Annual Report for 1881, p. 1107), and the first appropriation for it was made by the river and harbor act of March 3, 1881. This project provided for securing a 3-foot channel, not less than 80 feet wide, by the excavation of rocks shoals, dredging, and the removal of snags and other obstructions, at an estimated cost of $60,000. * * * Under this project there were removed 3 rock shoals, 10 sand bars, numerous snags, sunken logs, stumps, and overhanging trees, and the river was straightened at several points by cut-offs.

Concerning the Oconee, I quote from the same report, as follows:

The first appropriation for this river was made by the river and harbor act of June 18, 1878, a project having been submitted January 29, 1875, to secure a low-water channel 3 feet in depth from the confluence of the Oconee and Ocmulgee Rivers to Milledgeville, by removing rock ledges, shoals, snags, logs, and overhanging trees, at an estimated cost of $10,150. (Annual Report for 1875, Part II, p. 44.) This estimate was increased to $15,000 in 1878 (Annual Report for 1878, p. 768); to $50,000 in 1880 (Annual Report for 1888, p. 1704); and in 1888 to $100,000, with $5,000 annually for maintenance. (Annual Report for 1888, p. 1171.) Operations were carried on at irregular intervals as funds permitted commencing in 1878. A small amount of work was done in June, 1888, near the mouth of the river. A specific appropriation of $1,500 in the river and harbor act of August 5, 1886, for improving the section of the river between Skull Shoals and the Georgia Railroad bridge was expended so as to give a least depth in that reach of 20 inches at extreme low water. In all, there were removed from the river 2,234 snags and logs, 1,552 overhanging trees, and 487 cubic yards of rock. There were also some small brush jetties built. The expenditures under this project amounted to $44,822.18.

The river and harbor act of September 19, 1890, adopted a project for establishing a navigable steamboat channel 3 feet deep at ordinary summer low water from Milledgeville to the forks, by removing rafts, rock shoals, and sand bars; enlarging portions of the river; revetting caving banks; closing incipient cut-offs; removing snags and logs from the channel, and overhanging trees from the bank of the stream, at an estimated cost of $171,000; with from $3,000 to $5,000 for annual maintenance. (H. Doc. No. 211, 51st Cong., 1st sess., reprinted without maps or profile in Annual Report for 1890, p. 1430.) Under this project numerous logs, snags, stumps, bowlders, and overhanging trees were removed; several threatened cut-offs closed and others opened; 6 training dikes; 1 spur dam, and 900 feet of shore protection built; 23 rock shoals and several sand shoals removed, all below Milledgeville.

As to the Ocmulgee the report says:

The first appropriation for the Ocmulgee River was made by the river and harbor act of August 14, 1876, which adopted a project for a 4-foot channel 80 feet wide from the forks to Macon at a cost estimated at $112,480. (Annual Report for 1875, Pt. II, p. 671.) This channel was to be obtained by the excavation of sand and rock shoals and the removal of sunken rafts, snags, logs, overhanging trees, and other obstructions. Under this project there were removed from the river 7,705 snags and stumps, 13,144 overhanging trees, 359 cubic yards of rock, and 1,869 cubic yards of earth; 112 logs were cut up on the bank, 801 trees were girdled, 2 jetties were built at Tillmans Bar, 2 snag dams were built at Ashleys Landing and 1 at Indian Timber Landing.

* * * * * * *

The river and harbor act of September 19, 1890, adopted a project establishing a navigable steamboat channel 3 feet deep at ordinary summer low water from the forks to Macon at an estimated cost of $210,000 for original work and an annual cost of maintenance of from $3,000 to $5,000. (H. Doc. No. 215, 51st Cong., 1st sess., reprinted without maps in Annual Report for 1890, p. 1455.) The channel was to be obtained by removing rock shoals and sand bars, closing incipient cut-offs, revetting caving banks, removing snags and logs from the channel and overhanging trees from the banks of the stream.

Under this project there were removed from the channel 27,332 snags, logs, and stumps, 8 wrecks, and 2 old bridge piers; 1,722 trees were girdled and 121,143 overhanging trees, saplings, and logs were cut on the banks; 12 spur dikes were built at Tillmans Bar; 3 spur dikes aggregating 400 feet in length were built at Macon Bar; 1 spur dike was repaired; Atwoods Jetty was extended 155 feet; training dikes were built in the vicinity of Macon with an aggregate length of 8,089 feet—

And so forth.

The appropriations, I think, covering all of these streams up to March 4, 1915, and, including the allotment made then, amounted to $259,951.35. As to the commercial statistics the report of the Chief of Engineers states:

There is in regular operation on this river one steamboat, which made during the year 65 trips from Doctortown to the forks, a distance of 77 miles. The commerce for the calendar year 1914 was as follows: * * * Total by boats, 13,666 short tons.

To which was added "lumber rafted, 89,640 short tons," making a total, with the lumber rafted, of 103,306 short tons.

The appropriation that I gave was simply as to the one river. As to the next one, the appropriations have been $286,515.70, and the commerce of that river is set forth on page 2425 of volume 2. A steamboat made about 85 trips between the Cen-

tral of Georgia Railroad and Darien, a distance of 244 miles. The commerce for the calendar year 1914 was 22,542 short tons; lumber rafted, 15,700 tons. In the case of the other river, I have heretofore given the appropriations.

Now, Mr. President, I want to read a little from the hearings of the House committee on these streams—these streams with very little commerce, as has been shown, outside of lumber. Here is Mr. Walter De Four, who appears before the House committee at page 7 of division 7. This book is not indexed or consecutively paged. It runs by divisions. I give those pages in order to assist the reporter.

Speaking of these streams, he said:

The shallow water made it necessary for us to get together all the information that it was possible to get and then, in addition to all the information we could get from the outside, to apply a little ingenuity of our own and develop a boat about which Mr. Long will tell you later on—a boat with which we are able to navigate the river. We can now navigate this river, which is something we were never able to do before, notwithstanding the fact that the people of Macon had spent more than $100,000 in the building of boats. This $100,000 to which I have referred was spent by the people of Macon mainly in building boats along the old lines. After spending that amount of money we saw that we were going in the wrong direction and that in order to navigate the shallow river we would have to build boats on different lines, on different principles, on principles other than those that had been governing the construction of boats heretofore. Realizing this, we have done that; we have a boat now on the river that will carry 100 tons of freight and draw, probably, less than 3 feet of water. That boat is now in actual operation, Mr. Chairman. When we appeared here in 1914 we promised to build a boat and put it in operation on the river if given the necessary appropriation. We did not give up, but we have built the boat. * * * In building this first boat and operating it since July 20 last, we have learned more about navigation than we knew when we undertook to build that boat.

* * * * * * *

We desire that the committee be placed in full possession of all these facts, because when this second boat is built, with the appropriation that we have had heretofore, we will be enabled to get along, but we can not make the time and get the transportation or tonnage that we could if the appropriation was increased.

Certainly not; but there is encouragement in the fact that there is to be a second boat built by these people.

Mr. Long said, speaking of their boat:

We therefore determined to build a steel boat. That was the first thing we arrived at. The second question was how large a boat should we build and how should that boat be equipped, and so forth. That required considerable investigation, because we did not want to make a mistake, and we have not made a mistake. We finally settled upon a steel boat 120 feet long and 24 feet wide and 5 feet deep, built throughout of steel. There is not a piece of wood in this boat as big as your lead pencil, except what went into the screens to keep the mosquitoes from biting the crew and what went into the construction of the ice box. I have a photoghaphic history of the construction, and I will be glad to pass these photographs around to the different members of the committee in order that they may see just what we are doing.

I recommend the screens to the distinguished Senator from New Jersey [Mr. MARTINE].

He says:

We put an electric plant on this boat.

Listen to this great work of navigation, for which we are spending hundreds of thousands of dollars:

We can blow a horn—

There never was anybody advocating these appropriations who could not blow a horn for them—

or rather—

he says—

a whistle by electricity, and do various other things. We have a number of conveniences and so on. Our boat carries 83 tons on a 30-inch draft; 160 tons on 48 inches. We can load that boat down as low as 54 inches. When those photographs get back to me I will go into detail, because there are some points that are very important. It requires a crew of 10 men on this boat to run it night and day. We do run it night and day. By the way, it is the first boat that was ever installed on that system of rivers that runs night and day. It is the first boat that ever made the trip between Hawkinsville and Macon in less than 40 hours' running time.

Some boat, that! One of the members of the committee asked Mr. Long:

As a general proposition, was it not unwise to start in a 36-inch river with a 30-inch boat?

The witness replied:

I am very glad to answer that question. I will say that we were very cautious.

We must have been.

When we reached Brunswick, knowing our capacity, we met one of the chief assistants of the engineer or the division engineer. We told him about the freight that we had waiting for us, and asked his judgment as to whether we should take it on or leave part of it there.

There is another part of the description of that boat that I should like to find. Mr. Long further says, in describing this wonderful boat:

The propellers are all submerged. Say, for instance, that you are going around a bend. It is practically impossible for the stern to follow the bow.

[Laughter.]

Why, Mr. President, that is a serious thing with a boat. But these people are not dismayed by the fact that the stern of their boat will not follow the bow around the bends of that mighty river.

This part here [indicating] comes in contact with a side obstruction, and it is this that gives us trouble. We have no trouble navigating straight runs, because the bow is of sufficient strength, if it comes in contact with an obstruction, to force it out of the way, but because the stern can not follow the bow it is the cause of practically all the trouble we have with these boats.

That boat needs a surgical operation. [Laughter.]

Now, is not that ridiculous? We laugh about it, but it is a fine way to spend public money.

The Chairman asked Mr. Long:

Suppose we appropriate $40,000. Would that give you all-year-around navigation for boats now being constructed for use on the river?

Mr. LONG. I rather think it would, Mr. Chairman, but $40,000 is not going to be sufficient, if we may judge by the past, to make any permanent improvement at all, and I do not believe it will be sufficient to keep the river clean, because we found that river in a horrible condition.

Mr. Waterman also submits some very interesting matters. He says:

As Mr. Long has suggested, even now with this ordinary appropriation, as it has been for the last two years, so much will be spent for a new boat that it will do us very little good. It reminds me of my boyhood days, when we used to go to the branch and stick our toes down in the mud and pour water in to fill up the holes. Most of these improvements on the river have been made in that way. So much has been spent in equipment that after this money was expended there was just a small amount left that could go for small improvements, and this water has come up and filled the improvements with sand. These boats have been tied up, and they are practically useless to-day.

Mr. SMALL. In view of the fact that the Chief of Engineers recommends only $43,000 and the committee is in the habit of following or not exceeding the estimate of the Chief of Engineers, how are you going to meet that appropriation?

Mr. Weatherly, on this same proposition, says, on page 25:

I do not think our present method of improving our rivers and of appropriating money is the best method, by any means. I do not agree that the method of appropriating just a small amount for each river for each year is the best one. I do believe that a large bond issue, to be applied to a thoroughly mapped out scheme, is a proper one.

He says the Government should issue $2,000,000,000 worth of bonds.

A Member of Congress before that committee says:

We have not stopped spending money. We have not stopped in our exertions. We have gone back and raised more money, some $80,000, and put it into the hands of this company. We bought a boat and tried to navigate the river, and we came here to tell the committee that the people of Macon and this section of the country have made up their minds to build boats that can navigate that river. They have built a boat that will navigate it and they have another one under construction.

Here is a very interesting telegram from the secretary of the Dublin Chamber of Commerce, Mr. Charles P. Caldwell, in relation to these rivers:

Re Altamaha system appropriation, you have detailed explanation of our position as far as those who can and should be served by the Government under this enterprise are concerned. A local boat captain here with 100 pounds of dynamite has effected as much real improvement on our river as has ever come out of our share of the appropriation for the Oconee. Present practice is for a Savannah crew to go to Dublin once or twice a year on high water. This is exactly the time when they can not accomplish anything. Instead of this desultory work our full share of the appropriation for the Oconee should be spent through a substation, under Savannah office, located here in Dublin, with equipment working systematically up and down the river, particularly at low-water stages, when something worth while can be done. Our local boat lines will cooperate liberally with such a plant, depending upon you to defend our rights.

Then there is a letter to the Congressman as to what is necessary to put these rivers in condition. Here are some extracts from it, appearing on page 33:

First. Remove leaning trees at Toms Point. Stop up old suck with a jetty 100 feet long.

Second. Snag the river from this point to Parsons Shoals.

Third. Remove rocks on east side of river in the gap at this point.

Fourth. Snag from this point to Deep Creek; remove the rock on the point and clean out the gap at this point.

Fifth. Clean out the bight at Gum Spring, also Dry Creek bight, and the one bight below Gum Springs, and snag from this point to the boat yard.

Sixth. Clean out the gaps above the boat yard and one below; also clean old Blackshears Ferry Gap.
Seventh. Remove rock at upper end of Car Shoals and clean out all the gaps in the shoals to Dublin.

It does not take much to make a river out of this. [Laughter.]

Eighth. Clean out the river at Dublin.
Ninth. Complete the unfinished job of removing rock at Rattle Snakes Shoals.
Tenth. Build a jetty at Buzzard Bar 400 feet long.
Eleventh. Extend the jetty at Fish Trap Cut and snag to Troup Spring Lake.
Twelfth. Take the rock out of the middle of the river at this point.
Thirteenth. Snag from this point to just below Ann Smith Landing. Build a jetty 400 feet long at this point.
Fourteenth. Snag the river from this point to B. C. Bluff; fill up jetties at this point.

This is a bluff, all right.

Fifteenth. Snag river from this point to Rassle Jack, then put a jetty across Old River.
Sixteenth. Build a jetty at Troups Ferry.

There is nothing much to do to make a river out of this.

Seventeenth. Build a jetty at the bight just below Loose Bluff.
Eighteenth. Clean the snags to the bight just above Silver Bluff. Build a jetty at this bight.
Nineteenth. Clean snags from this point to the mouth of Old River; stop up Old River with jetties, then snag to Stalings Bluffs, and some snagging to be done between this point and Frying Pan.
Twentieth. Build a jetty across the suck at this point.
Twenty-first. Build a jetty across Old River and snag to Bells Ferry; fill up the old jetties at this point.
Estimated cost of this work, $50,000.

* * * * * * *

It seems to me that a light barge with proper machinery on it would accomplish much more for the river, as it could be handled during low-water periods.
Trusting that you may be able to do something for us, and wishing you a merry Christmas and a happy New Year, I am,
Yours, truly.

That is a fine proposition! I hope somebody will defend it before we vote any more money in addition to the million dollars of waste that has already occurred.

The Chattahoochee River: We have expended over a million dollars on this stream. The project is about 90 per cent completed. The commerce has gone from 100,122 tons in 1912 to 93,442 tons in 1914. There is apparently some considerable commerce on that river.

I think I will not spend any time on the Oklawaha River. It carries a very small appropriation in this bill. It carried some $733,000 in one of the former bills. It is a proposition that has always seemed to me absolutely indefensible, but probably to others it seemed to be perfectly proper.

The Orange River is another of the smaller propositions. I want to put in the RECORD just a few words about that.

Before improvement the river was obstructed by snags and overhanging trees and by nine shoals, all of small extent, consisting of sand and mud, with some bowlders and loose rock. The limiting depth over the shoals was 2½ feet, though elsewhere depths of from 6 to 21 feet were found. The width of the stream was about 90 feet at its mouth and 50 feet at Buckingham. The usable width of the available channel was about 30 feet. The head of navigation is the iron bridge at Buckingham, 5.7 miles above the mouth. The length of the navigable portion of the river is 5.7 miles.

There appears to be considerable water, however, on that river. During the fiscal year snags and overhanging trees were removed, and cuts made through obstructive shoals, making a continuous channel 4 feet deep, 50 feet wide for the lower 2½ miles and 40 feet wide in the upper 3 miles, where the banks limit the width to about 40 feet.

The commerce for the year 1912 was 9,930 tons; for 1913, 13,196 tons; for 1914, 4,100 tons. Of the 4,100 short tons, citrus fruits and fertilizer were the main products. It is one of the very small projects. If we are to go into the small-project proposition it has as much merit as many, many others in the bill.

The Anclote River in Florida received an appropriation in this bill. It is 3½ miles long. Outside of lumber the commerce is 2,470 tons. Tarpon Springs is located on this river. It is the great sponge center, perhaps, of the whole country, and we have spent on it $56,725. I believe that a transfer of fund was made last year or else an allotment of about $5,000 more.

The reports of the Army engineers give one launch as the number of regular steamers in the trade.

Crystal River, Fla., I have before referred to, and I will not take the time to do so again.

Withlacoochee River: There are three launches in this stream—4 miles. We have spent $339,000. Commerce seems to be largely for a phosphate establishment. The commerce fell off something like 50 per cent last year, one concern furnishing the bulk of the commerce. The tons last year were 96,778.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). Does the Senator from Iowa yield to the Senator from Florida?

Mr. KENYON. I do.

Mr. FLETCHER. If the Senator will permit me, I desire to state that a large portion of the tonnage on this river was phosphate rock, but by reason of the falling off of shipments of the rock the tonnage has decreased from 1914; and this decrease in the shipment of phosphate rock was due to the war, because it had previously been largely sold in Germany. That has been the case with all phosphate shipments from Florida since the war. The freight rates have been practically prohibitory, in the first place, and, in the next place, the market has been largely closed because Germany was the chief purchaser abroad.

Mr. KENYON. I suppose everything that happens can be blamed on the war.

Mr. FLETCHER. It is not a question of blaming anything. The statement I make is a statement of fact. It is not an excuse that I am making. I am simply stating the fact. The Senator will find in the report, the official statement, on page 189, the following:

The large decrease in commerce for the year was due to the suspension of phosphate shipments in consequence of the European war.

Mr. KENYON. I know that is in the report, and I have no reason to question it. This project has the advantage of most of the other projects in having some real excuse for the decrease of commerce. The engineers say the improvement of the upper river has no appreciable effect on freight rates, and other observations which they make I will not take the time to read.

An interesting proposition is the appropriations for removing water hyacinths. We have in this bill two of these propositions. I wish that we could in some way devise a plan whereby we might use these water hyacinths for the free bulb or free seed distribution. It seems strange that it may be absolutely necessary to spend large amounts of money to get hyacinths out of streams in order to make them navigable. I assume that the Army engineers, however, consider that that is important.

The Apalachicola River is another one of these medium streams, the improvement of which is justifiable if improvements of the smaller streams are to be carried on. We have appropriated some $226,000 for that stream. The commerce downstream, according to the engineer's last report, was 67,000 tons, of which 22,000 tons were logs and lumber. This bill carries $6,000 for that stream. It is a stream that is badly obstructed by logs, snags, trees, and other matters. During the year 1914 there were removed in the way of obstructions 431 snags from the channel, 139 logs, 537 trees, and 96 overhanging trees. The appropriations have run $226,250. I have given the freight traffic as reported by the engineers.

The Choctawhatchee River is one that I hope may be explained and defended by somebody. It seems to me to be a good deal of a farce to keep on appropriating money for a river of this character. The bill carries $20,000. I want to read from parts of the engineers' reports and have them in the RECORD.

For the year 1914 there were removed from the channel snags above Geneva 3,818, and below 860; saw logs above Geneva 775, below Geneva 573; trees above Geneva 2,259, below Geneva 814; stumps, 41 above Geneva and 42 below. Then, they removed from the banks trees and brush and wood.

We have altogether either appropriated or expended or had alloted for that stream $278,208.12. For the year 1914 the traffic upstream was 5,994 tons and downstream 19,446 tons, of which lumber and timber constituted some 8,000 tons, leaving about 11,000 tons of what could be called commercial traffic.

I do not know whether this results in any regulation of freight rates. I think the engineers' reports do not state it, but the expenditure of such a sum of money for the development of such a commerce can not be defended, in my judgment.

Mr. FLETCHER. Will the Senator allow me?

Mr. KENYON. I yield to the Senator.

Mr. FLETCHER. I call the Senator's attention to the report, which says:

At present, in connection was the Holmes River, it affords transportation to a large section of Florida without other means. Its restoration to good condition will probably result in the lowering of freight rates by rail to Geneva.

Mr. KENYON. It will probably result?

Mr. FLETCHER. Yes.

Mr. KENYON. It is always the prediction, Mr. President. But this project has been established for some time. I do not remember the exact year when it was started. We have certainly spent enough money to commence pretty soon to see some return in the regulation of freight rates.

The Alabama River. The appropriations for that river have reached $1,289,000. This bill calls for $100,000 more. Excluding logs and timber, there are about 41,000 tons of commerce. Previous project carried $419,445.69, the present one carrying $720,895.50. Commerce has gone down from 153,295 tons in 1913 to 112,345 tons in 1914. Fifty thousand dollars was allotted in 1914 by the Army engineers and $75,000 in 1915. So we have outside of logs and timber and the things that float without any particular work a very small commerce.

The Coosa River is a project upon which a large amount of money has been expended, a project of some eight locks and dams. The engineers tell us now that one of the dams is about 99 per cent completed. I assume that it would be rather wasteful not to complete that particular project, if anything ever was going to be done. The bill carries $98,000 for the Coosa River. We have expended heretofore $2,482,252. Forty thousand dollars was allotted to this stream by the engineers in 1914 and $186,000 in 1915. The scheme involves some $10,000,000 before it is completed.

The 1912 commerce was reduced about 45 per cent up to 1914. Here is a river improvement commenced in 1876 where the commerce, exclusive of timber and those matters, is less than 28,000 tons in 1914, and the Engineer's Report for 1915, on page 749, states that the decrease from last year is probably permanent. Only one boat is operating on this improvement, and that is not proving a paying investment. We have expended $2,500,000 on this proposition, and are going on now until we spend $10,000,000 on it.

In the House hearings it was stated by witnesses that the commerce on this stream for the calendar year 1914 consisted principally of fertilizers, general merchandise, timber products, and groceries, amounting to 28,751 short tons. The report does say that freight rates have been reduced for navigation from Rome down to Lock and Dam No. 4, and the same argument is presented that the commerce has been reduced on account of the war. But Maj. Brown, on page 8 of subdivision 22 of the hearings, throws some rather interesting light upon that subject and upon the question as to whether or not the people of the vicinity of those streams are supporting river navigation. He says:

> That little boat is only a gasoline affair, and although it may be carrying general commerce now, it was not at the time this report was submitted. Referring to the regular commercial boat, I have talked with the owners of the boat line a great deal. They were very much discouraged at the prospects. They say that the merchants at Gadsden and Rome are not supporting them as they should and that business is constantly falling off. They also have trouble in getting through the shoals. There are some bad shoals which are now under improvement.

The chairman asked him:

> You do not think the possibility—

That is, of the development of commerce—

> is very flattering now?
> Maj. BROWN. It did not look very flattering to me. Of course, there is at present something like $1,500,000 worth of local commerce, but it will always be of that local character.

So, Mr. President, we may well pause, it seems to me, and consider whether, having spent two and a half million dollars and a development of practically no commerce, we are going on with a scheme that involves $10,000,000.

I now pass for a moment to the Tombigbee and Warrior Rivers. We have spent $9,901,295 on these. There are only a few tons of commerce outside of timber; 56,000 tons in 1914, outside of timber, was averaged at the 17 locks, 95 per cent of which was coal.

The Black Warrior is not in this bill, and I only refer to it as one of the wasteful projects that has been passed by Congress, carrying nearly $10,000,000. It has a very small commerce.

On the Tombigbee we have spent $367,858.22. The commerce above Demopolis, according to the engineer's last report, was 29,000 tons, of which 21,000 tons was lumber and logs; commerce below, 299,000 tons, over 100,000 tons of which was logs.

I place in the RECORD some statistics as to another proposition covered in this bill—Pearl River and East Pearl River. The engineer's reports tell us as to the Pearl River below Rockford, Miss., that during the fiscal year ending June 30, 1915, the United States snag boat carried on snagging operations, struck a snag and sank, but a bank party was clearing the banks of overhanging trees; and overhanging trees felled and cut up numbered 1,185; logs cut up or stumps leveled on the banks, 1,869; stumps removed from river, 1,276; snags removed from the river, 5,457; logs removed from the river, 1,747.

Our appropriations have been something like $311,000. The project is about 43 per cent completed. A maximum channel 3 feet deep and 50 feet wide at low water now exists for 145 miles above the mouth of the river; and thence to Columbia, a distance of 10 miles, the maximum low-water depth is 1½ feet.

What about the commerce? There has been considerable commerce. In 1912, 191,173 short tons had decreased in 1914 to 111,497 short tons, the decrease being due principally to the lumber market. The Pearl River commerce is, I think, shown by the reports as being entirely timber, logs, and lumber, and not being rafted for over 1 or 2 miles, and the Government spends its time and its money in taking out all the snags in this river.

The complaints or criticism on Pearl River do not apply in the same way to the East Pearl River, which seems to have considerable commerce, but not very much outside of the question of lumber.

I do not believe, Mr. President, that any business man handling his own money would feel justified in spending it on that kind of a proposition.

I had intended to comment a little on the Yazoo River, but will not do so, as I should like to get through.

Bear Creek merely exhibits how things have been done. It is a very small affair. There is no local cooperation. It is proposed to remove snags and shoals and leaning trees. There was no commerce in 1913 and no commerce in 1914 and 187 tons in 1915. Freight is carried on in private gasoline launches by the owners, and they keep no records of the reports.

I take up for a moment the Big Sunflower proposition. On the previous project we have spent $224,000 and on the present project $149,000. The estimate to complete it is some $500,000. The commerce, except lumber, is about 16,000 short tons. But this work, according to the Army engineers, has reduced freight rates about 33⅓ per cent. So it has accomplished something locally for the good of the community.

The amount expended on all projects connected with this, including maintenance, was $472,749.27.

Another appropriation in the bill to get rid of water hyacinths I pass.

Mr. President, I will not be able, I think, to finish what I have to say to-night. I had hoped to finish, but I find myself very weary. The Senator from Illinois [Mr. SHERMAN] desires to occupy the floor for some time, and I think, therefore, I will stop at this point and resume my remarks at some later time.

*Friday, May 12, 1916.*

Mr. KENYON. Mr. President, I think the Senator from Illinois [Mr. SHERMAN] and the Senator from Iowa are not particularly to be criticized for discussing somewhat deliberately this important bill. It is a bill that ought to be discussed thoroughly, possibly not item by item, but at least items which we find objection to, and while that discussion we realize does not change any vote in this Chamber, and receives scarcely any attention in this Chamber, it is the discussion of matters that we believe the people of the country will pay some attention to.

Nor do I think we should be criticized for occupying the time of the Senate, because the Senate apparently has nothing of importance in the way of business to transact. The President on his western trip told the people that he wanted them to vocalize. We are trying to do that in a mild way. While the President urged upon the people that they should try and stimulate Congress in the way of preparedness, we find ourselves two and a half months after that time, with troubles on our border and other matters of an acute nature, absolutely doing nothing. So long as the time is not to be occupied in these important things it is well to discuss this bill very thoroughly. That we are trying to do with the hope that when the bill is put to a square vote with a motion to recommit it, or on a substitute for one-half, we may have interested enough Senators to make a fairly respectable showing on those propositions.

I wish to put in the RECORD some figures which I referred to the other day, but I did not very accurately state them. Those were the appropriations in the Sixty-first, Sixty-second, and Sixty-third Congresses, showing, as the Senator from Illinois has referred to the fact, that from the expenditures of the Sixty-first Congress of $1,956,125,776.99, came in the Sixty-third Congress to $2,231,055,150.57. I ask permission to insert that table for these three Congresses in the RECORD without reading.

The PRESIDING OFFICER (Mr. HUSTING in the chair). Without objection, it is so ordered.

The table referred to is as follows:

*Appropriations—fiscal years 1875 to 1916, inclusive.*

[Prepared by the clerk to the Committees on Appropriations of the Senate and House of Representatives.]

[a] The Army appropriation act for 1878 was passed during the special session of the Forty-fifth Congress, but for purposes of comparison is included under appropriations by the Forty-fourth Congress.

[b] The Army and legislative appropriation acts for 1880 were passed during the special session of the Forty-sixth Congress, but for purposes of comparison are included under appropriations by the Forty-fifth Congress.

[c] The agricultural, Indian, and sundry civil appropriation acts for 1898 and the general deficiency appropriation act for 1897 and prior years were passed during the special session of the Fifty-fifth Congress, but for purposes of comparison are included under appropriations by the Fifty-fourth Congress.

[d] There is in the total of appropriations for 1910 the sum of $11,261,410.76 passed during the first or extra session of the Sixty-first Congress as deficiency appropriations, including $10,000,000 for the Thirteenth Census for 1910, which failed to be appropriated at the last session of the Sixtieth Congress.

[e] There is in the total of appropriations for the fiscal year 1912 the sum of $451,852.20 passed during the first or extra session of the Sixty-second Congress. Of this amount $301,852.20 constitute deficiencies and $150,000 is a miscellaneous item.

[f] There is in the total of appropriations for 1914 the sum of $6,327,837.42 passed during the first or extra session of the Sixty-third Congress. Of this amount $5,335,837.42 constitute deficiencies and $992,000 are miscellaneous items.

[g] The Indian appropriation bill for 1914 failed of final agreement between the House and Senate at the third and last session of the Sixty-second Congress and the sundry civil bill for 1914 was vetoed by the President on Mar. 4, 1913. Both were passed at the first or extra session of the Sixty-third Congress, but for purposes of comparison are included under appropriations by the Sixty-second Congress.

[h] The Indian and Post Office appropriation bills failed of enactment at the third and final session of the Sixty-third Congress. A separate joint resolution was passed for each service continuing and making available for 1916 the appropriations made for the respective services for 1915 not to exceed in the aggregate the respective totals appropriated for 1915.

[1] Fifty per centum of the amounts appropriated for the District of Columbia are paid by the United States, except the amount for the water department, which is paid out of the revenues of that department, and was first included in the bill for 1883.

[2] The appropriations for the Postal Service are paid out of the postal revenues, and any deficiency in the revenues is provided for out of the Treasury of the United States.

[3] Includes award of $1,929,819 to British subjects under treaty of May 8, 1871.

[4] Includes $4,000,000 for extraordinary expenses of the naval service, appropriated by special act.

[5] Includes $1,634,700 in special act to increase the Cavalry force of the United States to aid in suppressing Indian hostilities.

[6] Includes $5,500,000 for Halifax fishery award.

[7] Includes $26,887,200 in special act for pension arrears.

[8] Includes $2,090,000 by special act for expenses of the United States courts omitted from the sundry civil act for 1880.

[9] Prior to 1881 appropriations for the Agricultural Department were provided for in the legislative acts.

[10] Includes $9,240,000 by special act for arrears and pension deficiencies for 1880.

[11] Includes $1,250,000 for additional Postal (star route) Service.

[12] Includes $18,282,306.68, pension deficiencies for 1881.

[13] Includes $16,000,000 by special act for pension deficiencies for 1882.

[14] In addition to this amount for pensions for 1884, and unexpended balance of about $38,000,000 was reappropriated and made available for that fiscal year.

[15] In addition to this amount for pensions for 1885, an unexpended balance of about $66,000,000 was reappropriated and made available for that fiscal year.

[16] Includes the following items: Tobacco-tax rebate, $3,791,965; Mississippi River improvements, $1,000,000; New Orleans Exposition, $1,000,000; District of Columbia sewerage, $500,000; and Ohio River overflow sufferers, $500,000.

[17] Includes $3,500,000 by special act for "increase of the Navy."

[18] Includes $6,000,000 by special act for pension deficiencies for 1886.

[19] Includes $5,769,015.28 for payment of Alabama claims awards.

[20] Includes $6,900,000 for Mexican War pensions, appropriated by special act.

[21] Includes $2,858,798.62 for payment of judgment of Court of Claims in favor of the Choctaw Nation.

[22] Includes $3,500,000, pension deficiencies for 1888, appropriated by special act.

[23] This is the aggregate amount of the deficiency acts passed during the first session of the Fiftieth Congress, exclusive of $3,500,000 for pensions. No deficiency act was passed during the second session of the Forty-ninth Congress.

[24] Includes the following: Public buildings, $4,727,000; establishing quarantine stations, $542,500; and procuring division of Sioux Reservation, $1,018,000.

[25] Includes $1,912,942.02 for payment to Seminole Indians for lands.

[26] Includes $8,000,000 in general deficiency act for pension deficiencies for 1889.

[27] Includes the following: Milwaukee public building, $1,200,000; Omaha public building, $600,000; payment to Creek Indians for land, $2,280,857.10; expense of Eleventh Census, $1,000,000; and to procure division of Sioux Reservation, $3,153,200.

[28] Includes $1,000,000 appropriated by joint resolution Sept. 29, 1890, for nickel ore or nickel matte for naval purposes.

[29] Includes $25,321,907.35, pension deficiencies for 1890.

[30] Includes $1,000,000 for procuring farm-mortgage and other statistics, $1,364,000 for aid to agricultural colleges, $1,200,000 for Rock Creek Park, and $598,085.81 for additional clerical force for Pension and other offices.

[31] Includes $889,753.50 for the Weather Bureau, heretofore in the sundry civil act under the War Department.

[32] Includes special appropriations for ratifying agreements with various Indian tribes, together with a payment of $2,991,450 to the Choctaw and Chickasaw Nations of Indians; in all, $8,617,740.75.

[33] Includes $1,000,000 by deficiency act to carry on work on new naval vessels.

[34] Includes $29,335,598.34, pension deficiencies for 1891.

[35] No general river and harbor appropriation act was passed for 1892, but an appropriation of $1,000,000 for the improvement of the Mississippi River was made by joint resolution approved Mar. 3, 1891, and appropriations amounting to $1,951,200 for the improvement of certain harbors and rivers under contracts were included in the sundry civil act, making in all for 1892, $2,951,200.

[36] Includes $7,674,332, pension deficiencies for 1892.

[37] Includes $814,000 in the sundry civil act for harbor and river contract work.

[38] Includes $14,149,724.85, pension deficiencies for 1893.

[39] No general river and harbor appropriation act was passed for 1894, but appropriations amounting to $14,166,153 for the improvement of certain harbors and rivers, under contracts, were included in the sundry civil act.

[40] Includes $1,330,666.67 to be placed to the credit of certain Indians for the face value of certain nonpaying State bonds or stocks, including certain abstracted bonds described on pages 153 and 154 of the Book of Estimates for 1895, and which become the property of the United States; also $2,472,697 to carry out agreements with various Indian tribes ratified by the Indian appropriation act for 1895.

[41] Includes $8,400,000 for harbor and river contract work appropriated by the sundry civil act.

[Footnotes—Continued.]

[42] No general river and harbor appropriation act was passed for 1896, but appropriations amounting to $11,462,115 for the improvement of certain harbors and rivers, under contracts, were included in the sundry civil act.

[43] Includes $3,284,597, appropriated by the sundry civil act, and $200,000, appropriated by a deficiency act, for harbor and river contract work.

[44] No general river and harbor appropriation act was passed for 1898, but the sum of $18,578,412.91 was appropriated in the sundry civil act to carry out contracts authorized by law, and $543,000 additional for river and harbor improvements for 1898; in all, $19,121,412.91. The general deficiency act also appropriated $1,200,000 to carry out contracts authorized by law and $11,000 additional for river and harbor improvements, and the joint resolution of Mar. 31, 1897, appropriated $250,000 for the improvement of the Mississippi River to carry out contracts authorized by law, and the joint resolution of Feb. 26, 1897, appropriated $250,000 for closing the crevasse in Pass a Loutre, an outlet of the Mississippi River, making in all for river and harbor improvements in sundry civil act for 1898, in general deficiency act, and in joint resolutions, $20,832,412.91.

[45] Includes $8,070,872.46, pension deficiencies for 1898.

[46] No general river and harbor appropriation act was passed for 1899, but the sum of $14,031,613.56 was appropriated in the sundry civil act to carry out contracts authorized by law, and $235,836 additional, and $360,000 in the general deficiency act, for river and harbor improvements for 1899; in all, $14,627,449.56.

[47] Includes $329,661,795.77 on account of expenses of War with Spain.

[48] Includes $361,879,927.26 on account of expenses of War with Spain.

[49] Includes $8,918,197, appropriated by the sundry civil act, and $100,000, appropriated by a deficiency act, for harbor and river contract work.

[50] Includes $15,140,464.70 on account of the Military Establishment.

[51] Includes $20,000,000 to carry out the obligations of the treaty between the United States and Spain concluded Dec. 10, 1898, and $3,146,143.97 for payment of claims under the Bowman and Tucker Acts and French spoliation and other claims.

[52] Includes $12,200,605.75 appropriated in the sundry civil act to carry out contracts authorized by law for harbor and river improvements for 1901, and $3,500,000 additional for harbor and river improvements for 1901, made in said act.

[53] No general river and harbor appropriation act was passed for 1902, but appropriations amounting to $7,046,623 for the improvement of certain harbors and rivers under contracts, were included in the sundry civil act.

[54] Includes $1,500,000 for payment to Baltimore & Ohio Railroad Co. toward cost of elimination of grade crossings in Washington, D. C., and $5,000,000 in aid of the Louisiana Purchase Exposition.

[55] Includes $5,768,757.50 for harbor and river contract work appropriated in sundry civil act.

[56] Includes $3,218,586.91 for refunding to States expenses incurred in raising volunteers, $1,860,000 for collecting revenue from customs, $3,150,000 for rebate of tobacco tax, and $4,000,000 for armor and armament of new ships of the Navy.

[57] Includes $50,130,000 for Isthmian Canal.

[58] No general river and harbor appropriation act was passed for 1904, but appropriations amounting to $20,233,150 for the improvement of certain harbors and rivers, under contracts, were included in the sundry civil act.

[59] Includes $2,300,000 for collecting revenue from customs, $2,065,850 toward construction of new public buildings, $1,370,000 for rebate of tobacco tax, $946,083.89 prize money, battle of Manila Bay, and $3,301,475.96 for refunding to States expenses incurred in raising volunteers.

[60] Includes $4,000,000 pension deficiencies for 1904.

[61] Includes $7,872,200 for harbor and river contract work appropriated in sundry civil act.

[62] Includes $4,600,000 loan to Louisiana Purchase Exposition, $2,400,000 for collecting revenue from customs, $570,000 for House of Representatives Office Building, and $921,134.36 for refunding to State expenses incurred in raising volunteers.

[63] Includes $4,500,000 pension deficiencies for 1905.

[64] Includes $10,544,132 for harbor and river contract work appropriated in sundry civil act.

[65] Includes $4,500,000 for collecting revenue from customs, and $14,962,466.77 for the Naval Establishment.

[66] Includes $3,500,000 for pension deficiencies for 1906.

[67] No general river and harbor appropriation act passed for 1907, but appropriations amounting to $17,254,050.04 for the improvement of certain harbors and rivers, under contracts, were included in the sundry civil act.

[68] Includes $25,456,415.08 for the construction of the Isthmian Canal.

[69] Includes $16,990,786 for the construction of the Isthmian Canal, $4,500,000 for the collection of revenue from customs, $2,214,920.80 for the Naval Establishment, $1,940,386.50 for the Military Establishment, and $601,717 for construction or repair of buildings on the Pacific coast damaged by earthquake.

[70] Includes $10,306,600 toward construction of public buildings, $10,000,000 for the use and benefit of the common schools of Arizona and Oklahoma, $2,500,000 for the relief of sufferers from earthquake and conflagration on the Pacific coast, and $1,000,000 to increase the efficiency of the militia.

[71] Includes $1,000,000 pension deficiency for 1907.

[72] Includes $6,392,730 for river and harbor contract work appropriated for in sundry civil act.

[73] Includes $27,161,367.50 for the construction of the Isthmian Canal.

[74] Includes $4,714,018.50 for the Military Establishment, $538,069.41 for the Naval Establishment, $1,000,000 to the Jamestown Exposition, and $1,921,866.40 for the Postal Service.

[75] Includes $10,000,000 pension deficiency for 1908.

[76] No general river and harbor appropriation act was passed for 1909, but appropriations amounting to $18,092,995 for the improvement of certain harbors and rivers, under contracts, were included in the sundry civil act.

[77] Includes $29,177,000 for the construction of the Isthmian Canal.

[78] Includes $12,431,250 toward the construction of public buildings, $5,021,814.19 for the Military Establishment, $5,207,275.87 for the Naval Establishment, $12,178,900 for the construction of the Isthmian Canal, $950,000 for the collection of revenue from customs, and $1,760,293.01 for the Postal Service.

[79] Includes $2,000,000 to promote the efficiency of the militia.

[80] Includes $19,754,514 for river and harbor contract work appropriated for in sundry civil act.

[81] Includes $33,638,000 for the construction of the Isthmian Canal.

[82] Includes $500,000 for payment to the Republic of Colombia under treaty agreement, $500,000 for the collection of revenue from customs, $5,299,358.72 for the Military Establishment, $2,201,843.74 for the Naval Establishment, $5,458,000 for the construction of the Isthmian Canal, $1,453,493.86 for the Postal Service, and $10,000,000 for the Thirteenth Census.

[83] Includes $800,000 for the relief of the citizens of Italy.

[84] Includes $8,051,428 for river and harbor contract work appropriated for in sundry civil act.

[85] Includes $37,855,000 for the construction of the Isthmian Canal.

[86] Includes $250,000 for the collection of revenue from customs, $2,430,678.91 for the Military Establishment, $1,569,195.19 for the Naval Establishment, and $983,207.05 for the Postal Service.

[87] Includes $20,020,000 for advances to reclamation fund, reimbursable from receipts of reclamation fund.

[88] Includes $7,028,077 for river and harbor contract work appropriated for in sundry civil act.

[89] Includes $48,560,000 for construction and fortification of the Isthmian Canal.

[90] Includes $500,000 for the collection of revenue from customs, $801,703.33 for the Military Establishment, $1,059,699.37 for the Naval Establishment, $490,000 for Meridian Hill Park, District of Columbia, and $900,000 for general expenses, Forest Service.

[91] Includes $4,200,000 to protect watershed of navigable rivers from fire, and for examination, survey, and acquirement of lands on headwaters of navigable streams for development for navigable purposes.

[92] Includes $1,350,000 appropriated in a joint resolution, approved July 8, 1912, for the Organized Militia.

[93] Includes $9,500,250 for river and harbor contract work appropriated for in sundry civil act and $700,000 in various special acts for flood protection along the Missouri and Mississippi Rivers.

[94] Includes $31,786,950 for the construction and fortification of the Panama Canal.

[95] Includes $350,000 for the Customs Service, $2,434,693.52 for the Military Establishment, $596,113.37 for the Naval Establishment, $201,752.25 for United States courts, $1,056,789.17 for Postal Service, $379,000 for Lighthouse Service, $370,000 for engraving and printing, $500,000 for expenses of Thirteenth Census, and $350,000 for Revenue-Cutter Service.

[96] Includes $300,000 for equipment of Army transports with life-saving appliances, $1,239,179.65 for relief of flood sufferers of the Mississippi and Ohio Valleys, and $400,000 for the protection of fur seal and sea otter.

[97] Includes $15,100,000 pension deficiency for 1913.

[98] Includes $10,045,795 for river and harbor contract work appropriated for in sundry civil act.

[99] Includes $21,135,393 for construction and fortification of the Panama Canal, $5,500,000 for the Customs Service, heretofore a permanent annual appropriation, and $500,000 for participation by the Government at the Panama-Pacific International Exposition.

[100] Includes $250,000 for payment to Panama under treaty requirements, $850,000 for the Customs Service, $796,890 for public buildings, $4,611,679.51 for the Military Establishment, $1,271,082.40 for the Naval Establishment, $405,000 for the Interstate Commerce Commission, $1,607,854.26 for the Postal Service, $722,600 for the Lighthouse Service, $682,614.09 for United States courts, and $3,305,257.19 for payment of a judgment of the Court of Claims in favor of the Confederated Band of Ute Indians.

[101] Includes $4,635,000 out of proceeds of sale of battleships Idaho and Mississippi.

[102] Includes $6,988,500 for river and harbor contract work appropriated for in sundry civil act.

[103] Includes $21,842,525 for construction and fortification of the Panama Canal, $500,000 for a Government building at the Panama-Pacific International Exposition, and $55,000 for the exposition to celebrate the fiftieth anniversary of the emancipation of the Negro.

[104] Includes $3,125,810 for public buildings, $475,150 for engraving and printing, $300,000 for Customs Service, $7,088,932.24 for Military Establishment, $1,980,931.79 for Naval Establishment, $484,746.70 for United States courts, $3,348,219.96 for Postal Service, $250,000 for payment to Panama under treaty requirements, and $2,699,350 for construction and fortification of Panama Canal.

[105] Includes $5,100,000 for War Risk Insurance Bureau, $1,000,000 for railroads in Alaska, $2,750,000 for relief of American citizens in Europe, and $1,000,000 for representation of foreign Governments incident to the European war.

[106] This is the amount originally submitted to Congress by the Secretary of the Treasury as estimated to be necessary under permanent specific and indefinite appropriations. For the fiscal year 1914 and preceding years the amounts are those reported by the Treasury as having been actually appropriated and expended.

[107] Includes $3,982,000 for river and harbor contract work appropriated for in sundry civil act.

[108] Includes $19,579,048.30 for construction, maintenance and operation, and fortification of the Panama Canal and $13,530,000 for the Reclamation Service, heretofore paid from a permanent annual appropriation.

[109] Includes $500,000 for the Interstate Commerce Commission, $3,801,141.34 for Military Establishment, $985,616.65 for Naval Establishment, $303,283.72 for United States courts, $880,971.39 for Postal Service, $250,000 for payment to Panama under treaty requirements, $2,500,000 for eradication of foot-and-mouth disease, and $349,243 for general expenses of the Forest Service.

[110] Includes $1,866,255.04 in omnibus claims act.

Mr. LEWIS. Will it interfere with the Senator from Iowa if I make some momentary allusion to his observation about our doing nothing respecting the trouble on the border of Mexico?

Mr. KENYON. I do not think we had better go into that. I do not mean doing nothing as to those troubles. What I referred to is the Army appropriation bill and the naval appropriation bill.

Mr. LEWIS. I only desire to say——

Mr. KENYON. I will say to the Senator I did not mean to raise the Mexican question.

Mr. LEWIS. I am gratified the Senator did not mean to raise the Mexican question, but this much, Mr. President, in the able Senator's observation that we had troubles on the border and that nothing was being done, might be construed when reported in public as meaning that nothing was being done to meet those troubles.

For myself, Mr. President, if the Senator will allow an interpolation, and the only one I shall make in his speech——

Mr. KENYON. If the Senator will pardon me, I do not want to be put in the position of claiming that. I was talking about the question of preparedness in relation to the Army and Navy bill. I realize that the guard is being called out and that something is being done.

Mr. LEWIS. I accept, Mr. President, the able Senator's qualification that he did not mean to intimate that nothing was being done by the Government to protect the condition that he referred to, but that nothing adequate was being done for general preparedness for the Navy and Army.

I may be permitted at this point, if the Senator will allow me a second observation. For myself on the floor of the Senate some time ago I there stated that the duty of the Government was to send soldiers in multiplied numbers to Mexico in order to meet those conditions, not parley with it nor falter, and that the guards of the border States should be called out and put on duty as a border patrol.

For myself I want to say that I regret that there has been any delay in taking this course. I deplore to say that the delay that has transpired in failing to add to those troops the reenforcement I then stated on this floor was necessary and calling out the State Guard as a border patrol has to a great degree, I fear, been responsible for those very conditions to which the Senator from Iowa alludes.

At this point, for myself and not further taking time, speaking as much as I can in conjunction with my colleague for my constituents, I will never lend my voice in any consent to withdrawing that support which we are now giving to the American soldiers in Mexico. I shall never give my consent to the withdrawal of any support in Mexico until there has been a proper and adequate punishment of the wrongs inflicted upon America and the murder of her citzens.

I will go further. I would not only continue the addition of these reenforcements, but I would continue them despite any protest that may come from any people anywhere who are themselves the source, direct or indirect, of the murder of American citizens.

I say to the able Senator from Iowa I am glad to have his observations, and that he did not mean that we were doing nothing, and that he only meant to infer that we were doing nothing that he regards adequate. For myself I am sure I join him, and I feel the whole Senate will be found unanimous behind what the President or any other force of this Government that will promptly, hastily, and efficiently reenforce and continue to reenforce in Mexico sufficient numbers to execute the object of our going there, and to do this despite any form of opposition which may come from Mexico and to meet the opposition, whatever it is, as an exhibition of enmity to the United States, if that opposition is against the United States carrying out the policy of punishing those who murdered American citizens.

I thank the Senator for allowing this interpolation in reference to his remarks, which I now understand differently, with his explanation, than I did at the time he uttered it.

Mr. KENYON. I am very glad, indeed, to have the remarks of the distinguished Senator interpolated in mine. I thoroughly agree with him. I did not say anything, I am sure, that could be construed as a criticism. I had not intended to. I have believed that in the difficult task the President was handling he was entitled to the support of Congress in whatever he might do, and criticism shall not come from me on the floor. I had in mind that it would seem more appropriate to be considering the Army appropriation bill or the naval appropriation bill at this time instead of the river and harbor bill.

Mr. President, I pointed out on yesterday a number of rivers in this country, two sets of three each that were woven together, where we had expended in one instance practically a million dollars and in the other $500,000, and on which there was scarcely any commerce at all. I pointed out that in the hearings before the House committee the ridiculous assertions of men who came before that committee, and it seems difficult to believe that they were solemn about it, when they set forth that on one of those streams where we had spent $500,000 as a great triumph that they had one boat, but there were difficulties, they said, about navigating the boat, because the stern would not follow the bow around the bend. That is the kind of ridiculous thing that we are fighting in this bill; and there are many other similar instances.

I was proceeding with the different projects, and I did discuss briefly about 20 of them. I want, if I can reach them this afternoon, to discuss others, worse if possible, and some where the appropriation is carried in this bill, as it comes from the Committee on Commerce of the Senate, raising the amount of the House appropriation for a project that has been condemned by the division engineer, by the Board of Army Engineers, and by the Chief of the Army Engineers. That proposition is the hardest one in the bill to object to, or it is the hardest one for me, for the reason that it is in the State of the distinguished chairman of the committee [Mr. CLARKE of Arkansas], for whom I have a very great respect, and whom I honor as I have seldom respected or honored any man I have ever known. That item, however, ought to be put up to the Senate for a straight vote. If the Senate votes to include that item in the bill, against the recommendations of the division engineer, the district engineer, the Board of Army Engineers, and the Chief of the Board of Army Engineers, then, of course, there is no use of making any motions as to any of the other items in this bill. But I shall reach that a little later on.

I want to follow along some of the bayous in Louisiana, not anywhere nearly in the same class as the instance that I have cited, but one of them, where the testimony before the House committee was that you could not tell when you got into it and you could not tell when you got across it; that the weeds grew up some 12 or 14 feet; and that was a kind of a stream for which there is an appropriation in this bill; yet Senators will stand up here and say that this is a splendid bill. The Senator from Michigan said of the last bill that every item in it was all right, and he gloried in the man from Peachtree Creek standing by the Peachtree Creek proposition. Passing along, I simply want to put in the RECORD, from public documents, some statements by the Army engineers. I want to observe, however, before taking up these bayous, just this as to the Kentucky River:

The Kentucky River is now improved by 13 locks and dams for a distance of 239 miles. It shows considerable commerce through some of the locks. That stream, it was pointed out in the discussion of 1910, on the river and harbor bill of that year, with 11 locks in 1909 carried less traffic than it did with 5 locks in 1889. The tonnage for 1914 amounted to 204,696 tons, excluding logs, lumber, timber, and things of that character.

The Bayou Vermilion is not a very bad project, but simply one of these useless ways of wasting public money. As to that the Army engineers say, on page 845:

> Original condition: Prior to improvement it was navigable at its higher stages to a point 49 miles above its mouth, but was obstructed, principally in the upper reaches, with snags, logs, fallen and overhanging trees, and shoals over which a depth of only 2 feet existed at low water. It was also obstructed by a bar at its mouth, over which there was a depth at low tide of only 2 feet.

Its commerce in 1912 was 25,687 short tons; in 1913 it was 35,369 short tons; and in 1914 it was 27,915 short tons, or a decrease from 1913. We have spent on this small stream some $38,000 in the last few years. In 1912 there seems to have been no record of commerce, because there had not been sufficient work to permit navigation.

For the Bayou Grossetete we have appropriated some $30,000, and the tonnage in 1914 amounted to about 8,000 tons—another one of these "miniature" propositions.

Another one along the same line is the Bayou Queue de Tortue. We have appropriated over $13,000 for that. There was a large balance on July 1, 1915, for use. The commerce there was almost nothing in that year.

Mr. CURTIS. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Kansas?

Mr. KENYON. Yes.

Mr. CURTIS. Does the Senator from Iowa mean that there was an unexpended balance that might be used?

Mr. KENYON. Yes; an unexpended balance. In the description of this stream the engineers say:

The stream has been surveyed from mouth to a point 23.9 miles above, the distance being measured along the bayou. Above this point the stream consists of short open stretches of water and straight sections of swamp, thickly covered by timber.

A very remarkable stream. The work of removing overhanging trees and other obstructions was begun in 1913 by hired plant, and was practically completed. The commerce in 1912 was 6,739 tons; in 1913 it was 7,382 tons; and in 1914 it was 6,752 tons. The decrease of commerce during the fiscal year is attributed to unusual international conditions, superinduced by the European war. If there is anything that can not be attributed to the European war, it has not yet been discovered.

Johnsons Bayou is another little affair; but it illustrates the ridiculousness of some of the projects. We have not spent very much money on that—something like $7,000. It has had a commerce of 2,214 tons in 1914. The engineers say as to that:

Prior to its improvement the minimum usable low-water depth across the bar was approximately 2½ feet. Above the bar to Deep Bayou there was a minimum usable low-water depth of about 5 feet, mean low Gulf level. The minimum usable low-water depth in Shallow Bayou was about 2½ feet.

So it runs on up to 6 feet.

Effect of improvement: This waterway affords the only outlet for the commerce of the locality. The work of improvement has facilitated navigation across the bar.

The commerce for the year 1912 amounted to 6,941 tons; for 1914, 2,214 tons.

What justification can there be for the development of a waterway that carries only 2,000 tons a year? There may be some justification, but it is difficult to understand just what it can be.

Another item in this bill covers the Bayous Bartholomew, Macon, D'Arbonne, and Corney, and Boeuf and Tensas Rivers, La. This is one of the items, it seems to me, that makes a river and harbor bill ridiculous.

We have expended on this combination of bayous $283,955.50, and there is scarcely any commerce on them. The engineers report that some of these bayous have a depth of 1 foot. Let us take up Bayou Bartholomew first. I quote from the report of the Chief of Engineers:

Original condition: Before improvement the bayou was navigable for light-draft boats to Baxter, Ark., 182 miles, about three months of the year, but the passage was difficult and dangerous on account of snags and leaning timber. The channel in the section included in the project was from 100 to 200 feet wide with minimum usable low-water depth of 1 foot.

* * * * * * *

Operations and results prior to the fiscal year: Snags and sunken logs were removed and overhanging trees cut from time to time as necessary, thus keeping the channel free from such obstructions and making its navigation easy at medium and high stages. The amount expended on the present project prior to the beginning of the fiscal year was $77,705.35, of which amount $45,873.53 may be regarded as for original work and $31,831.32 for maintenance. In view of the nature of the work it is impracticable to accurately separate these two items, and it is probable that the former item included some operations for maintenance.

* * * * * * *

Condition at the end of fiscal year: The channel is reasonably free from snags. The maximum draft that can be carried over the shoalest part of the channel in the section under improvement at medium and high stages is about 8 feet, and at low water about 1 foot. The total expenditures under the existing project to June 30, 1915, were $80,353.13, of which amount approximately $45,873.53 was for original work and $34,479.60 was for maintenance.

Local cooperation: None.

Effect of the improvement: The work done has reduced freight rates about 50 per cent.

That is always the argument that is used in connection with these matters.

Proposed operations: With the funds for which estimate is submitted it is proposed to maintain the improvement by removing snags, sunken logs, and leaning trees when they obstruct or threaten to obstruct the channel.

The commercial statistics show that for 1913, 396 tons were moved, while in 1915, 533 tons were moved, consisting of farm products and general merchandise.

Mr. BRANDEGEE. Mr. President, has the Senator the information to give as to what amount of money is appropriated for these bayous in this bill? The reason I ask the question is because the Senator is giving the amounts that have been expended on these bayous in the past, but he does not state how much it is proposed to expend on them this year.

Mr. KENYON. The amount appropriated, as shown by the bill, is $10,000 in all.

Mr. RANSDELL. Mr. President, will not the Senator please read the item?

Mr. KENYON. "For maintenance, $10,000."

Mr. RANSDELL. I ask the Senator to read the whole item so that we may understand what it is.

Mr. KENYON. It is on page 21 of the bill, and reads as follows:

Bayous Bartholomew, Macon, D'Arbonne, and Corney, and Boeuf and Tensas Rivers, La.: For maintenance, $10,000.

Mr. RANSDELL. There are six projects included in the item, are there not?

Mr. KENYON. Yes.

Mr. BRANDEGEE. The Senator has evidently examined the House hearings with some care.

Mr. KENYON. Yes.

Mr. BRANDEGEE. What statement was made in those hearings as to why this sum should be appropriated or as to the commercial value of the development of these projects? What is it supposed that they will accomplish in the way of aiding commerce and navigation?

Mr. KENYON. I will say to the Senator that, as I remember the House hearings, there was nothing whatever said about these projects.

On Bayou Bartholomew we have spent some $80,000, as I read this record.

Mr. BRANDEGEE. I understood the Senator to say that on the group of bayous we have heretofore appropriated altogether about $280,000.

Mr. KENYON. Two hundred and eighty-three thousand dollars.

Mr. BRANDEGEE. And the depth of water is only 1 foot at low water?

Mr. KENYON. At low water. That is true as to several of them. It was so stated in what I read as to one, and I am going to read concerning the others in order that the matter may be put in the RECORD. I quote the following concerning Boeuf River:

Original condition: Before improvement the river was navigable at high stages to Point Jefferson, La., 150.8 miles, but passage was difficult and dangerous on account of snags, logs, and leaning timber. The channel in the section included in the project was from 20 to 500 feet wide, with minimum usable low-water depth of 1½ feet.

That is a little deeper stream—

Operations and results prior to the fiscal year: Snags, sunken logs, and overhanging trees have been removed from time to time, as necessary, and the channel has been thus kept free from such obstructions and rendered navigable at medium and high stages.

* * * * * * *

Condition at the end of fiscal year: The work in progress is maintenance and is indefinite in extent. The channel is reasonably free from snags and sunken logs. The maximum draft that can be carried over the shoalest part of the channel in the section under improvement at medium and high stages is about 8 feet, and at low stages about 1½ feet. The total expenditures under the existing project prior to June 30, 1915, were $84,787.13, of which amount it is estimated about $30,000 was expended on original work and $54,787.13 on maintenance.

Mr. NORRIS. Mr. President——

Mr. KENYON. I yield to the Senator.

Mr. NORRIS. As I understand, these are completed projects.

Mr. KENYON. They are completed projects.

Mr. NORRIS. And the appropriation in this bill is for maintenance.

Mr. KENYON. It is for maintenance; that is true.

Mr. NORRIS. Has the Senator any statistics as to the passenger traffic on these various bayous?

Mr. KENYON. There is no passenger traffic on them.

Mr. NORRIS. I can not quite understand that. I should think there would be a great deal, because travel ought to be very safe on those bayous. There would not be any danger of drowning if the ship were blown up by a submarine.

Mr. KENYON. I presume it is like some of the other rivers which are too crooked and snaggy and winding for one end of the boat to follow the other.

Mr. NORRIS. A passenger could get on the rear end of the boat and get there first.

Mr. KENYON. That would sink the boat, I will say to the Senator, so that it would hit bottom, the bottom being only a foot and a half away.

Mr. NORRIS. But the boat could not sink. In that lies the safety of travel; and that is what I was calling attention to.

Mr. KENYON. I thank the Senator. That is one of the strongest arguments I have heard in favor of the appropriation.

But, listen to the commerce! In 1913 it amounted to 7,293 tons and in 1915 to 8,986 tons, consisting of lumber, logs, farm products, and general merchandise, and when you take away the lumber and the logs there is practically nothing left.

Mr. NORRIS. Does the Senator know whether the boats on this stream carry life preservers?

Mr. KENYON. I do not know about that, I will say to the Senator; but I think a good many of these appropriations are life preservers for Members of Congress. Tensas River is an-

other one of these streams concerning which I desire to quote the following:

Original conditions: Before improvement both streams were navigable at high stages, but passage was difficult and dangerous on account of snags and leaning timber. Westwood Place, 81 miles above the mouth, was the head of navigation on Tensas River; and Floyd, 112 miles above the mouth, on Bayou Macon. The channel in the section of the streams included in the project varied from 75 to 500 feet in width, with minimum usable low-water depth of 1 foot.

There is a stream, I will say to the Senator from Connecticut, in the same class as Bayou Bartholomew.

Operations and results prior to the fiscal year: Snags, sunken logs, and leaning trees have been removed from time to time, and the channels have thus been kept free from such obstructions and rendered safely navigable at medium and high stages. Owing to there being no demand for improvement of the Tensas above Westwood Place, 81 miles above the mouth, work on the Tensas has been limited to the portion of the river below this point. The amount expended on the present project prior to the beginning of the fiscal year was $71,420.06, of which amount it is estimated $32,862.44 was for new work and $38,557.62 was for maintenance.

* * * * * * *

Local cooperation: None.

Effect of the improvement: The work done has reduced freight rates about 35 per cent.

It will be seen that all of this work and the expenditure of these sums is to reduce freight rates for a few communities. The commerce in 1915 was 6,940 tons, consisting principally of lumber and farm products.

Next I will take up the Bayous D'Arbonne and Corney, La.:

The channel in the section included in the project varied from 50 to 150 feet in width, with a minimum usuable low-water depth of 1 foot.

Snags, sunken logs, and overhanging trees have been removed from time to time, as necessary.

It all sounds very much alike.

The amount expended on the present project prior to the beginning of the fiscal year was $22,828.59, of which amount $8,125.06 was for original work and $14,703.53 was for maintenance.

It is said that this improvement has reduced the freight rates.

Commercial statistics: In the year 1915 there were 4,855 tons, and we have expended on the stream the amount I have heretofore stated.

I want to call attention now to the Bayou Bartholomew, as to which the engineers say:

A party equipped with tools, tackle, and explosives, and housed in United States quarterboat *No. 10*, began work on this bayou at Ohio Landing, Ark., August 10, 1914, and continued operations downstream to the mouth of the bayou, which was reached October 27.

Here is the work of destruction that this party, armed with explosives, did:

Snags cut and destroyed, 1,843.
Shore snags cut, 2,647.
Logs removed from channel, 700.
Leaning trees cut, 878.
Trees girdled, 2,972.
Jams removed, 2.
Square yards willows and brush cut, 325.
After completion of this work the party was transferred for work in Ouachita River.

I should think they would have been. That is the kind of a proposition on which we have been spending money all these years, and it needs a complete and thorough airing.

Mr. BRANDEGEE. Mr. President, when these engineers' reports state that the improvement has had the effect of reducing freight rates, does the Senator happen to know whether it was by actual competition or whether it was simply because there was a potential or possible water competition that enabled the railroad to reduce the rate and have it sustained on the theory that the Interstate Commerce Commission has adopted—that where there is a possibility of water competition, the rate may be justified?

Mr. KENYON. I want to be perfectly fair about that, and say that in most instances the latter suggestion of the Senator is the one that seems to have been taken into consideration by the engineers.

Mr. NORRIS. Can the Senator state the nature of this freight—whether it was logs or cordwood?

Mr. KENYON. That is what I was trying to do. Here in the 533 tons that I have referred to on one of these streams there were 25 bales of cotton, 5,935 sacks of cotton seed, 150 sacks of grain, 334 bundles of shingles, 80 bales of hay, and 534 packages. They may have been packages of garden seed. It does not state.

Mr. NORRIS. Do those boats carry the mail? Does the Senator know about that?

Mr. KENYON. I do not know.

Mr. NORRIS. Does the Senator believe that the carrying of a few dozen bunches of shingles and two or three hundred packages would have the effect of reducing freight rates? Can the Senator tell us about the towns and the settlements along these streams?

Mr. KENYON. Certainly there can not be very many if the commerce is carried along these streams. No; I can not. I have never been down these streams.

Mr. NORRIS. Does the Senator know whether there are any railroads in this vicinity?

Mr. KENYON. I do not, as to these particular ones.

Now as to the boats: In the case of one of these bayous, there was one steamboat, three gasoline boats, and two unregistered barges. That was the mighty fleet of commerce!

On the Bouef River the commerce was 8,986 tons. Of that, about 5,000 tons was timber and staves and lumber barged.

Mr. SHEPPARD. Mr. President, do the figures show the value of the tonnage?

Mr. KENYON. They do.

Mr. SHEPPARD. Will the Senator add the value of the tonnage to the number of tons?

Mr. KENYON. I have given a good many figures. I will say to the Senator that if he will specify the particular ones he desires, I will give the value. As to the last, the value is $215,877. As to the 533 tons, the value is given as $22,582; average haul, 68 miles; rate per ton per mile, $1.66.

That is somewhat in keeping with my reference on yesterday to the Sabine. I want to put in the RECORD a letter from the Sabine Tram Co., of Beaumont, Tex., to Maj. Jackson. That is in Document No. 668, a letter from the Secretary of War, and accompanying suggestions:

We are in receipt of yours of the 29th relative to the Sabine River, Tex. and La., to Logansport, La., and note contents.

We have some 50 miles of river front along the Sabine River in Newton County, Tex. At this time we think it would do harm to the river instead of benefit for the reason that whenever the logs are cleaned out it will result in lowering the water by letting it run off. This is shown north and south of our mill at Deweyville, Tex. By taking the logs and obstructions out it caused the river to get shallower each year the logs were removed. Mr. Axtell, while with the Government, was up at our mill while it was low. We think he was of the same opinion.

For the above reason, and for the reason there is but little traffic on the river, we think it would be a waste of money to attempt to clean the channel.

We have the largest mill on the river, and it would not benefit us in the least to have it cleaned out, as none of our incoming or outgoing traffic would move by water; further, as above stated, we believe the river would be less in shape for navigation than it is now were all obstructions cleaned out.

In other words, here is a river that we have been contributing to, full of logs, and they urge the people along there not to take the logs out of the river, because if they do the water will run out. That is the same proposition where the wise Army Engineers recommended taking the logs and selling them to pay for the improvement of the river.

Mr. BRADY. Mr. President——

Mr. KENYON. I yield to the Senator from Idaho.

Mr. BRADY. Was there an appropriation made for that?

Mr. KENYON. Not in this bill. There is not an appropriation in this bill for that. I am citing and have cited that simply as a sample of governmental waste.

Now, Mr. President, I want to refer to the Brazos River. I would not want to do it in the absence of the Senator from Texas. If he is going out, I will take up something else.

Mr. SHEPPARD. I have just been called out of the Senate Chamber temporarily.

Mr. KENYON. Yes; I will say to the Senator that I will take up something else.

Mr. SHEPPARD. I will return in a few minutes.

Mr. KENYON. The Red River is one that I approach with some hesitancy because of its being one of the rivers of the distinguished chairman of the committee. The Red River is a rather interesting stream. We have appropriated for the Red River over $2,800,000. The report for 1914 shows commerce, not including logs and timber, reaching about 1,694 tons, and the commerce there has gone up some. In 1912, excluding the valuable timber, it reached 1,227 tons. At the time Senator Burton filed his minority report he stated that on the Red River below Fulton, covering a distance of 475.4 miles, there was in the year 1912 a total tonnage of 44,967 tons, and of that 42,640 tons were saw logs, of which the average haul was 131 miles; and up to that time we had appropriated for that stream $2,768,377.

This project was adopted in 1892, and there has been a cost of $100,000 annually for maintenance. The present bill carries an appropriation for this river. The district engineer has recommended the abandonment of the project. The division engineer has concurred with the view of the Board of Engineers.

Now, I want to call attention to some facts about this river.

From below Fulton, and also from Fulton to the mouth of the Washita—it is treated in two divisions—the engineers say, on page 948, that—

The present project was adopted by the river and harbor act of July 25, 1912, and has for its object to facilitate navigation by light-draft boats at medium and high stages from Fulton to the mouth of

the Washita River by the removal of snags, logs, and drift, the clearing of timber on caving banks—

And so forth.

* * * * * * *

The total expenditure under the existing adopted project up to the end of the fiscal year was $96,254.33, of which $19,790 was for new work on the combined dredge and snag boat *Denison* and $76,464.33 for maintenance.

* * * * * * *

Navigation on the Red River above Fulton has practically ceased. No steamboats are now in operation, and the rafting of logs has been reduced to an almost negligible quantity.

Below Fulton, on page 953 of volume 1 of the engineers' reports for 1915, it is stated:

Prior to improvement the entire channel of the river for 92 miles from Loggy Bayou to Hurricane Bluffs was filled by a mass of sunken logs and stumps which was known as the great raft. The head of navigation was at the foot of this raft, 257 miles above the mouth. The river everywhere was obstructed by snags and drift, and at Alexandria, La., by a ledge of rock. * * * The low-water depth on many shoals was 1½ feet and the width 90 feet.

* * * * * * *

The project has until recently given river towns freight rates about 25 per cent lower than towns not on the river.

The commerce for the fiscal year ending June 30, 1915, was 47,351 tons; and the appropriations on that river, as I have heretofore indicated, have run to an enormous amount.

The Secretary of War transmitted to the Committee on Rivers and Harbors of the House a document known as Document 947, and I want to read some parts of this document for the RECORD.

Col. Black, Chief of Engineers, discusses the river in this report as to the two projects above Fulton and from Fulton to the mouth of the Washita. Below Fulton, first:

The amount expended on this and previous projects to June 30, 1915, is $2,763,896.40. As a result of the work done the channel has been greatly improved, especially in the lower part of the river, but notwithstanding the improved navigation conditions, water-borne commerce has decreased until it has now nearly disappeared. The decline of water-borne commerce has been due in large measure to the better transportation and terminal facilities provided by the railroads, and the district officer doubts whether the river can be adequately improved so as to be fitted to the needs of modern transportation for any sum at all commensurate with the commerce of the present or near future. He finds, however, that there is a demand for Federal assistance in levee building and bank revetment.

I think there is no doubt of that; and this proposition ought to be urged as a flood-control proposition, and not as a navigation proposition.

The division engineer recommends that future work be confined to snagging and the prevention of cut-offs.

On the same river, from Fulton to the mouth of the Washita:

The amount expended on this and previous projects to November 30, 1915, is $487,400.95. * * * The commerce on this section of the Red River is very small. No steamboats are now in operation, and the rafting of logs has been reduced to an almost negligible quantity. Navigation may be said to have practically ceased, although the facilities for navigation at medium and high stages are greater than they were in the past, when the river was more generally used. No project of greater scope would be warranted and no lesser improvement would provide useful navigation. For these and other reasons, the district officer expresses the opinion that further work of improvement is not worthy of being carried on by the United States and that the present project should be abandoned. The division engineer concurs in these views.

Col. Black says:

After due consideration of the above-mentioned reports, I concur in the views of the Board of Engineers for Rivers and Harbors, and therefore report that it is deemed advisable to discontinue work under the present projects for improvement of Red River, La., Ark., Tex., and Okla.

Mr. SHERMAN. Mr. President, will the Senator yield for a moment?

Mr. KENYON. I yield.

Mr. SHERMAN. The Senator himself referred to some matters of flood control, and in the document he read there are certain portions relating to flood control. I wish to inquire if the flood-control question, properly operated and handled, will, so far as navigation can be made useful, also develop navigation by preparing these channels and utilizing the water?

Mr. KENYON. I should hope so, and I believe so.

Mr. SHERMAN. And this duplication of effort will result in duplication of the cost?

Mr. KENYON. Well, we have a $45,000,000 flood-control bill on its way over here, where all those questions can be discussed; but, of course, as a proposition of navigation, the Red River proposition is simply ridiculous. If it is not needed for flood control, so far as the commerce is concerned, and the reduction of freight rates, and all of that, the money seems to have been practically wasted.

Between Shreveport and Fulton, the report says, 2 feet can ordinarily be carried, but even this depth is not always available.

When this report was made it seems that there was a public hearing attended by Senator RANSDELL and Members of Congress and citizens protesting, but it does not seem to have had the usual effect, for Col. Black says:

The physical conditions of the Red River are such that no material increase in depth has been secured, and this is not practicable at reasonable expense. The stream has been kept fairly clear of snags, however, thus making the natural depths available, and this is all that can be accomplished at anything like justifiable expense.

I see also a communication was received from the Senator from Texas [Mr. SHEPPARD] by the Board of Army Engineers in reference to this stream.

I wish to refer in this connection to the public hearings which are found in Document 947, page 44. The Senator from Louisiana [Mr. RANSDELL], making speeches there, and he always makes a good speech, said to the Board of Engineers:

You have come here to examine into one of the great rivers not only of our State but of the Nation. Red River is one of the longest rivers on the continent.

Then he goes ahead and describes that river.

Representatives in Congress appeared before them. One of them said:

We have had in mind for a great many years actual transportation or the actual use of the river and the transportation of traffic on the river, and it is not for the purpose of simply and purely reducing rates, as some of the engineers may think. But just a few years ago a boat was put in the river. Navigation had suspended. The boat was put in the river and snags knocked the bottom out of it.

The shippers, it seems, have not patronized it.

The Senator from Louisiana goes into an interesting observation in that speech concerning the acts of Congress in ordering a resurvey, urging upon the board that the power of Congress ordering a resurvey should have no effect upon them at all; that the resurvey was put in by the act of one man taking Congress by the throat and forcing this legislation.

Mr. President, I do not know whether, with the Army engineers reporting against the further carrying on of this improvement——

Mr. SHEPPARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Texas?

Mr. KENYON. Yes.

Mr. SHEPPARD. The engineers recommended a further appropriation in the case of the lower Red River.

Mr. KENYON. Yes; in the case of the lower river.

Mr. SHEPPARD. I understood the Senator to state that they reported adversely.

Mr. KENYON. I say they recommended the abandonment of certain parts of the project. Does the Senator say they did not?

Mr. SHEPPARD. They did not recommend the abandonment of the lower section from Fulton to the mouth, and they did not recommend the entire abandonment of the upper section.

Mr. KENYON. They recommended as follows:

5. After due consideration of the above-mentioned reports, I concur in the views of the Board of Engineers for Rivers and Harbors, and therefore report that it is deemed advisable to discontinue work under the present projects for improvement of Red River, La., Ark., Tex., and Okla., and to adopt the provisional modified project recommended by the board and described above, subject to the conditions specified.

Mr. SHEPPARD. That is it; they modified the project.

Mr. KENYON. I agree with the Senator. They did not recommend a complete abandonment as to the river from Fulton to the mouth.

Mr. SHEPPARD. They did not recommend the complete abandonment of any portion.

Mr. KENYON. They recommended a very material modification of the project.

Mr. SHEPPARD. They recommended a modification of the project on both sections.

Mr. KENYON. Yes; they did.

Mr. SHEPPARD. On the lower section they recommend an appropriation of $55,000 a year for three years, giving the people a chance there to show that they are in earnest in the matter of navigation, and on the river above Fulton they recommend a continuing appropriation for the sole purpose of preventing an accumulation of rafts.

Mr. KENYON. We have spent over $2,000,000 giving them a chance to ascertain whether or not there could be any navigation on the river, with apparently no substantial results, so far as commerce is concerned, there being merely a negligible commerce.

Mr. SHEPPARD. The Senator is mistaken in that assertion. There has been a large navigation on the river for many years.

Mr. KENYON. There may have been in the past, but according to the engineers' report there has not been a large navigation for the last few years.

Mr. SHEPPARD. Oh, yes. In 1915 the Senator will find there was a large amount of tonnage on the lower river.

Mr. KENYON. Not if you exclude the timber and logs, which can merely float along without any particular work being done.

Then the Senator will find the commerce is very small. I will put in the RECORD exactly what those figures are, but there are only a few thousand tons.

Mr. SHEPPARD. Will the Senator permit me to quote from page 245 of the report?

Mr. KENYON. What report is it?

Mr. SHEPPARD. The report of the Senate Committee on Commerce accompanying the river and harbor bill. On page 245 there is found a statement to the effect that for the fiscal year ending June 30, 1915, the navigation amounted to 47,351 short tons, of a value of nearly $3,000,000.

Mr. KENYON. Forty-four thousand nine hundred and sixty-seven tons.

Mr. SHEPPARD. Forty-seven thousand three hundred and fifty-one tons.

Mr. KENYON. That proportion will run just the same, I assume, as in 1912. I have the figures for 1912 before me. I assume the Senator's figures are correct. There was a total tonnage of 44,960 tons, of which 42,642 were saw logs; the average haul, 171 miles; leaving only about 1,000 tons of really what you would call commercial traffic. That proportion was in 1912, and it is undoubtedly about the same in 1914. I claim without fear of successful challenge that when the figures are analyzed and the saw logs and the floatable lumber are taken out the commerce is practically negligible.

Mr. SHEPPARD. The Senator was never more mistaken in his life.

Mr. KENYON. I am different from the Senator from Texas. I have been mistaken many times.

I will put in the RECORD the exact figures in the morning. I thought I had them here, but have them for 1912 instead of for 1914.

In getting at this commerce these figures should be analyzed as to how far the different tons have moved. For instance, on the Mississippi River the average haul is 30 miles. On some of these streams the engineers have counted the tonnage through various locks and dams; every time it goes through they are counted again, the same as counting passengers on a street car at every corner of the block.

Mr. SHEPPARD. There are no locks and dams on the Red River.

Mr. KENYON. I am not talking about the Red River; I am talking about the Ohio and the Tennessee. I know there are no locks and dams on the Red River. There is not enough water there for any.

*Saturday, May 13, 1916.*

Mr. KENYON. Mr. President, at the time of the recess last evening a controversy had arisen concerning the increase of commerce on the Red River and just what has been the recommendation of the engineers. I wish to straighten that matter out so that it may not be subject to any controversy in the future.

As to the Red River below Fulton, where we have expended $2,700,000, the engineer recommends in Document No. 947, Sixty-fourth Congress, first session, page 3:

10. It is therefore recommended that further work on the Red River in the interest of navigation be discontinued, but that in the interest of conservation of national resources snagging operations on a reduced scale be carried on, levee building be participated in to the extent of 25 per cent of the cost of such levees as follow the meanders of the channel, and such spur levees and revetments be constructed as necessary to prevent cut-offs.

On the part of the Red River from Fulton to the mouth of the Ouachita, on which we have expended $487,000, the engineers recommend as follows, on page 3 of the same document from which I have quoted:

After due consideration of the above-mentioned reports, I concur in the views of the Board of Engineers for Rivers and Harbors, and therefore report that it is deemed advisable to discontinue work under the present projects for improvement of Red River, La., Ark., Tex., and Okla., and to adopt the provisional modified project recommended by the board and described above, subject to the conditions specified.

That modified project is also included on page 3.

Now, Mr. President, as to the commerce here is the amount of it given. I think I will also put in the RECORD the commerce on the Red River during the last year.

Snags destroyed, 3,610; stumps destroyed, 361; shore snags cut, 6,146; logs removed from channel, 1,038; drift burned, 67; leaning trees cut, 34,410.

Here is the commerce above Fulton: Lumber, 840 tons; miscellaneous, 5 tons; saw logs by raft, 473 tons; making 1,318 tons of commerce for the last year on the river above Fulton.

Below Fulton the work done by the snag boat during the fiscal year was as follows:

Snags pulled, 1,872; stumps pulled and destroyed, 1,850; shore snags cut, 1,144; leaning trees cut, 6,549; side jams removed, 10; brush cut, 30; people removed from overflow, live stock removed from overflow.

The commerce upon this part of the river, which is the important part, was 47,351 tons. That is a matter concerning which there was some dispute yesterday between the Senator from Texas [Mr. SHEPPARD] and myself. That would seem to be commerce which hardly justifies the tremendous amount of money which has been spent on this river.

When we analyze that commerce we find that 2,000 of those tons was lumber. Timber rafted, 7,500 tons. Timber barged, 9,875 tons. So of that sum 18,000 tons is lumber barged and otherwise, leaving about 29,000 tons of commercial traffic, 30,000 tons, including the river above and below, and on that project there has been spent over $2,000,000.

Of course it is wrong to question a thing of that kind, because the spending of the money of the people is a delightful pursuit.

What the engineers recommend as to the river above Fulton is a conservation proposition. They themselves say it is not at all a proposition of navigation, and that raises the question as to what Congress should do in matters of that character.

The National Waterways Commission, which was established along about 1910 to examine the waterways in this country and in Europe, laid down certain fundamental principles that it is well to consider at this time. They said in relation to this navigation proposition, on page 3 of House Document 254, part 2:

It should always be borne in mind that the waterway improvements made by the Federal Government under the exercise of its authority should be restricted to navigation. Whenever bank protection or flood prevention or the clarification of water is the sole object of improvements the question presents little difficulty in its solution. Such projects are not a proper charge upon the Federal Treasury. * * * In many instances proposed improvements have as their main object the protection or benefit of private property. In such cases there is a distinct benefit conferred upon individuals or localities which is only of remote or very indirect benefit to the country as a whole. Lands subject to periodical overflow or lands of uncertain value because of the danger of erosion, when improved are multiplied many times in value, and there is a constant danger that such improvements will be advocated under the guise of river and harbor legislation framed to benefit navigation when the real object is the benefit which will accrue to individuals or localities. * * * The line should be carefully drawn between improvements which, in whole or in part, are for the protection or development of private property and those which are made in the sole interest of navigation.

That report is signed by Theodore E. Burton, J. H. Gallinger, S. H. Piles, William Alden Smith, F. M. Simmons, James P. Clarke, William Lorimer, D. S. Alexander, Frederick C. Stevens, Irving P. Wanger, S. M. Sparkman, and J. A. Moon.

I pass, then, from the Red River, with the claim that the figures I gave last night are substantiated by the record I have produced this morning, and take up another interesting river, known as the Ouachita.

I hope, Mr. President, before we get through, that somebody will rise in this Chamber and defend the Ouachita River, on which we have expended $3,700,000. Certain recommendations are made by the Chief of Engineers, this project having been resurveyed under an act of Congress; but this bill goes further than the Army engineers in any way recommend. The most that they recommended was money for the completion of Lock and Dam No. 3. They had money on hand, they say, for Lock No. 2, and that was $234,000 that they recommended. This bill carries $474,000 for the construction of locks and dams.

Now, let us see what this Ouachita River is. I should like to know how anybody, with any regard for the Public Treasury or with any regard for the people of this country, who have got to pay for these things, can vote for this Ouachita River item. You will have a chance to go on record about it, and I hope the constituents of every Senator who votes for that proposition will study the figures and study the record of a traffickless stream, with no commerce to amount to anything, sinking nearly $4,000,000 on a project that has run for 20 years, and which will run for 20 years more.

Mr. TOWNSEND. Where is that river?

Mr. KENYON. It is in Arkansas and Louisiana.

Three locks have been completed of this construction and two are under way. Work has been going on for nearly 30 years. The commerce, according to the engineers' report, which I shall discuss later, comes up to about 70,000 tons a year. In the year 1913 there were removed from this remarkable stream 14,840 snags, leaning trees, and deadheads. I want to put a little history in relation to this stream into the RECORD in order that perhaps some time around the quiet firesides of the country a few people may study how their money is going.

Original condition: Prior to improvement navigation was much obstructed at all stages by snags, logs, wrecks, and leaning trees, and was rendered practically impossible at low stages by these obstructions,

together with sand and gravel bars. The minimum usable water depth in the portion covered by the project was 15 inches. Low-water channels varied from 150 to 500 feet in width. The streams were navigable in fact during high water from mouth of Black River, La., to 10 miles above Camden, Ark., a distance of 360 miles.

Previous projects: The date of the original project was March 3, 1871. Subsequent modifications were made June 10, 1872; August 14, 1876; and July 5, 1884. The amount expended under these projects was $614,802.19. For scope of previous projects, see Appendix, page 1869.

Present project: The present project is based on plan contained in House Document No. 448, Fifty-seventh Congress, first session (Annual Report for 1902, p. 1435), which proposes to obtain a navigable depth of 6½ feet at low water from the mouth of Black River, La., to a point about 10 miles above Camden, Ark., a distance of 360 miles, by the construction of nine locks and movable dams, with available horizontal lock-chamber dimensions of 268 by 55 feet, and with low-water depth of 6½ feet over miter sills, at an estimated cost (as revised) of $4,876,654.35.

From the manner in which appropriations have been made for this improvement it has been held that the project has never been adopted in its entirety by Congress.

And it never has been approved, as projects generally are, by the engineers before they are commenced. Different river and harbor acts have provided for locks and dams, and the work has been carried on as the funds were provided.

Condition at end of fiscal year: The project for constructing locks and dams is 46¼ per cent completed. Maintenance by snagging work will have to be continued indefinitely. Locks and Dams Nos. 4, 6, and 8 have been completed and are in operation, but as the pools are not continuous little benefit has been obtained. The maximum draft that can be carried at low water over the shoalest part of the section under improvement is 8 inches. The total expended under the existing project to the end of the fiscal year was $2,447,936.32 for new work and $267,121.67 for maintenance, a total of $2,715,057.99.

* * * * * * *

Effect of improvement: The project has caused considerable reduction in freight rates.

It has been a help in that respect.

Commercial statistics: These statistics were compiled for the fiscal instead of the calendar year, because the former more nearly coincides with the commercial year, and the period of navigation ordinarily closes in June.

*Comparative statement.*

| Fiscal year ending June 30. | Short tons. | Value. |
|---|---|---|
| 1913 | 48,222 | $1,894,939 |
| 1914 | 64,874 | 1,923,231 |
| 1915 | 70,619 | 3,074,465 |

Apparently a considerable increase in commerce.

The freight carried during the last fiscal year consisted of lumber and logs, farm products, and general merchandise.

I will analyze that commerce in a moment or two. I now read from page 2693 of the Engineers Report:

Operations were suspended on account of lack of funds from July 1 to October 21, 1914. The U. S. snag boat *Jos. E. Ransdell* began work at Jonesville, La., October 22, 1914.

Some Senators are famous for having cigars named after them and others for having snag boats named after them. This is what this particular snag boat accomplished:

| | |
|---|---|
| Snags pulled | 1,711 |
| Stumps pulled and destroyed | 830 |
| Leaning trees cut | 2,151 |

Destroyed cylinder timbers and part of hull of wrecked steamer *Poplar Bluff* (sunk December, 1894) with dynamite December 2, 1914.

When snagging operations were suspended the *Ransdell* was employed in towing material barges for the lock and dam construction work on this river until March 17, 1915.

And continued to get out a few more snags.

Mr. WORKS. Are their dimensions given?

Mr. KENYON. The dimensions of the river?

Mr. WORKS. No; the dimensions of the snags.

Mr. KENYON. I think not. Here is another summary of the work that this boat did:

| | |
|---|---|
| Snags cut and destroyed | 715 |
| Shore snags cut | 1,871 |
| Logs removed from channel | 378 |
| Leaning trees cut | 4,540 |
| Trees girdled | 69 |

The total amount of appropriations I think I have given—$3,741,616.45—and the commerce on this river was 70,619 short tons, 4,655 tons of staves, 509 of timber, timber rafted 7,515 tons, timber barged 18,956 tons, cross ties 3,444. So, taking out these things that certainly do not need locks and dams or all of this work to float, leaves about 38,000 tons as the commerce on this river, upon which we have spent over $3,000,000 and on which we propose to spend millions more.

As to the river above Camden, the statistics are that there was no commerce reported for that portion of the Ouachita River during the fiscal year.

Now, I want to read a little, Mr. President, from the Army Engineer's report. The last river and harbor act provided for a resurvey of this river. I read now from House Document No. 979, Sixty-fourth Congress, page 2:

Two projects are now in force for the improvement of this river. One provides in part for the construction of 8 locks and dams with a view to securing a channel 6½ feet deep from the mouth of Black River to a point 10 miles above Camden, Ark., while the other provides for removing snags, leaning trees, and other obstructions between Camden and Arkadelphia. In addition, the removal of obstructions below Camden is continued under an earlier project.

Here is the point I want to direct attention to: "Nos. 2 and 3 are under construction," and it is urged by many that it would be wasteful not to go ahead and complete those locks.

The engineer, Col. Black, continues:

Funds on hand are sufficient to complete No. 2, but it is estimated that an additional amount of $234,000 will be required to complete No. 3, and $1,804,000 to complete Nos. 5, 7, and 9. The district officer is of opinion that the resources of the adjacent country are sufficient to justify further work on the lock and dam project to and including Lock and Dam No. 8, but that the building of No. 9 should be postponed until the development of traffic on the canalized river indicates the necessity of its construction. He believes that it is advisable to undertake such open-channel work between Lock No. 8 and Camden as may be necessary to maintain existing conditions, and that the project for open-channel improvement above Camden should be abandoned. The division engineer is of opinion that Locks and Dams Nos. 2 and 3 should be finished in order to complete the canalization of the river below Monroe, and that the construction of additional locks should be deferred until the influence of the improvement below Monroe has been determined, work being confined meanwhile to operating the completed locks and snagging.

* * * * * * *

4. After due consideration of the above-mentioned reports, I concur in the views of the division engineer and the Board of Engineers for Rivers and Harbors, and therefore report that it is deemed advisable to discontinue the project for improvement of Ouachita River between Camden and Arkadelphia, and to modify the project for improvement below Camden to provide for the completion of Locks and Dams Nos. 2 and 3, and their operation when completed, and continuing the operation of Nos. 4, 6, and 8, together with such snagging as may be necessary to facilitate navigation up to Camden. An appropriation of $234,000 should be provided in one sum for completion of Lock and Dam No. 3.

Let us see what the Army engineer, who, we are told, is practically infallible, asks for and what the bill provides. He asks for the completion of Locks Nos. 2 and 3, but says that they have money on hand for the completion of No. 2, and need $234,000 to complete No. 3. The bill, on page 24, provides:

Continuing the improvement for construction of locks and dams heretofore authorized, $474,000.

Of course, the increase involves only a little matter of $230,000 or $240,000, which is perfectly trifling, of course, when it comes to the appropriation of public money.

Col. Abbot, one of the Corps of Army Engineers, submits some observations also as to the Ouachita River, which I want to put in the RECORD. He says:

Ouachita River above Camden to Arkadelphia, Ark.: This project, adopted by the river and harbor act of June 25, 1910, provides for removing snags, leaning trees, and other obstructions between Camden and Arkadelphia, a distance of 90 miles. The amount expended under this project to June 30, 1915, was $22,500, resulting in a channel reasonably free from obstructions. No commerce has been reported on this section of the river for the past three years, and there is no evidence that any is in prospect.

As to commerce on the river the engineer says:

Of 70,619 tons in 1915, over 35,000 tons were timber products and 8,768 tons were sand and gravel. Local interests claim that commercial developments would justify the completion of the project. Moreover, it has been stated that the United States is under moral obligations to complete the work on account of private investments made under this expectation.

* * * * * * *

7. At the request of interested parties a hearing was given at the office of the board on March 7, 1916, at which Senator J. E. RANSDELL, Hon. W. S. GOODWIN, M. C., Hon. R. J. WILSON, M. C., and a delegation from the locality appeared in favor of the continuation of the lock-and-dam project.

Col. Abbot continues:
